page writeup on the flower business on the front page of their Sunday Magazine October 16.

B. F. Engle, Rochester, Pa., is putting in a new office.

W. S. Kidd, New Brighton, is putting in a new boiler.

Some very fine white and pink Killarney are seen at the McCallum Co. Perles, Bon Silene and La Detroit are also seen here.

Quantities of chrysanthemums are being moved at the Pittsburg Cut Flower Co.

A. W. Smith Co. is still cutting quantities of gladioli at their Ohio farm.

The East End Store of H. L. Blind & Bro. has had several large decorations.

T. M. Fitzgerald, Beaver, Pa., was a recent visitor.

SEATTLE, WASH.—A change in the firm of Graff's Flower Shop on First avenue and Madison street has been announced, the successor is E. Fortlouis. The management will be in the hands of A. Fortlouis and the designing and decorating features will be under the direction of R. W. Schenk, who has gained a wide reputation in eastern cities.

Boston.

While the thermometer has been reported as low as 26° on one night, yet the weather continues very warm and roses, carnations and chrysanthemums are very abundant. The best quality of roses are in unfailing demand. The finest chrysanthemum on the market is Virginia Poehlmann, a creamy white tinted pink, other whites are Polly Rose, G. S. Kalb and Ivory, Rosiere, Glory of the Pacific and Pacific Supreme are the pink and Golden Glow, Monrovia and Robert Halliday the yellow varieties. Carnations are abundant and of good quality. Violets, snapdragons and cosmos are to be seen and Lilium Giganteum of the finest quality. Altogether the report is "good market."

NOTES.

They are very busy at H. M. Robinson & Co.'s, large shipments of immortelles and magnolia leaves being received, and one order of half a car of southern smilax to one retailer being events of the week.

At the Gardeners' and Florists' Club October 18 meeting, Edward McMullen will speak on "The Retail Florist," what is expected of him, and what he has been doing the last 30 years.

The local members of the Board of Control of the National Flower Show met October 11, and report that the available space is being taken and wide interest shown in the schedule.

The annual meeting of the stockholders of the Boston Flower Exchange will be held at Young's Hotel October 22. Dinner at 7 p. m.

Welch Bros. are very busy in all lines of stock and are having unusual large sales of Cattleyas.

The Co-operative Flower Market held their annual meeting October 17.

W. T. H.

Morristown, N. J.

The Morris County Gardeners' and Florists' Society, through its flower show committee, has pretty well gotten through with the details of the big show. Of course, there is lots to do yet, but the planning part is pretty nearly over. The society owes much to this committee, as it also does to the flower show committee of the Morris County Golf Club, for they have worked hand-in-hand, early and late, and if anything miscarries it will not be their fault. The show was originally intended to be held in the Whippany River Club, but that building was burned down last July. Through the influence of our society friends we se-

BUSINESS STAGNANT.

Market conditions for the past week have not been anything to brag about. There seems to be a general stagnation of business, and while there is not an over abundance of stock arriving, the demand is at times under the supply. However, toward the end of the week a slight improvement has been noticed. Various opinions have been advanced by many of the older dealers as to the cause of the present business depression, some claiming the quiet conditions in Wall street, others the amount of capital spent in the purchase and maintenance of automobiles, but the consensus of opinion seems to blame the very unseasonable weather, which has a tendency to keep everyone who can possibly manage out of the city and with the country radiant in its autumn splendor, people have not yet caught the flower buying fever. All stocks are arriving in good condition, but owing to the lack of demand, are bringing lower prices than usual at this season of the year.

NOTES.

Young and Nugent, West Twenty-eighth street, have a fine display of cattleyas and chrysanthemums in their window artistically arranged with ribbons to match and a background of Scottii ferns and crotons. Manager Wm. A. Hanft, of this firm, has just recently celebrated his ninth wedding anniversary.

At the next meeting of the New York Florists' Club in November, John D. Withers will lecture on his trip around the world. Mr. Withers has a very fine collection of views which he will show and the lecture promises to be a very interesting one, and the ladies are extended a very cordial invitation to attend.

The sixteenth annual exhibition of the Dutchess County Horticultural Society will be held in the state armory at Poughkeepsie, N. Y., on October 27-28. For prize list and entry blanks, address the secretary, Herbert G. Cottam, Wappingers Falls, N. Y. No entry fee will be charged.

M. C. Ford is receiving from Myers & Samtman, Chestnut Hill, Pa., some fine American Beauty and My Maryland roses, also their new pink rose, Hilda.

Wm. L. Ford is receiving some fine chrysanthemums.

The Kervan Co. will probably open their new store on Twenty-eighth street about the end of this month, where with the additional facilities they will be better able to handle their ever increasing business.

New Jersey Florists' Club Bowling Association scores:

Fenrich ... 145	135	146	C. W. Scott	121	139	102
McArdle ... 116	103	131	Berry	152	132	143
P. J. Smith	98	141	141	Tieser	119	85
Marshall	86	124	97	Nugent	91	73
Manda	122	158	155			

The New York Horticultural Importing Association will have a dinner at Kabil's restaurant to discuss several topics of interest to the members.

H. Van Rippen, formerly with the Growers' Cut Flower Co., has engaged with P. J. Smith. He starts in his new position on October 17.

Frank M'lang has leased the stand recently vacated by Chas. Smith Sons on the third floor of the Cut Flower Exchange.

Traendly & Schenck are receiving some fine cattleya plants, each plant averaging at least 10 blooms.

Chas. Schmelter, of Secaucus, N. J., is Chas. Roth's successor at the Cut Flower Exchange.

The Pennock & Meehan Co. are receiving some fine Killarney roses.

P. J. Smith won the prize of a gold pin offered by A. Moltz.

Yonkers, N. Y.

The meeting of the Horticultural Society was held in Wiggins Hall October 7, and owing to the absence of the president and vice-president, Secretary Scott called the meeting to order and appointed H. Nichols chairman pro tem. The committee on the June show made their final report and were discharged with thanks, and Mr. Millot received a very hearty vote of thanks for the capable manner in which he performed the duties of manager of that show. One new member was elected and several applications received. Mr. Sheppard exhibited two very fine apples of the Bismark variety, grown on dwarf trees planted out in the spring of 1909. The question box was instituted for the first time and a question was asked as to the best way to tell the different varieties of tea roses and Mr. Waite volunteered to have an answer ready at our next meeting. The question of how to get clear of San Jose scale and whether there was any law pertaining

Receivers and Growers of Cut Flowers.
Consignments Solicited.

to the cleaning up of old orchards in vacant lots was introduced, and after discussion it was decided to write the authorities at Albany, and Mr. Millot volunteered to attend to that matter. Mr. Hendry read a very interesting essay on "Chrysanthemums as Grown in England." A general discussion followed the reading of the essay, which was participated in by Messrs. Waite, Mooney, Scott and others, and a hearty vote of thanks given to Mr. Hendry. The committee on the fall show reported progress, having received a large number of donations for which they were very thankful. The next meeting will be held on November 4. We were all very glad to see Mr. Waite, who is looking very much better after his vacation.

Glen Cove, N. Y.

The Nassau County Horticultural Society held its regular meeting at Pembroke Hall, October 12. One new member was elected and one application received. The schedule for the fall show is out, and judging by the prizes offered this year, it will surely eclipse all others previously held by the society, especially under the management of James Halloway, assisted by Geo. Ashworth. Awards were as follows: Society's prize for best vase of peony flowered dahlias, T. J. Trepass, 1st; H. Gaut, 2d. Cultural certificate to Geo. Dorber, Center Island, for a grand vase of roses My Maryland and Chatenay; to Fr. Petroccia for cauliflower and onions; honorable mention to J. McDonald and Fr. Petroccia for vases of cosmos, and H. Gaut for sweet potatoes and cosmos; to I. Robertson for vase of roses Ivory, also for three beautiful celosias. A silver cup was donated by Budd's Seed Store, New York, for best collection of bulbs. Next meeting is to be "chrysanthemum night," and prizes will be awarded to best three white, three pink and three yellow.

STOUT CITY, S. D.—The Jones Seed Co. has purchased what is known as the Kiehl 40-acre tract, which will be converted into an experimental farm on which will be raised a good share of the seed which this company will sell.

PEDRICKTOWN, N. J.—Geo. R. Pedrick & Son are building a new seed warehouse, 30x60 feet, three stories, with basement, containing over 7,000 square feet of floor space, with which to handle their increasing business.

BOSTON, MASS.—A. F. Barney and J. M. Gleason, so many years with the Schlegel & Fottler Co., have associated themselves with the Thomas J. Grey Co., 32 South Market street, where they invite the patronage of their old friends.—T. J. Grey has on exhibition a remarkable relic, a plow more than 100 years old, in good condition that came down from the Richardsons.—Fottler, Fiske & Rawson Co. will keep the old Schlegel & Fottler store open for the present.—William Atkinson and daughter, of Handsworth, Yorkshire, Eng., were visitors this week. W. T. H.

Benary's Novelties for 1911.

Ernest Benary of Erfurt, Germany, is presenting a very fine list of novelties this year, among which may be noticed the following new plants which should be of interest:

Double white snapdragon (*antirrhinum majus grandiflorum album fl. pl.*) a new departure in this species, out of the mouth-like aperture of the flowers emerge abnormal fantastic petals

which give a double or beard-like aspect to the bloom.

Hercules aster Brilliant Rose, an entirely new color in this magnificent class of chrysanthemum asters.

Aguilegia coerulea candidissima, a new columbine which differs from the existing varieties with colored spurs to the uniform pure whiteness of the entire bloom.

Improved camellia flowered balsam primrose, the flowers are extra double, compact, of rosette-like shape, measuring over two inches across.

Begonia double tuberous-rooted, Lafayette-hybrids, the foliage is of a metallic dark brown streaked with broad veins of olive green and very ornamental.

F. Bruggerhof

Cineraria hybrida gigantea, red shades with white and blue shades with white. These flowers are 2½ to 4 inches across and respectively of deep red and rich blue shades with white center.

Primula obconica gigantea fimbriata rosea, a fringed Primula orbconica gigantea.

Impatiens Holstii nana Leignitia, a very dwarf sport of I. Holstii seldom exceeding ten inches in height and enormously productive of bloom.

Calceolaria Sunbeam, a large yellow bloom with a brilliant brown red blotch.

Poppy, King Edward, a large single annual, color deep scarlet with a large black blotch on each petal.

Petunia, double white lilliput, a charming addition to lilliput petunias.

Giant zinnias in separate colors, producing blooms five to six inches across.

Lobelia hybrida amanda, a beautiful trailing lobelia for baskets and boxes which is rosy lilac when it opens and turns to deep amaranth red.

President Bruggerhof.

The directors of the Wholesale Seedsmen's League did a graceful act at their meeting October 13 in presenting to Frederick W. Bruggerhof, on the occasion of his eightieth birthday, a testimonial in the form of an exquisitely moulded and chased loving cup bearing the following inscription:

Presented

to

Frederick W. Bruggerhof

upon his

80th birthday, October 15th, 1910,

by the

Directors

of the

Wholesale Seedsmen's League, as a token of the esteem and love in which they hold the Dean of the American Seed Trade.

Some of the features of the very interesting event was an immense birthday cake four feet in diameter and of eighty candle power, and the felicitous speeches expressive of the highest admiration towards Mr. Bruggerhof as a seed merchant and as a friend. The board was represented by its full membership of nine. The seedsmen guests were: E. E. Bruggerhof, of the J. M. Thorburn Co.; Alexander Forbes, of the Peter Henderson Co.; Howard M. Earl, of the W. Atlee Burpee & Co.; Burnet Landreth, Jr., of the D. Landreth Seed Co., and S. P. Landreth, of the D. Landreth Seed Co.

Mr. Bruggerhof has been identified with the American seed trade for fifty-five years, having entered the seed establishment of Thorburn in 1855. He is acknowledged to be the best all-around seedman in the United States, the highest authority on the history of the seed trade in America, his views as to variations and merit commanding the highest consideration. The wholesale seed trade, as represented by the league, is fortunate in being presided over by a man of such ability and loving disposition.

Mention the American Florist when writing

If you want to make some money, buy a box or more of Superior Assortment **Horseshoe Brand Giganteum** Bulbs, 7-9 inches, at \$22.50 per box of 300 bulbs, and give them as good attention as you would a good horse. The price is the same, no matter how many you buy, but the more you buy the more money you can make if you can market them.

You will do us a favor if you will compare them with other 7-9 you buy, because our greatest difficulty is to get growers to compare the goods. Don't mix them all up in planting---keep them separate and count the blooms and percentage of loss. You will profit by the comparison, and we hope to profit by securing your business.

Deliveries of all varieties and sizes now being made.

ers' Association at Grand Rapids, Mich., is illustrated on page 625 of this issue.

Tomatoes for British Market.

Consul Albert Halstead of Birmingham, England, writes: An interesting experiment in shipping Canadian tomatoes to the British market is announced in a Birmingham daily. Sample boxes of tomatoes packed in peat and sawdust were sent from Toronto to the English market to ascertain whether they can be shipped without injury.

It is stated that on Prince Edward Island farmers receive 25 to 30 cents per bushel of 60 pounds for tomatoes, whereas in London the price is 5 to 10 cents per pound. It is thought that Canadian tomatoes can be placed in British markets in good condition, because nearly \$1,000,000 worth of tomatoes were shipped from the Canary Islands to England last year and the time occupied in transit was the same as from Canada to England.

The possibility of shipping tomatoes successfully from the United States to the British market has occurred to me several times, chiefly because of the high price at which tomatoes sell in England; but the fact that they are so fragile and decay so easily causes the fear that such shipment would be unsuccessful and at least would lead to such heavy losses as to make it not sufficiently profitable. However, as the experiment is being made by the enterprising Canadians, it would seem to be well worth consideration by American shippers.

Tomatoes are very popular in England, and practically all sold here are hothouse grown. In the south of England, however, some tomatoes are grown outside successfully, which require the most careful attention; and unseasonable weather is most injurious to their production. Tomatoes are now (mid-September) selling at retail at greengrocers and fruiterers throughout Birmingham at 8 to 12 cents per pound, while in the earlier part of the season when greenhouses must be heated for their proper growth they are sometimes retailed at 20 cents.

The most popular tomato in England is the small, round kind, preferably not more than 2 to 3 inches in diameter. Housekeepers will purchase them for cooking purposes at 12 cents and perhaps more per pound rather than use the tinned variety which have equally as good a flavor. Of course, the tomatoes are used largely for salads and sliced for garnishing dishes.

A grocer, who sells high grade fruits and tomatoes, informs me that he is now paying about 6 cents per pound for tomatoes which average him at retail 10 cents, the poorer ones selling at about 8 cents and the better quality at 12 cents per pound. He said that care should be taken that the toma-

atoes, if shipped from the United States, should not be too large for they would command a much less price if larger than 2½ to 3 inches in diameter.

The dealer also expressed the opinion that it is as well for the American grower to know before entering this market that the English hothouse tomato would probably have a better flavor than the American outdoor tomato, which would necessarily cause the latter to bring a little lower price. This opinion is apparently the natural English view that English hothouse fruit and vegetables have better flavor than those imported which were grown outside. My own experience has not been that the British tomato was of better flavor than the American. If tomatoes from the United States can be delivered in Birmingham and elsewhere in England in good condition at from 5 to 5½ cents per pound, all charges paid, the market would appear worth cultivating. It must not be forgotten, however, that if the tomatoes are bruised through careless packing and if they are not of the selected sizes the possibilities of the market will be lost. Some tomatoes from Guernsey Island are packed in moss and others in what appears to be a cork-like substance. It would seem that if tomatoes were packed in sawdust or excelsior with soft moss or other soft material under each tomato and well boxed they should come in good condition. There may be difficulties in connection with such shipments that can not appear to one who is not an expert, but the Canadian experiment is worth duplication.

While on this subject the attention of American farmers, fruit growers, and shippers of farm produce should be called to the fact that the Canadians are studying the British market with the greatest care and showing much enterprise and skill in catering for it. This makes it all the more important that Americans should be alive to opportunities. As an example of the interest taken in the fruit market a Canadian expert on fruit is soon to give a lecture in Birmingham on

Canada as a fruit-growing country. Canadian apples are exhibited at fairs, and every effort is made to bring Canadian fruit to the attention of the British public. This means the development of a preference for Canadian fruit which will require the American grower to be even more considerate of the requirements and prejudices of this market.

Jackson & Perkins Company, Wholesale Only. Florists and Nurserymen, **Newark,** Wayne County, **New York**

Tacoma, Wash.

The end of good out-door flowers is in sight now that rain and cooler weather are busy helping the florist. Sweet peas come in rather slowly and badly damaged and will soon be over for this season. Out-door roses were very plentiful and of very good quality and have been used extensively. Very fine dahlias and a few yellow chrysanthemums are coming in to the stores. The crop of chrysanthemums is going to be late, practically nothing yet showing color except a few yellows. Asters seem to be the present standby but the unfavorable weather will soon put them out. This year will see a scarcity of greens in the way of asparagus and smilax, but the out-door ferns and huckleberry are plentiful and good, and we can procure them any time in the year with very little trouble and at present the autumn colored maple can be had in abundance. Business among florists is very good and with the end of out-door stock in sight the improvement will soon be very marked.

NOTES.

H. H. Hinze has a warm handgrasp every time we see him, one of the eastern sort, and we lately enjoyed a visit to his establishment. Everything looks first class, stock clean and growing nicely. A new No. 6 Kroeschell boiler is ready for business and no doubt will prove all that is desired. The way it is installed and green-houses piped we would be very much surprised at any other than a good report.

The Northwestern Floral Co. is the first to receive bulbs. They import direct and have received a good lot of all kinds. Some of the hyacinths and narcissus were too warm and damp, sprouting a fair crop of roots, but they will be planted at once and probably a fair percentage saved.

If You Want the Best Quality, Our Prices Are Low

James Vick's Sons,

Rochester, N. Y.

We hear talk of two more first class stores being opened this season. As they both have ample backing and will probably be in charge of competent men we figure some lively times about due in Tacoma among the florists.

Two flower stalls are all that remain in our public market. There were five, but we believe in the old adage "survival of the fittest."
S. L. H.

MINNEAPOLIS, MINN.—The Minnesota State Florists' Association will hold a flower show November 16-20 in the National Guard Armory. A most delightful plan has been announced of designating each day by the name of some flower, the opening day being dedicated to the chrysanthemum and the rose, carnation and other flowers will each be allotted a day.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;

Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

Defrauding Nurserymen.

The arrest of a nursery agent in Hoboken, N. J., by the federal authorities brought to light a well-developed scheme for defrauding nurserymen. He procured a position as canvasser for a nursery concern in the west, furnishing good references from a supposed Chicago firm that had no existence, and was to receive a commission, two-thirds of which was to be paid on receipt of order. Numerous orders were forwarded with requests for immediate payments of commissions, but upon shipping the goods as directed they would be returned by the postmasters marked, "not known." He was supposed to be working in the district from which the orders were received, but had remained at Hoboken and had taken the precaution to have his mail redirected.

LOS ANGELES, CAL.—M. Hagiwara, one of the most noted Japanese gardeners in the world and who laid out the famous Japanese gardens at Golden Gate Park in San Francisco, has offered his services to the Los Angeles park commission. The commission recently announced its intention to build a Japanese garden in one of the city parks, which shall rival the famous gardens of San Francisco. Hagiwara appeared before the park commission today to offer his assistance. At his own suggestion, he will visit the different parks in search of a spot suited to the purpose and will then prepare plans and make a definite proposal to the board. Should the board find that the kind of a garden it wants will cost more than it can afford this year, a part of it will be constructed now and it will be completed next year. T. Kato, another Japanese gardener, has also offered his services and he too will make an inspection of the parks and will present a proposal. If possible, the board will construct the gardens at Sycamore Grove park, because of its accessibility to the public and its topographical features. Another point in its favor is that it will be easy of access from Pasadena, should that municipality consolidate with Los Angeles.

HENRY EICHHOLZ, Waynesboro, Pa

Dreer's Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of summer-flowering plants, and we are prepared to furnish many of the latter as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox

We would particularly call attention to the following *Three New Varieties* as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice:

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flowers; of dwarf habit,

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

PRICE: Any of the above three new varieties,
\$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

HARDY PHLOX.

General Collection of Hardy Phlox

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Algae Adamson (Medium). Immense flowers, snow-white, with red eye.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish lilac; large, white halo.

Bacchante (Tall). Tyrian rose, with crimson-carmine eye.

Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.

Bridesmaid (Tall). White, with large crimson-carmine centre.

Belle Alliance (Medium). White, with large pure red eye.

Charles Sellier (Dwarf). Bright reddish-violet, with large white star-shaped centre.

Clara Benz (Dwarf). Lovely carmine-rose, with darker eye.

Colibri (Tall). White, with crimson-carmine centre; very late.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.

Champs Elyses (Dwarf). A very bright rosy magenta of an effective shade.

Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.

Caran d' Ache (Medium). Geranium-red, with old rose shadings and white eye; very effective.

De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.

Diadem (Dwarf). A fine dwarf pure white.

Danton (Medium). Scarlet, with pure red eye.

Etna (Medium). Crimson red, suffused with fiery red; cherry-red eye.

Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre, with an exceptionally large white centre.

Engene Danzanviller (Tall). Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.

Eclaircur (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.

Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.

Gruppenkonigin (Tall). Delicate, pale rose mauve, with claret-red eye.

George A. Strohlein (Medium). Bright scarlet, with crimson-red eye; does not bleach.

General Giovannelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal; a pure red eye; very effective.

General Van Hentsz (Medium). Scarlet, with rose shadings and crimson-red eye.

Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

PRICE: Any of the above General Collection, \$5.00 per 100; \$40.00 per 1000.

For a complete list of seasonable stock see our current wholesale list. If you have not received a copy it will be mailed to you on application.

HOERBER BROS.

51 Wabash Ave., CHICAGO
 Mention the American Florist when writing

St. Louis.

The weather has been very warm and has had considerable effect on trade. Had it not been for weddings and the Jewish holiday there would have been but little doing. Everything is plentiful, dahlias and chrysanthemums are in and violets are in with increased supply. Carnations and roses, including American Beauty, are plentiful, specially medium and long-stemmed.

NOTES

The Florists' Club held its regular meeting October 13 at Odd Fellows' Hall, President John Cannon in the chair, with 20 members present. The trustees were instructed to report as to the entertainment to be given to the visiting florists during Flower Show week, the next meeting of the club taking place that week and all visiting florists are invited to attend that meeting. The club indorsed the appointment of F. H. Weber as state vice-president of the S. A. F. for the eastern part of Missouri. The following gentlemen applied for membership: Hugo Gross, G. M. Thost, M. F. Widmer, of Highland, Ill., and Alex Geranios, manager of the Metropolitan Floral Co.

Dr. Wm. Trelease, of Shaw's Garden, will give an address Monday evening at the Academy of Science. He will exhibit by lantern slides the smallest of the century plants. Prof. Van Ornum will speak on the effect of vegetable mold on the strength of concrete and molds.

J. J. Beneke has started to make extensive alterations and improvements of his store. The entire store will be papered and painted, with a new double show window.

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great *Araucaria* Importer, Grower and Shipper? These so well favored, everlasting green decorative plants, the *Araucaria Excelsa*, *Robusta Compacta* and *Excelsa Glauca*, are in favor more than ever this year.

This is our 25th anniversary since we began importing *Araucarias*. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is 10,000, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in *Araucarias* and *Azaleas*. The trade is well informed that for many years past I go personally to Belgium to protect and elect for my customers the best of *Araucarias*, *Azaleas*, *Palms*, etc., that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money. Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4 5-6 tiers, 2-3-4-5 years old, 35c, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each.
Robusta Compacta, *Excelsa Glauca*, 6 in. pots, \$1.00 to \$1.25 each.
Kentia Forsteriana, in fine shape 6-in. pots 30 35 40-45 in. high, 4-5-6 years old, 75c, \$1.00 \$1.25, \$1.50, \$2.00 to \$2.50 each; 4-in., 35c each 25 in. high.

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using—

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

THIS Parallel Group

is a good one. The plan is right—it's built right and built right by the right people. We

are those people. Write us for information or our circular.

Hitching and Company
1170 Broadway, NEW YORK.

Los Angeles, Calif.

During the past two weeks considerable funeral work has been in evidence and now the bankers' convention is making a stir and retailers are looking around for stock. At the same time it cannot be denied that summer conditions still prevail. Many of the patrons of the florists will, however, be returning home shortly and the outlook is good. Outdoor carnations are still plentiful, our Japanese friends keeping us well supplied, though white is not as plentiful as colored. Cosmos in variety gaillardias, outdoor chrysanthemums and sweet sultan are among the principal offerings. Indoor roses are not yet up to standard, much of the stock arriving being short in the stem and having to be cut tight. Some of the local growers, however, are in cut with good My Maryland, Killarney, White Killarney, Golden Gate and fair Richmond. Beauties are still poor in color but are improving in stem and substance. Local grown orchids are much superior to those shipped in from the northern part of the state, but the supply does not nearly keep pace with the demand. Some elegant *Cattleya Labiata* is in, also *C. Trianae* from newly imported stock. Golden Glow, Monrovia, Hetherington and Touset chrysanthemums are among the showiest offerings now and the indoor grown stock finds a ready market. Green goods are plentiful, especially asparagus plumosus, and there is a fair supply of adiantum.

NOTES.

The Roserie is a very attractive store and C. J. Mueller says that business is already on the upgrade. This store was fortunate in securing the decorations for the bankers' ball at the Shrine Auditorium, October 4. The decorations were very elaborate, consisting of asparagus plumosus sprays and festoons and 40 immense hanging-baskets suspended from the iron girders. The pillars were hidden by banks of palms and other plants, while the approach to the stage was treated as a Spanish pergola, wreathed with fresh grape vines in fruit, the whole forming one of the most artistic arrangements ever put up in this city. Mr. Mueller also says they have quite as much funeral work as they can handle.

Something like a famine in flowers of all kinds occurred during the early part of the last week in September, occasioned by the fall opening of various stores. Almost every window in town was decorated more or less and many beautiful and novel effects were created, but one jeweler certainly deserves credit for his originality. He gave orders several days in advance

GREENHOUSE CONSTRUCTION

If you have no objection to purlin posts you will find **King Semi-Iron Construction** very superior in design, giving great strength and rigidity of frame and resisting all strains at reasonable cost.

Send for bulletins,

CHICAGO HOUSE WRECKING CO.
35th and Iron Sts., CHICAGO.

Genial and alert as ever, he looks uncommonly well and apparently the climate of California suits him.

Wm. Haerle has been cutting fine cattleya labiata for which the demand is excellent. He has also been in with some very bright and clean Monrovia chrysanthemums and the quality of his My Maryland, Killarney and other roses can not be beaten locally. Mr. Haerle has several sports and novelties in the rose line that look promising. He is installing a manure water tank and pipe system.

R. W. Saakes, "the American Florist," has executed several large orders of late, including one table decoration for 125 of the Pacific Gasmen's Association at the Alexandra hotel. Six hundred American Beauty roses were used here and the electric lighting effects were novel and good.

A fine cut of roses from the new greenhouses is being handled at Wright's Flower Shop, Manager Wern reporting business fine for this time of year. Several large orders in connection with the bankers' convention and preparations for others has kept the staff busy.

O. C. Saakes has been showing some elegant cut flower and plant stock, his chrysanthemums being especially fine. He reports business picking up in good shape and is getting a good share of funeral work.

Some of the best outdoor grown Golden Glow chrysanthemums we have seen have been handled by J. W. Wolters at the Angelus Flower Shop among other good stock.

Wolfskill's have a very attractive rockery arrangement in their window on Fourth street that attracts quite a little attention. Business is improving here.

H. R. R.

Louisville.

On the opening night of the horse show President A. J. Carroll tendered a dinner to the members and visiting exhibitors, including Messrs. A. G. Vanderbilt and Sorg of New York, at the Pendennis Club. The decorations, which were very effective, were of Richmond roses arranged in the shape of a horse shoe. The following evening Mrs. Carroll entertained the members and their escorts, and the decorations were beautiful and elaborate, consisting of My Maryland roses, violets and cattleyas, every lady being presented with a corsage of orchids. The decoration for both occasions were furnished by M. D. Reimers.

Pay for themselves in a single season

Sunlight Double Glass Sash will more than pay for themselves in the better, earlier crops that will bring the big prices on the early market—and in time and labor saved in caring for the beds.

You never have to cover Sunlight Sash

You can throw away expensive, cumbersome boards and mats. You can save all the time you now take to cover and uncover the beds—because Sunlight Double Glass Sash have—

Two layers of glass instead of one

Between the two layers of glass is a $\frac{1}{2}$ inch layer of dry still air. This transparent blanket is a perfect non-conductor, keeping in the heat—keeping out the cold—permitting the plants to get all the light

Sunlight Double Glass Sash Co., 934 E. Broadway, Louisville, Ky.

Mention the American Florist when writing

all the time. The result is that plants under Sunlight Sash will be ready for the market weeks ahead of those grown under single glass sash because the plants get the light from sun-up to sun-down—which means faster and stockier growth.

Glass is held in place without putty. Cannot work loose—easily replaced.

One user of Sunlight Sash writes: "The coldest day was 2 above zero and no plants were reached by the cold. Not only did the seeds germinate quicker under the double glass, but the plants do much better than under the single glass sash. And the labor saved in extra covering will soon pay for the sash."

R. M. Kingsley, Greenville, Tenn.

Agents wanted: A splendid opportunity for responsible persons in territory where we are not now represented. Write for details.

Get these two books

One is our free catalog giving all the details and our freight prepaid and guaranteed delivery proposition. The other is a book on hot-beds and coldframes by Prof. Massey, an authority on the subject. This book is of vital interest to every professional grower and florist. In stamps will bring Prof. Massey's book in addition to the catalog.

Write today

Plan 68

It was erected for Mr. E. Y. Weber at Stamford, Conn., J. Thompson Gardener. The house is 141 feet long and 30 feet wide, has five benches and is divided into three compartments.

The construction is our Sectional Iron Frame with Angle Eave Plate and boarded sides. It is fully described and illustrated in the Advance Pages from our New Catalog. And speaking of greenhouses, you will find these pages of especial interest—they line up the question in a way that has never been done before. Send for the pages.

THE CAMP CONDUIT CO.
Garfield Bldg., Cleveland, O.

Atlanta, Ga.

The fall weather is now here and the drought is broken and business is beginning to pick up. Outside flowers are about through and at the greenhouses everything is in good shape and ready for the winter. Cut flowers are of good quality, roses and carnations are fine and chrysanthemums are now on the market. The past week was a very good one for all the florists, funerals the first part and the Roosevelt receptions the latter part of the week, kept all hands busy.

NOTES.

The West View Floral Co. has about completed the remodeling of their store. They had the decorations at the Auditorium during the visit of Colonel Roosevelt and at the mayor's country home at Woodhaven where he was the guest of Mayor and Mrs. Maddox. The house was beautifully decorated with asparagus plumosus, white and yellow chrysanthemums and American Beauty roses. The centerpiece for the table was a star arranged with American Beauties at the points and lily of the valley and orchids in the center.

E. R. Gresham and his bride have returned from their honeymoon.

In writing on the care of 'mums' in his "Week's Work," Mr. Fritz Bahr says: "While on this subject I might mention our experience with the new insecticide 'Aphine.' We used this preparation on a hundred-foot Chrysanthemum house from the time the stock was planted out in May up to the present. A spraying was given once every week, and while two successive applications were required to get rid of a dose of aphids the plants had when planted out, the stock after that was kept entirely free from it by applying a weekly spraying of a strength according to directions. I don't know what Aphine is made of, and it really matters little; the important part besides its effectiveness to the grower, is its cheapness, for to keep this house free from these insects didn't cost quite \$1.50 all summer."

Thus the effectiveness and cheapness of Aphine is once more demonstrated by an expert authority.

Providence.

The autumn season is here and the foliage is remarkably handsome, quantities of which are used at weddings very effectively. Funeral work and wedding decorations continue good, while trade has fallen off owing to the very warm weather. Stock is very plentiful and prices low. Carnations are more abundant and of a better quality. Dahlias of good quality and in great abundance continue to come in and sell fairly well. Cosmos is good but sells slowly. Killarney, My Maryland, Richmond and Kaiserin roses are coming in of good quality and sufficient to supply all demands, and the same of orchids, lily of the valley and gardenias. Chrysanthemums in different varieties are in evidence, October Frost, Golden Glow and Monrovia being the varieties to be had at present. Violets are very plentiful, that is the single varieties, and prices only moderate. The demand for greens is not brisk owing to the use of so much autumn foliage.

PERFECT PLANT FOODS.

THOMSON'S Vine, Plant and Vegetable MANURE

Unrivalled for vines, tomatoes, cucumbers, all flowering foliage and fruit bearing plants; vegetables, lawns, etc. Has stood the test of 30 years. The result of many years of practical experience.

WATER GARDENS.

Aquatics and Their Winter Protection.

At the close of a most beautiful season for all decorative flowering plants one can but admit that aquatics have attained a position where they stand with the best of all. During the hot weather they can be relied upon to produce a magnificent display of gorgeous coloring, and not only coloring, but magnificent individual flowers, bold and massive, unique and rich and delicate in coloring. These flowers having been so satisfactory only enhances their popularity, the cultural methods are so simple. The amount of labor bestowed on them is less than is necessary on any other equal space, while no comparison can be made as to the results. These plants are in greater demand every season and of some varieties the supply is not equal to the call.

Cultural notes have been written in these pages times and again, yet it requires something of an object lesson to demonstrate their practical features. It is gratifying to note an increasing demand for cut blooms of nymphaeas, and that florists have been in daily receipt of first-rate specimen flowers. During the season hundreds and even thousands of these flowers have been used for decorations on special occasions. They have also been much in evidence at various exhibitions during the summer, and our public and private gardens manifest a greater interest in this class of plants—neither is the demand limited to our own land for all Europe is intensely interested in aquatic plants.

The general advancement in the line of culture is very noticeable. Many who made a trial with a few tubs have arrived at a stage when, by experience, they find that a tub twenty-two inches to twenty-four inches in diameter is by far too limited a space in which to grow a good water lily. They are not content with small or moderate flowers or such plants after seeing the large specimens in public and other gardens where nymphaea leaves are to be seen twenty to twenty-two inches across and flowers ten to fifteen inches in diameter. More commonsense methods

are now adopted in the culture of aquatics. A few years ago running water was considered necessary, or there would be stagnation, malaria, mosquitoes and other pests, but this fallacy has long since been dispelled. Plant life in the water oxygenates and purifies the water as do plants and trees the air we breathe, and fish destroy insects, so running water is no longer advocated by practical cultivators.

Now that the season is over, although drawn out unusually late, and numerous flowers are yet to be seen, it is full time that all plants required for stock should be housed, or everything in readiness for security against a sudden fall in temperature. After the first freezing, or even after a period of low temperature, it will be wise policy to remove them to safer quarters.

Where hardy varieties are in water of sufficient depth to be below freezing they will need no further protection, but where choice hardy varieties are grown in an artificial pond and it is necessary to draw off the water to preserve the masonry, the best way, or a very good way, at least, is to dig up the plants and pack them pretty closely together in a box and place this in a pond in water of a sufficient depth to be secure against freezing. If no such pond exists the roots may be packed closely together in a tub and covered with water and kept in a cold house, or even sunken in the ground and covered with boards, covering these in turn with leaves and litter.

The tender varieties that have flowered freely all summer are difficult to keep over unless they can be placed in a tank or shallow pond in the aquatic or other house, where they can be kept in a quiet state, not growing, yet not cold, so as to lose all leaves, such conditions to continue until the days lengthen. Where no tanks are available, and the resources of a greenhouse are at command, then, after the plants are nipped by frost, trim off most of the leaves and roots and remove the stool with a fair amount of soil around it and plant it under the bench near the walk; give a good soaking of water to settle the soil and keep the leaves in as fresh a condition as possible for a time. It will be unnecessary to give

another watering. Let the plants, with the tubers attached, if any, dry up. The central crown will surely die, but the side shoots will ripen good tubers. An examination may be made after a few weeks, and where the roots and leaves or leaf stalks have decayed the soil may be pressed in and around firmly, but the main thing will be to keep them dry and yet not so dry that they will shrivel. In this condition they may remain until spring. These remarks apply to all the night-blooming varieties that form compound tubers, but not the Zanzibar and other African or blue water lilies, unless they are small plants in from 4-inch to 6-inch pots. Plants in these sized pots can be readily placed in a tub of water under the bench.

Nelumbiums in tubs must be protected against freezing. Either sink them in the ground and protect, as before recommended for nymphæas, or keep in a cool house where they will not freeze. Where growing in an artificial pond it will be prudent to protect the masonry where frost is likely to be severe, remembering that the nelumbiums are safe only as they are below the frost line. Muskrats must be hunted down and destroyed if you value your water lilies.

WM. TRICKER.

PLANT NOTES.

Mignonette.

The mignonette that is grown for cut flowers should now be starting its long stems for winter blooming. Care should be taken to keep these shoots straight, and adopt some method of tying or staking that will keep them erect until the blooms mature, for if they get crooked they are worthless. Many growers place short brush, generally the tops of birch or other branching trees, in and between the rows, or wires may be strung the length of the bench and string fastened across to hold the stems upright, and another set of wires and strings added later, when the plants attain sufficient height to require it. Watch for the cabbage worm, which will very quickly eat all the foliage; it is generally found lying along the mid-rib of the leaf, but is a little difficult to find at first, for it is just the color of the leaf. Hand picking is the only remedy.

Violets.

The violet beds will now need constant attention, and the plants that were planted in September should have got a good strong hold in the soil and be making good growth. Keep the plants well cleaned, pulling off all the decayed leaves, and watch for any spot, which, should it be found, remove the leaf at once and burn, so as to destroy the fungus. In removing the leaves, do it very carefully. Many inexperienced men will, in order to hasten their work, take two or three leaves at once, and pull them off with a jerk. This is very apt to break the young roots off and check the plant. Pinch each leaf off carefully with the thumb and finger. Be careful with the watering from now on, for as the plants begin to cover the soil it is very easy to over-water them, and keep the top of

soil well scratched over. Plenty of ventilation all the time. Violets revel in a good, clear atmosphere, and delay giving artificial heat as long as possible, even if the night temperature falls as low as 36°.

Feverfew.

This common bedding plant, generally classed with the pyrethrums, but really a member of the chrysanthemum family, is very useful at Decoration Day, especially where a quantity of cheap bouquets or bunches is demanded. As soon as there is room in the propagating bed, put in a good batch of cuttings, and when rooted, pot off in two-inch pots and place them in a cool house, where they will move very slowly. Later in the winter there are sure to be some sections of the benches that are not producing well, perhaps some new variety of carnation that is not paying for its keep, and then the feverfew may be planted, and it will give a splendid cutting for the Decoration Day trade. It may seem a little early yet to make these cuttings, but in another month the propagation bed

A McCray Refrigerator.

will be full of more important stock and if the plants are rooted now and grown cool they will give much better satisfaction than cuttings taken after the holidays and forced to get them into bloom for the last of May.

Peonies.

It is not yet too late to move or divide peonies, but it should be done as soon as possible. In lifting them be careful to first dig all around the plant and loosen up the soil and get the fork or spade under the long tap roots, for these roots are very fleshy and brittle and break easily. The old plants should now be well cultivated and the old tops removed as soon as killed by the frost and a good mulch of rotted manure spread over them. When the tops are removed don't leave them lying on the ground, but remove them away from the garden entirely, as well as all other rubbish; they only make an excellent place for the cut worm moths to lay their eggs, and where this litter is allowed to remain on the ground all winter a good crop of cut worms is an assured thing the following spring.

LAS VEGAS, N. M.—Perry Onion has installed a large refrigerator in his flower store on Centre street.

THE RETAIL TRADE

J. J. Habermehl's Sons, Philadelphia.

The above-named firm has been in the retail business for many years, and they are noted for their ability to execute a first class decoration on short notice. They have two stores in Philadelphia—one in the Bellevue-Stratford Hotel, the other at Twenty-second and Diamond streets. At the latter store they have a large glass area where they grow very choice stock.

Their latest achievement in the line of decorative work occurred last week, when they decorated the splendid new store of Gimbel Brothers in New York City for its opening. Over 1,000 palms and 100 cases of Southern smilax, as well as thousands of cut flowers, were used in the decorations. To give an idea of the magnitude of this work, it may be stated that the decorations extended over eight floors of the store and that the Sixth avenue elevated station entering the store was also decorated. In the tea room 125 vases of cut flowers were used, and many more in the cloak room and other departments. It was the original intention of Gimbel Bros. to continue the decorations for a week, but it was so popular that they ordered the Habermehls to continue it for another week. It may be said that the rapid construction of the Gimbel Bros.' store has been one of the wonders of New York. Their opening and decorations have brought more prominently to the public view the versatility and ability of J. J. Habermehl's Sons as decorators.

A McCray Refrigerator.

The decorative features of a handsome refrigerator are quickly appreciated by the progressive florist in his store, not only in keeping the stock in excellent condition but also being the proper place to display his beautiful product, and besides making a valuable addition to his handsome fittings. The accompanying illustration represents one of the largest and hand-somest florists' refrigerators ever made, being built for the West View Floral Co., of Atlanta, Ga. Owing to the limitations of the space it occupies, it is of a very peculiar shape and has not a square corner in its construction. The dimensions are 24 feet in front and 26 feet in the rear; the ends are 3 feet and 6½ feet respectively, and it is 10 feet high. The outside is of white enamel with drawers in front for mosses, ferns, etc. The floor is of tile and the back is mirrored and it is fitted with wire shelves. It is not only very unique in design but one that will make a beautiful display and is one of the finest pieces of work ever produced by the McCray Refrigerator Co., of Kendallville, Ky.

NEW YORK, N. Y.—A runaway automobile crashed through the window of the Misses Horn & Hess Co., 756 Lexington avenue, October 15, causing a damage of \$500 to flowers, plants, show cases and vases.

BOSTON, MASS.—Caplan, at 144 Massachusetts avenue, has completed the renovations and has a very attractive store, at which can be found a fine line of seasonable flowers and an attractive window display is always to be seen.

AUTOMOBILE DECORATED BY MRS. ELLA GRANT WILSON, CLEVELAND, O.

The Bulb Industry of Holland.

Paper read by H. J. Schoening, before the Montreal Gardeners' and Florists' Club, October 3, 1910.

At this season of the year, when you are all handling Dutch bulbs, it occurred to me that a brief description of their cultivation by the Dutch growers might prove interesting. Before proceeding, I would like to state that it is now about 12 years since I was connected with the industry in Holland, and I have no doubt different methods have been introduced since, but I do not think the general culture has materially altered.

Most people, when they hear about Dutch bulbs, naturally assume that the whole country is devoted to their culture. As a matter of fact, but a very small area is used. It extends about from Leiden to Haarlem, an area of approximately 125 square miles, and is situated just behind the dunes. These dunes, you all know, are the natural protectors from the sea. They are a range of sandy hills along the North Sea, and prevent the sea from overflowing the land.

The ground in which the bulbs are grown is in many parts more like sand than soil. It is so light that the growers, during dry and windy weather, have to spread diluted cow manure over it, which, when dry, forms a thin cake and prevents the soil from blowing away. Owing to its low situation it is also very wet, and at about three feet water is found. Here are two of the main requisites for bulb culture, light soil and abundant moisture. Also there are hardly ever any hailstorms in this district which is very important. The net result is, a site for bulb culture, which is practically beyond

competition. The whole district has become a vast bulb farm, and the land is more valuable than any equal area of such poor soil in the world.

You will, of course, understand that such poor soil requires much enriching, and for this purpose pure cow manure is used. Generally the manure is dug in in the spring and a crop of potatoes grown on the land intended for planting with bulbs in the fall. The land is split in divisions of about 70 feet wide, and hedges are planted between to break the wind. Each of these squares is again divided in three, to make the beds about 20 feet long with a trench 2 feet wide and 18 inches deep between to carry off surplus water. The width of the beds is usually 4 feet, with a path of 18 inches between each bed.

Propagation commences around July. The method generally employed is hollowing out the root crown of the bulbs though many growers practice the cross-cutting system. It is considered a more rapid way, as bigger bulblets are formed by the latter method. The bulbs having been thus treated are laid on shelves in airy sheds, where they form blublets in about six weeks. It takes four or five years to grow a good-sized hyacinth from these bulblets, though many are sold when much younger. In October planting commences. Some start earlier, but that time is about the average. The various sizes are kept together and for narcissi and tulips a somewhat heavier land is selected. The cut and hollowed bulbs are planted just as they are, and the next year will be grown loose from the original bulb and big enough to look after themselves. After planting, the beds are covered with a sort of

grass called helm. This, I believe, is as much done to prevent the wind from blowing the bulbs bare as to protect the tender noses from spring frost. Hyacinths are covered thicker than either tulips or narcissi.

Winter is a quiet time for the bulb growers. When I was there my time was mostly taken up with skating, for which the canals and ditches round there offer excellent opportunities. They are, of course, all still waters and soon freeze hard. This time seemed all too short to me, as the spring sun in March forces some of the earlier varieties through their covering, and it is necessary to loosen it up somewhat and cover the tender tips which come through. Later on, about half is taken off, and the rest loosened up and put over them again to allow light and air between, but not the full sun. After a week or so, some more is taken off and this process is continued until the tips are quite hard and green, when all the helm is removed. The younger bulbs need protection yet, at this stage, and light lath frames are erected over the beds, over which cheesecloth is stretched. This prevents light frosts from doing any damage.

The most beautiful period now arrives, when they are in bloom. You can easily imagine the sight of fields upon fields of bloom, as far as the eye can reach. Standing upon the dunes and gazing over those stretches of dazzling scarlet or yellow tulips, waving fields of daffodils, while the perfume of the hyacinths reaches one's nostrils is a sensation long remembered. The flowers of the hyacinths and tulips are all cut as the grower wants to direct all the energy to the bulb. Some save the best and ship

them to the London market, but that has not given much profit of late years. I know one grower sometimes hardly got enough to pay for the wood of the boxes. Other times were better, of course, and it depended on the state of the market. The foliage while still green is examined for disease. One man walks along the bed with a cone-like instrument, while another goes before him with an umbrella, to shade the plants, as this particular spot is not visible in sunlight. When a diseased plant is found the cone is inserted, which pulls up bulb and soil around it. This is thrown away, as it is considered the soil is infested as well with this dreaded disease.

The beds are now just kept clean until the foliage dies down and the bulbs well ripened. They are then taken up and carted to the sheds, where an army of women and girls are ready to clean and sort them in various sizes. These sheds are like huge barns, in which trays are erected from top to bottom, and have windows on all sides. As soon as the bulbs are cleaned they are all put thinly on these shelves and the windows opened to dry them thoroughly. The sun is never used to dry them. When the hyacinths are thoroughly dry they are examined for disease. This operation consists in just cutting the nose off to see if there is any decay between the layers. If so, they are immediately discarded and burnt. Some diseases are contagious, so to speak, and they would infect other bulbs and also the soil in which they would eventually be planted. Only experienced men do this work, of course, as it is of great importance to keep the stock clean and healthy. The hyacinths which are used for propagating are even more closely watched for the dreaded yellow rot, which is very difficult to discern. All the bulbs of flowering size are kept on the lower shelves, as buyers come around daily. There are many small growers who sell their bulbs to the wholesalers. Also, many of the workmen cultivate a few tulips, which they sell to the larger growers. Their wives and children generally attend to their lots. Packing time is also a busy season. You are all familiar with the way they are packed, so I need not dwell on that subject.

I could not find any statistics as to the quantity of bulbs grown in Holland. In an address which Mr. Krelage made to President Roosevelt, during the latter's visit to the Haarlem Flower Show, he stated that 3,500,000 kilogrammes of bulbs were yearly shipped to America, and this was not a fourth part of the annual production. So, figuring on that estimate, the yearly output would be over 14,550 tons.

I think, gentlemen, this is about all I can tell you about the bulbs growing in Holland. I thank you all for your attention.

COLORADO SPRINGS, COLO.—The Pikes Peak Floral Co. has bought the lease, business and fixtures of the Colorado Springs Floral Co. and will conduct a retail store at 104 North Tejon street. They will continue the retail store at the greenhouses, corner of Platte and Wahsatch avenues. The area of the combined greenhouses of this company is over three acres.

ORCHID NOTES.

Hybrid Cypripediums.

The hybrids of cypripedium with Spicerianum blood in them are among the finest of all and form a beautiful and showy section. In the one figured the median line on the dorsal sepal is well defined, showing the Spicerianum influence. This is also noticeable in the wavy petals, while the Charlesworthi parentage is seen in the white staminode plants characteristic of this fine cypripedium. These hybrids, of which Leeanum and its varieties are well known examples, are easily grown and rapidly make fine specimens. There is a vigor about them that is lacking in many of the species and anyone who wishes to form a collection, either for cutting or for a display in the plants, will do well to include plenty of these choice hybrid forms.

Laelia Elegans.

Laelia elegans is one of the most variable orchids in existence and a fine subject for cutting from. It is known to botanists as *Laelio-cattleya elegans*, being thought to be a natural hybrid between *cattleya* and *laelia*. But the old name of *Laelia elegans* is the one by which it is, and probably always will be, best known to growers and the trade generally. It is a moderately

color the ordinary type of *Laelia elegans* is a pretty bright rose and the shape is well shown in the illustration herewith. The spikes carry from two to seven or even eight flowers and a large plant, with several spikes flowering at once, makes a very fine show. There are many named varieties of *Laelia elegans*, but they are not all particularly distinct and run from one into the other. One excellent kind should, however, be noted, *Laelia elegans Turneri*, a larger flowered, deeper colored variety far superior to the type.

Growing Lily of the Valley.

ED. AMERICAN FLORIST:

When is the proper time and what is the proper way to grow lily of the valley? Should they be grown in pots or benches? Could they be grown in the same bench with *Adiantum Cupeatum*?
SUBSCRIBER.

The growing of lily of the valley and *Adiantum Cupeatum* in the same bench would be out of the question, for the former requires the house or portion of the house where grown specially prepared for it and is grown in a temperature of 85° to 90°. The growing of lily of the valley on a small scale seldom meets with much success. The methods employed by most growers is to plant the pips in specially prepared frames, filled with sand, that can be

LÆLIA ELEGANS.

tall growing plant, flowering freely every year and rather variable in its time of flowering. The plants should be grown in shallow pots just large enough to take them easily and leave a margin of about an inch around them. There is nothing to beat good osmunda fiber firmly placed over good drainage for these orchids and they should be repotted just as they begin to grow away at the base and before the roots have made much progress. In

closed tight and well shaded, or in boxes or pots of sand and placed in such an enclosure with a slate bottom where the bottom heat can be maintained at 85° or 90°. The sand should be copiously watered daily and preferably with water of the degree of temperature of the sand until the blooms begin to open, then care should be taken not to wet the flowers. The frame is shaded very heavily, and when the flowers are nearly matured

the boxes are taken out and stood in a light warm house, avoiding all drafts and allowed to remain two or three days until the foliage acquires natural color and the blooms attain the necessary substance. The plants under this treatment will bloom in three to four weeks from planting. W.

THE CARNATION.

Cultural Notes.

The weather conditions nearly every night now are such as to make firing up and the use of a little steam heat in the carnation houses a necessity. A crack of ventilation on, with a little steam circulating through one of the lines of pipe, with the temperature of the houses held as near 50 degrees during the night are the conditions that ought to be maintained while the weather remains fine and moderate. Bright warm days and cool nights are ideal for a good sturdy growth of the carnation plants but any attempt at coddling or forcing must be avoided. This is the time for the plants to build up tissue for the winter's work. One of the most important things to guard against is a sudden rise in the temperature, particularly early in the day. If steam has been used during the night it should be turned off early if the day is breaking fine. It is the high temperature early in the morning that brings the red spider and thrips. Turn off the steam as the sun strikes the glass and commence to ventilate gradually, but freely, unless a strong cold wind is blowing, when it will be necessary to use caution to prevent a cold current of air striking directly on to the plants.

Watering and syringing are particularly important parts of the work just now. Early planted stock is by this time well established and will take liberal waterings, but greater care must be exercised with plants brought in from the field as late as the month of September. These will not consume nearly as much water as plants benched during July and August, and for the roots to work quickly, it is best to let the soil dry out moderately. Syringing can still be carried on every bright warm day, and the plants are greatly benefited by it. This should be done between ten o'clock and noon, if possible. If you cannot get around to finish the syringing and watering by noon, it is better to let the remainder go over to the next day, because there is very little drying up of the moisture after two o'clock, and it is fatal for the plants to be in a wet condition over night. The work of getting the shoots into the rings or strings must be followed up closely, to give the plant every chance to straighten up its growths, also remove any decayed or diseased foliage.

Disbudding is an item that will continually confront us from now on, but disbudding at this time we have found to work a little different than later in the season. We find it best to allow a trifle more development to the buds before removing them than we can do later on. If the disbudding is carried up very close, the main bud on some of the varieties will come crooked and also start to burst. Also, while long stems are very essential, it is best to

HYBRID CYPRIPEDIUM — CHARLESWORTHII X SPICERIANUM.

go a little slow in this respect for a month or so yet, and not remove too many of the side shoots with the object of gaining a few inches in the length of the stem. It will pay best in the long run to be content with medium stems for a little while and reserve to the plant as many of the lower side growths as possible. Another very important item just now is, if there are any flowers on the plants with stems too short to be serviceable, do not let them remain on long enough to be breeding places for thrips; remove them and keep everything around the plants and underneath the benches clean and fresh to guard against red spider and other pests.

C. W. JOHNSON.

Rex Begonias and Chrysanthemums.

ED. AMERICAN FLORIST:

What is the best method of propagating Begonia Rex and other varieties? What is the best way to keep cut chrysanthemums? How are the stock plants of chrysanthemums to be treated after the blooms are cut?

SUBSCRIBER.

Begonia Rex are propagated from leaf cuttings. Large and fully matured

leaves may have their ribs cut on the under side and pegged down on a well-drained, warm propagating bed, and, if carefully shaded, small leaves will grow where the cuts are made. The small plants can then be potted. Or the leaves may be cut into triangular pieces with a bit of the main petiole at the base, and these inserted in the propagating bed. Another way is to cut the leaf across the veins and stand it edgewise in the propagating bed. Other varieties are rooted with top cuttings, as are all soft wooded plants. Chrysanthemum blooms, if allowed to fully mature on the plants (not cut when too soft and young) and placed in large, deep vases or jars of water, which in turn are placed in a cool room away from all drafts for 10 or 12 hours, so that they may absorb the water, there will be no trouble in the blooms keeping. After the chrysanthemum blooms are cut, if the bench room is wanted for some other crop, the best plants should be selected and lifted and planted out in a bench in a cool house, and the cuttings will grow up from the old stock, or if the bench room is not wanted they can remain in the bench where grown, until the cuttings are taken. W.

DINNER OF THE BOSTON FLOWER EXCHANGE, AT YOUNG'S HOTEL, OCTOBER 22, 1910.

WITH THE GROWERS

The Robert Craig Co., Philadelphia, Pa.

There is an old joke concerning the futility of carrying coals to Newcastle. Newcastle, be it known, is one of the leading coal producing centers of England. Along these lines it may be said that to write of the Robert Craig Company, as growers of fine foliage and flowering plants seems almost like vain repetition, for this firm is so well known, and its reputation is so well established that it would seem that little more could be said of it. However, a good editor is a man who knows when something is going to happen, and has a reporter on the spot to take it all down. It was the fortunate assignment of this scribe to recently visit the range of this company and he will briefly state a few facts concerning what he saw there. As a preliminary he will state that for many years, Robert Craig has been a national figure in the production of the best things in the line of plants. His reputation is so well established that no one has ever attempted to dispute it. In recent years though, he has, to a considerable extent, turned the business over to his sons. He still retains an active interest and is the same genial, kindly and intelligent grower that he has been for many years.

Probably the most notable feature of this range at present is the crotons. Formerly crotons were considered as exotic, which in common parlance means something that is very delicate and must be handled like a baby. The genius of the Craigs has changed all this. Their crotons can be handled in any store where average intelligence prevails. By careful and intelligent work they have brought the croton to every retail store, and thus introduced them to every home where beauty is appreciated. Just recently, one of the leading retail stores of Philadelphia featured the Craig crotons in its show window and the attraction was so great that the sidewalk was blocked for hours and the reserve policemen had to be called out to regulate traffic.

The plant display at this range, even in these days of advancement, is most astonishing. There are at present from 12,000 to 15,000 cyclamens in from four to eight-inch pots and pans, all in the pink of condition. Many of the largest of these plants are now 26 inches in diameter. Along toward Christmas, when they will be in full bloom, their attractiveness can as well be imagined as described. Five thousand of these plants are in 4-inch pots and have been grown exclusively to supply the basket trade, which is always a great feature at Christmas. We will agree that the average retailer is a little suspicious of what he reads, but in this case the best advice we can give him is to go and see for himself. There are no "No Admittance" signs around the Craig range. All their work is open and above board and the millionaire and the laborer can there meet on common ground. We regret the impossibility of ever giving an outline of all the good things to be seen at this range. There are 28,000 poinsettias in pots and pans, 5,000 of which are double.

Dracena Massangeana is here shown in its finest form. There is one large house of these plants that we will venture to assert cannot be duplicated in the whole world. Possibly the people who have pinned their faith to airships may doubt this assertion, but we are writing of things that are on terra firma and that may be seen. The old Bible, which has been discarded by a bunch of crooks and fakirs, tells us that wheat shall be preserved, and that the chaff shall be burned.

A Day at Rutherford, N. J.

At one of the meetings held by one of the congressional committees at Washington a certain senator in the course of his remarks stated that in the horticultural industries of this country there were involved but a comparatively few hundred thousand dollars. Would that we could have had the pleasure of escorting that gentleman around the many different establishments adjacent to New York and show him the magnitude and the capital in-

vested in this business and convince him that he knew not of what he was talking. A trip to Rutherford, N. J., which is only one of many places made famous by horticultural pursuits, would find 10 or 12 establishments that required a capitalization of from \$2,000 to \$75,000 each. Here are located the immense nurseries of Bobbink & Atkins and the renowned greenhouse plant of Julius Roehrs Co., and a full day's time can easily be spent at these noted places in admiring the magnificent stock to be seen.

BOBBINK & ATKINS NURSERIES.

Entering the grounds of these famous nurseries we are immediately impressed with the magnitude of the estate and the vast quantity of excellent stock to be seen in all directions. Acres of beautiful evergreens and conifers of all the different sizes and shades, beautiful specimens of these magnificent plants for the decoration of parks and estates. Beyond these are the herbaceous gardens containing everything in this line that will supply the wants of the landscape gardener. A specialty of this firm is the large variety of Irises, both German and Japanese. At the right of the entrance are situated the buildings containing the several offices of the firm; here are the busy rooms where the various landscape plans are drafted and the necessary clerical work of such a vast establishment performed. Here also are the large packing sheds containing the accessories that are required to properly encase and ship this valuable stock. Passing out of the packing shed we are confronted with some of the large, elegant bay trees, and we walk through the lanes of these stately trees grown in such decorative forms, to the large greenhouse filled to repletion with palms and decorative plants, kentias, phoenix, dracenas and other necessary florists' stock here grown in all the desirable sizes are seen in abundance, all ready to be shipped to the fortunate purchaser. Each department is in charge of competent foremen and the excellence of the stock is evidence of their ability. Before leaving we

want to notice the garage, a new two-story cement building, wherein are housed the heavy motor trucks which have supplanted the slower horse and wagon. In this building is a fully equipped machine shop with all the necessary appliances for making repairs. In the second story is the carpenter and cooperage shop where the plant tubs and other woodwork are finished.

JULIUS ROEHRS CO.

Just across the road and directly opposite the nurseries which we have just visited is the world renowned plant of Julius Roehrs Co. Passing down the walk, between extensive lawns, bordered by magnificent specimens of large bay trees, we enter the main entrance to the large greenhouses, and as we enter the door on either side of the long corridor are houses filled with the beautiful exotics of the world which have been gathered after so many hardships in the tropical countries. House after house of exquisite orchids, some with their handsome flowers drooping towards us, others with blooms standing erect and still more making large growths that will bloom later and adorn many a festive occasion during the coming winter, as here can be found the largest collection of these rare and beautiful plants in this country. Competent growers who have spent years in the care of orchids are here employed and their successful culture is manifest not only in the prizes at the different exhibitions which this concern has won, but also in the appearance of the stock before us. Cattleyas of the different varieties predominate and many rare and beautiful specimens can be observed. The houses of palms and greenhouse stock are in fine condition and some noble specimens of these plants are here on sale. Five new greenhouses are in course of construction to meet the growing demands upon this enterprising concern, and these have required the addition of two new boilers to supply the necessary temperature. Passing by the offices we enter the large packing room which an establishment of this kind requires, and here we find a force of busy men fully equipped with everything that may be required to successfully pack these valuable products, that they may reach their destination safely. We certainly left this noted establishment with the well-formed opinion that the day had been most interestingly spent.

Chrysanthemum Chrysolora.

This new variety can be briefly described as an early Col. D. Appleton coming in 15 days earlier; is of larger size, stronger stem, not quite as tall and in color is intermediate between this variety and Maj. Bonaffon. We consider this one of our greatest achievements, possessing sterling worth from the commercial standpoint, while its size and splendid keeping qualities permit its taking a prominent part at the exhibitions. Best buds are those selected Aug. 1st to 15th. Awarded 93 points at New York and 94 points at Cincinnati, commercial scale, October 15th, 1910. Elmer D. Smith & Co., Adrian, Mich., sponsors.

European Horticulture.

Among other floral pieces seen at a Paris exposition, a tea table arrangement was especially successful. Two gallows-shaped frames of bamboo of unequal height were placed at opposite sides of the table, forming a sort of gateway over it, and decorated with odontoglossums, cattleyas and asparagus, all arranged with much lightness and elegance. The unusual effect of the table with an arch or handle over the center was unique and pretty. A cluster of Malmaison roses, barred across by prettily grouped bachelor's buttons, like a blue scarf, was simple and charming. An arrangement of the long white spikes of eremurus, surmounting *Iris pallida* and graceful peonies, the base supplied by *Asparagus Sprengeri*, though formal, was exceedingly handsome. Another tea-table,

red Jules Lefebvre was quite in accordance with tradition, while another arrangement of a few sprays of deep red roses floating over a bunch of Malmaisons was not so well received.

Philippe de Vilmorin, addressing the horticulturists gathered at his home May 27, said among many good things: "Natural sciences have this peculiarity which distinguishes them from most branches of physical science, that their application long precedes the formulation of theory. In horticulture, until relatively recent times, theories have been developed by the necessity of explaining results attained. But this is no longer true, and science has made such progress in the last century as to be able now to guide and enlighten practice. We see vanish without regret the time when horticulture was an empiric art, evolving by chance or under the exceptional impulsion of able minds fitted to their task, but without knowledge of its laws. Horticulture and agriculture can produce their best

CHRYSANTHEMUM CHRYSOLORA.

placed under an arbor of climbing roses, red with bloom, had a silver flower stand in which were gracefully arranged sprays of *Odontodia ignea*, repeating the tone of the roses. A balcony decoration of hydrangeas, blue and pink, whose great heads of bloom leaned through the balusters, a plant of *Ampelopsis quinquefolia* drooped its graceful sprays below and two vases of pink hydrangeas and two of palms surmounted the pilasters which broke the monotony of the balustrade. A most harmonious arrangement. A cluster of Mme. Chatenay roses surmounting the

fruits when deeply rooted in the fertile soil of botany and biology."

The English papers recount that the duke of Marlborough, visiting an English horticulturist's garden, noticed a lady admire a certain rose, which he gallantly picked, removed its thorns and presented. His surprise when presented with a bill for \$750, the grower claiming it as the result of 10 years of persistent labor, may be imagined; also his chagrin at being obliged to pay, and his reflection that (*Moniteur d' Horticulture*) "it is better to leave the misses to their mothers, the roses to their bushes."

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1910

PLAN now to attend at least one of the large fall exhibitions. Don't be a mossback, come out of your shell and see what the more progressive fellow is doing.

CHRYSOLORA is a grand yellow chrysanthemum, scoring 94 points in Cincinnati and 93 points in New York, when exhibited before the examining committees of the Chrysanthemum Society of America. The highest scores obtained by any variety before two committees since Mdle. Jeannie Nonin was exhibited in 1904.

Wintering Lantanas Outdoors.

ED. AMERICAN FLORIST.

Would you please inform me through your paper if lantanas will stay out-of-doors over winter if protected a little?

Indiana. M. J. W.

We don't believe that lantanas can be wintered out-of-doors in Indiana. On an occasional season one or two sorts will barely come through if protected, but the lantana is a tender plant, very susceptible to frost.

S. A. H.

A Florist's Wheelbarrow.

The Toledo Wheelbarrow Co. of Toledo, O., have placed upon the market a barrow for the special use of florists. After conferring with leading florists they believe they have constructed a barrow which will fill a long felt want and will meet all the requirements of the greenhouse. The features which they particularly desire to bring to the attention of the trade are that it is built narrow enough to be used in the aisles, has handle guards to protect the knuckles, angle iron legs and sockets for the side boards, and equipped with their patented "never break wheel." The dimensions are: Of the handles, 1½x2x59 inches; inside width in front, 15½ inches, and at handles, 18½ inches; extreme width at handles, 24 inches.

Reporting Exhibitions.

To save time and trouble in reporting the awards at exhibitions, correspondents should adopt the one correct style throughout, which is given below on this sheet. It will be noted that the addresses of firms appear only once, that the addresses of gardeners of private exhibitors appear only once and that the awards follow (not precede) names of prize-winners. Referring to the time of any event, give the date of the month, not the days of the week.

AWARDS.

Cut Blooms—Chrysanthemums.
Fifty yellow—Chas. H. Totty, Madison, N. J., first, with Robt. Halliday; E. G. Hill Co., Richmond, Ind., second; Elmer D. Smith & Co., Adrian, Mich., third.

Fifty pink—Dailedouze Bros., first, with Gloria; E. G. Hill Co., second; Walter Hunnewell, Wellesley, Mass., (T. D. Hatfield, gardener) third.

Fifty white—Dailedouze Bros., Flatbush, N. Y., first, with Miss Virginia Poehlmann; Elmer D. Smith & Co., second; E. G. Hill Co., third.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Elmer D. Smith announces the committees to examine new chrysanthemums for the ensuing year which are as follows:

Boston, Mass.—Wm. Nicholson (chairman), James Wheeler, Alex Montgomery. Ship flowers to Boston Flower Market, C. Park street, care of chairman.

New York.—Eugene Dailedouze (chairman), Wm. Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., 55 Twenty-second street, care Eugene Dailedouze.

Philadelphia, Pa.—A. B. Cartledge (chairman), John Westcott, S. S. Pennock. Ship flowers to A. B. Cartledge, 1514 Chestnut street.

Cincinnati, O.—R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott Flower Market, care janitor.

Chicago.—J. B. Deamud (chairman), Geo. Asmus, W. H. Kidwell. Ship flowers to J. B. Deamud, 51 Wabash avenue.

Shipments should be made to arrive by 2 p. m. on examination days to receive attention from the committee, must be prepaid to destination and an entry fee of \$2 should be forwarded to the secretary not later than Tuesday of the week they are to be examined or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees provided the raiser has given them two years' trial to determine their true character. Special attention is called

to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 8, 15, 22 and 29 and November 5, 12, 19 and 26.

TO THE RETAIL TRADE

My Entire Cut of Carnations

from 100,000 plants will be on sale every morning at

M. C. FORD'S, 121 West 28th St., New York City

My wagon arrives daily at 7:30 a. m.

H. HESSION

Carnation Grower, Flatbush, Brooklyn, N. Y.

Indianapolis.

Trade has been exceptionally good during the past week and is getting better every day. The large chrysanthemums are irresistible and many are sold singly to those who cannot pass the window without putting one on their coats. Carnations are of good quality now, so that the regular carnation buyers are again getting into line.

NOTES

Because the retail stores have not been doing their share in maintaining the various greenhouses scattered around the outskirts of the city, a number of the growers are endeavoring to band themselves together under a "Growers' Floral Commission" for the purpose of starting a combination retail and wholesale florist store. It is expected that a working capital of \$5,000 will be raised within the next week or ten days, and that in two weeks' time the enterprise be launched in a \$5,000 a year store on West Washington street or Indiana avenue. It is designed that the different members of the stock company have booths in this store where their floral produce be kept on exhibition and for sale. One manager or salesman is to look after all of their interests and to sell from the different booths according to which line of stock suits the public fancy. When a sale is made the manager is to credit same to the member from whose booth the flowers were taken. The retail price of flowers is going to be cut as close as is consistent with reason and the wholesale price is to be just twenty-five per cent below the retail price. This is something that Indianapolis has been needing, said one of the promoters last Saturday. "Why, Indianapolis has room for twenty-five more florist stores."

Herman Junge is now in his glory. He is head advertising man for the coming chrysanthemum show and is putting all of his well seasoned ideas in practice. The way he has been getting subscriptions, too, is almost to be compared with getting blood out of stones. A novel way of advertising the show will be shown when a number of dogs in the city appear with dog blankets bearing the simple inscription "Chrysanthemum Show, Tomlinson Hall, Nov. 8-12." These dog blankets may be used throughout the coming winter by simply turning them wrong side out or right side out, for there is really no wrong or right side except that one side bears the above inscription. A. W. B.

The manner of styling one's place So and So's Flowers is becoming quite popular since the ovation made by Brandt's Flowers. The last to fall in line was Benson, who gives "the earth with every plant." He now has on his wagon just below the large picture of the globe "Benson's Flowers." Mrs. Benson probably is wishing that the fact that she works in the store and sometimes carries home the day's receipts was not so publicly known, for it was only a matter of a few days ago that a colored gentleman, after overpowering her right in front of their own house, relieved her of a quantity of coin.

The gardener florists, and those who stand in the market and retail flowers, contributed to a purse for the purpose of placing an advertisement in the Indianapolis News to the effect that they would hold a grand chrysanthemum opening October 22. This step was taken because of the recent lack of business all through the city. The retailers have not been buying the customary amount of stock from these growers, thus leaving a large surplus on their hands. This surplus was to

be sold through the up-to-date method of advertising.

A number of the members of the State Florists' Association will make a trip to Richmond on November 2 for the purpose of seeing what the Richmond growers are doing. All of the florists in the city are invited to join the party. Adolph Bauer will give particulars to any who telephone to him in regard to this.

John Bertermann has now put his automobile in his curiosity collection, showing it to friends as the vehicle of former days. He is at present using his horse again and cannot quite make up his mind whether to sell the auto or to keep it for memory's sake.

A very needed improvement is being made in the Tomlinson Hall flower market. A neat wrapping counter, equipped with plenty of wax and manila wrapping paper and sea-green cord, is being supplied with every stand.

Young Wm. Glaubke is somewhat of a tobacco fancier and is growing some on their garden plot. A sample of this homegrown, smoked in a pipe, was the cause of a certain downtown florist's remaining home one afternoon last week.

Wiegands' have some more automobile fever and have now contracted for an Overland delivery wagon. Another new thing at Wiegands' is the uniform habit. Every attache of the place will soon be fitted out in green and gold.

Frank Saal has left the employ of John Rieman and has gone west to accept a position with a moving picture show. Ed. Schilling has taken his place with Rieman.

SAGINAW, MICH.—Charles Frueh & Son are erecting a greenhouse building, 30x142 feet, and a new smoke stack 80 feet high.

MORE SEASONABLE WEATHER.

The weather took a decided change for the better the first part of this week and was immediately reflected in the countenances of all the dealers. Friday and Saturday of last week saw the worst slump that the market has seen this fall. The weather had been exceedingly warm all the week and the stock came rushing in with but few buyers and Saturday nearly all kinds of stock could be secured at the buyer's offer, and many of the retailers took advantage of the low prices to make elaborate displays in their stores. But Monday the market took on a much better tone and at the writing has nearly reached a normal condition. Chrysanthemums in all grades are very plentiful and large quantities of magnificent blooms in numberless variety are being received at all the stores, and a large variety of pompons in both white and yellow are to be seen everywhere. The cut in roses with most of the growers is considerably less than has been the rule for the last few weeks, but the quality is of the best and with trade in the condition that it is, there is plenty of all kinds and grades to fill all the orders. American Beauty and the Killarneys are in elegant shape and Richmonds that are superb are offered by all the growers. Carnations are coming more plentiful every day and the poorer grades are moving slowly. Violets are finding hardly any market for they are not yet at their best and with so many other good flowers selling so cheap are not looked at by the consumers. Lilies and lily of the valley are not over-plentiful and the finest grades are meeting with good demand at fair prices. Orchids are in a little over-supply and some low price sales are reported. Cosmos is still a staple article at some of the stores and a few dahlias are still finding their way to the market. Greens are in a little better demand, the high colored autumn foliage is about done and the beautiful greens can be obtained in large quantities, and are finding a better market.

CHICAGO FLORISTS' CLUB.

There was an enthusiastic and large-ly attended special meeting of the Florists' Club at the Union Restaurant October 20 for the promotion of flower show business. Manager Asmus reported that the plans for the

show were progressing very satisfactorily, with every prospect of a record-breaking display. Several new members were enrolled and a number of others proposed for membership. Alex. Henderson was appointed chairman of the flower show refreshment committee. Chairman Kohlbrand reported for the banquet committee and it was decided that the banquet would be held at the La Salle Hotel November 10 at 6:30 p. m. The committee is making arrangements for a fine entertainment to be given in connection with the banquet and it is hoped members and guests will bring their ladies. Vaughan's Seed Store exhibited a large vase of fine dahlias. Elmer D. Smith & Co., Adrian, Mich., exhibited a grand vase of chrysanthemum Chrysolora, which was awarded the club's certificate, scoring the following points: Color, 19; form, 14; fullness, 9; stem, 14; foliage, 14; substance, 14; size, 9; total, 93. Anton Then showed his new red seedling carnation, a cross of Mrs. Nelson and White Lawson. This also received the club's certificate, scoring as follows: Color, 20; size, 18; calyx, 4; stem, 20; substance, 9; form, 12; fragrance, 4; total 87 points.

GRAND FLOWER SHOW BALL.

Chairman Yarnall of the bowling team reported at the last meeting of the Florists' Club that a ball had been suggested for flower show week and it has been decided that this will be given at the Coliseum Annex Friday night, November 11, the bowling team to have full charge of the arrangements.

AN INVITATION.

All Flower Show and other visitors are cordially invited to make Vaughan's Seed Store their headquarters for writing or receiving letters or telegrams, and are also urged to arrange to visit that firm's greenhouses and nurseries near this city.

NOTES.

The Chicago Carnation Co. is receiving large quantities of all the varieties of carnations as well as roses, violets and sweet peas. At the store this week on exhibition are five new seedlings, one of which a cross of Victory and Andrew Carnegie is very promising, producing flowers from 3½ to 4½ inches in diameter, of as bright a color as Victory, and will produce twice as many flowers to the plant in

a season. They have 150 exceptionally good seedlings on trial at the houses. This concern is very desirous that everybody should see the new carnation Washington at the houses at Joliet, offering free transportation to any one who will make the trip. A new telephone, Central 3373, was installed this week.

Bassett & Washburn are cutting magnificent blooms of chrysanthemums measuring eight to ten inches in diameter, some of which they were in hopes to have for the show, but their varieties have all shown a tendency to be a little early this year. Their roses and other stock are in prime condition. Mr. Washburn reports the first frost at Hinsdale on October 22 this year, the latest date for the first low temperature of that point in twenty years.

The weather for the last month has been very propitious for the shipping of the numerous orders received by the George Wittbold Co., for the excellent stock which they are sending out. The call for Boston ferns has been large and the superb stock which they are handling is giving great satisfaction, the 6-inch pot sizes being very popular with all the buyers. The demand for herbaceous perennials and nursery stock at the nursery at Edgebrook has been exceptionally large this fall.

Charles W. McKellar is receiving some very handsome orchids and in great variety. This week some Cattleya Trianae were received as well as Dendrobium Phalenopsis, D. Formosum, Vanda Caerulea, Oncidium Tigrinum, making a fine assortment for elaborate work. Mr. McKellar with his wife and party of friends enjoyed an automobile trip of 400 miles into the southern part of the state on Sunday and Monday of this week.

Poehlmann Bros. Co. is receiving a good supply of all the seasonable flowers. The chrysanthemums are in grand shape and magnificent blooms of all the leading varieties are to be seen here. Robert Halliday is elegant; Mrs. Henry Robinson and Miss Virginia Poehlmann are grand. Roses are in beautiful condition and carnations are fine. Lilies and lily of the valley are of high grade and in good demand.

E. F. Winterson Co. have an extra fine line of lilies just now, and cattleyas are constantly received. The chrysanthemums are of the finest

grade and those received from the Mount Greenwood greenhouses are as handsome as any on the market. A large shipment of elegant boxwood was received this week and also a number of cases of fine plants of Biota Aurea Nana.

E. C. Amling Co. has a splendid assortment of elegant stock of all the seasonable flowers. The American Beauty and Killarney roses are of an excellent grade and some especially fine lily of the valley is always to be obtained. Chrysanthemums are in abundant quantity and of excellent quality and carnations of all the leading varieties are daily received.

Hoerber Bros. are now receiving a high grade of stock, both of roses and carnations, from their range at Des Plaines. The carnations are of extra fine grade and the stock is coming in much more abundantly and the quality improving with every shipment. Harry Manheim, the manager at the store reports business as improving very rapidly.

Weiland & Risch are cutting a very fine grade of both white and pink Killarney and Bride roses, that are finding a ready sale. The carnations are of excellent quality and a fine grade of commercial chrysanthemums are being daily received. Even with the unseasonable weather business is very good and a market is found for all the large quantity of stock received.

J. A. Budlong is making heavy shipments of the elegant flowers to many far southern points, such as New Orleans, La.; Fort Worth, Dallas, Galveston and San Antonio Tex. The reports from their customers are that the stock is arriving in fine condition, which is a great testimonial of the high grade of stock being produced at the greenhouse.

The J. B. Deamud Co. is receiving some very fancy grades of chrysanthemums and fine commercial blooms of all the leading varieties. Roses, carnations and sweet peas are very good and an exceptionally fine stock of all florists' green are always on hand. Some very handsome dahlias are still being offered at this store.

E. H. Hunt is offering this week a large quantity of high grade stock of chrysanthemums, roses, carnations and all seasonable stock. A large shipment of southern smilax was received this week of excellent quality. The demand for supplies of all kinds is excellent and the outlook in this department is one of the best.

The chrysanthemums at Kyle & Foerster's are very handsome, some extra fine Mrs. Henry Robinson and Major Bonnafon, the first of this variety seen in the market were noted. A very fine grade of single violets from

ment of southern smilax was received this week of excellent quality. The demand for supplies of all kinds is excellent and the outlook in this department is one of the best.

the home market is being received. The roses are excellent and American Beauty is of very high grade.

Wietor Bros. are cutting heavily of all the leading varieties of chrysanthemums and elegant blooms of George S. Kalb. Mdle. Clementine Touset and Miss Virginia Poehlmann are to be seen at the store. The roses are of their usual good quality with Killarney, both white and pink, showing up remarkably well.

Robert Rahaley of the Michigan Cut Flower Exchange and Albert Pochelon of the L. Bomb Floral Co., of Detroit, Mich., witnessed the Cub-Athletic ball game on October 20, returning home the same evening. P. Olson and Harry Micholson of the Chicago Carnation Co., Joliet, were also in the city for the same purpose.

The quality of the stock at Zeck & Mann's is of exceptionally good grade. In roses, Richmond and Killarney are extra fine, and the chrysanthemums especially. Monrovia are especially good. An extra fine grade of sweet peas are eagerly sought by the buyers and disposed of at an early hour.

Vaughan & Sperry are offering an extra good grade of carnations. The blooms are superb and the stems are extra long. Some extra fine white Lawson Enchantress and white Enchantress were noted. Their American Beauties are of extra quality, of fine color and on extra long stems.

A. L. Randall Co. is in receipt of large quantities of everything in season. Chrysanthemums in all colors, roses of the different varieties and grades and carnations of all the leading kinds. A large demand for the Evergreen brand of fertilizer is reported.

H. Van Gelder of Percy Jones, is receiving large quantities of chrysanthemums of exceptionally good quality. Robert Halliday and Mdle. Clementine Touset are among the leaders, the flowers being extra large and the stem and foliage all that can be desired.

E. E. Pieser, of Kennicott Bros. Co., underwent an operation upon the index finger of the right hand October 22, as a result of blood poison. This firm is now offering large quantities

of chrysanthemums and all other leading varieties of flowers.

The dance given by the Wholesale Florists' Employees on the evening of October 25 at Columbia Hall was a grand success and a most enjoyable occasion to all who participated. The grand march was led by Charles Zopfe and Miss Holmes.

The Richmond roses that the Peter Reinberg houses are sending out into the store are really magnificent, fine long stems with beautiful foliage and long buds of the deepest crimson and in quantities to fill any order that may be received.

Frank Krall, 1907 Halsted street, reports business as brisk, with plenty of funeral and wedding work. Mr. Krall's little son has been very sick for some time but at the present writing his condition is improving.

H. C. Rowe, 42 Monroe street, is enjoying a very busy season. A Chris-

tianson of this establishment last week decorated the Powers residence on Macalister place, where a quiet home wedding took place.

The roses that are being sent in from George Reinberg's house are of a very high grade. They are especially strong on Killarney and American Beauty, some exceedingly handsome specimens being noted.

Wm. Sgoror of the Madison Floral Co., corner of Madison and Clark streets, is enjoying an exceptionally good business, the many weddings and funerals demanding his attention.

The new propagating plant of the South Park system at Marquette Park will be heated by two Kroeschell boilers which will be installed by the Kroeschell Bros. Co.

John Krutchten is receiving an extra fine grade of chrysanthemums, among which Early Snow is of excep-

tionally good quality, and plenty of all other seasonable stock.

Miss M. C. Gunterberg of the Flower Growers' Market is now offering an excellent grade of American Beauty roses, orchids and violets, in addition to all other flowers of the season.

Joseph Mendel, West Eighteenth street, democratic nominee for county commissioner, is looking forward to the support of his brother florists for the coming election November 8.

The Chicago Rose Co. is this week offering an excellent grade of chrysanthemums, roses and carnations, the latter being of exceptionally good quality.

Dominick E. Freres of the Flower Growers' Market is this week offering an excellent grade of Mrs. Jardine and Kaiserin Augusta Victoria roses.

The Lawndale Floral Co., 3212 West Twenty-second street, report business as brisk, with plenty of funeral, wedding and landscape work.

O. Johnson of the Flower Growers' Market is this week offering a large quantity of chrysanthemums and all other varieties of flowers.

John Byers, formerly of Kennicott Bros. Co., accepted a position with E. C. Amling Co., and entered upon his duties October 18.

Funeral and wedding work is keeping T. F. Keenan exceedingly busy at his store, 1306 East Sixty-third street.

F. Fuhrmann, 3164 North Clark street, is exceedingly busy with funeral and wedding work.

VISITORS: Roy Wilcox and wife, Council Bluffs, Ia.; Swan Peterson, Gibson City; Gustav Fredrickson, St. Joseph, Mich.; Robert Raheley of the Michigan Cut Flower Exchange, and Albert Pochelon of the L. St. Louis.

The first of the week the warm weather had a depressing effect on trade, but Thursday there came a great change. The wholesale houses are well stocked with all kinds of flowers. Chrysanthemums, roses, lilies, carnations and violets will, if the cool spell continues, improve. The Gov. Herrick variety of violets is now coming in and its keeping qualities are the best.

NOTES

The planting of the new Divoll branch of the Public Library at Eleventh and Farrar street was awarded to the Montrose Nursery, under the supervision of Mr. Drummond.

The Horticultural Society held a meeting last week. Very pretty show bills are now out advertising the show. There will be a fruit show in connection with the flower show.

We regret to announce the death of Frank Bucksart, father of Frank Bucksart, Jr., well known among the florists

as a designer and decorator. He was buried Monday.

Alex Siegel is preparing to open his branch store November 1 at Schaper Bros. department store.

Otto Sander is making very pretty displays in his show windows, making a specialty of \$1 boxes.

C. A. Kuehn, although improved, has not yet been able to get down to the office.

Fred Ude is bringing in some good carnations and his violets are improving.

H. G. Berning is the first wholesaler to sport an automobile.

John Steidle is now sending in some good carnations.

W. F.

Cleveland.

The past week has been unusually warm for this time of the year, one of the warmest Octobers in nearly 40 years, almost breaking the record, and stock has piled in from every grower until it was a problem where to place the same. Dahlias are still in full crop and such a glut as it is. Chrysanthemums, too, came in such numbers as to be a proposition to handle them. The warm weather had a bad effect upon business also, but one good frost, however, will do away with the outside stock and business will settle down to a firmer basis. Cosmos and greens of all kinds are very plentiful. Roses and carnations are arriving in vast quantities and the stock is exceptionally good for this season of the year. American Beauties and Killarney being favorites. Lily of the Valley and orchids are moving a little slow.

NOTES.

The Cleveland Florists' Exchange has been incorporated with a capital stock of \$15,000, the officers being Geo. W. Smith, president and treasurer; W. A. Heideman, vice-president; Chas. F. Bastian, secretary. All the stockholders and directors are employees of the firm, the idea being to make the interests of the employees worthy of consideration and thereby benefiting the customers and consignors, as the more interest shown will bring the desired increased results. Geo. W. Smith, the founder of the business, will remain in active management and control. All wish the new firm continued welfare and success.

Mr. Wheadon is back in Cleveland, and is now manager of the Taylor Flower Shop, Mr. Schoen having returned to the Gasser Co. C. F. B.

Atlanta, Ga.

As the weather gets cooler cut flowers are coming in good. Dahlias are at their best now. The past week was Horse Show week and a lot of choice cut flowers were used for personal adornment and table decorations. All the stores had their share of the different decorations and the Dahl's Co. had a very pretty window decoration for the occasion. Chrysanthemums in white, pink and yellow are the leaders at present, and fine flowers are to be had. Violets are coming in, but light in shade and short in stem.

West View has completed the remodeling of their store and the new refrigerator is a beauty. G. L.

Roses and Carnations
A Specialty.....
WHOLESALE GROWER of CUT FLOWERS

Cincinnati.

MARKET OVERSTOCKED.

The warm weather of the past week brought flowers along in a rush and it was an utter impossibility to unload one-half of those received in the wholesale houses. The greatest glut was in white chrysanthemums and white roses, and carnations also were in over-supply. Having had no killing frosts to date, cosmos and dahlias are still with us and help to clog up the already overstocked market. Lilies of the valley are exceptionally fine and meet with a fair demand, and we must admit that Liliun Longiflorum were never better. Violets both single and double are to be had but there is very little call for these. Green goods of all descriptions are very active, with not enough Asparagus Plumosus to meet the demand. At this writing, October 24, receipts are still heavy and business is quiet.

NOTES.

George Tromeay of Tromeay's Flower Shop, could not resist the temptation of seeing the Athletics and Cubs play ball, and so journeyed to Chicago to satisfy his curiosity. He saw the game played October 20 and came right back, stating that the Cubs were entirely outclassed.

Albert McCullough, president of the J. W. McCullough's Sons Co., leaves for Florida November 1 on his annual fishing and hunting trip. He will have several friends from this city accompany him and will be gone about a month.

Joe Sonnenberg of the Hyde Park Rose Co., is about the happiest florist in these parts. It is a boy, weighs eleven pounds, and mother and son doing well. Congratulations, Joe.

At the next monthly meeting of the Cincinnati Florists' Society the sub-

ject of holding a flower show will be discussed and all those interested are requested to attend.

F. C. Herms and wife of the Herms Floral Co., Portsmouth, celebrated their golden wedding on October 3 at their bungalow on the Scioto river.

The Bowling Club will get together again November 7 at Finke & Craig's alleys. If you want to spend an enjoyable evening come and join us.

Charley Hoffmeister was elected commander at the recent election of the Harding First Voters' Club.

We are glad to report that Lou Kyrk who has been on the sick list, is convalescent.

Visitors: Ben Esmeier of M. Rice & Co.; — Jackson of American Rose Co., Springfield, O.

Toronto.

BUSINESS INCREASING.

Business continues to show a steady increase as the season advances and is decidedly better than a year ago. The weather continues fine, and in this locality no frost has as yet done any damage. Outdoor flowers continue to arrive in good shape, and the dahlia specialists are cutting heavily of very fine stock. American Beauty is the only variety of roses which is scarce, but this variety from its unprofitable productiveness in this vicinity has been discarded by so many growers that the situation will be a poor one all season unless we depend on imported stock. Richmond and the two Killarneys are fine. Queen and Bride are both plentiful and a few Mrs. Jardine make up the bulk of the roses. Chrysanthemums are both plentiful and good, many of the varieties being up to show standard and good business keeps them going nicely. Carnations are improving in quality and are plentiful enough to fill all orders. Orchids, lily of the valley and violets are abundant.

ifful enough to fill all orders. Orchids, lily of the valley and violets are abundant.

NOTES.

The Gardeners' and Florists' Club held a well attended meeting at St. George's Hall October 18. The restrictions placed on greenhouses are such that they are ridiculous, and a committee was appointed to interview the city architect. Messrs. King, Dunlop, Chambers, McVittie and Adams were chosen to point out that the ruling that sash bars had to be composed of two by four lumber and that uprights not more than 18 inches apart is absurd. These and other similar points will make the meeting interesting.

The most recent outlet here for cull flowers is at Knox's five and ten cent stores, where no article of more than 15 cents in value is sold. Roses three for 10 cents, violets 15 cents per bunch and chrysanthemums five cents each are some of the alluring attractions.

Thomas Downing, manager of the Georgetown Floral Co., was a visitor who is well satisfied with the outlook for the season. Stock is in fine shape and cleans up nicely. A large wedding where chrysanthemums featured kept him busy October 20.

Albert Houle is in the hospital suffering from coal gas poisoning. The doctor reports that he will be out again in a few days.

J. J. Higgins, formerly with J. S. Simmons, has opened a store on Yonge street, near Gould.

Visitors: W. Dykes, of Ed Jansen's, New York; S. Dillhoff, of Schloss Bros., New York; William Atkinson and daughter, of Fisher, Son & Libray, Royal Nurseries, Handsworth, Sheffield, Eng.

San Francisco.

Business for the last few days has not been up to the standard, but this is partly due to the fact that we had our first heavy rains here, which, of course, interfered somewhat with shopping. However, the weather is now beginning to show signs of clearing, and better conditions can be expected. With the exception of chrysanthemums and violets, which are plentiful, other stock is still scarce. Many nice displays of orchids could be seen in the windows of our leading florists last week, but as the demand for them is generally good, they were rapidly disposed of.

The Grand Fall Flower Show will be held at the Fairmont Hotel in this city under the auspices of the Pacific Coast Horticultural Society and California State Floral Society, October 20-22. V. Matraia, who as president of the Pacific Coast Horticultural Society, will be manager of the show, has selected the following committee to act with him: The Misses Hannon, Williams, Branin, Vaughan, Mrs. Sachau, Mme. Roeckel-Davis, J. W. Bagge, H. Plath, W. Kettlewell, J. R. Atkinson, A. Rossi, J. H. Carbone, F. Schlotzhauer and C. Abraham. From the present indications this show will be one of the finest, if not the very best, that has ever been held in San Francisco. Both Mr. Matraia and H. Plath, who is the assistant manager of the show, have been untiring in their efforts to make this affair a complete success. Many valuable prizes have been obtained, and the competition for them will be keen.

The Pacific Coast Horticultural Society held a jinks at their club rooms last Saturday evening, which was largely attended. Before the entertainment many fine plants, ferns and flowers were exhibited. Prominent among the exhibitors were Wm. Kettlewell, who displayed some extra fine dahlias, and H. Plath, who can always be relied upon to show the best varieties of ferns. After the exhibition an interesting entertainment was enjoyed by the members, at the conclusion of which refreshments were served.

Walter K. Louis, traveling representative of the Dayton Paper Novelty Co., was recently in our city. The firm which Mr. Louis represents makes a specialty of florists' boxes, and he reports business all along the line to be in a flourishing condition.

E. Reynolds, formerly connected with the Redondo Floral Co. of Los Angeles, has severed his connections with that concern and is now with the Art Floral Co.

Julius Eppstein opened his store on Geary street, adjoining the St. Francis Hotel, today. His opening display was both artistic and attractive. ARTUS.

Albany, N. Y.

At the last meeting of the show committee of the Albany Florists' Club the names of Major Charles B. Staats, Captain William J. McKown and Captain Albert E. Denison were added to the hall committee. F. A. Danker had on exhibition a model cup to help the members decide upon a suitable design to be chosen as the prize for the best decorated booth at the show, November 10-12. It was decided to order the cup from a local jeweler.

Some display of the cups to be offered for premiums will be made in a few of the stores about the time of the show so that the public will be able to form an idea of what is coming. The subject of securing certificates of merit, entry cards, labels and such supplies was left to Mr. Danker and the secretary. Substantial progress is being made upon the program, which will go to press some time after November 1. One of the features of the decoration will be an electric sign which will be put up outside the Armory. This was left to Patrick Hyde, chairman of the hall committee.

One of the interesting weddings of the season was that which took place at the home of Mr. and Mrs. Louis Menand, Sr., on October 19, when their daughter, Miss Jessie E., became the wife of Frederick J. Doran, of this city. The Menand home was handsomely decorated for the occasion with orchids, American Beauty roses and foliage plants. The Rev. James K. Phillips, pastor of the Bethany Presbyterian church, officiated. Many guests from Albany and places out of town were present. On their return from a wedding trip Mr. and Mrs. Doran will reside in the Menand home-
stead.

Buffalo.

Trade is all that can be expected. Flowers are coming in and are very good of quantity and quality. Chrysanthemums are improving each day. Carnations, while not in active demand, are improving daily. Roses are of very fair quality.

NOTES.

All things are centered on the coming flower show, which promises to be a winner. All are striving to make their exhibit a credit to themselves and thereby help floriculture in Buffalo. From the largest to the smallest who expect to make an exhibit, the enthusiasm is the same. All the different committees are doing their best to have things in good shape. The music will be of the best. Reception is in good hands. Finance is composed of the "Get There" crowd. Press are all good talkers. So with that kind of a lot of hustlers the show should be a success. Space is ample and every attention will be given to the exhibit of the out-of-town grower and from inquiries the attendance will be large.

F. C. Brown, who is with S. A. Anderson, will remove to Buffalo this week.

W. A. Adams was down east this week.

Los Angeles, Calif.

The past two weeks have been extremely busy ones with all the retailers, the funerals of the many victims of the terrible disaster to the Times building having called for an enormous number of designs, wreaths and sprays. Besides this the many social functions occasioned by the visit and conven-

tion of the American Bankers' Association have caused a brisk demand for the higher grades of stock. In addition, many of the regular patrons of the retailers, who have been summing in the east and Europe, are returning and flowers for theatre, and street wear, table and house decorations, as well as those called for by transient customers have been in great demand. American Beauty roses, in the long stemmed grades, are far better in color than at the last writing and, though they are much more plentiful, the demand has kept pace with the supply, while the medium and short grades have not been nearly sufficient to meet the demand. Killarney, White Killarney, Richmond, My Maryland, Golden Gate and other teas are improving in color and stem right along and sell well; there has been quite a deficit in the short grades.

Northern Michigan Evergreen Nursery

Schooner ROUSE SIMONS, S W. cor. Clark St
H. Schuenemann Capt. Bridge, CHICAGO

The heat is proving too much for violets and those coming in are poor in color. In chrysanthemums, Major Bonnaffon holds the center of the stage, the earlier varieties being practically over. There are still a few Clementine Tousets while Timothy Eaton and Yellow Eaton will soon be at their best. Orchids continue to arrive from the northern part of the state, but they cannot compete for quality and freshness with the local grown stock. Among the outdoor flowers, cosmos, gaillardias and carnations are still plentiful and a few gladioli are still seen. Green goods are plentiful and the few bales of oak and other autumn foliage that have been shipped to this market have sold readily and been extremely useful in the many decorations recently carried out.

PHILADELPHIA, PA.

A good market, good stock, and satisfaction guaranteed.

Philaec phla.**BUSINESS IMPROVING.**

Business is improving, though the first days of last week were slow on account of warm weather and a surplus of stock. Heavy rains and decidedly cooler weather the last of the week materially improved the conditions. It is recognized as a fact that the reign of the dahlias, pretty as they have been, is almost ended for this season. The chrysanthemums will now have their innings and much good stock is already arriving and it is going very well. Add to this the exceptionally good quality of American Beauty and tea roses, carnations, lilies, Lily of the Valley and other stocks, and it is reasonable to state that, for a time at least, this market will be well supplied.

NOTES.

The two retail stores of H. H. Battles, on Twelfth street, are now resplendent with all the best things the market affords.

Samuel F. Lilley is now particularly strong on good roses and chrysanthemums and reports business as rapidly improving.

A recent visit to the Laurel Hill range of John Westcott disclosed a great stock of ornamental plants.

Berger Bros. have very fine chrysanthemums and a great variety of other stock and are cleaning up well.

John McIntyre is receiving large shipments of the best chrysanthemums and cleans them up every day.

J. J. Habermehl's Sons continue their excellent stock and fine window decorations.

John Burton is now sending to market an exceptionally fine crop of roses.

Pittsburg.**FIRST FROST.**

The long desired frost visited us October 23, and while it did not freeze up everything, it froze enough to give a healthier tone to the market, and we might expect the demand for indoor stock to be active and prices take a hump. Chrysanthemums continue to overshadow everything else, and those retailers who grow their own are selling them at exceptionally low prices, and while they sell a good many that way, roses, carnations, lilies, etc., are almost neglected. In fact there is no call for lilies at all. Beauties are exceptionally fine, but the demand is very weak; the same can be said of orchids and violets. Lily of the valley has very strong calls. The market is still overloaded with green stock.

At Phipp's Conservatories they expect to stage the big chrysanthemum show October 30.

A grand display is on at the conservatories of H. J. Heinz and H. C. Frick.

Very fine American Beauties and Cattleya Labiata are offered at the McCallum Co.

The Pittsburg Cut Flower Co. is kept busy moving quantities of mums.

Boston.**WARM WEATHER.**

The weather has been extremely warm and consequently the week has been a very trying one, especially to those who reship their stock. There is an over-supply of chrysanthemums, and the other stock has to take its chances. The retail stores take the finest blooms to make their establishments attractive, the noticeable varieties being Beatrice May, Alice Byron Gloria, Pennsylvania, Crocus, and Black Hawk. The condition of the chrysanthemum market is shown by the salesmen quoting the price by the hundred. The only stock in demand is lilies, of which the supply is short.

FLORISTS' CLUB MEETING.

The meeting of the Gardeners' and Florists' Club was held October 18 at Horticultural Hall. The speaker of the evening was Edward McMulken, the Boylston street florist. He spoke on the relationship between the retailer and the grower and policies affecting their mutual interest. And also of the growth of the florists' business and of the tremendous increase in greenhouse area in recent years. His remarks called forth considerable discussion from the prominent growers present, who turned a fusilade of replies upon him. The committee on entertainment at the National Flower Show in March reported in favor of a reception, dance and lunch instead of a banquet, and

62 members and guests present. It was a very gratifying affair. No liquors were served. The report for the year was so encouraging that motion was made to issue 15 more shares. A dividend of 10 per cent was declared. The old board of directors and officers were unanimously re-elected, as follows: William C. Stickel, president; William Nicholson, vice-president; George Cartwright, secretary and treasurer; Alexander Montgomery, E. Allan Peirce, Lester W. Mann, Andrew Christiansen, S. J. Goddard and Thomas Pegler, directors; William J. Thurston, manager. The remainder of the evening was devoted to speaking. Andrew Christiansen gave an account of his European trip which was replete with interest. Robert Cameron followed. George Butterworth of Framingham spoke on orchids. The other speakers were W. J. Thurston, A. C. Parker, J. S. Manter and Eber Holmes. A fine large flashlight photograph was taken of the members at the tables.

J. K. M. L. Farquhar announces that, following the policy illustrated by the great orchid show, the Massachusetts Horticultural Society will do all it can to induce other special exhibitions to come to Boston. The Greenhouse Vegetable Growers and Market Gardeners' Association has been invited to come to Boston in September, 1911. The Boston Market Gardeners' Association, in conjunction with the Massachusetts Horticultural Society, will contribute substantially the money that will be offered for prizes.

The funeral of Mrs. Julia Ward Howe called for the use of a vast quantity of flowers and there was a profusion of floral tributes at the funeral at the Church of the Disciples, consisting of large, elaborate floral pieces and wreaths of all kinds. The Greek societies tendered many fine and large tributes with the Greek and American flags and the Hellenic colors being worked into the designs very handsomely.

The Massachusetts Horticultural Society has made the following nominations for the coming year: C. W. Parker, president; W. C. Baylies, vice-president; J. A. Pettigrew, E. B. Dana, Wilfred Wheeler and S. M. Weld, trustees; C. W. Hoitt, J. B. Shurtleff, F. H. Appleton and J. Willard Hill, nominating committee for 1912. The annual meeting is in November.

Penn arranged the decoration at the Gilchrist store, one of the largest department stores in the city. They used 100 large Bay trees and 500 other plants in variety. The firm also had a

AMERICAN FLORIST CO., 324 Dearborn St., Chicago

New York.

STOCK OVERPLENTIFUL.

There has been little change in the market conditions over that of last week, if any it has been for the worse. The weather still remains unusually and at times uncomfortably warm, and there is an abundance of good stock arriving. Fortunate, indeed, is the retailer who has any decorations just now, as good stock can be bought for surprisingly low figures, particularly when bought in quantities, the wholesalers being glad to move it at practically the buyer's own price, and there is little chance of any improvement as long as the present weather continues. Toward the end of the week the heavy rains have added to the already stagnant conditions, but it is hoped and expected that they will prove to be harbingers of more seasonable weather. Chrysanthemums are now arriving in great abundance, as are also roses; some good carnations, considering the season, are also arriving but as usual will probably remain in the background until the exit of the chrysanthemums. Numerous cosmos and dahlias are still coming in, also violets, large quantities of the latter going to the street peddlers. Orchids and gardenias, although comparatively cheap, seem to hold their prices a little better than other stocks.

NOTES.

Geo. Stumpp of Fifth avenue had the Demorest wedding decorations on October 22, also a dinner preceding the wedding on October 21 at the Metropolitan Club, at which the table center pieces were of white chrysanthemums and the favors gardenias. At the house and also an adjoining empty house engaged for the occasion the decorations were of southern smilax, oak foliage, white, pink and yellow chrysanthemums. At St. Thomas' church, on Fifth avenue, the same color scheme was carried out, while made-up palms over 30 feet high were also used. The bride carried a prayer book with a spray of orange blossoms and the maids bouquets of cattleyas and Dendrobium Phalenopsis. This firm sent a team and three men to the country for two days cutting autumn foliage for this decoration.

P. L. Bogart, Sixth avenue, had the Palmer wedding decorations on West Seventy-third street, October 26, which was one of the largest of the season.

The house decorations were of southern smilax and white and pink chrysanthemums, and at the Church of All Angels, where the ceremony took place, enormous quantities of smilax, palms and white chrysanthemums were used. The bridal bouquet was of white orchids and jasmine and the ten bridesmaids carried bouquets of Bridesmaid roses, the flower girls carrying baskets of My Maryland roses.

Thos. Young, Fifth avenue, has a very artistic display of cattleyas and spray orchids arranged in bamboo stands with cybotium ferns for a background in one window, and in the other a display of fancy varieties of chrysanthemums and autumn foliage.

At the auction sale of J. Weir & Sons, Brooklyn, the real estate was withdrawn and the good will of the business and option of a three-years' lease sold to J. Weir, Jr., for \$800, while the stock, horses, wagons, etc., distributed among about 30 bidders, brought fairly good prices. Wm. Elliott & Sons were the auctioneers.

Fleischman has leased two stores in the new Pennsylvania station at Thirty-fourth street, one in the ladies' waiting room, the other in the arcade. This firm will have a new auto delivery car, with a glass body, in operation in a few days.

The strike of the wagon helpers of the United States Express Co., commencing on October 22, was the cause of considerable annoyance to the wholesalers, all consignments via this company being very late in arriving.

MacMillan Co. of Greenwich, Conn., report an unusually busy summer. Mr. McMillan is desirous of meeting the members of the Greenwich Gardeners' Club at his store to discuss plans for the coming year.

A. R. Jones, with the S. S. Pennock & Meehan Co., of Philadelphia, is spending a few days here, looking after the affairs of their New York store during the absence of Mr. Rigby.

Joe Fennrich has issued a challenge to any member of the New York Florists' Club to bowl the best seven out of 13 games, for \$100.

Sam Enright, salesman for Wertheimer Bros., is in town again after a successful trip through the New England states.

Wadley & Smythe are doing their usual amount of decorations for this season of the year.

Orange, N. J.

The New Jersey Floricultural Society at its regular meeting October 14 decided to hold their sixteenth annual chrysanthemum show in Lindsley's Hall, 240 Main street, October 29, from 3 to 10 p. m. The silver cup donated by John R. LeCount of Maplewood, N. J., will be competed for with 24 cut chrysanthemums, six varieties, four flowers of each, not less than 18-inch stems. There will be 12 classes of chrysanthemums as well as classes for orchids, roses, carnations, foliage plants, flowering plants, violets, fruits and vegetables. Competition is open to all. An invitation was received from the Morris County Gardeners' Society to participate at their annual chrysanthemum show, to be held at Convent Station November 2-4. Lager & Hurrell, the orchid growers from Summit, had a nice display of orchids on exhibition, for which they received 90 points. Albert T. Larson, gardener for A. B. Jenkins, was awarded 95 points for roses. Frank Drew, gardener for Thomas Edison, 95 points for roses. William Reid, gardener for S. M. and A. Colgate, 70 points for roses. William Reid, 90 points for carnations and 85 points for white seeding carnation not yet disseminated. Max Schneider, gardener for Chas. Hathaway, carnations, 75 points. William Reid, Begonia Gloire de Lorraine, 90 points, and for Maranta Splendidum, 85 points. Certificates were awarded for the following exhibits not in competition for points: Chas. Ashmead, gardener for Mrs. Wm. Pierson, carnations; Albert F. Larson, roses and carnations; Frank Drew, roses; Max Schneider, chrysanthemums; Fritz Berglund, gardener for the Essex County Country Club, chrysanthemums and carnations. The judges were John L. Collins, Edward Echs, D. Kindsgrab.

We're Still Making Long-Distance Shipments, but Cold Weather is Almost Here—Place Orders Now

Not long ago we shipped a lot of Palms to Mexico, and since then another lot to Guatemala. While that's only one out of hundreds of orders we've filled this year—going to every corner of the country—still it shows the wide territory to which our Palms are adapted, and our splendid facilities for taking care of orders—whether for one Palm or for many, to go one mile or thousands.

If you get in a good little stock of first-class Palms right away, you can sell a number of them profitably during the next few weeks. A lot of folks would like to have them for winter decoration, and will buy if you give them the chance—but you must order quickly or it will be too late to ship with safety.

Busy as our season has been we still have a good stock and can fill your wants promptly. The Palms you'll get if you send to us, will be of the same high order we always supply—grown from the seed in our own houses, by experts, and possessing a distinctive quality that you can build a paying business and a solid reputation on.

Here are our prices. Write today; we'll ship promptly.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

MILWAUKEE, WIS.—W. Reid, formerly of Chicago, is now with Currie Bros., this city.

CHICAGO.—Prices on the board of trade October 26 for grass seed were noted as follows: Timothy, \$8 to \$9 per 100 pounds. White clover, from \$22 to \$27.

VISITED CHICAGO.—J. Chas. McCullough, Cincinnati, O., returning from California; S. F. Willard, of Comstock, Ferre & Co., Wethersfield, Conn., and Jesse E. Northrup, of Northrup, King & Co., Minneapolis, Minn.

BOSTON MASS.—Joseph Breck & Sons report that the bulb demand sets in most strongly toward narcissus and the stock is getting short.—Fottler, Fiske & Rawson Co. say the bulb business this year excels all previous records.—James Comont of Carter, Dunnett & Beale, London, Eng., was a visitor.—W. T. H.

DES MOINES, IA.—Charles N. Page and his wife were happily reminded of their twenty-fifth wedding anniversary by receiving a handsome silver tea service, the gift of the many employees of the store, greenhouse and warehouse of the Iowa Seed Co., and among other rich gifts were two handsome silver trays to accompany the tea service. The day was quietly observed at the Page home.

LINCOLN, NEB.—The Griswold Seed Co. has just started work on a new fireproof warehouse and office building. The structure will be of reinforced concrete, three stories and basement in front. The rear of the building will be 35x50 feet, five stories high with deep basement, equipped with dump scales, reinforced concrete bins and all modern machinery for handling corn, clover, alfalfa, grass and other field seeds. The building will be strictly fireproof and modern in every respect. The firm is doing the construction work with the aid of an experienced foreman and in this way finds it possible to make desirable changes as the work proceeds and save money. It is hoped, with the aid of this building, to take care of the concern's rapidly increasing business.

The Insecticides Act.

At the last session of congress a bill was passed known as the Insecticides Act of 1910, for preventing the manufacture, sale or transportation of adulterated and misbranded paris green, arsenate of lead and other insecticides and fungicides, for regulating traffic therein, and for other purposes.

A notice was sent out by the attorney for the Department of Agriculture calling for a public hearing October 20 at 216 Thirteenth street, Washington, D. C., of all persons interested in the bill. As the bill provides for the making of rules and regulations for its enforcement, a committee, composed of R. E. Cabell, commissioner of internal revenue, Charles Earl, attorney for the Department of Commerce and Labor, and George P. McCabe, attorney for the Department of Agriculture (chairman), upon assembling asked those present if they had any views to express on the law, so that the department may be guided by them in framing rules and regulations. As the committee had nothing to propose, there was an informal expression of opinion by various persons interested, the greater part of whose work consisted of the submitting of pyrethrum powder samples.

The intent of the law, as finally summed up, is to prevent the sale of bogus material and misrepresentation as to the effects of materials. The law goes into effect January 1, 1911.

BENJAMIN HAMMOND.

Rain Damaged Beans.

A good deal of interest has been shown in jobbing circles in all sections of the country over the situation in lima beans with direct reference to damaged stock as a result of the rains on the coast during the curing season. A circular letter issued by one of the largest factors in the trade refers particularly to the rain damaged beans and is in the nature of a caution to the jobbing grocers. In connection with this circular Frank A. Alpin, vice-president of the J. K. Armsby Co., said in an interview yesterday: "Our circular to the jobbing grocery trade reads that rain damaged goods will be recleaned, hand picked and polished, will have a very good appearance, but will be more or less soft. For this reason we cannot guarantee keeping quality. Lima beans harvested before the rain are guaranteed as to keeping quality."

Pieters-Wheeler Seed Company

Growers of

Onion,
Lettuce,
Radish,
Sweet Peas,
Etc.

Correspondence
Solicited.

"There is comparatively a limited quantity of stock harvested before the rains left on the coast. If this is true the large 'short' interest that has contracted with the merchant to deliver at a price, choice recleaned limas, will be obliged to attempt to deliver limas harvested after the rain, on contracts. This is a good game for the grower. It is a good game for the speculative 'short' seller if he can put it through, but as the keeping quality will be seriously questioned, and as the shrinkage will go on from day to day the buyer will not only face shrinkage, but the possibility of 'must' unless the beans are carried under exactly the right warehouse conditions.

"It is up to the buyer this year to be rather careful as to what beans he buys or accepts. The general buying market today on the coast for free from rain damage stock is \$4.75 to the farmer. Considering expense of handling, the fact that goods are sold payable on arrival at eastern points, thus putting upon the shipper the loss of interest, possibly of claims for shrinkage in excess of the custom of the trade, you will readily see would force the shipper to name price if he came out even of fully 5 cents for strictly free from rain damage beans coast.

"On the other hand, rain damaged stock will have to be sold for what it will bring based upon the amount of damage and willingness of the jobber to take the risk. The serious side of the question is the fulfillment of contracts already entered into by shippers for October shipment for choice reclaimed stock."—New York Commercial, October 8.

Imports.

During the week ending October 1, imports were received at New York as follows:

C. F. Meyer, 159 cases plants.
Vaughan's Seed Store, 154 cases plants, one case bulbs.
McHutchison & Co., 131 cases plants, 42 tubs laurel trees.
J. M. Keller, 48 cases plants.
H. F. Darrow, 27 cases plants, 35 pkgs. seed.
J. Roehrs & Co., 27 cases plants.
A. Rolker & Sons, 25 cases plants.
W. R. Huntington, two cases trees.
C. C. Abel & Co., 72 cases bulbs.
W. Elliott & Son, 34 cases bulbs.
Stumpp & Walter Co., 32 cases bulbs.
J. M. Thorburn & Co., 12 cases bulbs, 15 bags seed.
R. M. Ward & Co., five cases bulbs.
P. Henderson & Co., 3 cases bulbs.
H. Nungesser & Co., 100 bbls. grass seed.

To others 735 cases plants, 34 cases trees and shrubs, 314 tubs laurel trees, 161 cases bulbs, 300 bbls., 224 bags seed, 111 bbls., 21 bags grass seed, 300 bags clover seed.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

B. L. Watts, State College, Pa., President;
H. F. Hall, Grand Rapids, Mich., Vice-President;
S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.
Annual meeting at Boston, Mass., 1911.

FREMONT, O.—The sauerkraut famine threatened a month ago has been averted by the heavy rains of the last few weeks. Cabbage which was selling at \$10 a ton during the dry spell has dropped to \$3 a ton and is plentiful at that price. All the plants of this city, which is the American sauerkraut center, are working overtime.

The Potato as a Truck Crop.

The growing of the potato as a truck crop has assumed large proportions at the south, and Bulletin 407, issued by the Department of Agriculture, thoroughly describes the preparation and character of the soil; the seed, and the care and quantity used; the planting and cultivation; fertilizing, spraying, and harvesting of this large and valuable crop.

Market Gardeners' Convention.

The report of the vice-president of Illinois at the Market Gardeners' convention states that 75 per cent of the growers are organized in the northern part of the state, while in the southern and central parts the number varies. The produce is sold to consumers direct, to retailers and commission men and enumerates the various crops grown. The growers generally are satisfied with the returns but complain of poor crops. The use of commercial fertilizers, spraying as a remedy for fungus, and uniform packages is on the increase. While irrigation is being resorted to, the expense of city water is a drawback. The most helpful methods to be considered are: to form local organizations, to cooperate with state governments in disseminating horticultural knowledge, become members of the national association, adopt modern farm implements, cooperate with fellow gardeners, and teach your sons to be contented. There are 93 greenhouse establishments of one acre or more devoted to vegetables in Cook county and vicinity, in which the principal crops are lettuce, cucumbers, and radishes, the first named occupying 75 per cent, the second 15 per cent and the last named 10 per cent of the area. The average yield for 100 square feet of bed surface is 100 boxes (6x8½x17½) of lettuce and 39 53-100 dozens of cucumbers. The total for these establishments is 2,700,000 boxes of Grand Rapids lettuce, and 1,027,000 dozen of cucumbers.

Notes on Marketing.

Attention being the first step towards making a sale, goods prepared for market should be put up in such a manner that they attract attention. It is right here that many a grower loses without realizing it. A commission man recently showed the writer barrels of lettuce which were no doubt a number one article, but which were not stripped or cleaned, simply cut and

washed. The lower yellow leaves will decay in 24 hours after packing and give the whole lot an old appearance. Such goods will never command top prices. We have experimented a little along this line, by collecting all the strippings and weighing them and we find the loss to be very small, so small that we strip rigorously every tainted leaf. It pays us to do so. Another factor is washing in fresh cold water. Many growers are careless in this respect. They think any old water will do, forgetting that they are handling foodstuffs, and that the buyer is entitled to goods handled in a sanitary way. Barrels intended for vegetables should be provided with drain holes, and the first layer so placed that the holes are not covered, so any excess water can promptly drain out.

Radishes are much more difficult to handle. We grow the scarlet globe type only. These we pull and pick into bushel baskets in such a way that all the radishes are against the basket in a circle. When full the basket is taken to the packing room and upset upon a table. This will expose every radish to the stream of cold water from a hose and with good pressure they can all be hosed perfectly clean in a moment; they are then bunched and dropped into a rinsing tub to clean the foliage, after which they are at once packed. By this method we can put up a large quantity in very short order and have perfect appearance. Any drying before washing greatly impairs color of rad-

ishes, and makes any earthy adherence hard to remove. It is never good policy to pull radishes or cut lettuce during the warm hours of the day; any wilting is a loss which is hard to correct.

Parsley should be stood in water for a few hours after bunching, in such a manner that the stems only are immersed, much like cut flowers.

Every retail store should feature Crotons this Fall and Winter, and we know our stock will please you and your customers.

Dracena Massangeana

The variety with the golden stripe down the center of the leaf. This handsome plant is the best of all Dracaenas for the house. We have an unusually large stock, exceptionally well colored and of the very highest quality.

6-in. pots.....\$18.00 per doz.
7-in. pots.....24.00 per doz.
8-in. pots.....\$30.00 and 36.00 per doz.
9-in. pots.....48.00 per doz.
10-in. pots.....\$5.00 and \$6.00 each

Dracena Amabilis

6-in. pots.....\$18.00 per doz.
8-in. pots.....\$2.00 and \$2.50 each

Dracena Fragrans

Ready now.
5-in. pots.....\$5.00 and \$6.00 per doz.

Phoenix Roebelenii

This is unquestionably one of the great Palms of the future, combining the grace of a Cocos Weddelliana with the hardiness of a Kentia. It will prove an invaluable plant for the house. Our stock in the following sizes is unusually fine:

8-in. pots.....\$30.00 per doz.
8-in. tubs.....3.50 and \$4.00 each

Pandanus Utilis

Superb stock.
8-in. pots, strong plants.....\$18.00 and \$24.00 doz.

Boxwood Just Arrived

We have an unusually large stock of fine plants of all sizes.

For window boxes, 10-in. to 12-in.....15c, 20c, 25c each
Heavy stock.....35c, 50c, 60c, 75c each
Ball shape.....\$1.00, \$1.25, \$1.50 each
Heavy bush form.....\$1.00, \$1.25, \$1.50 each
Pyramids.....\$2.25, \$3.00, \$3.50, \$4.00, \$5.00 each
Pyramids, square shape, very handsome, in fancy tubs.....\$12.50 each

It will be well to place your order for above at once. We will hold same for future delivery or ship at once.

Araucaria Excelsa

5-in. pots, 4 and 5 tiers..\$9 doz., \$70.00 100
6-in. pots, 5 tiers.....\$12.00 doz.

Areca Lutescens

Our stock is in splendid condition.
Very heavy 6-in. pots, 3 plants, 32 to 34 in. tall.....\$15.00 doz.
Heavy 7-in. pots, 3 plants, 36 in. tall.....24.00 doz.
Heavy 7-in. pots, 3 plants, 40 in. tall.....30.00 doz.
Heavy 8-in. pots, 3 plants, 42 to 44 in. tall.....36.00 doz.
Heavy 8-in. pots, 3 plants, 48 in. tall.....3.50 Each

Bougainvillea Sanderiana

An exceptionally fine lot of shapely specimens at \$2.50, \$3.00 and \$3.50 each. These plants will command big prices when in bloom next Winter and at Easter.

Neph. Amerpohli

Philadelphia Lace Fern.

6-in. pots.....\$6.00 and \$9.00 doz.

Neph. Todeaoides

London Fern.

This variety we consider the best of the upright growing class.
2½-in. pots..\$5.00 per 100, \$45.00 per 1,000
4-in. pots.....\$20.00 per 100
6-in. pots.....\$6.00 and \$9.00 per doz.
8-in. pots.....\$12.00 per doz.
10-in. pots.....\$18.00 and \$24.00 per doz.
11-in. tubs.....\$24.00 per doz.

Neph Scholzei

This is an ideal crested Fern, holding the same position to all other crested varieties that the Scottii holds to the old Boston.
2½-in. pots..\$8.00 per 100, \$75.00 per 1,000
6-in. ¾ pans, heavy.....\$6.00 and \$9.00 per doz.
8-in. ¾ pans, heavy.....\$15.00 per doz.
10-in. ¾ pans, heavy.....\$24.00 per doz.

Neph. Elegantissima Improved

This variety is a greatly improved Elegantissima and shows no tendency to revert to the Boston. This will prove a valuable addition to the crested varieties.
6-in. pots, strong plants.....\$6.00 and \$9.00 per doz.

Neph. Elegantissima Compacta

A dwarf compact form of N. Elegantissima, each plant making an ideal shape. Our stock of the variety is large and of exceptional quality.

2½-in. pots..\$10.00 per 100, \$90.00 per 1,000
4-in. pots.....\$25.00 per 100
6-in. pots.....\$6.00 and \$9.00 per doz.
8-in. pans.....\$15.00 per doz.

Neph Scottii

Our stock in superb condition.

2½-in. pots..\$5.00 per 100, \$45.00 per 1,000
4-in. pots.....\$25.00 per 100
6-in. pots.....\$6.00 per doz., \$45.00 per 100
8-in. pans.....\$12.00 per doz.
10-in. pans.....\$18.00 per doz.
11-in. tubs, heavy.....\$2.00 and \$2.50 each

Asparagus Plumosus Nanus

2½-in. pots..\$4.00 per 100, \$35.00 per 1,000
3-in. pots.....\$7.00 per 100, \$65.00 per 1,000

Pandanus Pacifica

Very handsome plants.

11-in. tubs..\$2.50, \$3.00, \$3.50 and \$4.00 each

Cyclamen

This has been one of our specialties for over twenty years. This year we grew upwards of 50,000 plants. Our stock at this time is better than we have ever had it and sure to be a money maker for anyone buying now.

5-in. pots, heavy.....\$50.00 per 100, \$450.00 per 1,000
6-in. pots, very heavy.....\$75.00 per 100
We are also booking orders for Christmas delivery, plants to be exceptionally well flowered.

4-in. pots.....\$25.00 per 100
5-in. pots.....\$6.00, \$9.00 and \$12.00 per doz.
6-in. pots.....\$12.00, \$15.00, \$18.00 and \$24.00 doz.
7-in. pots.....\$2.50 each
8-in. specimen plants..\$3.00 and \$3.50 each

Gardenia Veitchii

Strong plants.

2½-in. pots, heavy.....\$8.00 per 100, \$75.00 per 1,000
4-in. pots, heavy.....\$20.00 per 100, \$180.00 per 1,000
6-in. pots, heavy.....\$50.00 per 100
7-in. pots, heavy.....\$9.00 per doz., \$70.00 per 100
The above will make grand stock for Winter blooming.

Begonia Gloire de Lorraine

We have the largest and finest stock of this grand Christmas plant in America and are in a position to ship plants the following sizes in full bloom at once:

6-in. pots, very heavy.....\$12.00 per doz.
7-in. pots, very heavy.....\$15.00 and \$18.00 per doz.
8-in. pots, very heavy.....\$24.00 and \$30.00 per doz.
These can be used to advantage during November.

Send us your sample order now, see the quality, and then mail us your Christmas order.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

National Nut Growers' Association.

The annual convention of the National Nut Growers' Association will be held at Monticello, Fla., November 1-3, with headquarters at the St. Elmo hotel. The first session will be called to order at 2:30 p. m., November 1. Hon. D. A. Finlayson will welcome the convention to Monticello. E. W. Kirkpatrick of Texas, will respond. The president's annual address and transaction of initial business will conclude the session. The second session convenes at 7:30 p. m., the same day. Reports of officers and several committees will be heard. Judge U. V. Whipple of Cordele, Ga., will read an important paper entitled "Why Pecans?" Prof. H. A. Gossard of Wooster, O., will make an address on nut growing in that state. Col. J. C. Cooper of Oregon is booked to lecture on "The Persian Walnut in the Northwest," illustrating the subject by use of stereopticon views.

The second day, November 2, will be given up to the examination of orchards and nurseries. Committee work will be given attention, and the Georgia-Florida Pecan Growers' Association will hold a business session. At 7:30 p. m. an entertainment tendered by citizens of Monticello will round up the busy day. The third day and the third session convenes at 9:00 a. m., November 3. Business and reports will receive attention. M. B. Waite of Washington, D. C., will furnish a paper on diseases effecting nut trees and Prof. M. E. Jaffa of the University of California, has for his theme, "The Nutritive and Economical Value of Nuts." The fourth session on Thursday afternoon, will be devoted largely to business growing out of the various reports assigned for this session. Dr. R. O. Graham of Bloomington, Ill., has promised a paper on "Feeding the Orchard." The secretary will give a historical sketch of the association. The report of the committee on standards and nomenclature is assigned to this session.

The closing session on the evening of November 3 will be varied but very important. Prof. Hutt of North Carolina will give a review of legislation affecting horticulture. C. A. Reed of the Department of Agriculture and chairman of the important committee on varietal adaptation, will make an interesting as well as valuable report. Election of officers and attention to all unfinished business will end the convention.

HENRY EICHHOLZ, Waynesboro, Pa

Dreer's Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of summer-flowering plants, and we are prepared to furnish many of the latter as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox

We would particularly call attention to the following *Three New Varieties* as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice:

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flowers; of dwarf habit,

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

PRICE: Any of the above three new varieties,
\$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

HARDY PHLOX.

General Collection of Hardy Phlox

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Aglac Adanson (Medium). Immense flowers, snow-white, with red eye.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish lilac; large, white halo.

Bacchante (Tall). Tyrian rose, with crimson-carmine eye.

Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.

Bridesmaid (Tall). White, with large crimson-carmine centre.

Belle Alliance (Medium). White, with large pure red eye.

Charles Sellier (Dwarf). Bright reddish-violet, with large white star-shaped centre.

Clara Benz (Dwarf). Lovely carmine-rose, with darker eye.

Colibri (Tall). White, with crimson-carmine centre; very late.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.

Champs Elysee (Dwarf). A very bright rosy magenta of an effective shade.

Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.

Caran d' Ache (Medium). Geranium-red, with old rose shadings and white eye; very effective.

De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.

Diadem (Dwarf). A fine dwarf pure white.

Danton (Medium). Scarlet, with pure red eye.

Etna (Medium). Crimson red, suffused with fiery red; cherry-red eye.

Edmond Rostand (Medium). Reddish violet shading brighter towards the centre, with an exceptionally large white centre.

Eugene Danzavillier (Tall). Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.

Eclaircure (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.

Frau Dora Ungeller (Tall). Crimson red; a strong free-flowering late variety.

Gruppenkonigin (Tall). Delicate pale rose mauve, with claret-red eye.

George A. Strohllein (Medium). Bright scarlet, with crimson-red eye; does not bleach.

General Giovannelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal; a pure red eye; very effective.

General Van Bentz (Medium). Scarlet, with rose shadings and crimson-red eye.

Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

PRICE: Any of the above General Collection, \$5.00 per 100; \$40.00 per 1000.

For a complete list of seasonable stock see our current wholesale list. If you have not received a copy it will be mailed to you on application.

Orchids

In great variety, established or unestablished at popular prices. Also materials of all kinds, such as Peat, Live Sphagnum, Orchid Baskets, etc. Write for special list and catalogue.
Lager & Hurrell, Summit, N. J.

Providence.
The warm weather the first of the week had a sluggish effect on trade which had fallen to almost summer conditions. Roses, carnations, chrysanthemums and violets never looked better with the growers about this section. The supply of carnations is steadily increasing and quality improving but the demand is poor. Roses are looking fine and healthy, and the prices only fair. Chrysanthemums are more abundant and in more variety, but the trade is very slow, although quantities are used at funerals and weddings. Violets of good quality are plentiful, but move slowly at low prices. Dahlias and cosmos are the only outdoor flowers and quantities of both of good quality are available. All green goods are over plentiful and enough of lilies, lily of the valley and gardenias to supply all demand.
The R. I. Horticultural Society held its monthly meeting October 20, Vice-President Thomas Hope presiding. Eleven were elected to membership. Chairman Hope announced that the subject for discussion was the Evening Bulletin tree campaign and the members indorsed the movement most

FERNS

Scottii, Scholzei, Whitmani, Boston. Six houses stocked with the choicest, were never better than this year, 5, 5½, 6 and 7 in. pots, 35c, 40c, 50c, 60c, 75c to \$1.00.

LEADER

in

Azalea Indica.

LEADER

in

Begonia Gloire de Lorraine, Kentias, Palms, Rubbers, Etc.

We lead you into wealth.

AZALEA INDICA.

Owing to the cold and wet weather this summer in Belgium and the large demand all over the world, Azaleas this year are very scarce and high in price. But in spite of all that, I want all florists to know that I have just arrived from Europe with the finest cargo of **Azalea Indica** obtainable in Ghent. My grower over there always looks after my interests and has reserved for me the cream of his 200 acre azalea field—my own pick.

When a cigarmaker smokes a cigar, what will he smoke? The worst? No. The fragrant aroma of his production will tell his customers what a fine cigar he makes. So do I. What I force for myself is surely good enough for you, as I send my customers the same kind I force.

Now is the time to force Azaleas for Christmas. What varieties will you take? Which ones will force well? Take my advice. There is the Deutsche Perle one of the best well known double whites; we have plants of these at 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Next, Simon Mardner double bright pink, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Vervaeana is so well known that there is no need to talk about it; big variegated rosy flowers, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Apollo single red varieties; it is a deep pink, much admired, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Dozen and hundred at the same price. How about Mme. Patrick? This is one of the earliest pink varieties, very scarce this year in Belgium and high in price; a few of this variety you must have. Price: \$1.00, \$1.25, \$1.50 to \$2.00.

For Easter forcing we have only the well known standard American market varieties, such as Mme. Van der Cruyssen, pink, very scarce this year in Belgium, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Niobe, double white, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Deutsche Perle, 60c, 75c, \$1.00, \$1.25 to \$1.50; Helene Thielman, light pink, \$1.00, \$1.25, \$1.50 to \$2.00; President Oswald de Kerkove, \$1.00 to \$1.50; Schuyveriana, \$1.00, \$1.50 to \$1.75; Emereuse of India, double variegated, 6 c. 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Professor Wolters, \$1.00 to \$1.50; Vervaeana, 60c, 75c, \$1.00, \$1.25 to \$1.50; Apollo, 60c, 75c, \$1.00 to \$1.25; Simon Mardner, 60c, 75c, \$1.00 to \$1.50.

Remember, small sizes of Azaleas are scarce this year in Belgium; therefore I had to buy mostly large sizes.

Rubber Plants, 6 in. pots, 35c, 40c and 50c. Asparagus Plumosus, 2½ in. 3c; 3 in. 5c; 4 in. 10c. Asparagus Sprengeri, 2½ in. 3c. Sago Palms, 6-7 in. pots, from 9 to 13 leaves, 10c per leaf. Cocos Weddelliana, 3 in. pots, 15c, 18c and 20c. Adiantum Hyb., 2½ in. pots, 5c; 3 in., 8c; and 4 in., 12c. Cyclamen Grandiflora, best strain, 4 in., 15c. Primula Obconica, best strain, 4 in., 10c; 5 in., in bloom 15c; 6 in., 25c. Primula Chinensis, 4 in. pots, \$10.00 per 100. We have an unsurpassed strain of **Solanum Multiflorum** (Jerusalem Cherries). Can offer only a limited quantity 3½ in. pots, strong \$5.00 per 100. Hydrangea Otaksa, pot grown, 6 in., 25c.

Cash with order, please. All plants must travel at purchaser's risk.

SONG—Welcome Home. Tune: "When Johnny Comes Marching Home Again."

When Aschmann comes sailing home again, hurrah! hurrah!
A warm hearted welcome he'll obtain, hurrah! hurrah!
The florists will gather from far and near
To greet his return with hearty good cheer;
For we'll all be glad when Aschmann comes sailing home.

He has sent us pictures of other lands, hurrah! hurrah!
He never neglects the jolly home band, hurrah! hurrah!
We will go to see the plants he has bought,
To serve us well the best he has sought,
Won't we be pleased when Aschmann comes sailing home?

A glorious sight we shall see this fall, hurrah! hurrah!
The best of Europe for each and all, hurrah! hurrah!
For size and health, for color and price,
We shall hold our breath, they'll look so nice;
We'll hustle and buy when Aschmann comes sailing home.

We hope his journey will pay him well, hurrah! hurrah!
He has bought for us what we may sell, hurrah! hurrah!
So I sing a song with a rich refrain;
We're heartily glad he is home again;
A cheer from all when Aschmann comes sailing home.

(Composed by some of his many florist friends.)

Remember, it is the wide awake man that is not afraid to invest a dollar that makes the money.

Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4 5-6 tiers 2-3-4-5 years old, 35c, 50c 60c, 75c \$1.00, \$1.25 to \$1.50 each.

KROESCHELL HOT WATER BOILERS

This Boiler has found great favor with the greenhouse trade throughout the entire country. The Kroeschell will develop more heat units per pound of coal consumed than any other form of construction.

More Kroeschell Boilers and Generators used for greenhouse heating than any other make.

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using—

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" **Detroit, Mich.**

TAUX D'ANNONCES DANS L'AMERICAN FLORIST.

Nos taux d'annonces sont \$1.00 (Frs. 5-15) par pouce, largeur simple colonne, \$30.00 (Frs. 154-50) par page de trente pouces avec escomptes sur les insertions consécutives, comme suit:

6 insertions.....5 pour cent. 26 insertions.....20 pour cent.

13 insertions.....10 pour cent. 52 insertions.....30 pour cent.

La place occupée par des annonces sur la première et la dernière couverture ne s'accorde que par contrat annuel au taux de \$1.00 (Frs. 5-15), net, par pouce. Faites remise par Mandat-poste international.

Ready Reference Section.

10 CENTS PER LINE, NET.

Less Ice With Better Results

The McCray System of Refrigeration, which insures a perfect circulation of cool, dry air will not only reduce your ice bills, but will keep your stock in the best condition—fresh, fragrant and attractive.

McCray Refrigerators

are made so as to display your flowers to the best advantage. They can be lined with white enamel, opal glass, tile, mirrors or marble to suit your convenience. Write for our beautiful free catalog No. 72 which shows refrigerators for florists, both stock and built-to-order in all sizes and styles.

McCRAY REFRIGERATOR CO.,
269 LAKE ST., KENDALLVILLE, IND.

Nashville.

The flower supply is not so plentiful as it might be, and a great many carnations and even roses are being shipped in from other places. Trade is good, however, in spite of a tight money market, of which many are complaining, and a slowness of collections. Chrysanthemums are coming in nicely now and there is a good demand. Violets are beginning to come but not so long-stemmed as they will be when the weather gets cooler. We are having fine weather. There has been no frost as yet, kept off by the dry spell, and all the growers have had ample opportunity to prepare for frost and cold weather.

NOTES.

McIntyre Bros. have their place in ship shape for the winter. Their fine range of houses are in neat and orderly condition, and roses, chrysanthemums and carnations have healthy foliage and growth and will produce fine flowers later in the season, though shy of blooms just at the present. They grow no American Beauties, but have a fine prospect for Richmond, Bridesmaid and Killarney and a few white varieties. Their houses are full and they are very crowded for room and will soon erect more houses for which the material is already on hand. To help relieve the situation and make more room they have built cold frames for bedding stock and such plants as do not require much heat. Their stock of poinsettias is fine, and they have always had fine sales on these bright blossoms. Coming on in splendid condition is a bench full of Gloire de Lorraine begonias that are unsurpassed and will fully repay the care given them. Another good pot plant, beautiful for the table or house, is the celestial pepper, of which they a fine lot. They are growing some stuff at the new place on the Tennessee Central railroad, but will not improve extensively there for the present. The need of those florists in or near the city limits is for more room, and they are getting out where the air is better, and more favorable to plant life and where they can grow.

Arnold Schmidt, who is in the heart of Waverly, a suburb, wants to move out further where land is not so valuable and more of it can be had. Mr. Schmidt has a fine lot of chrysanthemums and other flowers but he will not continue to grow flowers to any great extent, but will turn his attention more and more to fancy early vegetables. He has lettuce the year round and is now marketing lettuce, radishes and egg-plant. He has six houses 75x300 feet in lettuce containing 10,000

First Cost Should Not Be

the only consideration in

GREENHOUSE CONSTRUCTION

King houses are reasonable in cost and truly economical, for they are lasting, and easy of maintenance, and relieve the mind in time of storm.

Plan 87

You will not wonder we call this one of our ideal plans. Ideal because a palm house and wings with workroom at the back, joined by a connecting house, can't be beat for handiness and economy in distribution of the heat. It is an equal distance from either wing house to the boiler and the circulation in the coils can be evenly balanced. From any point of view this Plan 87 is attractive. Just how attractive is shown in the Advance Pages from our New Catalog. Send for them. Some of the illustrations are in color. Every Gardener or Superintendent should have it for reference.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Gladiolus.

In the spring of the year there is always demand for some flower that is a little novel, that is, one that the buyers have not seen all the winter, and the Gladiolus Colvellei makes a beautiful addition to the flowers at that season, serving either as a cut flower or in made-up work. The bulbs are cheap and occupy but little space and even if all do not sell, they amply repay for the cost of both bulbs and care. They can be procured in white and different shades of pink, and can now be purchased of any of the large bulb importers. They should be planted in boxes and as the foliage is very small can be set very close together, two inches apart being plenty of room between the bulbs. They should be placed in dark, cool quarters until the roots are formed and should then be given a location in a light, warm house. If in a temperature of 60° at night, they will be in bloom in April and May, and if grown cooler the season may be extended until June. Some growers plant these bulbs between the rows of carnations and flower them there. While we do not advocate this method, yet they make but little shade and come into bloom after the main crop of carnations has been picked.

Antirrhinums.

The beautiful sprays of antirrhinums have been a very valuable addition to the winter flowers and are grown extensively for all the larger markets. They make a very nice crop to follow the chrysanthemums, but if this practice is followed it is far better to remove about half the soil in which the chrysanthemums have been growing, and fill the bench up with a good compost. They are very strong growers and if the long, elegant spikes are desired the soil should be very rich. The plants that are intended for this purpose should now be in two and a half inch pots and growing nicely and should be planted into the benches as early as possible. They should be

staked and tied to keep them erect as fast as they grow, for if they are allowed to bend over the tips immediately start to grow erect and the stem becomes crooked. The white variety is the best and in most demand, but the yellow is also very popular, especially for table decorations and functions of all kinds. There is a very beautiful pink variety that is well liked in some markets but the reds and mixed colors are in but small demand. If the plants are grown from seed there are sure to be some plants that give a superior flower, or bloom much earlier than the others; these should be selected to make cuttings from and the stock for next year rooted and thereby obtaining a strain that is far better than that grown from any seed that can be purchased.

Lily of the Valley.

The importations of lily of the valley will soon begin to arrive, but if it is desired to force any of this beautiful little flower before the first of the year it is far better to purchase cold storage stock than to try to depend upon the fresh importations. While some growers claim that they get good results from the latter, yet the best growers nearly all say that the loss is too great to make it profitable and depend entirely upon the pips that have been in cold storage. If it is intended to grow a few pots for the holiday trade it is best to procure a supply of cold storage pips, cut off the bottom roots so that they will not be more than five inches in length, and plant closely in a six-inch pot in clear sand, from 18 to 25 in a pot. Fix a place where, by enclosing the steam pipes, a bottom heat of 80° to 90° can be maintained, with a sash or covering that can be raised to give ventilation and carry a temperature at least 10° lower and over this sash place covering of dark colored canvas or similar material and place the pots in the frame. The sand should be kept well saturated with water and where there

Autumn Number
Issued Next Week
Send Advs. Early.

is danger of the bottom heat receding with warm water. The pips should bloom in about three weeks and after the buds make their appearance be careful not to wet them, or they will spot. When the lower bells begin to open, the pots can be taken out of the enclosure and placed in a warm house in the sun that the foliage may assume a good natural color, but be careful not to place them where cool drafts will reach them.

Carnations.

The laborious work in the carnation houses is now finished and the work from now on is to keep the stock in a good, healthy, growing condition and picking the crop. Keep the young growths within their enclosures, and the beds free from all weeds and litter of any kind. It is early yet to begin feeding of any kind, but the early propagation should begin at once. In taking the cuttings, try and select the best. As we wrote some weeks ago in regard to chrysanthemums the vigor and constitution of the plants depend upon the selection of the cuttings and instead of taking every cutting that can be obtained select the plants that are producing exceptionally fine blooms and keep these cuttings by themselves and endeavor to build up a superior strain of a variety. While the growing of carnations from seed is "a snare and delusion" to a certain extent, yet a little play mixed into business relieves the monotony and a few blooms cross-fertilized now when pollen can be obtained will mature its seed soon after the beginning of the year and if then planted will take up but little room and will give plants that can be bloomed in the ground during the summer, and our experience has been that seed obtained when the plants are young and vigorous, gives stronger plants than seed that is cross-fertilized and gathered in the spring.

Callas.

The bulbs that were planted direct into benches in the late summer should now be in fine growth and beginning to produce flower buds. The calla likes plenty of heat and naturally grows in a wet, well-drained soil and requires

TABLE DECORATION OF ROSES AND ADIANTUM.

By Bohannon Floral Co., Chicago.

plenty of water. Those that were started in five or six-inch pots will now need a shift to larger pots or planted in a bench. The latter method will give the larger flowers, but in our experience the pot callas will, unless they get starved, produce the most blooms. If they are placed in the benches in which the chrysanthemums were grown, remove about half the soil and replenish with new compost, and if they are in pots and going to stand on this soil remove all but about an inch, or better still, remove it all and spread a layer of ashes or sand about an inch thick over the bench. To leave all the soil in the bench and place pots upon it only tends to get the old soil in a sour, soggy condition, that is detrimental to the plants standing upon it. All kinds of plants will grow much better if standing on a bed of sifted ashes.

THE RETAIL TRADE

IN the illustrated note entitled "A McCray Refrigerator" in our Retail Trade Department last week the address of the McCray Refrigerator Co. was inadvertently given as Kendallville, Ky., when it should have been Kendallville, Ind.

Table Decorations.

There is no better opportunity for the florist to exercise his originality and artistic temperament than in the arranging of the many table decorations that society demands during the winter season. This work is capable of being handled in so many different ways and shapes that it gives the designer a beautiful chance to not only please his customer but also make a most decided impression upon any one who chances to observe it. If possible, the florist should see the room or hall in which the table is to be arranged, and choose the flower, or at any rate the color, that will harmonize with the walls and fittings of the room. It is very possible that the customer will desire some certain color that may not be at all appropriate, and the florist must use all the diplomacy at his command, and fully explain how much more handsome some other arrangement will be.

But few general rules are to be followed, but there is one thing that should be always borne in mind, especially if the table is small and the guests are to be seated, that is, the arrangement of the flowers should be such as not to conceal the view across the table. If baskets are to be used for center pieces, they should be arranged low enough to allow those seated at the table to look over them, and if vases of long stemmed roses or other flowers are used they should stand high enough to look under them without having to move the head to converse across the table. In large

DINNER TABLE DECORATION OF SINGLE CHRYSANTHEMUMS.

TABLE DECORATION, POMPON CHRYSANTHEMUMS AND PLANTS OF PANDANUS.

tables this is not so necessary, but still it should always be taken into consideration. Large tables are capable of very startling effects, both in color and designs and as they are generally held in large dining halls in hotels the backgrounds are invariably in light colors or in single tones, and the choice of colors is not so much restricted but in the smaller decorations in the private homes and especially on tables of ten or less covers, the designer must be very much more careful. If the fittings of the room are dark, white, with plenty of beautiful greens, should be the selection, and where the dining hall is furnished in light colors, darker shades that will harmonize may be chosen. Very often, where the furnishings are very elaborate, the simpler flowers are more effective. We remember once seeing a table, that was in such surroundings, being decorated very simply with Garza chrysanthemums, and the boutonnières and corsages were of gardenias, the simplicity of the arrangement in the dark heavy surroundings was fully appreciated at once.

Handsome greens are always necessary to make a proper setting for the flowers, no matter what may be chosen and should always be selected with care and fitness to the flower that is to be used. A beautiful plant or cluster of plants can often be made very effective, but the whole matter of a table decoration depends so much upon its surroundings and the taste and personality not only of the designer but of the patron, that it is very difficult to make any hard and fast rules to govern them. Where more than one variety of flowers is to be used, those that appropriately mingle should be chosen. If exotics are to be used for the bouquets some choice or very simple flowers should be chosen for the center piece. Our illustrations show some very beautiful and effective arrangements of this class of work.

BURLINGTON, VT.—Mrs. C. E. Gore of Shelburne road will open a flower store on Main street.

A Hallowe'en Window.

H. R. Hughes, 1859 Van Buren street, Chicago, whose original and unique window displays have acquired such widespread notoriety, has this fall had a very effective window display entitled "Down on the Farm," in which the farm implements and products were nicely arranged and with the accompanying live stock of hens and ducks and two young porkers whose sportive ways caused considerable amusement to the admiring crowds that enjoyed the display. The store was handsomely decorated with boughs of autumn foliage, giving a country effect.

On October 31, he gave the children a Hallowe'en party. The illustration which we publish was one which Mr. Hughes issued upon a card on the back of which was the following story, entitled "The Witch of Hallowe'en":

"A long, long, time ago—more than a thousand years—there was a little village in the North of England, just on

the edge of a great forest. In the forest there was said to live an old witch who caused the people of the village much trouble by the tricks she played upon them.

"Sometimes she bewitched their horses or cattle and caused them to do all sorts of peculiar things, and once in a while some man or woman felt her influence and wandered off into the forest, never to be seen again.

"Now, one time this old witch decided upon a very terrible thing—to bewitch all the children of the village and lead them away far into the forest, where she would teach them witchcraft. So she flew around over the village one night, making signs over each house that had a child in it, and the next day, one by one, the children all slipped away into the big forest.

"The first thing the witch did, when the children were all in the wood, was to instantly turn them all into imps. Then she led them far into the thickest part of the forest, where the pot in which she brewed her witchcraft was always steaming and boiling, and set them to dancing around her, while she stirred her brew of witchcraft and prepared to teach them to do her evil work.

"You can imagine the grief and terror of the poor people of the village when they realized that their children were gone. Each mother supposed her own children were at a neighbor's house, until evening came on and none of them returned. Then everyone knew that the children must have gone into the forest, and that they would not have gone except at the call of the witch.

"Just about this time, however, a little fairy happened along, and, seeing what was taking place in the forest, waved her wand and drove the witch away. She then turned the imps back into children and sent them home to their parents."

In the evening the store was entirely cleared, and in one corner the witch, with the boiling pot hanging from the tripod and with fitting surroundings was located. The windows were decorated with jack o' lanterns and other Hallowe'en paraphernalia. A children's party from 8 to 10 o'clock was given by Mr. Hughes to some 50 children who enacted the story as told

TABLE DECORATION, LILY OF THE VALLEY ON TABLE AND FOR BOUQUETS.

upon the card and then enjoyed the balance of the evening in dancing. An orchestra and refreshments were provided for their benefit. The sidewalk and street in front of the store was so crowded with spectators watching the children and display that an officer was necessary to keep a passageway open for the teams and pedestrians.

WITH THE GROWERS

J. A. Budlong, Chicago.

About a half hour's ride in the electric from the center of the city in the district called Bowmanville are a number of growers of flowers for the wholesale flower market, and prominent among these is the large range of houses of J. A. Budlong. Among growers, both in the east and the west, the name of Budlong has long been associated with those who have been interested in producing crops under glass, early in the production of vegetables, but later in the growing of the more beautiful products of nature, flowers. This plant was started some thirty years ago by the late J. A. Budlong, and as has been stated, for the first few years was devoted to the growth of vegetables, but since the cultivation of flowers has been undertaken has been continually enlarged until it now ranks as one of the largest ranges of glass in the city. The larger part of the range is devoted to roses, and they are in prime condition. The Richmonds are carrying stems that vie with the American Beauties and a very promising crop for the holidays is assured. The Killarneys are now making their breaks for the winter production and the fine red foliage which this variety produces when growing luxuriantly is a sight well worth seeing. The American Beauties are in very fine condition, their long canes bearing luxuriant foliage. Other varieties which are in the pink of condition are My Maryland, Bridesmaid, Bride, Mrs. Marshall Field and Kaiserin Augusta Victoria, and give promise of a fine crop of excellent quality through the coming winter. A range of nine houses devoted to carnations were showing very fine growth and the flowers were of very high grade. White Perfection is a favorite and as it looked on our visit it well deserves the reputation for the plants were of splendid growth and very productive of excellent blooms. Other varieties noted were Enchantress, Pink Enchantress, Victory, O. P. Bassett Aristocrat, Afterglow, Winsor and Mrs. T. W. Lawson. They were all in splendid condition and an exceptionally heavy crop is pre-

dicted. One large house of chrysanthemums is a beautiful sight and producing a very fine grade of blooms of marketable sizes. All of the best commercial varieties are here to be found and a yellow Mdle. Clementine Tousez which sported here is grown in large quantities and meets with ready demand.

The manner of making and distributing the immense quantity of liquid manure in such an establishment as this is very interesting and economical and dispenses with a great deal of the laborious work which is ordinarily incumbent upon this necessary operation. A large wooden vat is built in the building in the center of the range, and into this the fresh

where it drops to the ground and is carted away, but the screen and force of water has so thoroughly washed out the stronger part that this residue is but a very small proportion of the original bulk of manure. When the liquid passes through the screen it runs into a large circular concrete vat, which is sunk into the ground, and from there pumped through pipes into the houses. After this vat has been emptied, a steam jet raises any sediment that may have settled at the bottom, and carries it back to the manure vat. The manuring capacity of this arrangement is unlimited, for, with two men, one to watch the large manure vat and the other to remove the residue, twelve houses can be furnished with manure water at the same time. Another very interesting accessory was the original soil or sod pulverizer, which tears and breaks and mixes with manure the large quantities of soil which are necessary in a greenhouse plant of this size.

The greenhouses are under the charge of A. H. Budlong, and the fine condition of all the stock is a fitting testimonial of his ability, and the product is marketed at the store, 37-39 Randolph street, where the amiable manager, Philip Shupp, watches the disposition of the immense output of this establishment.

Robert Scott & Son, Sharon Hill, Pa.

This well known firm has a long and honorable record for successful work in growing roses for cut flowers and in disseminating new varieties. Their work along these lines in the past is well known to the trade, so this article will deal mainly with their present enterprises.

During a few hours recently spent with Alexander Scott, who is the moving spirit of this firm, and a very active one at that, we were much impressed with the scope and extent of his work. As is generally known, this firm handles exclusively in this country the new rose production of Alexander Dickson & Sons, of Newtownards, Ireland. The name of Dickson and Hawlmark roses are synonymous, and when it is announced that Mr. Scott has received something new from them, all rose growers are interested.

Early in the coming year Mr. Scott will begin to disseminate the new yellow rose, Melody, a Dickson production. This is the finest yellow rose we have ever seen. Though none of the large stock now seen at the Scott range was planted earlier than the middle of June, and much of it as late as July 1, it has made wonderful growth and its productiveness is well established. The buds are large and the beautiful shading of the petals can

H. R. Hughes' Hallowe'en Card.

cow manure is thrown direct from the cart, the water is turned on and when thoroughly mixed the lower gate is opened and the mixture rushes out into a cylindrical screen about 10 feet long and three feet in diameter. This is constantly rotated by a water motor, the water from which, after furnishing the necessary power, is piped to the large manure vat. Inside the rotating screen is a spiral screw about three inches wide, made of wood, and as the cylinder revolves the residue is slowly turned toward the opening of the screen,

VIEW OF J. A. BUDLONG'S GREENHOUSES, CHICAGO.

only be fully appreciated when seen. Its foliage is a glossy green and is absolutely mildew-proof. Grown in the fields of Ireland, it is said of it that, among many varieties, it is the only one that has never shown a touch of mildew. It likes a cool temperature, about 58, and is decidedly a rose for winter forcing. The pink double sport of Killarney will also be disseminated from this range early in 1911. It sported in the Scott range and a large stock has been rapidly worked up. It is a shade lighter in color than

general appearance similar to the old and well known Morehead Return Steam Trap. In detail, however, the condenser trap differs from the return trap in the addition of a cold water connection made through a flexible tube with the tank of the trap. The flexible connection terminates in a perforated pipe inside of and running the length of the trap tank. In short, the condenser trap is nothing more or less than a combination of the principles of the jet condenser and the Morehead Automatic Return Steam Trap. Con-

the condensation from the return lines and the condensing water fills the tank, the latter tilts, opening the live steam valve allowing the steam pressure to enter and discharge the water contents into a return steam trap above the boiler or into an open heater. As soon as the water is discharged, the tank, containing the steam which is left after the water is discharged, resumes a horizontal or filling position. The tank returning to its horizontal position automatically opens the control valve on the cold water in-let and allows the cold water spray to come in contact with the live steam contained in the tank. This cold water condenses the steam and forms a vacuum in the tank of the trap which in turn performs the usual functions of created vacuum in heating systems of pulling the condensation from the lines to be drained. The cold water supply is furnished either from city water works or a tank or any other source that is available for that purpose. Particular attention is called to the fact that a surprisingly small amount of water is required in the condensing process.

A receiver is always used in connection with the condenser trap, the water seal in the receiver taking the place of thermostatic valves on the heating system. The condenser trap is used as the lower trap, taking the place of the return trap in the Morehead standard double trap installation, the lower or condenser trap discharging to the return trap placed above the boiler.

Greenhouse Heating.

ED. AMERICAN FLORIST:

I have two houses heated with hot water, one planted to lettuce and the other to carnations. The benches are three feet high and the pipes one foot from the ground. Would I obtain better results if the pipes were raised above the benches?

W. S.

The question does not state the nature of the difficulty or the reason for the proposed change. It is always desirable to have a portion of the radiation under the benches, and one of the principal reasons for running the pipes overhead is to improve the circulation. If "W. S." will furnish a plan and description of his piping it will be possible to give a definite answer.

L. R. T.

Killarney and much more double, with large buds and is as free a bloomer as the parent.

On returning recently from a six week's stay in Ireland, Mr. Scott brought back forty-two new varieties of roses for testing, and he is now erecting a new house 16x160 feet to be used exclusively for testing purposes. The King Construction Co. have just completed for him another new house 50x145 feet, which will be used for pot stock. Of the 200,000 square feet of glass in this range a part of it shelters 22,000 plants of Killarney roses in one block. There are three large houses of My Maryland, two of Mrs. Jardine and two of Kaiserin Augusta Victoria in addition to the large area planted with the new productions previously mentioned. There are six houses of gardenias and we have never seen finer stock. Three of these houses are 18x200 feet and three are 18x100 feet. The whole place is admirably fitted up; large vats of concrete, in which the manure water is prepared and screened, being noteworthy. Twenty-five hundred tons of coal are burned in a season.

The Morehead Condenser Trap.

A new method of draining exhaust steam and reduced pressure heating systems of both water and air, and with the same agent create a vacuum to insure positive and rapid circulation, has been devised, patented and put into successful operation by the Morehead Manufacturing Co., of Detroit, Michigan.

The new device is known as the Morehead Condenser Trap and is in

nected to the return line of vacuum heating systems where a difference of pressure is maintained between the ends of the system the line condensation and accumulating air is taken into the tank of the condenser trap as in the case of the return trap, but with the added pulling power of the vacuum created in the tank of the condenser trap.

When the steam is turned on in the heating system, the various lines of which are full of air, the cold water supply valve as shown in the sectional view of the trap is opened slightly. As

THE MOREHEAD CONDENSER TRAP.

CARNATION WHITE PERFECTION AT J. A. BUDLONG'S, CHICAGO.

Two New Roses.

The E. G. Hill Co., of Richmond, Ind., had on exhibition in Chicago, October 29, two roses that promise to be valuable additions to the varieties now under cultivation.

Rose Queen is a very beautiful flower of intense rose pink with yellow shadings at the base of the petals; it is so vivid as to be startling, reminding one of the color found in a perfect Caroline Testout, leaving nothing in the coloring to be desired. One of its strong points is its constancy of color, for it does not fade under the brightest sun nor turn toward blue with age. In form and size it is magnificent, the bud being long and shapely and very nicely pointed. E. G. Hill, who brought the blooms to this city, says of this variety that it is a very rapid grower with long stiff stems clothed with ample handsome foliage and produces bottom breaks very freely, and is quite free from both mildew and black spot, having an exceptionally fine healthy constitution and one with which any average grower will have no trouble in producing high-grade blooms.

Sunburst is a handsome yellow rose, the bud is of very good size and of beautiful shape. The color grades from a light yellow on the outer edge of the petal to a bright yellow and then to a coppery yellow at the base, making a very pleasing combination. The stems are exceptionally strong and straight and for a yellow very long, with very bright luxuriant foliage.

The Horticultural Society of New York.

The fall exhibition of this society will take place on November 9-13 at the American Museum of Natural History. Indications are for a large and interesting exhibition. Those who have exhibited here before know of the exceptional advantages offered at this institution for the display of exhibits, and of the ample space which can be allotted to each exhibitor. To those who contemplate exhibiting for the first time, it may be said that in this great building there is an abundance of room for all to make as large and effective an exhibit as they may desire. The floors are of stone, the ceilings high, the ventilation good, and the light, both day and night, excellent, all explaining the wonderful keeping qualities of the flowers noted by all visiting these exhibitions in the past. Each specimen can be given plenty of room, so that its beauties may be shown to the best advantage. Nothing destroys the beauty and artistic appearance of a fine specimen so much as crowding, trying to force a lot of material into small and cramped quarters. To appreciate the beauty of a specimen its individuality must appear. Then, too, the external surroundings of the American Museum, its location in one of the finest residential sections of the city, and its ease of access by numerous transit lines, appeal to all who have visited this Museum, one of the largest and finest devoted to natural history in the world.

Dutchess County Horticultural Society.

The sixteenth annual exhibition of the Dutchess Co. Horticultural Society was held in the state armory October 27. The display of orchids occupied a conspicuous place and were very extensive. Cedars were placed along the walls to make a background for the beautiful exhibits. The awards are as follows:

Chrysanthemums.

Chrysanthemums in pots, best 12 plants, distinct varieties.—William P. Clyde, New Hamburg (H. J. Osterhoudt, gardener), first; Archibald Rogers, Hyde Park (Thomas Conner, gardener), second.

Best six plants, six varieties, single.—W. P. Clyde, first.

Best group of ornamental and flowering plants, arranged for effect.—Saltford Flower Shop, first; Archibald Rogers, second.

Group of ornamental foliage plants, arranged for effect.—Archibald Rogers, first.

Group of Japanese chrysanthemums in pots to occupy 75 square feet.—Archibald Rogers, first.

Group of single chrysanthemums in pots, to occupy 75 square feet.—G. I. Hoyt, Staatsburgh (David Harrison, gardener), first.

Table of decorative foliage plants.—W. P. Clyde, first.

Specimen plant, asparagus, any variety.—Archibald Rogers, first.

Thirty blooms of chrysanthemums, six varieties.—Ogden Mills, Staatsburgh (James Blair, gardener), first; F. W. Vanderbilt, Hyde Park (H. J. Allen, gardener), second.

Six blooms, distinct varieties.—Ogden Mills, first; Osborne estate, Garrison (William Inglis, gardener), second.

Six vases, single chrysanthemums, 6 varieties.—W. P. Clyde, first; Osborne estate, second.

Cut Roses.

Collection of roses, three varieties, twelve each.—Valentine Burgevin's Sons, Kingston, first; F. W. Vanderbilt, second.

Twelve pink roses.—Burgevin's Sons, first; G. I. Hoyt, second.

Twelve white roses.—Stuyvesant Fish, first; F. W. Vanderbilt, second.

Twelve crimson roses.—F. W. Vanderbilt, first; Burgevin's Sons, second.

Carnations.

Twenty-five light pink carnations.—Burgevin's Sons, first; Ogden Mills, second.

NEW ROSE — SUNBURST.

Twelve blooms, white.—Mrs. J. D. Wing, Millbrook (Philip Bovington, gardener), first; Levi P. Morton, Rhinecliff (W. D. Robertson, gardener), second.

Twelve blooms, any color.—Levi P. Morton, first.

Six blooms, white.—Levi P. Morton, first; Stuyvesant Fish, Garrison (William McDean, gardener), second.

Six blooms, pink.—Stuyvesant Fish, first.

Six blooms, yellow.—Stuyvesant Fish, first; Levi P. Morton, second.

Six blooms, crimson.—Stuyvesant Fish, first.

Twenty-four blooms, distinct varieties, with stems 12 inches in length.—F. W. Vanderbilt, first; Mrs. J. D. Wing, second.

Twelve blooms, distinct varieties, with stems 12 inches in length.—F. W. Vanderbilt, first; Mrs. J. D. Wing, second.

Twenty-five red carnations.—Ben Willig, Poughkeepsie, first; Burgevin's Sons, second.

Twenty-five variegated carnations.—Saltford Flower Shop, first.

Twenty-five crimson carnations.—F. W. Vanderbilt, first; Saltford Flower Shop, second.

Twenty-five white carnations.—Ben Willig, first; Burgevin's Sons, second.

Twenty-four blooms, three varieties.—F. R. Newbold, Poughkeepsie (Fred Saenger, gardener), first; F. W. Vanderbilt, second.

Specials.

William P. Clyde prize, thirty-six blooms of chrysanthemums, twelve varieties.—F. W. Vanderbilt, first; Ogden Mills, second.

Mrs. Archibald Rogers prize, best twenty American Beauty roses.—F. W. Vanderbilt, first; Gerald L. Hoyt, second.

Irving Grinnell prize, for best arranged basket of chrysanthemums.—G. L. Hoyt, first.

Frank B. Lown prize, for best six plants Begonia Gloire de Lorraine.—Saltford Flower Shop, first; Mrs. J. D. Wing, second.

Mrs. Andrew C. Zabriskie prize, best twelve blooms White Killarney rose.—Burgevin's Sons, first; R. F. Newbold, second.

Winthrop Sargeant prize, for vase of twenty-five chrysanthemums, arranged for effect.—N. H. Cottam, Wappingers Falls, first.

Charles Mitchell prize, for best 100 double blue violets.—Ben Willig, first; Ogden Mills, second.

C. J. Reynolds prize, for private gardeners, fifty double blue violets in one bunch.—F. W. Vanderbilt, first; Archibald Rogers, second.

Julius Roehrs Co. prize, for best table of orchids and ferns in pots or pans.—F. W. Vanderbilt, first.

Arthur T. Boddington's prize, for twenty-five named varieties of vegetables.—F. W. Vanderbilt, first; G. L. Hoyt, second.

Nassau County Horticultural Society.

The annual fall show was held in Pembroke Hall, Glen Cove, Oct. 27-28. Chrysanthemums, of course, were the main feature, but what was noticeable all through the show was the interest taken by all visitors to the fine display of outdoor flowers. While the big monsters were greatly admired they only received a casual glance compared to the time devoted in looking over the different classes of outdoor flowers and single chrysanthemums, especially. Those last named are growing in favor every year, and as for outdoor grown chrysanthemums, a prominent Glen Cove lady said that if such fine flowers could be grown outside they could almost do without glass. A fine exhibit of pot grown dahlias shown by H. F. Matz, Glen Cove, was greatly admired. If plants in pots can be grown as successfully as those exhibited, dahlias have a great future in that line. Chrysanthemums were extra fine, and competition keen; in fact, I doubt if better blooms will be seen at any show this season. The judges were W. Turner, J. F. Huss and W. Scott.

Twenty-five carnations for commercial growers.—Chas. Webber, Rockville Centre, first; H. Matz, second.

Violets, single.—I. Reidenbach, first; double, H. Gant, first.

Best centrepiece.—J. Quinlan Roslyn, first; H. Gant, second.

F. Petrocchia was heaviest winner in the vegetable class. Others were R. Marshall, I. Reidenbach, I. F. Johnston, F. Johnson, F. Barton, V. Cleres, P. Reul, I. McDonald, S. J. Treppes. Collection outdoor flowers.—I. Reidenbach.

Chas. H. Totty, special, 36 blooms chrysanthemums.—A. McKenzie, first; J. Everett, second. Cottage Garden's special carnation.—W. Eccles, first; J. Duffie, second.

Burnett's special 25 chrysanthemums.—A. McKenzie, first.

Lager & Hurrell special, orchids.—R. Marshall, first.

Peter Henderson special, 25 blooms.—A. McKenzie, first; J. F. Johnson, second.

W. Marshall special.—H. Gant, first.

Vaughan special.—F. Petrocchia, first.

Webber & Don special.—J. F. Johnston, first; H. Gant, second.

Kitching silver cup.—A. McKenzie.

Lord & Burnham gold medal.—R. Marshall.

Butler special.—A. Matz.

Julius Roehrs special.—R. Marshall.

Stump & Walter silver cup. American Beauty.—V. Cleres.

Mrs. Brewster special.—A. McKenzie.

Glen Cove Echo special.—J. Everett.

Mrs. Smither silver cup, hardy chrysanthemums.—G. Ashworth.

J. D. Troy silver cup, roses.—I. Forbes, Jericho.

Rickard Bros. special.—A. McKenzie.

Mrs. Bucknal special.—J. McDonald.

M. Underhill special.—J. Reidenbach.

W. Weeks special.—V. Cleres, first; I. Everett, second.

Titus & Brown special.—A. McKenzie.

M. Shottwell special.—J. Everett.

M. Stapleton special.—I. Ingram.

Ron Arbor special.—I. McDonald, J. Everett.

H. J. Meyer special.—A. McKenzie, H. Matz.

Mrs. H. Pratt's silver cup, collection of fruit.—J. Everett.

Mrs. Byrne special.—F. Petrocchia.

H. Matz special.—I. Reidenbach.

Budds' special.—P. Reul.

O. E. ADDOR.

NEW ROSE—ROSE QUEEN.

E. T. Hulst prize, for best collection of named varieties of fruit.—N. H. Cottam, first.

Best named twelve varieties of apples.—F. W. Vanderbilt, first; N. H. Cottam, second.

Horatio N. Bain prize, best plate of mushrooms.—Austin L. Sands, New Hamburg (James Keeley, gardener), first; G. L. Hoyt, second.

Best twelve heads of celery.—William C. Bahret, Poughkeepsie, first; Walter Pavitt, Poughkeepsie, second.

Peter Henderson prize, for best twelve onions.—John Blakely, Poughkeepsie, first; A. Christmas, Poughkeepsie, second.

Best twelve named varieties of vegetables.—Walter Pavitt, first; G. L. Hoyt, second.

Basket of mixed flowers (for amateurs).—Mrs. Walter Pavitt, first.

Mrs. G. L. Hoyt prize, twelve pink Killarney roses.—Stuyvesant Fish, first; F. R. Newbold, second.

On October 28 the dinner table decorations were the feature, and the prizes were awarded as follows: H. G. Cottam, first; F. W. Vanderbilt, second.

Awards.

Group of Chrysanthemums, 50 sq. ft.—W. Eccles, first; A. McKenzie, second.

Group of ornamental plants, 75 sq. ft.—A. McKenzie, first; I. Ingram, second.

Best six distinct cut blooms, chrysanthemums.—I. F. Johnston, first; H. Gant, second.

Best six white.—A. McKenzie, first; R. Marshall, second.

Best six yellow.—A. McKenzie, first; James Marshall, second.

Best six pink.—R. Marshall, first; A. McKenzie, second.

Best six crimson.—I. Everett, first; V. Cleres, second.

Twelve pink carnations.—W. Eccles, first.

Twelve red carnations.—W. Eccles, first.

Monmouth County Horticultural Society.

The thirteenth annual chrysanthemum exhibition of the Monmouth County Horticultural Society was held at Red Bank Armory, October 26. The flowers were not as good as they have been in former years on account of the hot weather which has prevailed. The awards were as follows:

Group of chrysanthemums.—A. Freedman, Red Bank (J. Frazer, gardener), first; J. Young, Elberon (James Kennedy, gardener), second.

Bush plants.—F. Achelis (William Dowlen, gardener); J. Young, and J. Loeb (H. A. Kettel, superintendent), were awarded first prizes.

Group of foliage plants.—C. N. Bliss (W. Butterbach, superintendent), first; J. Murray, Elberon, second.

Specimen palms.—C. N. Bliss, first; M. C. D. Borden Estate (Wm. Turner, superintendent), second.

Foliage plants not palms.—M. C. D. Borden Estate, first; E. D. Adams (G. H. Hale, superintendent), second.

Six specimen ferns.—C. N. Bliss, first; J. Loeb, second.

Thirty-six blooms chrysanthemums.—M. C. D. Borden Estate, first.

Twenty-four blooms.—M. C. D. Borden estate, first.

Eighteen blooms.—J. Young, first; F. Achelis, second.

Twelve blooms.—F. Achelis, first; J. Young, second.

Six white.—C. N. Bliss, first; M. C. D. Borden estate, second.

Six pink.—E. D. Adams, first.

Six bronze.—M. C. D. Borden estate, first.

Six any other color.—C. N. Bliss, first; E. D. Adams, second.

Best seedling.—E. D. Adams, first.

Best vase arranged for effect.—E. D. Adams, first.

Best American Beauty roses.—Anton Bauer, first.

Best Bride roses.—C. N. Bliss, first.

Best Bridesmaid roses.—C. N. Bliss, first.

Best Golden Gate roses.—C. N. Bliss, first.

Best any other variety of roses.—C. N. Bliss, first.

Best vase of mixed roses.—C. N. Bliss, first.

Best light pink carnations.—J. Loeb, first.

Best white carnations.—E. D. Adams, first.

Best red carnations.—A. Freedman, first.

Best any other color carnations.—J. Loeb, first.

Personal.

Prof. L. H. Bailey will tell about "The Size of an Acre" in the Youth's Companion next year.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the Coleus Fanny Ross, by the J. W. Ross Company, Centralia, Ill., becomes complete.

H. B. DORNER, Sec'y.

October 27, 1910.

Ladies' Society of American Florists.

All members of the Ladies' Society of American Florists and visiting ladies to the St. Louis Flower Show, the week of November 8, are requested to meet at the Coliseum, Wednesday, November 9, for theater party and dinner at 6. Entertained by Ladies' Home Circle of St. Louis.

MRS. CHAS. M. MAYNARD,
Sec'y L. S. A. F.

Reporting Exhibitions.

To save time and trouble in reporting the awards at exhibitions, correspondents should adopt the one correct style throughout, which is given below on this sheet. It will be noted that the addresses of firms appear only once, that the addresses of gardeners of private exhibitors appear only once and that the awards follow (not precede) names of prize-winners. Referring to the time of any event, give the date of the month, not the days of the week.

AWARDS.

Cut Blooms—Chrysanthemums.

Fifty yellow—Chas. H. Totty, Madison, N. J., first, with Robt. Halliday; E. G. Hill Co., Richmond, Ind., second; Elmer D. Smith & Co., Adrian, Mich., third.

Fifty pink—Dailedouze Bros., first, with Gloria; E. G. Hill Co., second; Walter Hunnewell, Wellesley, Mass., (T. D. Hatfield, gardener) third.

Fifty white—Dailedouze Bros., Flatbush, N. Y., first, with Miss Virginia Poehlmann; Elmer D. Smith & Co., second; E. G. Hill Co., third.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Elmer D. Smith announces the committees to examine new chrysanthemums for the ensuing year which are as follows:

Boston, Mass.—Wm. Nicholson (chairman), James Wheeler, Alex Montgomery. Ship flowers to Boston Flower Market, C. Park street, care of chairman.

New York.—Eugene Dailedouze (chairman), Wm. Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., 55 Twenty-second street, care Eugene Dailedouze.

Philadelphia, Pa.—A. B. Cartledge (chairman), John Westcott, S. S. Penock. Ship flowers to A. B. Cartledge, 1514 Chestnut street.

Cincinnati, O.—R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott Flower Market, care janitor.

Chicago.—J. B. Deamud (chairman), Geo. Asmus, W. H. Kidwell. Ship flowers to J. B. Deamud, 51 Wabash avenue.

Shipments should be made to arrive by 2 p. m. on examination days to receive attention from the committee, must be prepaid to destination and an entry fee of \$2 should be forwarded to the secretary not later than Tuesday of the week they are to be examined or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees provided the raiser has given them two years' trial to determine their true character. Special attention is called to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 8, 15, 22 and 29 and November 5, 12, 19 and 26.

WORK OF EXAMINING COMMITTEES.

Chicago, October 22.—Roepke & Riemann Co., Indianapolis, Ind., exhibited No. 3-09, white Japanese reflexed, scored 78 points commercial scale; No. 64-09, pink, scored 74 points commercial scale. Elmer D. Smith & Co.,

Tarrytown-on-Hudson, N. Y.

Combining Beauty and Usefulness.

The New Haven railroad is now known as the "rose route" to New York, because thousands of rambler rose bushes have been planted along the sandy sides of its cuts and embankments. This was not done primarily to beautify the right of way, but in order that the rose bushes might intertwine and form a blanket to prevent the sand from rising as dust with the passing trains, and also that cohesion and permanency might be given to the sloping sides. The roses are planted in three rows, running parallel to the rails. They are not yet old enough to have formed the perfect blanket desired, but already a journey over the road is like one continuous saunter through a rose garden. The delights of travel there during the blooming season may well be imagined—a mass of green, a blaze of color, and breezes, dust-free and odor-laden. A happy combination of the utilitarian and the aesthetic this is, certainly, and it is a cheering evidence that industrial concerns are going in for such combinations more and more.

America has heretofore been too young to consider much else but the purely utilitarian, but now that wealth and advancement have reached their present stages, there is more time and opportunity for considering the aesthetic and the beautiful. Heretofore, factories and industrial plants and their surroundings were as ugly as possible, but now clean, sanitary and attractive buildings, premises and walks are provided and maintained with scrupulous care. They are considered business assets of real value. Formerly, in the erection of public and municipal buildings, railway stations and public service structures of all kinds, only the exactions of use were

EXTRA FINE HARRISII LILIES } Can supply them all the year.
 Once tried you will have no other.

Chicago.

GOOD BUSINESS

A week of beautiful seasonable weather with cool nights and pleasant days has improved the quality of the stock in all lines as well as the tempers of the dealers. Heavy frosts have ended all the outside stock for this year, and the market henceforth will be entirely dependent upon greenhouse product. Chrysanthemums are the ruling flowers and are to be seen in all forms and grades. The midseason varieties are now on the market and they are at their best, magnificent blooms of Col. D. Appleton, Major Bonnaffon, Timothy Eaton and its yellow sport, Golden Eagle and White Bonnaffon are extra fine and are bringing very good prices, but there appears to be a shortage of the pink varieties and very few of the reds or bronzes are seen at all. There are vast quantities of medium and small blooms on the market and on some days more than are in demand. The roses are in elegant shape and while the cut has shortened up considerably yet the quality has improved and there is no surplus but yet enough to fill all demands. American Beauty is in superb condition, some magnificent blooms being seen on 50 inch stems. Killarney and My Maryland are fine and the call for the latter from southern points is very large. This variety seems to stand the long shipments better than Killarney. Brides and Bridesmaid are a little short of the call which is received. Carnations are now in excellent condition and some extra fine flowers are to be found and good prices are the rule. Cattleyas are in beautiful shape and the demand has increased and better prices prevail. Sweet peas are improving and selling very well. Violets are much improved and are receiving much more attention bringing better prices. Bouvardia and gardenias are both to be obtained. Two holidays, All Saints' Day and Halloween caused more or less flurry on the market and the increased sales relieved the market of large quantities of good stock. While large shipments of extra good stock are daily received, yet there is no glut of anything and no great shortage, the market preserving a very nice balance. Show talk is heard on every side and great interest in the coming exhibition is being shown.

NOTES.

The stock at the Peter Reinberg houses is in excellent condition and

the rose cut is very heavy. The daily receipts at the store are from 2,500 to 3,000 roses. Killarney, My Maryland and Richmond are of very fine grade and the cut is very heavy. A very nice lot of Sunrise, something out of the ordinary, is being received and they are eagerly sought by the best trade for table decorations and extra fine work, the beautiful foliage being very effective. The carnations are now in splendid condition and beautiful blooms are daily received. The shipping trade is very large and increasing very rapidly.

Poehlmann Bros. Co. is cutting an unusually fine grade of roses. The American Beauties are grand. Some noble blooms on stems nearly five feet long were noticed this week. The Killarneys are extra long and of excellent quality, and My Maryland is particularly fine and a great favorite with their buyers, and an excellent grade of Perle were also seen. The chrysanthemums are in elegant form, the Timothy Eaton and its yellow sport being of extra fine grade. The lily of the valley still holds to the fine grade that has become noted.

A call at the J. A. Budlong store on Friday and Saturday last week found them working as hard as at the Christmas holidays. Their All Saints' Day shipments to the south were very heavy and kept all hands hustling. They were well supplied with a high grade of all kinds of stock. Chrysanthemums of all colors are in fine condition. Roses are extremely good, American Beauty and Killarney being excellent, and carnations are extra fine. They are also receiving a fine grade of home-grown violets.

A. L. Vaughan of Vaughan & Sperry has been visiting his growers this week and finds the stock in excellent condition. The houses at Newcastle are coming along in fine shape and an extra heavy cut is predicted for the holidays. A splendid assortment of chrysanthemums of all colors is now being received, and the rose cut is sufficient to meet all demands. Boxwood is of fine quality and is moving more rapidly with the weather turning cooler. An extra fine lot of orchids are now being received.

The E. C. Ambling Co. is the recipient of large quantities of splendid stock of all kinds. Chrysanthemums of a high grade of commercial blooms are daily arrivals in all the marketable varieties. The violets are of ex-

tra quality, some extra fine home-grown singles being noticed. The roses are of extra high grade. American Beauties are very fine and Richmonds and Killarneys are of extra quality. Some extra fine lily of the valley and sweet peas were noticed this week.

G. H. Pieser of Kennicott Bros. & Co. is still unable to attend to business regularly, being absent from his accustomed place more or less during the week. This concern is enjoying a fine trade and the stock is of excellent quality, roses and carnations of an extra good grade being daily received. An extra fine grade of chrysanthemums are daily arrivals, some fancy Ivory and White Bonnaffon being sent by George Bayer of Toledo, O., which are finding ready sale.

Percy Jones is now receiving from his growers an extra fine lot of chrysanthemums, the Major Bonnaffon and White Bonnaffon being especially good. The violets which he is now receiving are of extra quality and finding ready sale, being picked up by the buyers at a very early hour in the morning. The roses and carnations are of excellent grade and very satisfactory to his increasing trade.

The Raedlin Basket Co. is enjoying an unusual large sale of their baskets and urns and window boxes of willow, and the fancy pot covers are meeting with a great sale. They cordially invite all the visitors attending the show to make them a call and inspect the new and attractive stock which they have recently imported.

The Chicago Rose Co. is rushing the alterations on their store as rapidly as possible and they will occupy their new quarters in a few weeks. This company is handling some very fine stock of chrysanthemums, roses and carnations and an extra good grade of both white and pink sweet peas.

The regular meeting of the Florists' Club will be held at the Union Restaurant, Thursday evening, November 3, at 8 p. m. Much important business in connection with the flower show to be held at the Coliseum, November 8-12, will be taken up for consideration.

W. N. Rudd is making a tour of the agricultural colleges, east and west, in the interest of the Illinois College of Agriculture at Urbana.

H. F. Halle has moved to the old Fuchs place, Clarendon avenue, across the street from his old location at 1124 Sheridan road.

BASSETT & WASHBURN,

Office and Store:
76 Wabash Ave., Chicago

Greenhouses:
Hinsdale, Illinois

The J. B. Deamud Co. is having a splendid trade and the last week was a particularly busy one. The calls came so rapidly the latter part of the week that it was necessary to reshipe the stock in its original boxes, the arrangements being such that the orders could be filled without the stock having to be unpacked and reshipped. The chrysanthemums are of splendid quality and all lines of stock are of exceptionally fine grade. An extra fine grade of carnations is being received, especially White Perfection and Enchantress and some beautiful Pink Delight were noticed.

Schiller, The Florist, 2221 West Madison street, is enjoying a very busy season, on October 26 decorations for two elaborate weddings were arranged. In order to properly conduct the rapidly increasing business, 15 people are kept constantly employed as well as additional help when needed. The new Buick car, of which mention was made before in our columns, will be ready for delivery next week.

Bassett & Washburn are cutting an excellent grade of chrysanthemums with Timothy Eaton and its yellow sport showing up remarkably well. Roses are arriving in quantity and some especially fine Rhea Reids were very noticeable. The southern shipping trade has been very heavy, especially to New Orleans, La., where large quantities of flowers were used for All Saint's Day.

The Chicago Carnation Co. is receiving large shipments of chrysanthemums, roses, carnations and all other leading varieties of flowers. Business has been very good and the first shipment that arrived October 29, was disposed of immediately after reaching the store.

Wietor Bros. are cutting large quantities of chrysanthemums of exceptionally good quality. White and yellow Bonnaffon, Golden Eagle and Col.

==Chicago's Great Fall== Flower Show

D. Appleton have made their appearance and pompons in all the leading varieties were also very noticeable.

Frank Smith, of Smith & Fetters, Cleveland, O., on October 27, arranged the decorations at the Dangler home at Lake Forest, where an elaborate dinner took place.

Zech & Mann are handling a very fine grade of roses, carnations and chrysanthemums. Richmonds and Kill-

arneys are fine and Brides and Bridesmaid are of good quality. A shipment of extra fine Leucothoe sprays was received this week.

A. Stenquist, formerly of the Geo. Wittbold Co., has accepted a position with the E. C. Amling Co., and entered upon his duties October 24.

W. D. Desmond, of the L. S. Donaldson Co., Minneapolis, Minn., spent a few days of the present week in the city on business.

Peter Reinberg, 35 Randolph St.,
CHICAGO.

The quality of the stock from the new houses of Hoerber Bros. at Des Plaines is of the best and their daily receipts are now very large. The chrysanthemums are very fine, and a splendid grade of white, yellow and pink are constantly being received. The roses and carnations are now in excellent crop, the white and pink Killarneys are of extra grade and white Perfection, Enchantress, Beacon and Winsor carnations are remarkably good. A telephone order from New Orleans was received October 26, for an order for All Saint's Day which was promptly filled.

E. F. Winterson Co. is handling an exceptionally fine grade of chrysanthemums, some very beautiful blooms of Ivory, Pink Ivory and Major Bonnafon being noticed. The renovations in the flower department that have been in progress for the last few weeks are now completed and the doors set with double glass are a great improvement.

The extra fine line of orchids that Charles W. McKellar is receiving are finding a very ready sale and he is having no difficulty in disposing of them at very good prices. The cattleyas which are now coming in are extra large and of beautiful color, and a fine assortment are being regularly received.

A number of friends and relatives of William Starrett, the obliging salesman of the Chicago Carnation Co., assisted him and his wife in celebrating the sixth anniversary of their wedding at their home on Cottage Grove avenue, October 31. It was a most enjoyable occasion for all who were present.

Wm. Harbitz, formerly with Edward Palmer, opened a retail establishment at 3437 West Chicago avenue, November 1, and intends to build two greenhouses 25x50 feet in the spring. Mr. Palmer and wife, who expect to spend the winter in the west and south, will assist Mr. Harbitz in the store.

E. H. Hunt recently received a shipment of 22 cases of Japanese baskets including all the latest designs of reds, greens and browns. The supply department is well stocked and this firm is now ready to fill any and all

ORCHIDS A SPECIALTY.

orders which may be received for anything in this line.

A. L. Randall Co. had on exhibition October 28 a vase of the new rose Hilda, a sport of My Maryland, which was forwarded by Myers and Samtman, Chestnut Hill, Pa., the originators of this variety. This concern is the western agent for this rose.

J. E. Schaeffer, manager of the McNeilly Floral Shop, 1153 E. Sixty-third street, is wearing a very smiling countenance and the recipient of many congratulations, all caused by the visit of the stork to his home. It's a girl, and mother and baby are doing finely.

George Reinberg is cutting very heavily in all lines of stock and of a very high grade. Some extra fine Killarney and Richmond roses are being received. Mr. Reinberg returned this week from a business and pleasure trip of ten days to South Dakota.

Trade at the Geo. Wittbold Co. is very good, the call for all decorative plants being large. The Boston ferns are in great demand and the sales this fall have been very satisfactory.

J. B. Opitz, 3626 Cottage Grove avenue, arranged the decorations for the annual banquet of the German Medical Society at the Bismarck Hotel, which was held October 29.

Robert Groves and his daughter, Blanche, of Adams, Mass., made the city a flying business trip last week. Mr. Groves is a large shipper of ferns to this market.

John Starrett is kept busy at the Hotel La Salle with the large number of table decorations at the many banquets at this noted hostelry.

John Kruchten is offering an excellent grade of white and pink Bouvardias and reports the demand for same to be exceedingly heavy.

Joseph Mendel, West Eighteenth street, democratic nominee for county commissioner, is very busy campaigning for the coming election. Mr. Mendel is the only retail florist in the county that is running for office and is looking forward to the support of his brother florists on November 8.

The Florists' Club bowling league will give a grand ball at the Coliseum Annex Friday night, November 11. The management have left nothing undone to make this the social event of the season and a good time is promised to all who attend.

Argeson & Papatony, the Masonic Temple and Briggs House florists, report a very busy season. Both stores are located in the business district of the city, where a splendid transient trade is enjoyed.

John P. Risch has been greatly missed from the store this week, being reported as very sick and at the St. Francis Hospital.

Frank Oechslin, 4911 Quincy street, recently received a large shipment of azaleas.

Visitors: E. G. Hill, Richmond, Ind., W. D. Desmond of the L. S. Donaldson Co., Minneapolis, Minn., Frank Smith of Smith & Felters, Cleveland, O.

Chicago Bowling.

The Orchids are in the lead and have won eleven and lost four games, the Carnations are second, having won eight and lost seven of the games played. The Violets remain in third position and have won six and lost fifteen games, the Roses are last and have won five and lost ten games. Allie Zech has the highest individual average for the games played this season, with T. C. Yarnall a close second. The following table shows the individual and team scores for games played October 26.

Milwaukee.

Now that the out-door stock is completely frozen, it will no doubt improve the condition of the market. The receipts for the latter part of the week were much lighter, and with an increasing flow of business, the market is commencing to ease up considerably. Carnations were plentiful the forepart of the week, and some were sold at low figures, but towards the end of the week the price became normal. Roses were quite plentiful especially Killarneys, which did not clean out as readily owing to the large quantity of chrysanthemums, mostly of the common grades, which were also a drug on the market. Violets are improving each day in quality and are selling quite readily. Easter lilies are again plentiful, and American Beauties have shortened up considerably.

NOTES.

The Cup presented by Harry Balsey, of the Detroit Flower Pot Manufactory, will be exhibited at the different retail flower stores. This will be the prize for the best 100 blooms sweepstakes, meaning the best 100 blooms to be selected from the winners of classes 43 to 47 inclusive. This prize is certainly worth while going after, as the cup is a beauty.

Entries for the show are coming in on every mail and there no doubt will be quite a number of exhibitors and every one can help the committee along by sending in their entries at once. The committee in charge are working strenuously getting things in shape for our big show in the near future.

Miss Effie Harper Currie, daughter of W. Currie, and E. Franklin Wythe, of Cambridge, Mass., were married October 27, at the home of the bride's parents, and intend making their future home in Cambridge, Mass., where Mr. Wythe has an undertaking establishment.

WIETOR BROS., 51 Wabash Ave., Chicago.

Miss Weigle announces having sold her stand at the Pfister Hotel to Walter M. Droppers of the Loveland Floral Co. Miss Weigle expects to work in one of Milwaukee's leading retail stores.

Edlefsen & Leifiger Co., report cutting a large amount of chrysanthemums and carnations which are selling well. They report business fair.

W. C. Zimmerman reports business satisfactory, having a large number of funeral orders during the past week.

G. H. Hunkels Co. was fortunate in not having more damage in a fire which occurred in several adjoining stores.

Manke Bros. Co., of North Milwaukee, are cutting some fine Enchantress carnations.

J. P. Sherrer reports business very satisfactory and is kept busy with both candies and flowers.

Visitors: Martin Reukauf, H. Bayersdorfer Co., Philadelphia.; Desmond, of L. S. Donaldson Co., Minneapolis, Minn. G. R.

Cleveland.

HEAVY FROSTS.

The frosts the past week have without a doubt sounded the death knell of all outside flowers in this vicinity. Besides heavy frosts, snow fell in considerable quantity and cold sharp winds have been blowing almost continuously. The dark stormy weather has also shortened the inside crop considerably, especially in carnations, which have fallen off very much. Chrysanthemums are in better demand and the supply about equal, except in yellow, which color is a little short. Some excellent Col. Appleton and Robert Halliday are finding a good market, but white are the most plentiful. Roses are still in good supply with fair demand and violets are having a good call just now. Lily of the Valley is plentiful, but not much in demand and orchids are having a fair call. Good southern smilax and fresh boxwood are now in. Greens of all kinds are plentiful.

NOTES.

The boys from Alliance and Salem, Ohio, will be up to Cleveland on Saturday, November 5, to play the florists of Cleveland a bowling game, which will take place at Schwartzberger's alleys on Sheriff street, opposite the old Market House. All are invited, as a good time is assured and some fancy scores are expected on both teams.

The Lamborn Floral Co., Alliance, are cutting a fine lot of Col. Appleton chrysanthemums, besides many other varieties in all colors.

F. C. Bartels and A. M. Coe of North Olmstead, are cutting a fine lot of chrysanthemums and some high grade carnations at present.

Knoble Bros. had a small fire in the rear of their store and greenhouse; damage was slight. C. F. B.

We Have a Full Line of Everything in Cut Flowers

St. Louis.

At last we have had a real frost, the early part of week was warm, but Thursday there was a change, and outdoor flowers are gone. Trade, however, is very dull. Chrysanthemums are now crowding carnations, and violets are slowly improving, considerably. Fancy chrysanthemums are being held for the show. A few sweet peas are in but do not cut any figure in the market at present.

NOTES

Arthur E. Beyer and Louis Geiger, have left the employ of Grimm & Gorry and have gone to Chicago, the former having accepted a position with Schiller, the Florist.

Trustees of the Florists' Club have arranged to entertain visiting florists during show week, after the regular meeting, with a spread and automobile ride to the show.

Geo. Fenshol, foreman at H. Baternmann's is cutting some nice white chrysanthemums which he consigns to the W. C. Smith Wholesale Floral Co. The show windows of the Kelley Floral Co. have a grand display of gold fish and blooming plants.

The Bentzen Floral Co. advertises in the local press a special sale of chrysanthemum plants.

Bassett & Washburn of Chicago are shipping considerable stock to this market.

Jos. Hauser is cutting some fancy violets. His crop is taken by F. C. Weber.

The Riessen Floral Co. have been very busy with funeral work.

Heavy Supply of Roses - Carnations - 'Mums

Our stock is in exceptionally good condition, and if you want to please your customers you should place your order with us immediately for

Beauties, Maryland, Jardine, Richmond, and Pink and White Killarney **Roses** They are sure to give satisfaction. None better in the market.

Violets. Fragrant home-grown singles, you will find these hardy enough to stand long distance shipments. Can also supply the New York or Hudson River Violets, but only at buyers' risk, owing to the reason that they require several days to reach here.

Carnations. All the leading varieties. You will find them to be large sized flower and long stem grade, and of a quality far above the average to be seen in this market. **Try them and be convinced.**

Chrysanthemums. Pink, White and Yellow in large quantities. Chrysanthemums of the Pink variety have been scarce, but we are again cutting some choice blooms from the late sorts.

Plenty of other Seasonable Stock.

RAIN AND FROST.

At last after months of weary waiting and anxious forebodings, we have had in this territory a rainfall, not heavy, but sufficient to give heart and encouragement to the cultivators of the soil, and to give relief to some extent to the anxiety over the waning water supply for the city and suburbs. The farmers, who have been unable to plow and to seed their fall grain have been enabled to go to work and the gardeners to make amends for the enforced idleness which has been the result of the severe and long continued drought. The precipitation was about .80 of an inch, a more abundant downpour than has been experienced since the month of June. The fall has been one of unusual features besides its dryness. Up to October 22, summer vegetables were being gathered from the truck patches and gardens, and the markets are filled with all kinds of hot-weather products, such as tomatoes, egg-plants, peppers, lima beans, etc. These, with the commingling of the usual fall sorts, make a very attractive and varied display. The first frost was encountered near Baltimore on the night of October 23, the mercury going down to 35°. There was no killing frost until the morning of the 29th. The usual outside flowers have been much less in quantity and far inferior in quality, as a rule, to ordinary seasons, and in a great measure if not entirely to lack of rain, flowers, fruits and vegetables, all, seeming to fail to develop without the adequate moisture for absorption by the roots. As a consequence, there was somewhat more of a summer demand for greenhouse stuff, and, all things considered, trade may be reported as "fair to middling." October has been a notable month for weddings, quite surpassing the usually more favored month of June, and

there have been some very pretty decorations, demanding the very finest flowers and the most expert handling. Indeed, in this community, there seems a growing tendency toward the use of more select material and the exercise of refined taste and the nice adaptation to its particular expression of feeling to the occasion being celebrated rather than exorbitant quantities put together with less artistic thought and feeling. This holds true of funerals as well as of weddings and other joyous occasions. Some recent funerals here have been distinguished by the fine taste displayed in the memorial offerings, and the high class of flowers, orchids being conspicuous. It looks as if the coming local social season will be one of unusual activity and gaiety, the lists of the debutantes which are published by the daily papers exceeding in length those of several preceding years. The first german which opens the season is at hand and for one day at least the florists may expect a slashing business in the loveliest and most expensive flowers. This is the occasion where every debutante expects each admirer and family friend to send at least one bunch of orchids, American Beauties or Lily of the Valleys to help launch her into the sea of fashionable society.

NOTES.

Martin Lohr, of the firm of Lohr and Fritze, rose growers, of the Frederick road, acquired last summer a handsome automobile, and occasionally gives his friends a test of its speed and comfort. The two partners with John J. Perry and George Morrison, went down October 25, to the Maryland State Experiment Station, almost at the gates of Washington, making the roundtrip in quick time, and seeing all the sights at the Station.

The veteran, John Cook, rosarian and dean of the trade of this community,

contemplates spending next winter, as he did the last, amid the balmy airs of Florida, which he finds suits the conditions of his health. He has escaped so far the twinges of rheumatism, which changeable weather brings, but thinking precaution better than cure, he with Mrs. Cook, will be off for the south about the latter part of November.

Boyd G. Merritt, of Grange, Baltimore County, a young florist who is developing fine skill and building up a model establishment where he is growing (besides carnations) about the only American Beauty roses now produced around Baltimore, and good ones too! Last week he took to himself a bride, Miss Mary Sparks, and has the congratulations and kindest wishes of his friends in the trade.

The last meeting of the Gardeners' and Florists' Club was well attended. The mayor and other city officials made addresses urging the members to vote for the proposed loans for public improvements which are to be submitted to the popular vote. Unfortunately for the strength to be gained by this effort, more than three-fourths, probably, of the members are voters elsewhere than in the city.

It is reported, apparently semi-officially, by one of the daily papers, that Charley L. Seybold, one of the local park superintendents, who has had several encounters with the general superintendent and the Park Board on questions of policy, etc., will now be retired, the board taking the position that filing of charges against that body by a subordinate cannot be tolerated.

A neat greenhouse belonging to Miss Mary Sloan, at Lutherville, Baltimore county, was destroyed by fire, the loss being total, due to the scarcity of water. The building will be restored and probably enlarged.

BUSINESS IMPROVING.

A more settled state of affairs in the flower world of this city can be reported this week. A hard freeze took away everything outside and the effect was at once noticeable on the market. American Beauties, roses and violets which have severely felt the pressure of outdoor stock are now moving freely. Naturally chrysanthemums are still the big show, a much better demand being experienced on these. Valley is still in under-supply.

NOTES.

A bright spot among the window decorations this week was that of the Penn avenue store of Randolph & McClements, Henry Klunders in charge. It is a Halloween affair, consisting of corn, pumpkins, bark, etc., arranged in a farm scene, the whole set off by a lot of well arranged bronze pompon chrysanthemums.

The Florists' Club met Tuesday evening, November 1, the subject being chrysanthemums. A very fine showing was made by the private gardeners, prizes being awarded in this class.

Howard Carney of J. B. Murdock & Co., has entered the contest for one of the automobiles offered by the Pittsburg Dispatch and asks all his friends to help him out.

W. Q. Potter, of the McCallum Co., has been away several days on account of sickness. A new addition to the store force of this company is John A. Martin.

Joseph Thomas, Greensburg, is disposing of several houses of ferns which are known all over this territory as the "Thomas" Brand which means "best."

The A. W. Smith Co. bought all the small and medium chrysanthemums in sight for their Halloween dollar boxes.

Up the Monongahela River we find Jos. Haube, Charleroi, and A. L. Linn, Lock No. 4, on the sick list.

Ernest Zieger has taken the Mergenthaler place, on East Washington Lane, Germantown, Philadelphia.

J. G. Neville, East Liverpool, Ohio, states that he is putting up more glass.

"THE BUSIEST HOUSE IN CHICAGO."

"WHEN in Doubt, Lead Trumps." It will be a trump card everytime if you send us a trial order. Be sure and get our weekly trade letter. It will keep you thoroughly posted on the market.

J.

Albany, N. Y.

At the last meeting of the flower show committee of the Albany Florists' Club, W. C. Gloeckner of the judges' committee presented the acceptances of five men who will pass upon the exhibits in the state armory, November 10-12, including: Edward J. Norman, Erskine Park, Lenox, Mass.; Alfred H. Wingate, Allen Winden, Lenox, Mass.; T. J. Totten, Saratoga Springs, and J. R. Fotheringham, Tarrytown, N. Y. A very handsome cup, suitably engraved, was on exhibition and will be the prize offered by the Florists' Club for the best decorated booth. Chairman Frederick Goldring, F. A. Danker, William C. Gloeckner, and Thomas B. Snare had enthusiastic reports to offer on the show at Lenox, which they attended a few days before and were able to announce that they had seen a number of growers there who promised to make some interesting exhibits at Albany. It is expected that several of them will come over with chrysanthemums and orchids. Lenox certainly filled the Albanians with enthusiasm and they are talking yet about the magnificent groups of orchids, the large ranges of private greenhouses in immaculate condition, and the prize vegetables which attain there an unheard of size. Many details incident to the closing preparations were attended to at the meeting and assigned by the chairman to various members for completion.

The funeral of David B. Hill, a former governor and United States Senator, on October 24, brought some notable orders to the local florists. The Democratic state committee purchased through Eyres a rectangular panel of large size in the center of which was a five-pointed star in violets, the Democratic emblem printed on the ballots. In the panel were 125 cattleyas. The New York state legislature ordered a large wreath of magnolia, lily of the valley and violets and many friends and organizations ordered bunches of American Beauties, chrysanthemums, and simple designs. F. A. Danker supplied for the Argus Company, publishers of a local newspaper in which Mr. Hill was interested, a wreath of galax and palms and also a number of other designs for friends in the city.

BETTER BUSINESS.

Business the past week was very quiet and seasonable flowers of all kinds accumulated accordingly. The biggest was in white roses and carnations. On October 28, the first killing frost of the season occurred and the following day buyers were more active than they have been at any time in the past two weeks. At this writing, October 31, there is a good demand and everything in the flower line is cleaning up nicely and let us hope that the spurt will continue indefinitely.

NOTES.

P. J. Olinger, Alex Ostendorf and Albert Sunderbruch have signified their intentions of going to Chicago to take in the chrysanthemum show.

Mrs. Henry Schwarz leaves November 1, on a visit to her brother, who is located at Birmingham, Ala.

B. J. Glins has accepted a position with Julius Baer. He will have charge of the new conservatory.

Do not forget the meeting of the bowlers at Finke & Craig's November 7, at 7:30 p. m.

Visitors: Sam Seligman, representing Wertheimer Bros., New York.; J. T. Herdegen, Aurora, Ind.; Victor H. Thomas, Augusta, Ky.; Wm. Gardner, New Castle, Ind.; Charles Weltz, Wellington; Robt. T. Groves, Adams, Mass.; James Burnett, Blanchester, S.

OSKALOOSA, IA.—Theodore Greeve is to add another greenhouse to his large establishment on North Ninth street.

WOOSTER, O.—The Ohio experiment station will open their greenhouses to the public November 6 and 13, that they may enjoy the display of chrysanthemums.

Buffalo.

The weather is very variable and flowers are coming in good. Chrysanthemums are getting better daily.

NOTES.

There is one in the business who would not let a little thing like a flower show bother him and that one is Edward Walther, who has charge of the receiving of all of the stock of W. J. Palmer & Son. There was a wedding on Wednesday evening, October 26, when Edward Walther and Miss Irene Bolza were united in marriage. The newlyweds are on a trip to New York and Boston and are not giving a thought to the flower show. They will be at home on Woodward avenue, Parkside, after November 15. The best wishes of the members of the

A good market, good stock, and satisfaction guaranteed.

Philadelphia.**COLDER WEATHER.**

The cold wave has struck us and struck hard. The night of October 29 was very cold for this season and it does not seem that much outdoor stock can have survived. There had already been a shortening up on account of cool nights, but this spell seems to put the finishing touch on dahlias. There will not however be much mourning. It has been generally recognized for some time that there was a surplus of stock on the market, and now the greenhouse products will have a clearer field. Business throughout the past week was not up to expectations. Saturday was a very fair day, but during the earlier part of the week business lagged. Nobody seemed able to make a definite explanation of the dullness, except that the people were not buying many flowers. Chrysanthemums, as a matter of course, have a large place, and there are many good ones now seen. It is also true that much very fair stock is selling cheap. No exceptions can be taken to the quality of roses, orchids, gardenias, carnations and other stocks now arriving, even though the chrysanthemums are the leading feature. There is a fair movement in ferns and rubber plants.

FLORISTS' CLUB MEETING.

The regular monthly meeting of the Florists' Club was held at Horticultural Hall on the evening of November 1. The attendance was large and the meeting very interesting and instructive. In the absence of President Heacock, who is in the midst of a strenuous political campaign, being candidate for state senator, Vice-President Burton occupied the chair. Robert Craig addressed the club and in an eloquent and feeling manner, outlined the character and life work in horticulture of his departed friend and fellow member, William K. Harris, and in behalf of the Harris family, presented to the club a fine crayon portrait of Mr. Harris. John Westcott followed and spoke on similar lines, paying tribute to the worth of their departed member. Thomas B. Meehan delivered a very interesting address on the care and pruning of shrubbery. He had specimens of various evergreen and deciduous trees with him and with his pruning shears illustrated the best methods of pruning and trimming the same. Propositions for membership were received from Mark Mills, William K. Harris, Jr., and J. S. Prince. The following committees were appointed: Club room: David Rust, George Craig, John Westcott and Fred Hahman. Games: D. T. Connor, William Robertson, John Dodds, Nicholas Moore and W. R. Huttenlock. Membership: Henry F. Michell, W. E. McKissick and Arthur E. Niessen. Es-

and one funeral order was a casket cover of violets and lily of the valleys with a shower wreath of orchids.

Welch Bros. report a very busy week and called attention to their superior method of packing, which insures the arrival of flowers at long distances in perfect condition.

Galvin's window has been resplendent with orchids.

Pierce Bros. are sending in some grand Timothy Eaton chrysanthemums.

Sons, of Hatboro. The American Rose and Plant Co., of Springfield, O., exhibited a promising sport of Nephrolepis Bostoniensis.

NOTES.

Among the many good things seen at the range of the Robert Craig Co. are about 15,000 begonia Gloire de Lorraine, Glory of Cincinnati and a very promising sport of the Lonsdale begonia. Their Ficus pandurata, palms and ferns continue to be great attractions.

Frank Myers, of Myers & Samtman, was in the wholesale district last week with samples of two new roses, a pink and a yellow, which are being grown at his range.

At his retail store on Chestnut street, Robert Kift is showing very attractive features in decorative boxwood plants.

Boston.

PRICES DEMORALIZED.

Prices at the markets the past week have been demoralized. The stalls are overflowed with fine stock and the buyers had the advantage. And so it will be till the chrysanthemums get by. The season has been such that while this flower was having its inevitable effect, roses and carnations were also running a race with themselves to overstock the market still more. The florists have had a good week. Weddings and funerals have been abundant and there are some very busy florist establishments for telephone and telegraph mean great things for an enterprising florist.

NOTES.

The event of the week has been the assignment of William E. Doyle, who has two stores. The amount of liabilities being reported as \$40,000. A meeting of the creditors was held October 29, and the following committee was chosen: John McFarland, chairman; P. Donohue, P. Welch, H. M. Robinson, Wm. H. Elliott. This committee was instructed to investigate and report November 2.

Mr. Campbell reports space rentals for the National Flower Show coming in rapidly. John Farquhar is authority for statement that trade exhibits will be allowed no gratuitous space. Two or three well known houses gave notice of withdrawal for this reason. It is now understood that there will be no gratuitous space except for competitive classes.

The nominations for officers of the Massachusetts Horticultural Society reported last week should have read J. K. M. L. Farquhar for vice-president, instead of W. C. Baylies, and H. E.

MARKET CONDITIONS.

During the past week the demand has not caught up to the supply, with a few exceptions. Chrysanthemums are coming along fast and find an outlet at some figure. American Beauty roses have diminished in number and at the end of the week there were comparatively few in the market. The smaller varieties of roses increased in volume and the average price on these showed no improvement; on the contrary, owing to the limited demand, clearances were difficult at any price. The carnation situation remains unchanged. Cattleyas are plentiful and have sold well and considerably less of lily of the valley appeared in the market as the week advanced. Violets were not nearly so plentiful this week, the higher price prevailing in the west probably attracting shipments in that direction. The quality has been rather poor and only begins now to show improvement. Forty cents has been an outside figure here and that for but a small portion received, the remainder going to the street peddlers for smaller amount. At present, however, the prospect looks brighter for them if we don't get too many. Saturday found a better tone to the market and there was some business. If wholesalers had not been handicapped with accumulations it would

have been possible to advance prices a little bit, but there was enough and to spare to take care of a still greater demand than developed.

EXPRESSMEN'S STRIKE.

For a week past shipments have been delayed and finally accomplished with the aid of local expressmen owing to a general strike of the drivers and helpers of all the big express companies beginning with the United States and finally involving all the other great carriers. The companies had been accepting shipments of flowers at shippers' risk but could not make delivery. Consequently consignees were obliged to send to the train for their shipments and messengers with wagons found great difficulty in getting the goods from the cars, as the strikers interfered and in several instances the company refused to open the cars, as the police protection was insufficient. Some shipments were mixed up with outgoing freight and sent back to the starting point. There seems no immediate prospect of a settlement, notwithstanding the demand of the strikers as to better pay and shorter hours has been agreed to by the United States Express, but it is further demanded that the companies recognize the union, which is likely to prolong the strike if the men do not yield in this demand.

The scores made by the members of the New York Florists' Club Bowling Association are as follows:

Flesser	122	86	99	Fenrich	152	139	132
Irvin	122	171	160	Marshall	131	106	101
Donaldson	125	167	147	Scott	137	143	170
Einsman	127	121	171	Smith	144	120	156
Shaw	143	114	143	Manda	134	182	140
Berry	145	122	169				

The special prize, a silk umbrella, given by Mrs. C. W. Scott, was won by Mr. Irwin of the Skidelsky & Irwin Co., Philadelphia. Mr. Irwin gives the prize this week for the highest score and next week P. J. Smith gives a handsome traveling bag for the best head pin score in 12 frames.

The New York Florist's Club bowling association played several games October 28. The contest for highest score was won by Joe Manda, who carried off a stein given by R. J. Irwin.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryc, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

THE cooler weather has improved the demand for Dutch bulbs and stocks of the more popular things in this line are running low.

HOLLY reports to date indicate that while the quantity in sight is not so large as last year, the crop is well berried, south as well as east.

THE sharp freezing weather of the past few days has reminded onion set growers of a large quantity of stock still unprotected in the fields.

CHICAGO.—Prices on the board of trade November 2 for grass seed were noted as follows: Timothy, \$8 to \$9 per 100 pounds. White clover, from \$20 to \$27.

BOUQUET GREEN picking has been favored by the fine weather of October but there is considerable uncertainty as to the quantity already picked and its condition owing to the growing tendency among the woodsmen to withhold facts with a view to advancing prices.

PHILADELPHIA, PA.—The Henry F. Michell Co. celebrated "New Home Week" October 31 to November 5 at its new quarters, 518 Market street, to which, for the past two years, the firm has been gradually transferring the business from the old location. The new building is one of the largest and most up-to-date seed houses in the country with an organization of nearly 100 employes thoroughly trained to care for the interests of the firm's many patrons.

Roemer's Novelties for 1911.

Among the many valuable novelties offered by Frederick Roemer, Quedlinburg, Germany, the following are noticeable and of interest to the growers:

Antirrhinum mangus grandiflorum Hephaestos, the brightest red in the class of large flowering snapdragons.

Godetia grandiflora lilaccina fl. pl., the first bluish shade in godetias and a novelty which will be welcome.

Petunia hybrida grandiflora superbissima fimbriata intus aurea, a bright

crimson and purple with wide open throat marked with yellow and black.

Gladiolus praecox lilac and reddish violet varieties and striped and variegated varieties, two distinct strains in the annual gladioli.

Statice sinuata rosea, a rose-colored statice surely a welcome addition.

Novelties in Asters: Extra early Hohenzollern, purplish violet; July ray aster, reddish violet; Christmas tree, brilliant carmine; Christmas tree comet, white, white changing to rose, brilliant carmine, light blue and reddish lilac; Giant Victoria, crimson on white ground, Noble aster, salmon rose; Ray aster, reddish brown; Japanese aster, dark scarlet. These are all new colors in their several classes.

Henry F. Michell Co.'s New Store.

Rear Entrance.

Bulb Industry of the Netherlands.

The following information concerning the bulb industry of the Netherlands is taken from an article entitled "Market Gardening in Holland," published in the Department of Agriculture Journal for Ireland, July, 1910:

Since 1750 the cultivation and export of bulbs has been regularly carried on in Holland, though the trade only reached its present enormous proportions during the last decades of the nineteenth century.

The bulb-growing industry was first confined to Haarlem and its vicinity, but has gradually extended wherever a suitable piece of land was available. In order to grow bulbs, meadows have been transformed and sand dunes leveled. The preparation of land for this purpose is often very costly, and the value of the best plots varies from £320 to £500 (\$1,557 to \$2,433) an acre.

The export statistics of the industry, which have been carefully kept since 1897, show that the total export has very largely increased in the last ten years. The value of this export cannot now be less than £800,000 (\$3,893,200). England is still Holland's best customer for bulbs, taking nearly 40 per cent of the total export. The number of bulb-exporting firms in Holland is about 200; there are also over 2,500 growers who do not export directly, but send their produce through the larger firms.

The Dutch bulb growers are organized into a general federation, which now numbers nearly 3,000 members, and is divided into 37 local groups. A paper is published twice a week, weekly exchanges are held during the trade season, novelties are examined and reported upon by a committee of judges, and a trade council inquires into and decides all trade differences. Many exhibitions have been organized by the federation, and of late exhibits have also been sent to foreign countries. In addition to the general federation, there are two special societies, one to protect the interests of bulb exporters and the other to protect those of growers who do not export.

The following statement showing the quantities of bulbs imported and exported into and from the Netherlands in 1908 and 1909, in pounds, is furnished by Consul Frank W. Mahin, of Amsterdam.

Mushroom Culture.

In almost every section of the country the first essential to successful mushroom culture is a house or shed that can be darkened at will, is not too much exposed to sun and wind and can be kept at a uniform temperature of 60° or thereabouts. No doubt there are places where mushrooms may be grown in outdoor beds, but these require more skill and attention than the indoor crops. Caves, underground cellars and similar places are often pressed into service by the mushroom grower and they are excellent for the purpose. Again some growers are successful with this crop under greenhouse benches devoted to other crops, but this is not generally a satisfactory method of culture, owing to fluctuations of temperature and the inability to control the water-supply owing to drip from the benches. Beds one foot thick and from four to five feet wide, according to convenience, are best.

Whatever method is followed it is absolutely necessary that good manure is procured and properly prepared. The manure as it comes from the stables of horses fed on dry food should be laid out thinly on the floor of a shed or, if in the open air, some method of covering should be furnished against heavy rains. Where the daily supply of manure is large, nothing else need be done to it until there is a sufficiency for one bed or more. But where a considerable time elapses it will probably be necessary to turn the manure over. When enough has been gathered, begin at one end of the pile and shake out the greater part of the straw, throwing this to one side for use in covering the beds later. The remaining portion should be thrown into a compact heap, about six feet wide at the base, and tapering to a point about six feet high. If good fibry loam is plentiful, add about one part in ten, as the work of turning proceeds. In about a week or ten days the pile must be turned again, throwing the outside to the middle and the top to the bottom as much as possible, at the same time shaking the manure well to allow of the escape of the rank smell.

About three turnings are usually necessary and by this time the manure will be in a uniform condition, no part being over-heated or over-dried. When placing the manure in position it should again be well shaken out and placed in thin layers, these being well rammed as the work proceeds to insure a thoroughly solid mass when finished. As to the time of spawning, some growers are in the habit of waiting until the beds have heated up and then declined to a stated figure. But if the manure has been properly prepared and the beds are made thoroughly firm, as advised above, there is no need of waiting. It is always safest to use large pieces of spawn, the ordinary brick being broken into eight pieces. Then, should the outside of the spawn become a little over heated, there is plenty of live mycelium in the lump and no fear need be entertained if the spawn is fresh and good. Here it may be well to warn growers against spawn which, on being broken open, discloses a lot of little white spots about the size of a pin head. Good, fresh spawn should have the white cottony threads of the mycelium running uniformly throughout the whole mass. In placing

the spawn never use a dibber; just lift the manure, push the lump of spawn in with the hand and ram the manure firmly down in place again. Thus no holes are left for the escape of the heat and the influx of air to dry out the spawn.

Usually the beds will be fit for soiling about one week after spawning, but if there is any doubt about the manure being warm enough it should be soiled and covered with the straw shaken out of the manure at once. For covering the beds clean loam is the best, but if this cannot be had any good garden soil will answer if the top inch or so is removed. From one to two inches of soil, according as this is heavy or light, will suffice and it should be in a moderately moist condition, not dry enough to need watering or wet enough to cake up when rammed in place. Cover at once with straw and maintain a moist atmosphere in the house by dampening all available walks, but not watering the beds direct. The art of keeping a mushroom bed moist without frequent direct watering is not an easy one to attain, but one that is very necessary to success. The first mushrooms will appear in about

five weeks and the beds if properly handled will go on bearing for months. One of the best stimulants for mushrooms is common salt. A light dressing of about one ounce to the square yard should be given weekly. The beds should be uncovered as little as possible, as the light spoils the pure white that is so desirable in first-class produce.

Don't Be Satisfied With Anything But The Best

In placing your order for

Craig Quality Stock

You can insure yourself against inferior goods. Our stock is the highest quality obtainable, and we solicit your valued orders. We have thousands of satisfied customers.

WHY NOT YOU?

Ficus Pandurata

The plant of the century. Positively the best house and porch plant to date. Our stock of this wonderful plant this year is finer than we have heretofore offered, and we can surely give you satisfaction.

6-in. pots, 2 feet tall.....\$2.00 each
6-in. pots, 2½ feet tall.....2.50 each
7-in. pots, 3 feet tall.....3.00 each
8-in. pots, 4 feet tall.....4.00 each
10-in. and 11-in. tubs, 5 to 7 feet tall.....\$5.56, 7.50 each

The large plants are unusually fine and there is nothing that will give better satisfaction to the buyer as a decorative plant.

Branch plants, exceptionally fine, at \$2.50, \$3.00, \$3.50, \$4.00, \$5.00, \$6.00 and \$7.50 each.

Crotons

The Croton with its highly colored foliage is indispensable during Fall and Winter. We have the largest and most complete collection of Crotons in America, of the very highest quality and brilliantly colored.

4-in. pots.....\$25.00 per 100
5-in. pots.....50c, 75c and \$1.00 each
6-in. pots.....75c, \$1.00, \$1.25, \$1.50 and \$2.00 each
7-in. pots.....\$2.00, \$2.50 and \$3.00 each
8-in. pots.....3.00, 3.50 and 4.00 each
10-in. ½ pans... 5.00, 6.00 and 7.50 each

We desire to make special mention of Croton Cronstadtii, of which we have an entire house full. This variety is one of the most beautiful and graceful of the Croton family.

6-7-8-in. pots.....\$1.50, \$2.00, \$2.50

Every retail store should feature Crotons this Fall and Winter, and we know our stock will please you and your customers.

Dracena Massangeana

The variety with the golden stripe down the center of the leaf. This handsome plant is the best of all Dracenas for the house. We have an unusually large stock, exceptionally well colored and of the very highest quality.

6-in. pots.....\$18.00 per doz.
7-in. pots.....24.00 per doz.
8-in. pots.....\$30.00 and 36.00 per doz.
9-in. pots.....48.00 per doz.
10-in. pots.....\$5.00 and \$6.00 each

Dracena Amabilis

6-in. pots.....\$18.00 per doz.
8-in. pots.....\$2.00 and \$2.50 each

Dracena Fragrans

Ready now.
5-in. pots.....\$5.00 and \$6.00 per doz.

Phoenix Roebelenii

This is unquestionably one of the great Palms of the future, combining the grace of a Cocos Weddelliana with the hardiness of a Kentia. It will prove an invaluable plant for the house. Our stock in the following sizes is unusually fine:

8-in. pots.....\$30.00 per doz.
8-in. tubs.....3.50 and \$4.00 each

Pandanus Uilis

Superb stock.
8-in. pots, strong plants.....\$18.00 and \$24.00 doz.

Boxwood Just Arrived

We have an unusually large stock of fine plants of all sizes.

For window boxes, 10-in. to 12-in.....15c, 20c, 25c each
Heavy stock.....35c, 50c, 60c, 75c each
Ball shape.....\$1.00, \$1.25, \$1.50 each
Heavy bush form.....\$1.00, \$1.25, \$1.50 each
Pyramids.....\$2.25, \$3.00, \$3.50, \$4.00, \$5.00 each
Pyramids, square shape, very handsome, in fancy tubs.....\$12.50 each

It will be well to place your order for above at once. We will hold same for future delivery or ship at once.

Araucaria Excelsa

5-in. pots, 4 and 5 tiers..\$9 doz., \$70.00 100
6-in. pots, 5 tiers.....\$12.00 doz.

Areca Lutescens

Our stock is in splendid condition.
Very heavy 6-in. pots, 3 plants, 32 to 34 in. tall.....\$15.00 doz.
Heavy 7-in. pots, 3 plants, 36 in. tall.....24.00 doz.
Heavy 7-in. pots, 3 plants, 40 in. tall.....30.00 doz.
Heavy 8-in. pots, 3 plants, 42 to 44 in. tall.....36.00 doz.
Heavy 8-in. pots, 3 plants, 48 in. tall.....3.50 Each

Bougainvillea Sanderiana

An exceptionally fine lot of shapely specimens at \$2.60, \$3.00 and \$3.50 each.

These plants will command big prices when in bloom next Winter and at Easter.

Neph. Amerpohli

Philadelphia Lace Fern.
6-in. pots.....\$6.00 and \$9.00 doz.

Neph. Todeaoides

London Fern.
This variety we consider the best of the upright growing class.

2½-in. pots.....\$5.00 per 100, \$45.00 per 1,000
4-in. pots.....\$20.00 per 100
6-in. pots.....\$6.00 and \$9.00 per doz.
8-in. pots.....\$12.00 per doz.
10-in. pots.....\$18.00 and \$24.00 per doz.
11-in. tubs.....\$24.00 per doz.

Neph Scholzeli

This is an ideal crested Fern, holding the same position to all other crested varieties that the Scottii holds to the old Boston.
2½-in. pots.....\$8.00 per 100, \$75.00 per 1,000
6-in. ¾ pans, heavy.....\$6.00 and \$9.00 per doz.
8-in. ¾ pans, heavy.....\$15.00 per doz.
10-in. ¾ pans, heavy.....\$24.00 per doz.

Neph. Elegantissima Improved

This variety is a greatly improved Elegantissima and shows no tendency to revert to the Boston. This will prove a valuable addition to the crested varieties.
6-in. pots, strong plants.....\$6.00 and \$9.00 per doz.

Neph. Elegantissima Compacta

A dwarf compact form of N. Elegantissima, each plant making an ideal shape. Our stock of the variety is large and of exceptional quality.

2½-in. pots.....\$10.00 per 100, \$90.00 per 1,000
4-in. pots.....\$25.00 per 100
6-in. pots.....\$6.00 and \$9.00 per doz.
8-in. pans.....\$15.00 per doz.

Neph Scottii

Our stock in superb condition.

2½-in. pots.....\$5.00 per 100, \$45.00 per 1,000
4-in. pots.....\$25.00 per 100
6-in. pots.....\$6.00 per doz., \$45.00 per 100
8-in. pans.....\$12.00 per doz.
10-in. pans.....\$18.00 per doz.
11-in. tubs, heavy.....\$2.00 and \$2.50 each

Asparagus Plumosus Nanus

2½-in. pots.....\$4.00 per 100, \$35.00 per 1,000
3-in. pots.....\$7.00 per 100, \$65.00 per 1,000

Pandanus Pacifica

Very handsome plants.
11-in. tubs.....\$2.50, \$3.00, \$3.50 and \$4.00 each

Cyclamen

This has been one of our specialties for over twenty years. This year we grew upwards of 50,000 plants. Our stock at this time is better than we have ever had it and sure to be a money maker for anyone buying now.

5-in. pots, heavy.....\$50.00 per 100, \$450.00 per 1,000
6-in. pots, very heavy.....\$75.00 per 100
We are also booking orders for Christmas delivery, plants to be exceptionally well flowered.
4-in. pots.....\$25.00 per 100
5-in. pots.....\$6.00, \$9.00 and \$12.00 per doz.
6-in. pots.....\$12.00, \$15.00, \$18.00 and \$24.00 doz.
7-in. pots.....\$2.50 each
8-in. specimen plants.....\$3.00 and \$3.50 each

Gardenia Veitchii

Strong plants.
2½-in. pots, heavy.....\$8.00 per 100, \$75.00 per 1,000
4-in. pots, heavy.....\$20.00 per 100, \$180.00 per 1,000
6-in. pots, heavy.....\$50.00 per 100
7-in. pots, heavy.....\$9.00 per doz., \$70.00 per 100
The above will make grand stock for Winter blooming.

Begonia Gloire de Lorraine

We have the largest and finest stock of this grand Christmas plant in America and are in a position to ship plants the following sizes in full bloom at once:
6-in. pots, very heavy.....\$12.00 per doz.
7-in. pots, very heavy.....\$15.00 and \$18.00 per doz.
8-in. pots, very heavy.....\$24.00 and \$30.00 per doz.
These can be used to advantage during November.

Send us your sample order now, see the quality, and then mail us your Christmas order.

Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

Notes From the Arnold Arboretum.

The nurseries and frame grounds in the Arnold Arboretum, at the present time, contain an enormous number of seedlings, raised from the seeds sent to Dr. Sargent from China by E. H. Wilson, who has been collecting there during recent years. Mr. Wilson has discovered a very large number of new species of deciduous trees, shrubs and evergreens, in the various provinces of China, where he has botanized, and to see the immense number of seedlings in the Arboretum, which Jackson Dawson has so successfully raised, at once suggests the impression that this work is bound to have a far-reaching effect on the parks and gardens of America and Europe. Whilst some of the new species may be somewhat tender in the northeastern states, there seems to be no question about the most of them being hardy, and many of them highly ornamental. Many valuable plants already decorate our parks and gardens from the Chinese Empire, and with the rich discoveries recently brought to light by Mr. Wilson, and as Dr. Sargent said to the writer, that there were undoubtedly large numbers of new species of plants yet to be discovered in the future in the interior of China; what a large amount of ornamental material will be available in the future, for the decoration of parks and gardens.

The trees and shrubs discovered by Mr. Wilson extend through many genera. Some of the most important genera are Acer, Berberis, Cornus, Deutzia, Hydrangea, Magnolia, Molus, Philadelphus, Pyrus, Quercus, Salix, Tilia; and amongst evergreens Abies, Picea, Pinus and Rhododendron. Through all of these and many others he has found numerous species. One new genus has been adopted for a new type, and perhaps more will have to be formed. In his present journey in China Mr. Wilson is particularly looking for the seeds of conifers, of which he found many new species, but at the time of his previous journey, all conifers were fruiting sparingly and a supply of seeds could not be procured.

Dr. Sargent is highly pleased over the fact that Mr. Wilson has found the Moutan Pæony, growing in a wild state in the interior of China, and states that he (Mr. Wilson) is the only white man who has ever discovered it, or has seen it to recognize it in its native habitat. All of the plants in cultivation now in occidental countries have been introduced from cultivated stock in China. Dr. Sargent regards this discovery as most important, as new vigor and much stronger vitality can undoubtedly be imbued in some of the best cultivated forms by crossing with the wild form, and a much more virile race procured for the decoration of gardens than we at present have. This is certainly a desideratum, for whilst we have most beautiful and showy varieties of the Moutan Pæony, they lack vigorous constitution.

MANETTI

In another month you will need good stock for grafting. We have just what you want. Place your order now so that you can get it when you need it.

Considerable interest is shown in the Arboretum in one of the plants introduced from China: Eucommia ulmoides; a rapid growing deciduous arborescent shrub, with large handsome elm-like leaves. It is said to possess important caoutchouc properties and there is a strong probability that it may become valuable to grow it economically in the northeastern states, as so far it appears to be quite hardy. Gutta-percha producing plants are mostly tropical or sub-tropical and a hardy plant that would produce this in profitable abundance would be of inestimable value. JOHN DUNBAR.

Dreer's Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of summer-flowering plants, and we are prepared to furnish many of the latter as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox

We would particularly call attention to the following *Three New Varieties* as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice:

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flowers; of dwarf habit,

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

PRICE: Any of the above three new varieties, \$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

HARDY PHLOX.

General Collection of Hardy Phlox

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Aglac Adanson (Medium). Immense flowers, snow-white, with red eye.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish lilac; large, white halo.

Bacchante (Tall). Tyrian rose, with crimson-carmine eye.

Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.

Bridesmaid (Tall). White, with large crimson-carmine centre.

Belle Alliance (Medium). White, with large pure red eye.

Charles Sellier (Dwarf). Bright reddish-violet, with large white star-shaped centre.

Clara Benz (Dwarf). Lovely carmine-rose, with darker eye.

Collibri (Tall). White, with crimson-carmine centre; very late.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.

Champs Elysee (Dwarf). A very bright rosy magenta of an effective shade.

Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.

Caran d' Ache (Medium). Geranium-red, with old rose shadings and white eye; very effective.

De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.

Diadem (Dwarf). A fine dwarf, pure white.

Danton (Medium). Scarlet, with pure red eye.

Etna (Medium). Crimson red, suffused with fiery red; cherry-red eye.

Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre, with an exceptionally large white centre.

Eugene Danzavillier (Tall). Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.

Eclairer (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.

Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.

Gruppenkonigin (Tall). Delicate, pale rose mauve, with claret-red eye.

George A. Strohlein (Medium). Bright scarlet, with crimson-red eye; does not bleach.

General Giovannelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal; a pure red eye; very effective.

General Van Hentsz (Medium). Scarlet, with rose shadings and crimson-red eye.

Hermine (Dwarf). The dwarfiest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

PRICE: Any of the above General Collection, \$5.00 per 100; \$40.00 per 1000.

For a complete list of seasonable stock see our current wholesale list. If you have not received a copy it will be mailed to you on application.

Mention the American Florist when writing

Heating Problems.

ED. AMERICAN FLORIST:—

We wish to know whether a two-inch riser from the boiler, which has no larger opening, would be large enough to feed the following system: We have three connecting houses, each 20x50 feet. The flow is to reach its highest point above the boiler, branch out into three two-inch flows, one for each house, dropping from the boiler to the farthest end, and each flow returning in five two-inch pipes, or fifteen returns to the boiler. Is anything gained by adding a three-inch riser to the two-inch opening at the boiler, or would two flows, say, through the middle house and returning in nine two-inch returns be better. Temperature seldom below 20° above and shed running the full length of gables at north end.

DIXIE.

The sketch which accompanies the question shows a head pipe running across the ends of the three houses at the height of six feet. From this one flow pipe runs down the center of each house with a fall of one inch in ten feet. At the farther end of the houses the flow pipe branches and feeds the five returns, of which three are on one side and two on the other side of each of the three houses. None of the pipes are larger than two inch.

From the above it is evident that there is not far from one thousand linear feet of two-inch pipe or 625 square feet of heating surface. To supply the water for such a system the connection with the boiler should be by means of a three-inch pipe, and if the flow pipes in the different houses could be 2½-inch the circulation would be all the better. If it is not possible to tap the boiler for three-inch flow and return pipes, it would answer if, in addition to the present two-inch connections, which would answer for one of the houses, the boiler be tapped for 2½-inch flow and return pipes, which could run to the other two houses. Failing in this, it would be helpful if 2½-inch flow and return head pipes be put in, from which a three-inch pipe is run to the boiler and reduced to two-inch as close to the boiler as possible. The circulation will then be materially better than as now arranged, when all of the pipes are two-inch.

L. R. T.

Carnation Flowering Time.

ED. AMERICAN FLORIST:—

When will carnations bloom? planted now. C. S.

Carnation plants set out in the houses the first of September if in proper condition when planted will begin to bloom in three or four weeks. W.

HOME AGAIN!

Godfrey Aschmann, chief of the old reliable firm, Godfrey Aschmann, 1012 W. Ontario St., Philadelphia, has returned from his trip to Europe. He sits at his desk, looking after the interests of his countless customers, and is as lively and as jolly as ever. **Leader in our specialty, the Araucarias, 8,000 in all sizes now ready; more coming.** See us growing. Remember this is our 25th anniversary in importing and shipping Araucarias. Ready for business. Can handle the largest order at short notice.

AZALEA INDICA.

Owing to the cold and wet weather this summer in Belgium and the large demand all over the world, Azaleas this year are very scarce and high in price. But in spite of all that, I want all florists to know that I have just arrived from Europe with the finest cargo of **Azalea Indica** obtainable in Ghent. My grower over there always looks after my interests and has reserved for me the cream of his 200 acre azalea field—my own pick.

☞ When a cigarmaker smokes a cigar, what will he smoke? The worst? No. The fragrant aroma of his production will tell his customers what a fine cigar he makes. So do I. What I force for myself is surely good enough for you, as I send my customers the same kind I force.

☞ **Now is the Time to Force Azaleas for Christmas.** What varieties will you take? Which ones will force well? Take my advice. There is the *Deutsche Perle*, one of the best well known double whites: we have plants of these at 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Next, *Simon Mardner* double bright pink, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. *Vervaneana* is so well known that there is no need to talk about it; big, variegated rosy flowers, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. *Apollo*, single, red varieties; it is a deep pink, much admired, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Dozen and hundred at the same price. How about *Mme. Patrick*? This is one of the earliest pink varieties, very scarce this year in Belgium and high in price; a few of this variety you must have. Price: \$1.00 \$1.25, \$1.50 to \$2.00.

☞ **For Easter Forcing** we have only the well known standard American market varieties, such as *Mme. Van der Cruysen*, pink, very scarce this year in Belgium, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; *Niobe*, double white, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; *Deutsche Perle*, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; *Helena Thielman*, light pink, \$1.00, \$1.25, \$1.50 to \$2.00; *President Oswald de Kerkove*, \$1.00 to \$1.50; *Schryveriana*, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; *Emoress of India*, double variegated, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. *Professor Wolters*, 75c, \$1.00, \$1.25 to \$1.50; *Vervaneana*, 60c, 75c, \$1.00, \$1.25 to \$1.50; *Apollo*, 60c, 75c, \$1.00 to \$1.25; *Simon Mardner*, 50c, 60c, 75c, \$1.00 to \$1.50.

☞ Remember, small sizes of Azaleas are scarce this year in Belgium; therefore I had to buy mostly large sizes.

☞ Remember, it is the wide awake man that is not afraid to invest a dollar that makes the money.

LEADER

in

FERNS

Scottii, *Scholzeli*, *Whitmani*, *Boston*. Six houses stocked with the choicest, were never better than this year, 5, 5½, 6 and 7 in. pots, 35c, 40c, 50c, 60c, 75c to \$1.00.

LEADER

in

Azalea Indica.

Begonia Gloire de Lorraine

This is another specialty of ours. We have a secret in growing them to perfection, only known to us giving them a rich, deep pink color. They stand shipping well, traveling 2,000 to 3,000 miles without injuring or killing them in transit, if properly handled. We have a big house full in 6 to 7 in. sizes in bud and partly in bloom ready for immediate sale or for the holidays. Everybody knows that last Christmas we had the best *Begonia Gloire de Lorraine* on the market. They were crackjacks indeed! We have the deep pink and the light pink (*Lonsdale*) varieties. 6 in. pots, 50c, 75c to \$1.00; 7 in., \$1.25 to \$1.50; 3 in. (if transplanted soon) will make good 4 in. for Christmas). 15c each \$15.00 per 100. If you have room you should order now, because they are always scarce at Christmas.

Begonia Erfordii, latest improvement: this variety is always in full bloom during winter Christmas and Easter; 4 in. pots, in bloom and bud, 20c.

Cash with order, please.

All plants must travel at purchaser's risk.

Mention the American Florist when writing

PEKIN, ILL.—George A. Kuhl made very nearly a clean sweep with his flower entries at the Springfield state fair, winning thirteen prizes with thirteen entries.

SPRINGFIELD, O.—The annual meeting and banquet of the Florists' Club was held at the Bookwalter Hotel October 10, and the feature of the meeting was the appeal for more generous planting of flowers by the citizens and the city itself.

SCRANTON, PENN.—The display of plants, ferns and flowers of G. R. Clark at the Industrial Exposition was one of the features and a marked beauty spot in the armory. Isaac Summerhill had charge and the roses, palms and ferns were very tastefully arranged. A large number of cattleyas were particularly admired.

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,
 ¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

Indianapolis.

Fred H. Lemon of Richmond, Richard Witterstatter of Cincinnati and Carl Sonnenschmidt of Cumberland will act as the three judges at the coming chrysanthemum show to be held in Tomlinson Hall next week. At the flower shows of other years it has been customary for judges to be appointed to pass on the blooms in each division, working independently of each other, but it is the intention to have the three judges work jointly in coming to all of their decisions this year. The judges named make a happy selection, are well qualified, being men of experience in the growing end of the business. F. H. Lemon began in early boyhood to learn the business under E. G. Hill of Richmond, and is today a large grower with about one hundred thousand square feet of glass. R. Witterstatter is known all over the country as the originator of Afterglow and Adonis carnations, which won several gold medals and blue ribbons. C. Sonnenschmidt is an imported florist. He was a thorough florist when he came to this country from Germany, having served his apprenticeship there under one of the most noted florists that ever drank that good old German beer. Today Sonnenschmidt is turning out perfect roses in the large plant of "Sonnenschmidt & Junge," better known as simply "Smith-Young Co." In making the awards at the coming show, the judges will follow the official scales of the different national associations of growers. A blue ribbon will indicate first prize, red the second and white the third.

NOTES.

Geo. Swain, a seedsman, has sold out his business to a Mr. Warren, who intends to take charge of same about November 1. The firm will be styled the "Warren Seed Co." The business will run along the same old channels, the only difference being that Warren will replace Swain. Before Swain went into the seed business he was a linotype and acted as foreman for the Indianapolis News. He is now going West, but instead of investing his money in land, expects to reap more coin by taking up his old trade and pounding out copy for some newspaper.

In addition to there being a chrysanthemum show at Tomlinson Hall next week there will be extra large and special displays at a number of the downtown retail stores, including Wiegand's on Sixteenth and Illinois. This has been decided on as a side show for the big exhibit. It is expected that trade will be good during the show week. A. W. B.

Providence.

Seasonable weather is here, the trade has taken on a different aspect and business is about normal. Dahlias are a thing of the past but cosmos of good quality continues plentiful. The Queen of the Autumn is here in all her glory and all the stores are making grand window displays of chrysanthemums, the varieties on the market being Robert Halliday, Miss Virginia Poehlmann, Polly Rose, G. S. Kalb, Ivory, Rosiere, Glory of the Pacific, Pacific Supreme, Golden Glow and Monrovia. Carnations of good quality are abundant and roses continue plentiful. Pink and White Killarney, Richmonds and American Beauties are good quality. Orchids, lily of the valley, lilies, and gardenias of good quality are being received and violets are over-plentiful. The demand for asparagus and other greens is light. The October business was below the standard of former years, but the nurseries and seedsmen all report a busy season. G. A. J.

Plan 61

On page 16 of the Advance Pages to our New Catalog this subject is thoroughly described. On the opposite page are interior views of this house and two other eleven "footers." For a general utility house the eleven "footer" is a mighty good one.

The one shown belongs to Mr. A. E. Hammar, Branford, Conn. Send for the Advance Pages and know all about it.

Mention the American Florist when writing

Salt Lake City.

A great improvement is noticed in the floral business the last week, there having been several heavy frosts that have put an end to the outside stock, so good flowers are scarce. Utah chrysanthemums are coming in and also some carnations, but not enough to supply the demand, and there are some good California violets being received. The use of basements and the rear end of drug stores for florists has about had its day in this city.

NOTES.

Thos. Hobday has opened a swell store on State street. Mr. Hobday has spent most of his life in the florist's business and with experience and popularity in this city there is no doubt of his success.

The Huddart Floral Co. report a good business, especially in California chrysanthemums, of which they handle large quantities.

Walter W. King has moved into his new store. He has the most attractive and up-to-date store in the city.

Some extra good roses are shipped here from Council Bluffs, Ia., by J. F. Wilcox.

The Pike's Peak Floral Co. are sending in some good roses and carnations.

E. A. Lambourne is having a show window fixed up to display his goods.

The Sugar House Floral Co. are cutting some very good carnations.

The Ogden Floral Co. have the best carnations in the state.

The Miller Floral Co. is sending in some good roses.

UINTA.

The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.

$\frac{3}{4}$ of the heating surface is in the tubes.

Ask the man that knows the one using different style boilers—names are yours for the asking.

After using our boiler one season, you will say like all others: Nothing but "Superior" for me.

This boiler has given better satisfaction than any other boiler on the market

MADE IN NINE (9) SIZES FOR HOT WATER.

Send for catalogue and list of growers that are using this boiler

SUGGESTIONS FOR PLANT GROWERS.

Fuchsias.

It is time now to start the old stock plants of fuchsias if nice large plants are wanted for the vases and boxes next spring. The fuchsia is a plant that likes plenty of heat and one to which mealy bug is very partial. When the old plants are cut back and potted go over them very carefully and remove any of these insects that have obtained a foothold, and after being placed in the houses syringe them often, never allowing this dirty little pest to obtain a foothold. An old gardener of national reputation once told us that there was no excuse for a grower having mealy bug in his houses if he had a good force of water behind his hose. Shake the old soil all off the roots and pot them in good compost and when the shoots get long enough to make into cuttings place in the propagating bed. It is these early struck cuttings that make the handsome plants, making nice growths that can be nipped back to make fine stocky plants. If this is postponed until later the little shoots will set their buds before being long enough to make into cuttings and a dwarf stunted plant is too often the result.

Spirea Japonica.

When the roots of Spirea Japonica arrive lose no time in getting them into their pots, for they are of a moisture-loving nature and should not be left to dry up in the packing cases. Before potting place the clumps in a tub of water and allow them to get well soaked through. A great many failures in growing this cheap, though useful plant, are attributable to the potting of the dry clumps that never get thoroughly wet. They should be planted in pots just large enough to hold them and any very small roots can be doubled up—two or three in a pot. After potting, water thoroughly, and they should then be placed outside where they can be subjected to a little freezing weather. If they are to remain in these quarters until after the first of the year, at which time

they should be started for Easter blooming, they should be well protected from freezing severe enough to break the pots. It may be desired to save some roots for Decoration Day blooming. Instead of potting, these may remain in the case, being sure to thoroughly wet them, and allowing them to freeze and then place them in a cold cellar or other dark quarters where they will remain frozen until wanted about the middle of March.

Bedding Stock.

After the chrysanthemums have been cut there will be room to handle the bedding stock. Take the soil out of the benches and pile it up where it can get well frozen, and it can be used in the spring for potting up the vast amount of small plants grown at that season. Spread some sifted ashes on the benches about an inch thick and pot in 2½-inch pots the geraniums and other stock that was placed in the propagating bench during the fall, and get it started. If there has been propagated all the stock of geraniums that can be properly handled they can be grown very cold and rather dry, and will make much more stockier plants than if grown warm. But if more stock is wanted, they should be grown in a temperature of 50° at night at least, and if kept moving right along a good top cutting can be obtained early in the year that will make a fine salable plant for spring. The plants that are grown cool will not need to be shifted to larger pots until the first of March, but the warmer grown plants will need a shift in 3-inch pots early in the year. The other bedding stock that was propagated in the fall should be potted as soon as possible if it is still in the propagating bed. The coleus will need a warm location so that more cuttings can be obtained and this plant will not stand any cool temperature at all. Verbenas, petunias, lobelias, salvias and all such stock should be kept moving as rapidly as possible so that the stock may be multiplied later on.

It is not too late to propagate the tender growths of vinca and if rooted now and pinched back so that the lower eyes break into running shoots, some very nice small plants can be produced for the spring sales and those that are too small for use can be planted out in the ground in the spring and grown on for the large plants for the next year. If there is any call for *Centaurea candidissima* (the true dusty miller) the seed should be sown at once. Many people prefer this to *Centaurea Gymnocarpa*, but it takes much longer to produce good plants of the former than of the latter.

Bulbs for Outdoors.

The exceedingly warm fall has delayed the planting of spring bulbs and they should now be set out as quickly as possible. Many a customer would buy and plant beds of tulips and narcissi if he was informed that now was the proper time. How often have we heard ladies remark in the spring, when the bulb beds were in their glory, that they had intended to have a tulip bed planted but it had been forgotten. The hustling florist remembers these customers and when his bulbs arrive, notifies his trade in some attractive manner that the bulb season is on. In selecting the varieties the customer's individual fancy must be followed; some like many varieties mixed in one bed, others beds of solid color, and some with a large bed divided into sections of different colors, but if the first or last are to be planted, care should be exercised in selecting varieties that bloom at the same time. After the bulbs have been planted it is well to allow the ground to freeze hard enough to make a crust before they are covered, for if they are covered immediately after they are set out the frost is very slow getting through the covering and the bulbs may make quite a growth in the fall and then when the spring comes the shoots are all up in the leaves or litter and the stems all crooked.

Acalyphas.

To the florist who has many vases or window boxes to fill, nothing is more satisfactory or showy than the acalypha and it is time now to get the stock propagated, for they root more easily at this season of the year and, being slow growers, require plenty of time to get them into the best condition. The half-ripened wood is by far the easiest to propagate and makes the best plant. The hard wood roots much more slowly and does not start as easily. Cuttings taken with a heel are the best and root very readily. After the cuttings are rooted they should be potted in 2½-inch pots and for the first week or ten days kept a little warm and close so that the roots may get a firm hold on the new soil and to prevent the top from wilting, which it sometimes has a tendency to do, especially if subjected to too cool a temperature, or cool draughts. They should be grown in a moderately warm house and to obtain good colored foliage should have a bright, sunny location.

ALLIANCE, O.—O. A. Reisch held an opening to the people of this city October 29. He has established an up-town store on Arch avenue near Main street, of which Miss Helen Tullis will have charge.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

The Autumn Queen.

Let us consider the "Queen of Autumn," the chrysanthemum—the only hardy flower which can brave the November cold. No other late autumnal flowering plant is so popular and justly so, because of its beauty and its effectiveness. So strikingly effective are the blooms that they are equally well suited for exhibition purposes, or as cut flowers for the drawing room. Whether a florist or an exhibition grower, each must have his Japanese and pompon varieties. The raising of seedlings is said to be "the poetry of gardening"—and if this be so, then it was never more true than

A Standing Wreath.

in the case of the ever popular chrysanthemum. It certainly takes first rank as a winter exhibition plant. It may not be amiss to state that the Siamese have adopted the chrysanthemum as their national emblem.

The ribbon, twisted and thread varieties seem to take a better hold than the others for decorative purposes. The long ragged tassel-like flowers in the form of a loose mop is excellent for effective decorations—and the feathery kind are most stunning. For conservatory decorations where the object is to get a brilliant mass of color irrespective of shape—nothing lends so beautifully as the chrysanthemum. The single variety of chrysanthemum finds many admirers. It must be remembered that formality is not beauty in the eyes of the artistic, or even tasteful people and all that dressing can do to the flower is to give it more regularity and this is too stiff and should not be indulged in. The chrysanthemum was never more popular than it is today and as a decorative plant is more and more extensively cultivated every year. Each year brings out its new members and it is certain that this year's Flower

Show has not lacked in its new varieties and beautiful specimens.

A word about packing this flower may be of assistance to some who are not as familiar through experience as the old veterans of the trade. A little moist cotton wadding should be placed around the severed stems at the base, this being surrounded by a small piece of sheet of India rubber or oil silk paper to prevent the wadding from drying too quickly. The flowers and stems so treated should be packed in tissue paper in a tin box. The cover or lid may be hermetically sealed by a film of sheet rubber. In this way they will stand the longest journey.

To the growers we would say, give us still larger varieties; elegance of form and perfume (if you can); in a word, let all tastes be consulted—let all wants be satisfied. There is a wide and open field for improvement and progress. A. E. K.

A Wichita Hallowe'en Window.

A Hallowe'en window in the store of W. H. Culp & Co., Wichita, Kan., attracted much attention and received newspaper mention this week, and Ralph Culp is accordingly gratified although the initial idea was suggested by Mrs. Culp, his mother.

The decorative scheme was a combination. The open roomy space next to the front was covered with sheet moss and then a background of trees under which witches were gathered round the kettle, under which a very realistic fire was glowing. The inevitable black cat was there also, and a skeleton bringing wood for the fire and, to the left, almost overgrown, was the deserted cottage with ghosts peering from broken windows and behind broken down doors. The attention to detail and fidelity to nature in making the wood scene was the strong point in the picture. Not a pot was in evidence. The moss in coming to the irregular background of trees was carried up over the pots and gave just the unevenness to the ground that was needed. There was plenty of open space and the harmony of proportion between trees, figures and house was carefully observed.

This fidelity to detail held the spectators and kept them pointing out the new items as they would discover them and many, after spending several minutes at the window, would step back and cast their glance about to see at whose store they were looking. W. I. CHITA.

Church Decorations.

The accompanying illustration of a summer church decoration at Swampcott, Mass., was arranged by Wax Bros., the well known Boston florists. The church was banked with palms and laurel and 300 Easter lilies were used, large bunches of the latter tied with chiffon producing a very pleasing effect. The firm was highly complimented for their arrangement.

YOUNGSTOWN, O.—John Walker, the Phelps street florist, has purchased a tract of land west of Boardman Centre upon which he will erect a range of six greenhouses next spring. The houses are to be two hundred feet in length.

CHURCH WEDDING DECORATION BY WAX BROS., BOSTON, MASS.

WITH THE GROWERS

Bassett & Washburn, Hinsdale, Ill.

In a recent visit to the greenhouses of Bassett & Washburn at Hinsdale, Ill., we were much impressed with the degree of perfection to which all the stock is grown. Their American Beauty plants are in a range consisting of eight houses, six hundred feet long and from 28 to 32 feet wide. These houses are all filled with the cleanest lot of American Beauty plants we have seen in many years, one-half of which were carried over from last year, while the other half consist of young plants, the difference being that the older plants are now producing mostly all long stem flowers. The stems on these plants are now from five to seven feet long, as may be seen in the illustration of the house of American Beauty roses which we publish, and the plants are all in a most healthy condition with elegant, large, strong foliage without a blemish. The younger plants are giving some medium length stems, but no short stem stock is being cut at all. The color of their beauties is particularly fine, and in a cut running from 1,500 to 2,000 per day they do not get over one dozen crippled flowers in the whole lot. Their American Beauties are in such heavy demand that the firm is behind in their orders most of the time. In the miscellaneous roses they have some twenty-five or thirty houses, ranging in length from 300 to 600 feet. These are planted with Pink and White Killarney, My Maryland, Rhea Reid, Richmond, a few Bridesmaid and Bride, Kaiserin Augusta Victoria and Perle de Jardin. These are all grown on grafted roots, as the firm has found that while the grafted plants cost more they produce a better average grade of stock than do the rooted plants.

The carnation range is next to this one. Here we found 90,000 plants of carnations in only four varieties—Pink and White Enchantress, O. P. Bassett and Winsor. In addition to this they have about 5,000 plants on trial of Dorothy Gordon, Niagara, also a dark pink seedling and 500 of J. Whitcomb Riley, which is the yellow carnation originated by Bertermann Bros. These carnations, one-half of which were planted in the houses in the spring and carried right straight through, are in the very finest possible condition. We

saw O. P. Bassett's there with stems 24 inches long—a magnificent flower of a most brilliant shade of red. Their White Enchantress had stems 18 inches long, the flowers $3\frac{1}{2}$ inches in diameter. Pink Enchantress was in similar condition. This firm grows quite a quantity of Winsor, as they find this variety does exceptionally well on their soil.

The next range was the chrysanthemum houses, where we saw the finest lot of commercial varieties in the vicinity of Chicago. They do not grow any variety of chrysanthemums that will not ship and carry well when packed in the box. Every chrysanthemum must be a good commercial shipper or that

C. L. Hutchison.

President Horticultural Society of Chicago.

variety is promptly discarded. The result of this process is that they have built up a reputation for having the best shipping chrysanthemums in the Chicago market, the majority of their cut of flowers being distributed to points outside of the city. After leaving the chrysanthemum range we came to the lily houses. Here are planted 40,000 *Lilium Formosum* bulbs. The

earliest planted bulbs are just now commencing to give flowers. This new variety comes practically all healthy, as Messrs. Bassett and Washburn report only 2 per cent of diseased bulbs are found. These bulbs are planted as soon as received in 5 and 6 inch pots, placed out doors and covered with a heavy mulch of straw. As soon as the roots begin to fill the pots they are brought into the greenhouses, and those wanted for very early flowering are forced at a little higher temperature than the others. They have lilies in flower all the year around, but aim to bring in a majority of the flowers between Thanksgiving and Easter.

For summer and early fall, they force the cold storage *Lilium Giganteum*, bringing these out from the cold storage warehouse as fast as they are wanted. Mr. Bassett used to grow the *Lilium Harrisii*, but this was some twenty years ago, and at that time he paid \$150 per thousand; but the old time *Lilium Harrisii* are past, so that the firm the last two years have not grown a single Bermuda lily bulb. Before completing our visit to this interesting establishment we saw the houses of asparagus and smilax. They grow two houses exclusively for asparagus sprays, not allowing the plant to run up into strings. They have one more house which is grown to strings of asparagus plumosus, also a house containing 12,000 plants of smilax.

While this completes the growing end of the line, the visit to the boiler houses, where the heating and pumping is located, is fully as interesting as any part of their large range. Their heating plant was designed by the Kroeschell Bros., and has been visited by heating engineers from all over the country, who consider it one of the model plants of the time. Their icehouses are filled each year with 500 tons of ice, which they cut from an artificial pond located directly opposite the icehouses. This firm takes great pride in the even run of their flowers. They send their cuts into their city store two and three times a day, and make a specialty of cutting the flowers for shipment to long distances, assuring their customer of the arrival of the stock in good condition even when as long as sixty hours on the road. About 90 per cent of their flowers are shipped out of the city, the balance sold to Chicago retail stores. This is a great show of the success which they have

PARTIAL VIEW OF BASSETT & WASHBURN'S GREENHOUSES AT HINSDALE, ILL.

made in growing flowers for the shipping trade.

This is one of the most important ranges of glass in the vicinity of Chicago, and it well worth a visit from any grower to inspect the fine stock which may always be seen. It was our pleasure to meet the junior member of the firm, and to be escorted through

the winners of many prizes and their stock brings the best prices in the best markets of the country. The products of these two ranges are sold in New York, Mr. Farenwald's by the New York Cut Flower Co., and Mr. Towill by Moore, Hentz & Nash.

The Farenwald range is noted for its fine Richmond and Killarney roses.

American Beauties, and the stock is in splendid condition. He also grows Richmond, the Killarneys and My Maryland. This new house brings his glass area up to over 60,000 square feet. His stock is handled by the Leo. Niessen Co. In all these ranges the stock is grown on beds.

The Joy Floral Co., Nashville, Tenn.

The extensive greenhouses of the Joy Floral Company never were in better shape or growing better flowers. Everywhere is the evidence of thrift and hard work. Four acres are covered with greenhouses; house after house filled with rose plants promise an abundant supply of the best flowers. Trade is not at its flood tide as yet and some of the rose houses are being held back to come on in greater perfection later. The chrysanthemums are superb and in quantities, there being five large houses of them, all the best varieties, early and late. There is also plenty of both *Harrissii* lilies and *speciosum*. The carnations, like the roses, are a wonderful array of plants and when the weather gets colder will bloom in great perfection. The green-eries are an exhibit all to themselves. Mr. Joy has one large bed of asparagus that is twelve years old. It gives fine, strong, vigorous strings, fine for anything; the maiden-hair ferns are apparently inexhaustible. He also grows some *Swansonia*, Snap-Dragons, *Alysum* and Sweet Pea. Violets are not so abundant. Mr. Joy is trying them in the greenhouse, heretofore having bloomed them in cold frames. He says the long warm dry spell of this season has prevented their blooming in the frames which accounts for their not being plentiful. Mr. Joy is his own foreman and while he superintends the plant, his young son, Thomas H. Joy, has charge of the store and has developed a wonderful talent not only as a salesman but as an artistic worker in flowers, and has put up some of the most pleasing of the season's bridal bouquets. One of these was a wreath to be carried on the arm, one-half was of bride roses and the other half of valleys with the chattelaine.

M. C. D.

CHRYSANTHEMUM TIMOTHY EATON AT BASSETT & WASHEURN'S, H. NSDALE, ILL.

the houses by him and the genial foreman, Andrew Benson, who has been with this concern and superintended the greenhouses ever since they started to grow flowers, some thirty years ago.

Rose Growers of Hillside, Roslyn, Pa.

The man who invented the name "Hillside" had probably climbed the hill from the Reading railway station. Mayhap he took the wrong road, as we did on our first visit, and when he reached the summit was perspiring and uncomfortable with a wilted collar. Therefore, we forgive him. It has frequently been written that "a rose smells as sweet by any other name," and a progressive colony of rose growers can carry on their business as successfully at Hillside as they could if it was called Roseville or Roseland.

But we were writing about the hill. After the hill is climbed, all is smooth sailing. There we find a veritable peaceful valley, with a wooded ridge that protects it from the fierce blasts of winter. Here, within a few hundred yards of each other, are located three great rose ranges with a remarkable man directing each. When we write "great," we do not mean that they are the greatest in the country. The men who own them would be the last to make that claim. But, considering that all these men are yet young and that they have all come up from the ranks, their successful work, in my estimation, deserves more than passing notice.

This noted trio is Adolph Farenwald, Edward Towill and Victor Groshens. We believe that Mr. Towill was the first to locate, Mr. Farenwald arriving soon after, with Mr. Groshens a good third. To all who have attended the exhibitions of the American Rose Society, both Mr. Towill and Mr. Farenwald are well known. They have been

and the prospects for great crops are now flattering, the beds that were first started being now remarkably prolific of buds. One house, 50x300 feet, is planted exclusively in Killarney and there are others. About 20,000 square feet are in Richmond. Mr. Farenwald carries over much of his Killarney stock with great success, some of it being three and four years old and grown on beds. Mr. Towill is growing fine stock of American Beauty, My Maryland, Richmond and the Killarneys. We have never seen anything finer than his large house of American Beauties. Mr. Groshens, though the latest to locate at Hillside has been very energetic and progressive. He this year erected a new house, 42x500 feet, which is altogether planted in

AMERICAN BEAUTY ROSES AT BASSETT & WASHBURN'S HINSDALE, ILL.

C. L. Washburn in the Aisle.

Florists' Telegraph Delivery.

This is an auxiliary of the Society of American Florists and membership is open to all members of the parent society who are doing a retail business.

It is our aim to have at least one member in each city and town, though membership may include as many as desire to join from any one city. It is not the intention to create a monopoly but merely to provide a complete list of reliable florists throughout the country for the interchange of business. The organization can not directly make a profit but is established for the convenience of its members and the expenses are to be met by annual dues of the members.

The Association guarantees prompt payment of bills due from one member to another member. This is made possible by requiring that each member shall deposit a certain amount in a trustee fund and the interest on this fund, together with membership fees, constitutes a guarantee fund for the bills of all. Members who do not pay their bills promptly to be expelled and to lose their deposit.

The charges are based upon the assumption that the total of business going out from and coming into any given city will be in proportion to the population of that city and that the total business will not be much greater if there are several members in that city than if there were only one.

The census returns are not yet available for 1910 so the census of 1900 is at the present time taken as a basis. As an example of how this works out, let us take Indianapolis. The census of 1900 showed a population of 169,164. The payment to the trustee fund is at the rate of 20 cents for each thousand, eliminating fractional parts of \$5.00. This would fix the payment at \$30.00 for Indianapolis. If Bertermanns were the first to join, they would remit \$30.00 for the trustee fund and a membership fee of \$5.00 (which is the same for all members). The annual dues are fixed at 10% of the payment to the trustee fund, which in this case would be three dollars (dues in no case to be less than \$1.00). Now suppose that the Weigands also concluded to come in. The trustee deposit for the whole city having been made by the first member from that city, the secretary would advise the Weigands that their proportion was one-half of the \$30.00, which is \$15.00, and upon its receipt he would refund that amount

to the Bertermanns so that each should have the same amount invested and the deposit in the trustee fund from Indianapolis should always be the same.

For towns of less than 25,000 population, the deposit is fixed at \$5.00.

It should be borne in mind that the payment to the trustee fund and the \$5.00 membership fee are made only once, not every year. It should be further remembered that if you choose to withdraw at any time you are entitled to get back the money you have on deposit in that fund, less your percentage of any bad bills that have been paid out of that fund. In other

Chrysanthemum Plant Grown by C. W. Johnson.

Exhibited at the Chicago Flower Show.

words, this association is not for the profit of an individual but each member will simply pay his part of the cost of maintaining the organization.

Applications have already been received from such a large number of florists from all parts of the country and these represent such a substantial and prosperous class that the success of the enterprise is now a certainty

and it is up to you whether you will move with the procession or watch it go by.

We have met with some objections from a few florists who had already established connections with other florists and were afraid they might be compelled to change. I wish to make it clear that this organization does not try to tell its members where they must place their orders. We think that members will be apt to deal with their fellow members but they are not bound to do so.

It is our plan to carry a complete list of members as a standing advertisement, so that in this way, alone, each member will get back all that the membership will cost him.

It will save confusion and much extra labor for the secretary, if you will see your fellow retailers in your town and send the list of those who wish to join, to the secretary. He can then send you a statement of the amount due from each. The secretary of the Florists' Telegraph Delivery is the secretary of the Society of American Florists, viz: H. B. Dorner, Urbana, Illinois.

Other officers elected at the Rochester meeting in August were: W. J. Palmer, Buffalo, vice-president; W. L. Rock, Kansas City, treasurer; A. B. Cartledge, Philadelphia; W. F. Gude, Washington; Fred H. Meinhardt, St. Louis; Philip Breitmeyer, Detroit; Ernest Wienhoeber, Chicago; George Asmus, Chicago; W. L. Rock, Kansas City; John Bertermann, Indianapolis, and Irwin Bertermann, Indianapolis, directors.

Do not confuse this with any other organization of a similar nature. This is the only one organized under the auspices of the national society.

Hurry up and get into the band wagon.

J. A. VALENTINE, President.
Denver, Colo., Oct. 20th, 1910.

ALLIANCE, O.—J. R. & V. A. Cowgill have purchased the Lamborn floral store at Canton and will take possession November 1.

SAN DIEGO, CALIF.—Miss A. M. Ramford, who some time ago took over the retail store of Miss Sessions, finds business very brisk and has now a regular staff of four clerks. Miss Ramford will open the flower store in the Grant hotel at once. Orchids and choice table decorations are her specialties.

BASSETT & WASHBURN'S FIRST PRIZE VASE TIMOTHY EATON CHRYSANTHEMUMS AT THE CHICAGO SHOW.

THE ROSE.

Among the Roses in Early November.

The cool nights, while bracing and strengthening the rose plants, render care and watchfulness necessary on the part of the grower. A capable night-man, who is interested in his work, and will take the trouble to watch his temperatures carefully, is invaluable at this time. In colder localities quite considerable fire heat is necessary to maintain a correct temperature and buoyant atmosphere while, even in the south, where the nights are cool, even though the temperature may not fall to the danger point, yet the atmosphere has to be kept moving and a little steam has to be turned on to accomplish this; sufficient air should be left on the houses to prevent the temperature rising unduly. A man who is constantly running to his thermometer and who thinks more of a degree or two, one way or another, than of a correct atmosphere in which air, heat and moisture are nicely balanced has yet much to learn in rose culture. At the same time we are thoroughly in accord with keeping the temperature as even as possible under all circumstances.

Inexperienced growers are often at a loss to account for the pale tint found in the foliage of cut-back plants of *Bride* and *Bridesmaid* which is often found on the first growths. On some soils and in some localities it appears to be impossible to prevent it, but as

the season advances the plants soon attain to better color if correctly treated. We are not speaking now of the pale yellow tint that is caused by over-watering or bad drainage. This is a totally different matter, not so easily cured, though it may be prevented by judicious treatment. It is often found in beds of young plants where the whole of the soil has been moistened instead of watering a small space around the plants individually. Where it occurs great care is necessary in spraying, not to moisten the top soil more than can possibly be avoided and in severe cases it may be necessary to go to the extreme of hilling up the soil between the rows and drying it out artificially. This, too, usually disappears as the plants get a grip of the soil, but is troublesome and worrying to the grower in the meantime, especially as this foliage is abnormally tender and easily burnt by bright bursts of sunshine following rain or a dull period.

Cut back *Killarney* and *White Killarney* if neglected at this point soon grow into a thick mass of shoots, this being encouraged by the habit some growers have of snipping out the buds when only half formed, and taking no growth with them. We have found it far better to allow the buds to develop almost to the point where they show color and are producing one or two good leaves. Then when pinched a much stronger growth starts, while the development of the leaves at the base of the shoots is much better and is conducive to a freer root action.

Where long stems are required on plants beginning to flower the first bud will in most cases have to be pinched out and a strong growth taken up from this. *White Killarney* this season is producing finer growths and better stems than the type. *Mme. Chatenay*, as usual, has suffered some from burning and has had to be lightly shaded. But this will no longer be necessary, excepting in extreme southern points.

There may still be vacancies in late planted beds or benches to be filled with plants reserved for the purpose and this matter should be attended to without delay. Thrips may make its appearance at any time now in *American Beauty* and, as spraying is no longer safe, fumigation must be practiced. If taken in hand early the insects are easily destroyed by painting the heated pipes with *Nico-fume* at full strength, two or three applications on alternate evenings being usually all that are necessary. A mixture of camphor in solution and 30 per cent nicotine has been found far more effective than cayenne pepper. Whether it is that this is difficult to procure of full strength or whether it has been overpraised in the past we are not prepared to say, but certainly it has not proved by any means effective against this troublesome pest of the rose grower. Sweetened solutions of *Paris-green* sprayed on the plants and washed off after 24 hours are also effective, but are considerably more trouble than the vaporizing fumigants referred to.

H. R. R.

Roses in the South.

The past two weeks and the next few weeks to come compose the transition period from fall to winter. Needless to say, it is a critical one and requires careful watching on the part of

to convert them into cash, but the future state of the plants and your pocketbook will be better and healthier if only a few of the strongest are cut and the others pinched out as fast as they show color. Most of the teas and

palm of the hand, and a medium mulch of pretty fresh cow manure. This will be sufficient for two or three weeks, when a sprinkling of dried blood will be a wonderful benefit. Manure water may also be supplied once in two weeks until the first of the year. See that the plants are kept nicely tied up and remove all side growth from the bottom suckers. Remove all dead leaves from the beds and keep the houses clean of all rubbish. WM. LEAR.

Piping Rose Houses.

ED. AMERICAN FLORIST:

I have two houses 16x90 feet and 16 feet to the ridge in which I wish to grow roses. I have a Furman boiler and 2-inch pipe. Will you kindly tell me how to arrange the piping in these houses? How many flows and returns will be necessary? Would you advise placing both flows and returns under the benches, which are 2½ feet above the ground? The outside temperature falls to 10 degrees but generally is between 30 degrees and 40 degrees.

CONSTANT READER.

For 16x90-foot houses it will be possible to maintain a temperature of 60 degrees under the conditions mentioned, by using two 2½-inch flow pipes (or, if one has plenty of 2-inch pipe, three 2-inch flows could be used) and five 2-inch returns. The best circulation can be obtained if the flows are upon the plates rather than under the benches. If three flows are used the extra one can be a couple of feet below the ridge. About 900 square feet of radiation will be required for the two houses, but the heater should have a rating of 1,250 square feet.

The arrangement of the returns will depend upon the location of the benches. If the house contains three benches place two returns under each of the side benches and one beneath the center bench. L. R. T.

BASSETT & WASHBURN'S FIRST PRIZE VASE DR. ENGUEHARDT CHRYSANTHEMUMS

At the Chicago Show.

the grower. The plants are making a quick growth and the proper conditions must be maintained to insure this growth being strong and stocky. The days are bright and warm but the nights are cool enough to require a little fire heat. Plenty of ventilation is needed in daytime, raising the ventilators higher as the sun gains power. The cooling off of the houses during the process of syringing will now have to be reckoned with in ventilating. A fall of 5° to 10° is liable to occur when syringing and this fact must be borne in mind when giving air. A few minutes after this operation is finished will suffice to warm up the houses, then proceed to open up the ventilators slowly and gradually. It is still necessary to keep on about three or four inches of air at night, even when firing, until the weather gets below freezing. The air is then dry and continually on the move. By observing these precautions mildew may be held at arms' length. Mildew is purely the result of a condition, therefore avoid that condition. Thomson in his classic poem "The Seasons" correctly and aptly describes mildew as "clammy." That is it exactly. Avoid a clammy condition and your chances are good to avoid consequences. If your American Beauties are growing thick and rank get the syringing done as early as possible in the morning to give them all the chance to dry out before sundown. It is well to look over them in late afternoon and shake off any water that may be hanging in drops on the foliage. A light tap or two with a cane will readily dislodge the drops.

A great quantity of buds are now appearing and the temptation is great

hybrid teas will be right for the holidays if pinched up to November 10 (or even November 15, if the weather is favorable).

The plants will require some feeding now. I prefer at this time a top dressing of bone flour, rubbed in with the

Chrysanthemum Stock Plants.

What is the best way to treat old chrysanthemum plants? How long does it take bone meal to have an effect on plants? H. Y. S.

If the chrysanthemum plants are grown in pots, they can be left in the pots in which they were grown. If in benches or beds, and the same are wanted for some other crop, the better plants, as many as are wanted to produce the cuttings for another year, are lifted and planted quite closely together, being careful to correctly label each variety and with space enough between the varieties so that they will not run into each other and get mixed. A very cool house during the winter months will suffice to keep them, as the cuttings are not generally wanted until spring. If in a climate where the temperature does not run too low a cold frame that can be protected makes an ideal place to keep the plants, but they must be secure from all frost.

Ground bone is one of the slowest of the fertilizers to undergo the necessary chemical changes to become plant food, and the length of time required depends upon the fineness to which it is ground. Bone meal, which is one of the finest if used as a mulch, will make itself felt on the plant growth in ten or twelve days, but the effect is slow and will continue for some time. It is better, if immediate effect is wanted, to mix a small amount of bone meal with some sifted animal manure that is much quicker in action and use this mixture in small quantities and often. W.

BIRDSBORO, PA.—A. J. Grubb is making improvements on greenhouses on Main street.

THE FALL EXHIBITIONS

The Chicago Show.

On November 8 the doors of the Coliseum opened to one of the most beautiful displays of plants and flowers that ever has been shown by the Chicago Horticultural Society. The building is peculiarly adapted to the holding of such a large exhibition, the hall being large and commodious enough to admit of the displaying of large exhibits of decorative plants and the arranging of the same so that there is no overcrowding and each specimen can be given the necessary amount of space to show to the best advantage. The entire roof, which is of ample height, is hung with southern smilax, making a splendid bower, and through this shine the many electric lights, giving a very soft and subdued effect. The placing of the exhibits is very effective and the first impression that the visitor receives when entering the hall is that he has been transported into a vast garden profuse with flowers and beautiful specimens of decorative plants. The garden plan is followed throughout, the plants being arranged in large, artistic groups, as if in beds, with broad walks, the edges of which are laid with sod. Upon entering the portals, in the center are grouped a very fine display of immense chrysanthemum plants, particularly noticeable among which are beautifully grown

specimens of May Forster and Golden Age, exhibited by the Vaughan Seed Store. Directly behind these, stretching on either side, are two very extensive displays of palms and decorative plants from Lincoln and South Parks. The collection from Lincoln Park contains some very large and handsome palms and superbly colored crotons and dracenas, mingled with which are large Pandanus Veitchii. The display from South Park in addition to splendid palms and other decorative plants has in front a table covered with beautiful orchids, containing some very nice specimens of cattleyas, cypridiums and odontoglossums. To the right, in the center, is the bed containing the chrysanthemums grown as standards and half standards, and some very handsome plants were noted, one of Helen Clay Frick being in splendid shape, and a bush plant of Cosmos in the bed was a sight to behold, being literally covered with blooms. Around the hall are arranged other smaller beds containing magnificent specimens of all the plants known to the gardener that can be shown at this season. Beautiful palms, crotons, dracenas, pandanus and ferns on every side, one magnificent plant of cibotium regale being especially noticeable. Julius Roehrs Co. of Rutherford, N. J., has a small but choice collection, including

some very highly colored new crotons. *Dracena Lindenii*, *Massangeana* and *terminalis* and plants of *Celosia Castle Gould*. H. A. Dreer of Philadelphia

to the sod, making a fine contrast to the mass of color behind them. In a portion of this exhibit was seen the new fern *Nephrolepis Roosevelt*, a

fine display of the crested variety of *nephrolepis* was made by Schiller the Florist.

At the end of the hall, under the large balcony, are arranged the exhibits of single chrysanthemum blooms. While the number of contestants was not large, there being but four, and the contest not close, yet the blooms were of very fine quality and some very handsome specimens shown. E. G. Hill Co., of Richmond, Ind., was the first prize winner, closely followed by Elmer D. Smith & Co. of Adrian, Mich. and the Mount Greenwood Conservatories staged some very well finished blooms. These blooms were shown in two classes, each containing 25 varieties, one bloom of each one class calling for blooms to be shown in vases and the other on mossed boards. The contestants all selected their better blooms for the latter class, which, although the boards were placed low down and in the best possible manner, yet the depth of the bloom is lost sight of by this manner of showing, and if the same specimens were arranged in low vases a much better display would have been the result. In the Hill collection were noted some magnificent blooms: Mrs. D. V. West, an exquisite white; F. S. Vallis, a yellow, was the prominent flower it has been for the last few years; Harold Wells is a beautiful pure white; Glenview, an elegantly grown bronze; Wells' Late Pink was a beautiful bloom of exquisite light daybreak pink and Pockett's Crimson was the gem of the collection, an elegantly built bloom of the brightest crimson, the reverse being bright gold and just showing enough to make a brilliant contrast. In the Smith collection O. H. Broomhead was a magnificent flower, a beautiful pink; Mrs. W. Mease, a fine specimen of yellow of the Japanese reflexed class; Naomah, a pure snowy white of beautiful luster, tightly incurved, making a veritable snow ball, and Reginald Vallis, a dark pink, was a

E. G. HILL CO.'S FIRST PRIZE VASE A. J. BALFOUR CHRYSANTHEMUMS.

At the Chicago Show.

has a group of splendid specimens of *Cocos Weddelliana*. Three beds of large plants of single chrysanthemums, one of all yellow, one of white and one of pink varieties, are very effective additions. A bed of splendidly grown bright red geranium plants made a very bright, showy display.

A collection of plants that was very interesting and instructive were the fine specimens exhibited by John Cook, Department of Botany, University of Chicago, which contained many rare plants not often seen in the exhibition halls. The handsome specimens of *Raystonia Borenguena*, a new and very rare palm, which were at least ten feet high and were beautiful and graceful plants, attracted admiration. Other plants that were interesting, being beautiful specimens, were *Coccoloba uvifera*, with large leathery, glossy leaves; two plants of Mexican Pawpaw, one in fruit and the other in bloom; a Mexican pepper plant, a fine specimen of *Ficus Macrophylla*, and a *Coculus laurifolius* and beautifully colored large crotons. Other rare and unusual plants were shown by Robert Mueller, gardener to A. S. Trude, and H. Skjoldager, gardener to E. G. Uihlein, the former showing fine specimens of *Alocasia metallica*, *Anthurium Ferriense* and *Diffenbachia insignis*, and the latter a fine plant of *Anthurium Veitchii* with exceptionally large, handsome foliage. A very handsome bed was that arranged by Vaughan's Seed Store, to the left of the main entrance. Built very high in the center and toward the back and filled with very well grown small plants of the different classes of chrysanthemums, Japanese, incurved, pompons and singles, and the colors beautifully blended. In the front were arranged a fine assortment of ferns that came down

sport of the Harris Boston fern, which were very graceful plants. Another beautiful group exhibited by this concern was a small bed of *Araucaria compacta*, which were very fine specimens. The groups of palms exhibited by Frank Oechslein and The George Wittbold Co. contained some very handsome plants and the cluster of *Pandanus Veitchii* shown by the former were of extra good quality. A very

GENERAL VIEW OF THE CHICAGO FLOWER SHOW.

fine specimen. Merza was a finely built bloom and ranked among the best. In the Mount Greenwood Conservatories collection, which, although the blooms were not quite as large as in the other two exhibits, yet the finish of the flowers was very fine and beautiful specimens of Rosemaur, an incurved Japanese pink, Mary Donnellan, yellow, Mrs. J. C. Neill, light yellow and Naomah, white, were elegantly built blooms.

The classes calling for vases of 12 and 25 blooms of a variety brought forth a great many very beautiful and well grown specimens. These were arranged in the several booths around the hall and attracted great attention from the spectators. In the 50 blooms, Timothy Eaton, Bassett & Washburn were first with a fine vase of extra large blooms. The contest in all the yellows was very close and the blooms were grand. E. G. Hill Co. was first in Golden Eagle, a beautiful vase; Elmer D. Smith & Co. first in Col. D. Appleton, magnificent blooms, and Mount Greenwood Conservatories first in Major Bonaffon, a finely finished vase of blooms. In pinks, Poehlmann Bros. Co. was first with a beautiful vase of Maud Dean, and Bassett & Washburn first with elegant Dr. Enguehard. In any other color Hill & Co. were first with a magnificent vase of Glenview. In the 12 blooms the competition in many of the classes

was very close and the exhibits all of excellent quality, particularly the vases of Pockett's Crimson and Merza shown by Elmer D. Smith & Co., of Adrian, Mich., and President Roosevelt by Bassett & Washburn.

Passing from the main hall into the smaller hall at the south end of the building, one was suddenly transported from summer or fall to winter, for here the nurserymen had literally outdone themselves in their displays of trees and shrubs, and by the liberal use of cotton on the floor and scattered through the shrubbery had pictured a beautiful winter scene. The Geo. Wittbold Co., Vaughan's Seed Store, The W. W. Barnard Co., Klehm's Nursery Co. of Arlington Heights and Frank Kadlec Nursery of Evanston all made very interesting and instructive displays of trees, evergreens and shrubs, which were correctly and legibly named. The box trees grown in various forms shown by the Kadlec nurseries attracted a great deal of attention. Leaving this hall and proceeding back to the main hall, before reaching the summer scene again, The Winterson Seed Co. is passed, and one gets a glimpse of spring, with the pretty representation of a tulip bed in bloom, backed with fine specimens of box and evergreen plants. A very artistic display of nursery stock is also made by Frank Clavey of the Ravinia nurseries, Deerfield, Ill.

Schiller, the Florist, showed a very tasty dinner decoration of single chrysanthemums and a booth in which were arranged some beautiful bridal arrangements was the center of attraction. A bride's shower bouquet of lily of the valley and a bridesmaid's bouquet of My Maryland roses were very beautifully shown and a bride's muff of pink tulle with a cluster of Vanda Carulea, with a few sprays of lily of the valley, was exquisite and greatly admired. Two exhibits that were very attractive were the case of orchids shown by E. G. Uihlein and the grafted chrysanthemum plant which had blooms of more than twenty varieties upon it.

Back of the nursery exhibits has been arranged a small auditorium in which on the several evenings will be delivered lectures by noted horticulturists on floricultural and horticultural subjects, which will be illustrated by stereopticon views. The lecture on the opening evening was by Prof. H. B. Dornier of the University of Illinois, on the subject, "What Illinois is Doing For the Florists."

The judges selected to award the several premiums are Prof. John F. Cowell of Buffalo, N. Y.; Adam Graham of Cleveland, O., and William L. Rock of Kansas City, Mo. Prof. Cowell not arriving the first day, Prof. H. B. Dornier was selected to act in his stead.

The roses were the feature of the show the second day, and the exhibition was small when compared with other years, but the quality of the stock shown by all of the exhibitors was very fine. There were but three entries in the class of 100 American Beauties, but the vase of blooms exhibited by Bassett & Washburn, which was awarded first premium, were simply grand and the color was a deep brilliant shade very seldom seen in this rose. This firm showed some superb flowers of Rhea Reid, Kaiserin, Augusta Victoria, Brides and My Maryland, securing five first prizes in six entries. The Killarney and White Killarney roses exhibited by Poehlmann Bros. Co. were exceptionally fine, securing first premium in each class, but they had a very worthy competitor in the blooms shown by Wendland & Keimel of Elmhurst, who showed some beautiful flowers. Poehlmann Bros. Co. were winners also in Richmond roses.

On Thursday morning the carnationists took possession of all the available space in the hall and they were out in full force and a very fine showing of carnations is promised. Some very elegant blooms are staged awaiting the judges' verdict. The Northwestern

Florists' Club had made preparations for the entertainment of the many visitors who attended the show, and a large gathering sat down at the tables in the banquet hall of the Hotel La Salle and enjoyed the bountiful menu which was provided. After the serving of the repast the remainder of the evening was spent in a most enjoyable manner listening to many witty remarks and interesting stories which were delivered by the gifted members and guests present.

In the middle of the hall to the left of the entrance is erected a large, well decorated stand in which Hand and his band, assisted by the following soloists, Miss Genevieve Smith, harpist; Miss Grace Hamlin, soprano; E. Wack, with cornet; Charles Fischer, with xylophone, and Darroll Martin with trombone, entertain the visitors throughout the afternoon and evening.

Awards—Chrysanthemums.

Best vase, 50 blooms, Wm. H. Chadwick.—Poehlmann Bros. Co., first; E. G. Hill Co., second; Albert Hay Floral Co., third.

Best vase, 50 blooms, Timothy Eaton.—Bassett & Washburn, first; E. G. Hill Co., second; Poehlmann Bros. Co., third.

Best vase, 50 blooms, any other variety.—E. G. Hill Co., first; Mt. Greenwood Cemetery Association, C. W. Johnson, grower, second; Elmer D. Smith & Co., third.

Best vase, 50 blooms, Maud Dean.—Poehlmann Bros. Co., first.

Best vase, 50 blooms, any other color.—E. G. Hill Co., first; Poehlmann Bros. Co., second and third.

Best 12 blooms, one variety, white.—Elmer D. Smith & Co., first; Poehlmann Bros. Co., second; E. G. Hill Co., third.

Best 12 blooms, one variety, yellow, not darker in color than Major Bonaffon.—Bassett & Washburn, first; Poehlmann Bros. & Co., second; E. G. Hill Co., third.

Best 12 blooms, one variety, yellow, darker in color than Major Bonaffon.—Bassett & Washburn, first; E. G. Hill Co., second; Mt. Greenwood Cemetery Association, third.

Best 12 blooms, one variety, pink, lighter in color than Viviani Morel.—Mt. Greenwood Cemetery Association, first.

Best 12 blooms, one variety, pink, not lighter in color than Viviani Morel.—Mt. Greenwood Cemetery Association, first; H. W. Buckbee, second.

Best 12 blooms, one variety, red.—Elmer D. Smith & Co., first; Poehlmann Bros. Co., second; E. G. Hill Co., third.

Best 12 blooms, one variety, bronze.—Elmer D. Smith & Co., first; E. G. Hill Co., second.

Best 12 blooms, one variety, any other color.—Bassett & Washburn, first.

Best 12 blooms, Mrs. Jerome Jones.—C. C. Pollworth & Co., first.

Best collection, named varieties, one bloom each, 25 varieties.—E. G. Hill Co., first; Elmer D. Smith & Co., second; Mt. Greenwood Cemetery Association, third.

Best collection, named varieties, one bloom each, 25 varieties, to be shown on mossed boards.—E. G. Hill Co., first; Elmer D. Smith & Co., second; Mt. Greenwood Cemetery Association, third.

Best display pompon varieties in at least 15 varieties, five sprays or more of each sort, shown in separate vases.—E. G. Hill Co., first.

Best display of single chrysanthemums, at least 15 varieties, five sprays or more of each sort shown in separate vases.—E. G. Hill Co., first; Alois Frey, second.

Chrysanthemum Plants.

Best specimen plant, any color, no restriction as to size of pot or growth.—Vaughan Seed Store, first and second; Mt. Greenwood Cemetery Association, third.

Best specimen plant, white.—Vaughan Seed Store, first and second; Robt. Mueller, gardener to A. S. Prude, third.

Best specimen plant, yellow.—Vaughan Seed Store, first; Mt. Greenwood Cemetery Association, third.

Best specimen plant, pink.—Vaughan Seed Store, first and second; Mt. Greenwood Cemetery Association, third.

Best specimen plant, single.—Vaughan Seed Store, first; Robt. Mueller, second; Mt. Greenwood Cemetery Association, third.

Best specimen plant, anemome.—Vaughan Seed Store, first; Robt. Mueller, second; Mt. Greenwood Cemetery Association, third.

Best standard, any color, not less than 30-inch stem.—Vaughan Seed Store, first; Mt. Greenwood Cemetery Association, second; Robt. Mueller, third.

Best two half-standards, not less than 12-inch stems, nor more than 24-inch stems, two varieties.—Vaughan Seed Store, first; Mt. Greenwood Cemetery Association, second and third.

Best three specimen plants, in variety, not less than 10-inch pots.—Vaughan Seed Store, first; Mt. Greenwood Cemetery Association, second; Robt. Mueller, third.

Best five specimen plants, pompon varieties, not less than 8-inch pots.—Vaughan Seed Store, first; Robt. Mueller, second; Mt. Greenwood Cemetery Association, third.

Best five specimen plants, single, white, not less than 8-inch pots.—Vaughan Seed Store, first; Mt. Greenwood Cemetery Association, second; Robt. Mueller, third.

Best five specimen plants, single, yellow, not less than 8-inch pots.—Vaughan Seed Store, first; Robt. Mueller, second.

Best five specimen plants, single, pink, not less than 8-inch pots.—Vaughan Seed Store, first; Robt. Mueller, second; Mt. Greenwood Cemetery Association, third.

Best 12 plants grown to single stem and bloom, any color, not over 6-inch pots, not over 30 inches high above the pots.—Vaughan's Seed Store, first.

Best group of chrysanthemums, plants arranged for effect, to occupy not less than 100 square feet.—Vaughan's Seed Store, first.

Best plant of odd or bizarre variety.—Mt. Greenwood Cemetery Association, first.

Best 24 plants, single stems, 6-inch pots, one or more varieties.—Vaughan's Seed Store, first.

Miscellaneous Plants.

Most interesting grafted specimen plant of any kind (if chrysanthemum. It must have at least three inches clean stem above soil). Rule 2 does not apply in this class.—Vaughan's Seed Store, first.

Best collection orchids (not less than 25 plants).—E. G. Uihlein, second.

Best three palms, not less than 10 feet high.—John Cook, University of Chicago, first.

Best Boston fern (or sports of the same).—Adam Wolniewicz, first.

Best six araucarias.—Vaughan Seed Store, first; Frank Orschlin, second.

Best three Gloire de Lorraine begonias (or its types in not less than 8-inch pots).—Schiller, the Florist, second.

Best flowering plant other than specified in class 48, chrysanthemums excluded.—Fritz Bahr, first.

CHRYSANTHEMUM PLANT ANNA.

Exhibited at the Chicago Show by Mount Greenwood Cemetery Association.

Floral Co. of Willmette, Ill., have some exceptionally fine specimens that promise to be winners in their classes. C. C. Pollworth Co. of Milwaukee also staged some very beautiful flowers. Other large exhibitors are Poehlmann Bros. Co., F. Dorner & Sons Co., La-Fayette, Ind.; Wellworth Farm Greenhouses, Downer's Grove, Ill.; Mount Greenwood Cemetery Association, Bassett & Washburn, Chicago Carnation Co. and J. A. Budlong Co. The banquet held the evening of November 10 was a grand success. The Chicago

Best vase, 50 blooms, Dr. Euguehard.—Bassett & Washburn, first; C. C. Pollworth & Co., second; Mt. Greenwood Cemetery Association, third.

Best vase, 50 blooms, any other variety.—E. G. Hill Co., first; Mt. Greenwood Cemetery Association, second; Bassett & Washburn, third.

Best vase, 50 blooms, Maj. Bonaffon.—Poehlmann Bros. Co., first; E. G. Hill Co., second; Elmer D. Smith & Co., third.

Best vase, 50 blooms, Golden Eagle.—E. G. Hill Co., first; Mt. Greenwood Cemetery Association, second; C. C. Pollworth & Co., third.

Best vase, 50 blooms, Col. D. Appleton.—Elmer D. Smith & Co., first; Poehlmann Bros. Co., second.

Best vase, 50 blooms, any other variety.—Poehlmann Bros. Co., first; E. G. Hill Co., second.

Best six Boston ferns (or sports of the same, one or more varieties, not less than 10-inch pots).—Vaughan Seed Store, first; Schiller, the Florist, second.

Best collection of ferns, number of varieties to be considered in judging.—E. G. Uihlein, first; Vaughan Seed Store, second; Schiller, the Florist, third.

Best filled fern dish, not to exceed 15 inches in diameter.—The Geo. Wittbold Co., first; J. A. Cook, University of Chicago, second; Peter Schilt, gardener to Kenneth Barnhart, third.

Best basket or hamper of plants.—E. G. Uihlein, first; The Geo. Wittbold Co., second; John Cook, third.

Best 12 Pandanus Veitchii, not less than 6-inch pots.—Frank Oechslein, first.

Best group of dracenas, in variety.—E. G. Uihlein, first.

Best three Ficus Pandurata.—Schiller, the Florist, first.

Roses.

Best 25 American Beauty—Bassett & Washburn, first; Poehlmann Bros. Co., second; Peter Reinberg, third.

Best 40 Richmond—Poehlmann Bros. Co., first; Peter Reinberg, second; J. A. Budlong, third.

Best 40 My Maryland—Bassett & Washburn, first; J. A. Budlong, second; Poehlmann Bros. Co., third.

Best 40 Bride—Bassett & Washburn, first; J. A. Budlong, second.

Best 40 Bridesmaid—Bassett & Washburn, first; J. A. Budlong, second.

Best 40 Killarney—Poehlmann Bros. Co., first; Wendland & Keimel, second; J. A. Budlong, third.

Best 40 White Killarney—Poehlmann Bros. Co., first; Bassett & Washburn, second; Wendland & Keimel, third.

Best 40 any other variety—Peter Reinberg, first; J. A. Budlong, second; Poehlmann Bros. Co., third.

Best 100 American Beauty—Bassett & Washburn, first; Poehlmann Bros. Co., second; J. A. Budlong, third.

Best 100 Richmond—Poehlmann Bros. Co., first; J. A. Budlong, second.

Best 100 Killarney—Poehlmann Bros. Co., first; Wendland & Keimel, second; J. A. Budlong, third.

Best 100 White Killarney—Poehlmann Bros. Co., first; Wendland & Keimel, second; J. A. Budlong, third.

Best 100 My Maryland—Poehlmann Bros. Co., first; J. A. Budlong, second.

Best 100 any other variety, red—Bassett & Washburn, first; Poehlmann Bros. Co., second.

Best 100 any other variety, white—Bassett & Washburn, first; C. Loveridge, second; J. A. Budlong, third.

Best 100 any other variety, pink—J. A. Budlong, first.

Best 100 any variety—Poehlmann Bros. Co., first; J. A. Budlong, second.

Best 12 blooms of a new rose never exhibited in this country previous to this season, a silver cup valued at \$25.00.—E. G. Hill & Co. Honorable mention.

Best 25 blooms, any variety not in commerce.—E. G. Hill & Co., first.

Visitors.

The following visitors were noted during the week:

W. Adcom, Janesville, Wis.
Jacob Allenbach, Peoria, Ill.
Edw. Amerpohl, Janesville, Wis.
V. H. Anderson and wife, Belvidere, Ill.
Harry Balsley, Detroit, Mich.
Mrs. Wm. Benning, St. Joseph, Mich.
Anda B. Bergstrom, Gibson City, Ill.
John Bertermann, Indianapolis, Ind.
Wm. Beyer, South Bend, Ind.
H. M. Bills and wife, Davenport, Ia.
R. J. Birnbaum, Springfield, Ill.
J. A. Bissinger, Lansing, Mich.
Jos. Bock and wife, Burlington, Ia.
C. O. E. Boehm, Davenport, Ia.
Mrs. Brauer, Grand Rapids, Mich.
A. C. Brown, Springfield, Ill.
H. W. Buckbee, Rockford, Ill.
Frank Button, Lake Geneva, Wis.
M. J. Callahan, St. Joseph, Mo.
F. A. Chapman, Grand Rapids, Mich.
W. W. Coles and daughter, Kokomo, Ind.
Miss Minnie L. Copeland, Marion, Ill.
Adair Cowan, Mount Vernon, Ia.
A. T. Cowan, Mount Vernon, Ia.
John F. Cowell, Buffalo, N. Y.
G. F. Crabb, Grand Rapids, Mich.
Eli Cross and wife, Grand Rapids, Mich.
Theo. A. Dana, LaFayette, Ind.
C. E. Desser and wife, Nebraska City, Neb.
Geo. J. Dinkel, Springfield, Ill.
H. E. Doles, St. Joseph, Mich.
H. B. Dörner, Urbana, Ill.
Miss Emily Dörner, LaFayette, Ind.
E. O. Dunham, Richmond, Ind.
Geo. Dysinger, Ionia, Mich.
J. C. Elspersmann, Evansville, Ind.
M. H. Elvidge and wife, New York.
A. Emerich, Paris, France.
John A. Evans, Richmond, Ind.
Frank Fiedler, Elgin, Ill.
Mrs. Alice M. Flick, Fort Wayne, Ind.
Mrs. J. M. Gasser, Cleveland, O.
Louis A. Giger, St. Louis, Mo.
A. L. Glaser, Dubuque, Ia.
Adam Graham, Cleveland, O.
Chris A. Hageman, Peoria, Ill.
Carl Hagenburg, Cleveland, O.
Geo. F. Hartung, Sandusky, O.
N. A. Harkett, Dubuque, Ia.
Geo. A. Heintz, Toledo, O.
Chas. A. Hewitt and wife, Monmouth, Ill.
Miss Ann Hewitt, Monmouth, Ill.
J. Hielbrinch, Grand Rapids, Mich.

Harry Hofmann, Jacksonville, Ill.
Thos. Holmes, Elgin, Ill.
Wm. F. Hornink, Cleveland, O.
J. L. Johnson and wife, DeKalb, Ill.
Walter T. Johnson, Muncie, Ind.
T. C. Joy, Nashville, Tenn.
Jas. Karins, Philadelphia, Pa.
W. F. Kasting, Buffalo, N. Y.
Wm. A. Kennedy, Jr., Milwaukee, Wis.
Frank J. Knecht, Fort Wayne, Ind.
F. R. Knehe, Lake Geneva, Wis.
Geo. A. Kuhl, Pekin, Ill.
Miss Lottie Kuhn, Michigan City, Ind.

Pennsylvania Horticultural Society.

The annual exhibition of the Pennsylvania Horticultural Society, which opened November 8 at Horticultural Hall, was a splendid display of chrysanthemums and flowering and foliage plants, largely from the many private estates. The arrangements were excellent and a most beautiful exhibition

CHRYSANTHEMUM PLANT GLADYS.

Exhibited at the Chicago Show by Mount Greenwood Cemetery Association.

W. Logan Kring, Fairbury, Ill.
Chas. Loveridge, wife and daughters, Peoria, Ill.
M. A. McKenney, Milwaukee, Wis.
E. H. Mann and wife, Richmond, Ind.
Miss Katherine Manz, Owensboro, Ky.
A. Miller, Philadelphia, Pa.
J. A. Muller, Rutherford, N. J.
A. L. Munk, Mt. Gilead, O.
E. A. Munk, Columbus, O.
Samuel Murray, Kansas City, Mo.
Harry Newby, Logansport, Ind.
Grant Newport, Cedar Rapids, Ia.
P. J. Olinger and wife, Cincinnati, O.
H. A. Olsen and wife, Peoria, Ill.
S. J. Perry, Grand Rapids, Mich.
Andrew Petersen and wife, Hoopston, Ill.
Frieda M. Peterson, Gibson City, Ill.
J. A. Peterson, Cincinnati, O.
Wallace R. Pierson, Cromwell, Conn.
I. L. Pillsbury, Galesburg, Ill.
C. C. Pollworth, Milwaukee, Wis.
H. C. Reiche, Michigan City, Ind.
Jos. Reisinger, LaCrosse, Wis.
Fred Reutschler, Madison, Wis.
Geo. Reutschler, Madison, Wis.
Frank L. Riley, Des Moines, Ia.
Walter B. Riley, Des Moines, Ia.
Wm. L. Rock, Kansas City, Mo.
C. W. Scott, New York.
G. A. Sellinthin and son, La Crosse, Wis.
A. J. Smith and wife, Lake Geneva, Wis.
Elmer D. Smith and wife, Adrian, Mich.
Henry Smith, Grand Rapids, Mich.
H. P. Smith, Peoria, O.
Philip J. Smith, Sandusky, O.
S. Sprague, Mishawaka, Ind.
John J. Stuppy, St. Joseph, Mo.
Norman A. Sullivan, Detroit, Mich.
J. A. Tapscott and wife, Owensboro, Ky.
W. E. Trimble, Princeton, Ill.
Geo. E. Valke, Minot, N. Dak.
Harry Van Velden, Grand Rapids, Mich.
W. J. Vesey, Jr., Fort Wayne, Ind.
W. L. Wahlstedt, Lake Geneva, Wis.
Mrs. W. H. Walker, Janesville, Wis.
Miss Rose Waltman, Davenport, Ia.
J. E. Winhart, Nebraska City, Neb.
R. E. Windler, St. Louis, Mo.
L. B. T. Winslow, Janesville, Wis.
Edith B. Wood, Cleveland, O.
Paul Zoellner, La Crosse, Wis.

was the result. Among the commercial exhibitors were Henry A. Dreer with an exhibit of foliage plants and hardy chrysanthemums, Henry F. Michell Co. showing bulbs, William H. Moon Co. with a fine display of evergreens and shrubbery and Conard and Jones Co. with an exhibit of cannas. The awards were as follows:

Best four plants Japanese chrysanthemums, four colors.—F. C. Penfield (John McCleary, gardener), first; Mrs. Joseph F. Sinnott (David Ingram, gardener), second.

Best three plants, pink.—Mrs. J. F. Sinnott, first; F. C. Penfield, second.

Best three plants, three varieties.—F. C. Penfield, first.

Specimen plant in not over 14-inch pot.—F. C. Penfield, first; J. W. Pepper (William Robertson, gardener), second.

Best two plants in not over 10-inch pot.—F. C. Penfield, first; Mrs. J. F. Sinnott, second.

Best six plants, one variety.—P. A. B. Widener, first; John Wanamaker (John H. Dodd, gardener), second.

Best six plants, yellow, not over six-inch pots.—Mrs. R. B. Ellison (Alex Lindroth, gardener), first; Mrs. F. C. Penfield, second.

Best six plants, any other color, not over six-inch pots.—P. A. B. Widener, first; Mrs. F. C. Penfield, second.

Best six plants, bronze, six-inch pots.—Mrs. F. C. Penfield, first; G. B. Newbold (Samuel Batchelor, gardener), second.

Best single flowering varieties.—John W. Pepper, first; C. B. Newbold, second.

Best six blooms, chrysanthemums, Mrs. Frank Thomson.—John W. Pepper, first; P. A. B. Widener, second.

Four vases, five blooms each.—J. W. Pepper, first; P. A. B. Widener, second.

Fifty blooms, 10 varieties.—P. A. B. Widener, first; C. B. Newbold, second.

Vase of 12 blooms.—P. A. B. Widener, first; J. W. Pepper, second.

Six vases, six varieties.—John W. Pepper, first; John Wanamaker, second.

Five blooms Beatrix May.—John Wanamaker, first; Mrs. Wm. M. Polts (W. J. Henderson, gardener), second.
 Five blooms Col. D. Appleton.—Geo. W. Childs-Drexel (Thos. Long, gardener), first; Mrs. R. B. Ellison, second.
 Five blooms O. H. Broomhead.—Craige Lippincott (Wm. Morton, gardener), first; J. W. Pepper, second.
 Display of hardy pompon chrysanthemums.—John W. Pepper, first.
 Best five white blooms.—John W. Pepper, first; Mrs. R. B. Ellison, second.
 Best five yellow blooms.—Geo. W. Childs, first; John Wanamaker, second.
 Best five pink blooms.—John Wanamaker, first; Craige Lippincott, second.
 Best five any other color.—Mrs. R. B. Ellison, first; C. B. Newbold, second.

San Francisco Flower Show.

The Grand Fall Flower Show this year at the Fairmont Hotel will long be remembered as one of the best and largest attended shows ever given by the Pacific Coast Horticultural and California State Horticultural Societies. The exhibition attracted a fashionable crowd, and many of San

ranged. There were two especially fine exhibits in this class; one by J. A. Carbone, and the other by MacRorie, McLaren Co. The collections of these parties were arranged so as to show the orchids as they grow in their tropical countries, and the effect of displaying them in this manner won the approval of all. There was an unusual amount of fine plants offered for competition, but among those that received particular mention was a plant belonging to J. A. Carbone, a white *Cattleya Gaskelliana*. It was a very handsome plant, and was at all times surrounded by a group of admirers.

Along with the other fine exhibits of ferns and plants, which were numerous, was to be found the work of the floral artists and decorators, whose skill helped to display nature's gifts in this particular line to a greater ad-

MINTA, LIGHT PINK POMPON.

Awarded Certificate by Chrysanthemum Society of America to Elmer D. Smith & Co., Adrian Mich.

Francisco's four hundred took active interest in displaying some of their choicest collections of plants and flowers, capturing in many instances first prize for their products. The display of chrysanthemums was particularly attractive, the flowers being larger and showier than ever. The contest for prizes in this class was entered by some of our most prominent growers, and their displays were so perfect as to render it a very difficult task for the judges to select the prize winners.

The orchid display was also one of the chief attractions of the show, and many high compliments were given their exhibitors for the skill and manner in which their shows were ar-

vantage than when the flowers were left upon the plant or bush. Many beautiful and original designs were executed, which reflected great credit upon their designers. One of the designs which received considerable praise was made by Pelicano, Rossi & Co. It was an exact reproduction of the Western Hemisphere, and was made with white and red carnations and selected ferns, all artistically draped with ribbon.

The professional judges of the show were E. Schwerin, S. Clack, C. Wolters, M. Ebel and S. R. Lundy. These gentlemen were assisted in passing judgment upon exhibits by a number of prominent society ladies.

The awards were as follows:

Best chrysanthemum plants.—H. Gertzheim, first.
 Best vase 50 chrysanthemums.—W. Munro, first; Donato Bros., second.
 Best vase 25 chrysanthemums.—Enomoto Bros., first; W. Munro, second.
 Best vase of chrysanthemums.—Pelicano Rossi & Co., first.
 Best vase of chrysanthemums.—M. H. De Young (Uhlmann, gardener), first.
 Best vase of chrysanthemums.—H. Gertzheim, first.
 Best arrangement of flowering and foliage plants.—McRorie, McLaren Co., first.
 Best collection of 12 ferns.—H. Plath, first.
 Best collection of *Neprolepis*.—H. Plath, first; E. James, second.
 Best collection *Neprolepis elegantissima*.—Alameda Floral Co., second.
 Best *Cibotium Scheidei*.—Jos. C. Love, first.
 Best stag and tree ferns.—McRorie, McLaren Co., first.
 Basket of ferns.—Wm. Munro, first.
 Best collection of orchids.—McRorie, McLaren Co., first.
 Best collection of cattleyas.—E. J. De Sabla (Hill gardener), first.
 Best collection of phalaenopsis.—J. A. Carbone, first.
 Best collection of oncidiums.—McRorie, McLaren Co., first.
 Best twelve crotons.—E. J. De Sabla, first.
 Best twelve cyclamen.—E. James, first.
 Best collection tuberous begonias.—T. W. Breen, first.
 Best twelve primulas.—Wm. Munro, first; E. J. De Sabla, second.
 Best basket potted plants.—H. M. Sanborn Co., first; Pelicano Rossi & Co., second.
 Best vase of American Beauty roses.—F. Rossi, first; H. M. Sanborn, second.
 Best vase of white roses.—F. Rossi, first; H. M. Sanborn Co., second.
 Best three vases of roses.—E. W. McLellan Co., first; J. A. Carbone, second.
 Best white carnations.—J. A. Carbone, first.
 Best red carnations.—J. A. Carbone, first.
 Best collection of carnations.—Enomoto Bros., first.
 Best collection of dahlias.—Wm. Kettlewell, first.
 Best vase of dahlias.—P. H. Eckelmann, first; M. H. De Young, second.
 Best basket of dahlias.—Sievers, Cornwall Co., first.
 Best collection single dahlias.—J. W. Bagge, first.
 Best collection cactus dahlias.—Wm. Kettlewell, first.
 Best table decoration.—J. Seulerberger, first; H. M. Sanborn Co., second.
 Best brides' bouquet.—Miss C. Williams, first; Pelicano Rossi & Co., second.
 Best bridesmaid bouquet.—Pelicano Rossi & Co., first; Miss C. Williams, second.
 Best original design.—Pelicano Rossi & Co., first; H. M. Sanborn Co., second.
 Best basket mixed flowers.—Francis Floral Co., first; Pelicano Rossi & Co., second.
 Best collection of vegetables.—Wm. Kettlewell, first.

Lenox Horticultural Society.

It was the writer's privilege to act as one of the judges at the annual chrysanthemum exhibition of the Lenox, Mass., Horticultural Society on October 26-27. I had previously heard a good deal about the horticultural status of Lenox and naturally expected to find something very fine. To say that I was not disappointed with my visit is putting it mildly. I was delighted with my visit, the hospitable way in which I was received and entertained, and with the high order of horticulture and the horticulturists. The money value of the prizes is small in Lenox compared with many other places, and these annual exhibitions cannot be charged to any mercenary motives, but are the outcome of real sportsmen-like spirit and friendly rivalry. The awarding of the various prizes was no easy task, the decisions in many cases being awarded by a narrow margin of points. This was particularly so in the vegetable classes, where only a matter of a few points separated the winning lot. Yet the kicking which one usually hears as the aftermath of the judge's decision was conspicuously absent.

The plant groups first of all were a revelation of artistic taste and design. Three contestants entered for the plant groups and two for the orchid groups. The arrangement in each case was dissimilar and the individual specimens used were of the highest order culturally, and the awarding of the prizes was very much a matter of individual taste regarding arrangement. The first prize was awarded to F. Heermans, superintendent to W. D. Sloane, Esq., "Elmcourt." His arrangement was very gracefully combined and the individual specimens could be seen at a glance from any point of vantage, and this proved the deciding factor in the award. The ground work was extremely rich, consisting principally of *Adiantum Farlowense* and highly colored rex begonias. The supporting columns on both sides were principally composed of this, with various specimen crotons, of Warrent and Prince of Wales varieties, also *Phoenix Reicheni* and *Asparagus Elongatus*. The specimen crotons were particularly handsome, standing 4 feet high and furnishing from the pots upward. The dominating colors used were white and pink, which consisted of begonias, lilies, gypsophylla and lily of the valley. The second prize was

awarded to Edward Jenkins, superintendent to Giraud Foster, Esq., "Bellefontaine." Pink and white also predominated in his arrangement, and his specimens were all that could be desired, but his group was heavier and had to be seen from various points to be assimilated. He had also some beautiful Warreni crotous and specimen palms. His flowering plants consisted of cypripedium, begonias, Gloire de Lorraine, fuschia, "The Rockford," specimen lilies and clerodendron. His ground work consisted of lily of the valley, adiantum Farleyense, filionias and asparagus sprengeri. The third prize was awarded to Allan Jenkins, superintendent to S. P. Shoter, Esq., "Shadowbrook." His group was a rock work design, neat, original and effective, but lacked in the richness of foliage. His color effect was red and white, consisting principally of clerodendron falax, bouvardia, justicia, lilies and lily of the valley. A. J. Loveless, superintendent to Mrs. John Sloane, was first for the group of orchids, and F. Heermans second. Mr. Heermans' group was more of a table effect in which he used a good deal of cork bark. They consisted principally of Cattleya labiata and Oncidium Rogersii, with adiantum Farleyense as a ground work. They were a charming lot, most tastefully and sweetly arranged, but they lacked the costliness and variety of the Mr. Loveless group which won out for him.

Mr. Loveless had some very fine specimens of cypripedium Danderae, dendrobium phalenopsis, odontoglossum crispum, oncidium papilio, oncidium ornithorhynchium and album, and many others. These groups were certainly worth going a long way to see. They were an education to the average citizen and also to the experienced gardener.

The chrysanthemum blooms were well up to the average, but we believe not quite as good as former years. The varieties principally shown were in the more recent introductions, viz.: Gladys Blackburn, Mrs. Stevens, Hetty Wells, Owunda, W. Mease, Keith Luxford, Mrs. Syme and R. F. Felton. Amongst the older varieties the following predominated: Beatrice May, F. S. Vallis, Prest, Viger, Mrs. J. C. Neill, Pockett's Crimson, Pockett's Surprise, Mrs. Wm. Duckham, W. M. Moire, Lady Hopetoun, Glenview, Merstham Blush, Rose Pockett, Mrs. J. C. Dunn, Leslie Morrison, Merza, Commandant Mathieu, Wm. Duckham, Mrs. Etherington, Mrs. Norman Davis, Nanceur Ber, Hamilton, Reginald Vallis and Geo. J. Bizard. In the six-inch pot classes the following were principally used: Mrs. Wm. Duckham, Beatrice May, Mrs. Stevens, Leslie Morrison and Pockett's Crimson. Among the single varieties the following were noted as particularly good: Merstham White, Annie Stevens, Nellie Redding, Anne Betts, Chas. Graves, Crown Jewel, Alice Cumber, Thirza Sanford, Sylvia Slade, Kitty Bourne, Mary Richardson, Mrs. Ferguson, Daisy, Mrs. Roberts, Marguerite and Yellow Queen. Among the carnations Alma Ward, Mrs. C. W. Ward and Dorothy Gordon were in the front in their respective classes. Lady Alzy was also there in good size and form.

For twelve flowering plants Mr. A. H. Wingett, superintendent for Chas. Lanier, Esq., won out with twelve fine specimens of geraniums. It is a wonder they are not more used, for here they made a fine display. Next in importance to the plant groups in Lenox is the vegetable displays. As will be noted from the prize list keener competition exists here than in any other section of the exhibition. The orchid grower, the chrysanthemum grower, the rose and carnation grower, all contribute to the vegetable classes. They had the finest lot of vegetables that I have ever seen, and I question if a finer lot was ever seen in this country. The first prize onions were an even lot and averaged 3½ pounds each. I do not believe there was an onion in the exhibition that weighed less than two pounds. Parsnips measured four feet, carrots three feet and leeks with 29 inches of blanche were some of the features. The gardeners of Lenox are certainly to be congratulated upon the most excellent showing. As a whole they stand at the head of their profession and their work will long be remembered.

The judges were: Howard Nichols, Yorkers, N. Y.; Richard Gardner, Newport, R. I.; Mr. Burton, Bar Harbor, Me.; Walter Angus, Chapinville, Conn.

Awards—Plants.

Three specimens chrysanthemum plants.—R. Spiers, gardener to Mrs. J. E. Parsons, first. One specimen chrysanthemum plant.—R. Spiers, first.

Twelve chrysanthemum plants grown to single stem in 6-in. pots.—S. Carlquist, gardener to Mrs. Robt. Winthrop, first; R. Spiers, second; A. J. Loveless, third.

Group of plants 100 sq. ft., arranged for effect.—F. Heermans, first; Edw. Jenkins, second; Allan Jenkins, third.

Group of orchids, 50 sq. ft.—A. J. Loveless, first; F. Heermans, second.

Best specimen palm Kentia.—A. H. Wingett, supt. for Chas. Lanier, Esq., first; A. J. Loveless, second.

Best specimen palm Areca.—A. H. Wingett, first; F. Heermans, second; Edw. Jenkins, third.

Best specimen palm, any other variety.—A. H. Wingett, first; Edw. Jenkins, second; F. Heermans, third.

Best specimen fern.—A. H. Wingett, first.

Three specimen ferns.—A. H. Wingett, first; F. Heermans, second.

Twelve ornamental foliage plants.—A. H. Wingett, first; A. J. Loveless, second; Edw. Jenkins, third.

Twelve flowering plants.—A. H. Wingett, first; A. J. Loveless, second; Edw. Jenkins, third.

Three Begonia Gloire de Lorraine.—Edw. Jenkins, first; A. H. Wingett, second.

Twelve cattleya labiata.—Edw. Jenkins, first.

Six cattleya labiata.—J. J. Donohoe, gardener to Mrs. M. K. Jesup, first.

Twelve cypripedium.—A. J. Loveless, first.

Six cypripedium.—E. J. Norman, first.

Cut Flowers.

Vase of 24 blooms chrysanthemums.—R. Spiers, first; F. Heermans, second; Edw. Jenkins, third.

Twenty-four blooms, distinct varieties.—Edw. Jenkins, first; F. Heermans, second.

Twelve blooms, distinct varieties.—R. Spiers, first; Edw. Jenkins, second; A. J. Loveless, third.

Six blooms, distinct varieties.—S. Carlquist, first; Thos. Page, supt. for Geo. H. Morgan, second.

Ten blooms chrysanthemums, any one variety. First prize, Chrysanthemum Society of America cup.—A. J. Loveless, first; Robt. Spiers, second.

Roses.

Eighteen blooms American Beauty.—F. Heermans, first; E. Jenkins, second; J. J. Donohoe, third.

Twenty-four blooms, pink.—F. Heermans, first; J. J. Donohoe, second; E. Jenkins, third.

Twenty-four blooms, white.—A. J. Loveless, first; F. Heermans, second.

Twenty-four blooms, Kaiserin Augusta Victoria.—F. Heermans, first; E. Jenkins, second; R. Spiers, third.

Twenty-four blooms, President Carnot.—E. Jenkins, first.

Twenty-four blooms, scarlet.—A. J. Loveless, first; F. Heermans, second; E. Jenkins, third.

Twenty-four blooms, any other variety.—R. Spiers, first; J. J. Donohoe, second.

CHRYSANthemum PLANT DR. ENGUEHARDT.

Exhibited at the Chicago Show by Mount Greenwood Cemetery Association.

Twelve blooms, disseminated 1910.—S. Carlquist, first; A. J. Loveless, second; F. Heermans, third.

Six blooms, yellow.—R. Spiers, first; F. Heermans, second; A. J. Loveless, third.

Six blooms, red.—Edw. Jenkins, first; A. J. Loveless, second; F. Heermans, third.

Six blooms, white.—F. Heermans, first; A. J. Loveless, second.

Six blooms, pink.—Edw. Jenkins, first; A. J. Loveless, second; R. Spiers, third.

Six blooms, bronze.—F. Heermans, first; A. J. Loveless, second.

Six blooms, any other color.—F. Heermans, first; A. J. Loveless, second; Edw. Jenkins, third.

Three blooms, yellow.—S. Carlquist, first; A. J. Jenkins, second; J. J. Donohoe, third.

Three blooms, red.—J. J. Donohoe, first; S. Carlquist, second; Thos. Page, third.

Three blooms, white.—S. Carlquist, first; J. J. Donohoe, second; A. J. Jenkins, third.

Three blooms, pink.—A. J. Jenkins, first; Thos. Page, second; S. Carlquist, third.

Three blooms, bronze.—Thos. Page, first; R. Spiers, second; S. Carlquist, third.

Three blooms, any other color.—S. Carlquist, first; J. J. Donohoe, second; Thos. Page, third.

Twelve vases single chrysanthemums, distinct varieties.—S. Carlquist, first; E. J. Norman, second; A. H. Wingett, third.

Six vases single chrysanthemums, distinct varieties.—R. Spiers, first; Edw. Jenkins, second.

Twelve vases pompon chrysanthemums, distinct varieties.—A. H. Wingett, first.

Six vases pompon chrysanthemums, distinct varieties.—S. Carlquist, first; Edw. Jenkins, second.

Twelve blooms, American Beauty.—J. J. Donohoe, first.

Twelve blooms, pink.—Thos. Page, first.

Twelve blooms, Kaiserin Augusta Victoria.—A. J. Loveless, first; Thos. Page, second.

Vases of 50 roses, in variety.—F. Heermans, first; H. Jenkins, second; R. Spiers, third.

Carnations.

Twenty-four blooms, white.—F. Heermans, first; A. H. Wingett, second.

Twenty-four blooms, pink.—F. Heermans, first.

Twenty-four blooms, dark pink.—F. Heermans, first; A. H. Wingett, second.

Twenty-four blooms, light pink.—F. Heermans, first; A. H. Wingett, second.

Twenty-four blooms, scarlet.—A. H. Wingett, first; F. Heermans, second; A. J. Loveless, third.

Twenty-four blooms, crimson.—A. H. Wingett, first.

Twenty-four blooms, any other color.—A. H. Wingett, first.

Twelve blooms, white.—Thos. Page, first; S. Carlquist, second; E. J. Norman, third.

Twelve blooms, pink.—Thos. Page, first; S. Carlquist, second; E. J. Norman, third.

Twelve blooms, dark pink.—S. Carlquist, first; R. Spiers, second; A. J. Loveless, third.

Twelve blooms, light pink.—S. Carlquist, first; R. Spiers, second; A. J. Loveless, third.

Twelve blooms, scarlet.—Thos. Page, first; S. Carlquist, second.

Twelve blooms, crimson.—S. Carlquist, first.

Twelve blooms, any other color.—R. Spiers, first.

Vase of 50 carnations, in variety.—F. Heermans, first; A. H. Wingett, second.

Best 100 single violets.—R. Spiers, first; T. Page, second; E. J. Norman, third.

Best 100 double violets.—A. H. Wingett, first; A. J. Loveless, second.
 Twelve dishes apples, distinct varieties.—E. Jenkins, first.
 Six dishes pears.—G. H. Thompson, superintendent for Count De Heredia, first; A. J. Loveless, second; E. Jenkins, third.
 Two bunches grapes, black (indoors).—S. Carlquist, first; A. J. Jenkins, second; E. Jenkins, third.
 Two bunches grapes, white (indoors).—S. Carlquist, first.

Vegetables.

Best collection of vegetables, 18 varieties.—E. Jenkins, first; R. Spiers, second; G. H. Thompson, third.
 Best collection of vegetables, 12 varieties.—S. Carlquist, first; Thos. Page, second; F. Heermans, third.
 Best collection of vegetables, 6 varieties.—David Dun (gardener to Mrs. F. K. Sturgis), first; J. J. Donohue, second.
 Best six heads celery.—G. H. Thompson, first; E. Jenkins, second; S. Carlquist, third.
 Best six onions.—A. H. Wingett, first; E. Jenkins, second; S. Carlquist, third.
 Best six carrots.—J. J. Donohue, first; F. Heermans, second; S. Carlquist, third.
 Best six leeks.—A. H. Wingett, first; S. Carlquist, second; J. J. Donohue, third.
 Best six Endive.—S. Carlquist, first; G. H. Thompson, second; A. J. Loveless, third.
 Best dish of tomatoes, one variety.—S. Carlquist, first; F. Heermans, second; G. H. Thompson, third.
 Best six heads of lettuce, one variety.—E. Jenkins, first; A. J. Loveless, second; Thos. Page, third.
 Best three heads cauliflower.—Thos. Page, first; E. Jenkins, second; S. Carlquist, third.
 Best dish mushrooms.—J. J. Donohue, first; S. Carlquist, second.
 First class certificates were awarded as follows: To Julius Roehrs Co., of Rutherford, N. J., for Cattleya Portia, Cattleya Lenox and Cattleya Edwardii; Henry A. Dreer, Inc., Philadelphia, Pa., for Ficus Wendlandi, and Nephrolepis exaltata superba. A diploma was awarded to Julius Roehrs Co., for collection of cyrtipediums.

A. N.

Tarrytown Horticultural Society.

The twelfth annual fall exhibition of the Tarrytown Horticultural Society was held at Irvington, N. Y., November 1-3. The exhibition throughout is finer than any that has ever been held in this vicinity—the individual blooms more nearly perfect and the competition keener in all the classes. There is considerable rivalry for the prizes offered by J. D. Archbold, Ferdinand Hermann, Miss Blanche Potter, Mrs. J. B. Trevor, William Church Osborn, William Rockefeller, Addison Johnson, Charles Mallory, W. A. Read, J. A. Stillman, H. Darlington, Mrs. Isaac N. Seligman.

The William Rockefeller silver cup was awarded to Adolph Lewisohn; the Charles Mallory cup to Robt. C. Clowry; the Miss Blanche Potter cup to Fred K. Potter; the F. R. Pierson cup to Fredk. Potter; the Wm. F. McCord cup to W. A. Read; the W. A. Read cup to Richard Delafield.

The F. R. Pierson Company made an elegant display of several varieties of its ferns, also palms, Phoenix Roebeleni, etc., also a fine plant of the new fern, Nephrolepis mossiae; also several vases containing 100 each of Killarney, White Killarney, and Richmond roses.

An elegant exhibit of fruit was made by W. A. Read. Chrysanthemums were exhibited by Elmsford Nurseries, Scott Bros., Props.; a very fine orchid plant in bloom by Ferdinand Hermann.

The exhibition called out the most prominent people of Westchester County. The beauty of the hall in which the elegant exhibits were displayed was a sight worth going a long distance to see.

The prizes awarded are as follows:

Special Prizes.

Society's prize, Silver Medal, for any new flower, foliage or decorative plant.—F. R. Pierson Co., for Nephrolepis Mossiae.

F. R. Pierson's prize, Silver cup, for exhibitor securing largest number of prizes during the exhibition.—Fredk. Potter (W. C. Roberts, gardener.)

J. D. Archbold's prize, best 12 blooms chrysanthemums.—W. A. Read (Andrew McKendry, gardener), first; Wm. Rockefeller (George Middleton, gardener), second.

Ferd Hermann's prize, best 20 blooms chrysanthemums.—Joseph Eastman (Robert Angus, gardener), first; Wm. Rockefeller, second.

Pierson U. Bar Co.'s prize, most effectively arranged table of decorative plants 3½x12 feet.—Joseph Eastman, first; S. P. Shotter (Allen J. Jenkins, manager), second.

C. P. Johnson's prize, collection of single chrysanthemums.—Mrs. F. A. Constable (Wm. Stuart, gardener), first; Henry Siegel (Thos. Atchinson, gardener), second.

David MacFarlane's prize, best three blooms chrysanthemums, 1 each pink, white and yellow.—Adolph Lewisohn (John Canning, gardener), first; Wm. Rockefeller, second.

A. T. Boddington's prize, best 6 blooms chrysanthemums, distinct varieties.—James Speyer (Samuel C. Horn, gardener), first; Charles Mallory (Wm. J. Seavey, gardener), second; Mrs. I. N. Seligman (John Brunner, gardener), third.

Miss Blanche Potter's prize, best six blooms chrysanthemums, 12 roses and 12 carnations.—Frederick Potter, first; Adolph Lewisohn, second; Wm. Rockefeller, third.

Mrs. J. B. Trevor's prize, 12 blooms chrysanthemums, one variety.—Frederick Potter, first; W. A. Read, second.

Mrs. Wm. Church Osborn's prize, 36 blooms chrysanthemums, six varieties.—Wm. Rockefeller, first; W. A. Read, second.

William Rockefeller's prize, best 18 blooms chrysanthemums, six varieties.—Adolph Lewisohn, first; W. A. Read, second.

Addison Johnson's prize, best arranged vase, 18 chrysanthemum blooms.—Miss Blanche Potter (Geo. Wittlinger, gardener), first; W. A. Read, second.

Charles Mallory's prize, 24 blooms chrysanthemums, four varieties.—Robert C. Clowry (Edward Brethwey, gardener), first; Mrs. Myron I. Borg (James Atchinson, gardener), second. Charles Vanderbilt's prize, largest chrysanthemum bloom.—W. A. Read.

W. F. McCord's prize, three plants Begonia Gloire de Lorraine.—W. A. Read.

Henry A. Dreer's prizes, best plant new golden leaved Smilax.—E. H. Weatherbee (Francis Milne, gardener), first. Best box of vegetables.—Mrs. E. L. Coster (Edward Kane, gardener), first; Richard Delafield (William Brock, gardener), second.

Burnett Bros.' prizes, best vegetables grown out doors.—Mrs. J. B. Trevor (Howard Nichols, gardener), first; Richard Delafield, second. Six specimens Burnett tomato.—Walston H. Brown, first.

W. A. Read's prize, best arranged floral decoration dinner table, six feet in diameter, 12 covers.—William Brock, first; Robert Angus, second; John Canning, third.

Isaac N. Seligman's prize, best basket of cut flowers.—P. W. Popp, first; Wm. Brock, second.

Philip Jewell's prize, best centerpiece for table.—Allen J. Jenkins, first; Mrs. M. E. Sands (Thos. A. Lee, gardener), second.

H. Darlington's prizes, six kinds out door vegetables.—Richard Delafield, first; Mrs. M. E. Sands, second. Best 18 carnations, three varieties.—Adolph Lewisohn, first; Frederick Potter, second.

Society's Prizes.

Best bush chrysanthemum plant, white.—Claude Wilson, first; E. H. Weatherbee, second.

Best bush chrysanthemum plant, yellow.—E. H. Weatherbee, first.

Best bush chrysanthemum plant, pink.—S. P. Lillenthal Estate (Hamilton Scott, gardener), first.

Best bush chrysanthemum plant any other color.—E. H. Weatherbee, first.

Best arranged group of palms, flowering and foliage plants.—Joseph Eastman, first.

Best six plants for table decoration.—Joseph Eastman, first; E. H. Weatherbee, second.

Best six ferns for table decoration.—Claude Wilson, first; Theodore Trevillian, second.

Best pair adiantums.—W. A. Read, first.

Best plant Begonia Gloire de Lorraine.—Adolph Lewisohn, first; Henry Siegel, second.

Best 12 blooms chrysanthemums, 4 varieties.—E. H. Weatherbee, first; Mrs. M. E. Sands, second.

CHRYSANthemum DICK WITTERSTAETTER.

Awarded Certificate by Chrysanthemum Society of America to Elmer D. Smith & Co., Adrian, Mich.

An Honorary Member's prize, 12 blooms White Killarney rose.—Frederick Potter, first; Mrs. F. A. Constable, second.

J. A. Stillman's prize, 12 blooms Richmond roses.—F. A. Constable, first; Osborn Estate, second.

Lord & Burnham's prize, 18 roses, three varieties.—Mrs. Stuyvesant Fish.

Richard Langle's prize, 12 blooms Pink Killarney roses.—Frederick Potter, first; Mrs. F. A. Constable, second.

Vaughan's Seed Store prize, 36 carnations, six varieties.—Wm. Rockefeller, first; H. Darlington, second.

Best six blooms, white.—Mrs. F. A. Constable, first; Frederick Potter, second.

Best six blooms, yellow.—James Speyer, first; Wm. Rockefeller, second.

Best six blooms, pink.—Frederick Potter, first; James Speyer, second.

Best six blooms, crimson.—Wm. Rockefeller, first; Henry Siegel, second.

Bunch 50 single violets.—Miss Blanche Potter, first; Frederick Potter, second.

Six varieties of apples.—W. A. Read, first.

Three varieties of apples.—W. A. Read, first; Six apples one variety.—W. A. Read, first; Mrs. M. E. Sands, second.

Six pears one variety.—S. P. Lillenthal Estate, first; Mrs. W. H. Pullan, second.

Two bunches greenhouse grapes, black.—Emil Berolzheimer (Wm. Jameson, gardener), first.
Six heads celery.—M. M. Van Buren (Frank Flanagan, gardener), first; Miss Blanche Potter, second.

Twelve onions, one variety.—Richard Delafield, first; Mrs. E. L. Coster, second.
Six leeks.—Richard Delafield, first; Miss Blanche Potter, second.

Two heads cabbage.—Richard Delafield, first; Mrs. Philip Schuyler, second.

Two heads cauliflower.—Mrs. E. L. Coster, first; Mrs. J. B. Trevor, second.

Three head lettuce.—M. M. Van Buren, first; W. A. Read, second.

Amateurs.

Best window plant.—Henry Wagner, first; Harold G. Neubrand, second.

Best bouquet.—Waldon Purdy, first; Harold G. Neubrand, second.

Twenty-five blooms, carnations.—Traendly & Schenck.

Twenty-five blooms, roses.—F. R. Pierson Co.

Twelve American Beauty roses, for private gardeners.—Edwin Gould, first; W. A. Read, second.

Twelve pink roses.—Miss Blanche Potter, first; Joseph Eastman, second.

Twelve white roses.—Frederick Potter, first; Mrs. J. B. Trevor, second.

Twelve yellow roses.—Joseph Eastman, first; Mrs. L. P. Child, second.

Twelve crimson roses.—Osborn Estate, first.

Twelve roses any other color.—Mrs. F. A. Constable, first; Frederick Potter, second.

Twelve white carnations.—J. J. Riker, first; Adolph Lewisholm, second.

Twelve scarlet carnations.—Frederick Potter, first; Wm. Rockefeller, second.

Twelve dark pink carnations.—Wm. Rockefeller, first; Frederick Potter, second.

Twelve light pink carnations.—J. J. Riker, first; Wm. Rockefeller, second.

Twelve streaked carnations.—Frederick Potter, first; Wm. Rockefeller, second.

Twelve crimson carnations.—Frederick Potter, first.

Buffalo Flower Show.

Words cannot convey to the mind the beauty and success of the first "New Method" flower show of the Buffalo growers and retailers. The show was "new method" from the fact of there being no prize list whatever, everything being complimentary, and, beyond the restriction placed on the general effect, and outline of space, each exhibitor was permitted to let his ideas be reflected in the flowers and their arrangement.

The hall was entered through a pergola made from the natural logs of the forest with their branches cut short and the bark left on and generously treated with wild smilax. On emerging from under this a sight met the eye never to be forgotten, immediately in the foreground was laid out a perfect French garden, the circular art effect being here employed by our talented landscape artist, Geo. McClure, Jr., to exceptional advantage, in the center of this space was a round bed of Scottii ferns with a fountain playing a spray to a varied height averaging thirty feet and falling into a large basin in which were gold fish. Surrounding this were circular beds in three tiers separated by generous paths and edged with grass sod, the grouping of these beds was carried out in low solid effect and was beautiful in every detail. Noticeable among which were those of chrysanthemum plants arranged by Mr. Sandiford for the J. J. Albright conservatories, also a magnificent bed of Gloire de Lorraine begonias from S. A. Anderson. Delaware Park and South Park conservatories, also contributed through their superintendents, Prof. Cowell and Mr. Donaldson, very fine beds.

Looking over this section the eye was delighted by an exhibit in front of the stage by the Wm. Scott Company and on the stage was another perfect semi-circular pergola with its graceful southern smilax hanging as from natural forest branches. The walls of the hall were hung from roof to eave with autumn tinted pin oaks and at a number of carefully selected positions were huge trees of the same reaching clear to the dome of the high Convention Hall. Passing around we find the first space on each side occupied by Reichert Bros. with palms and general stock, these extending the full length, the exhibits on one side of W. J. Palmer & Son, on the other that of S. A. Anderson. The Palmer section was distinctive in its feature of the use of birch bark, immense trees extending the full length of their exhibit, each tree featuring its special flower, one being of American Beauties, one of pompon chrysanthemums, one white roses, and so on down a line of veritable beauty, beneath these trees were effectively displayed the general stock of the storeman in tempting manner. Mr. Palmer also had a couple of dainty and artistic table decorations and many little basket favors displaying his ideas of the use of cut flowers. The S. A. Anderson space was one to be remembered, in size, in the originality of conception, and in the quality of the cut flowers and plants displayed. Mr. Anderson proved his claim to destination as a leader in our line. One end of the exhibit was devoted to Boston ferns (such ferns) another space to cibotiums, another to palms, another to crotons and miscellaneous decorative plants, the different sections being lightened by enormous vases of specimen chrysanthemums with the color grouping carried out as was also the grouping of the variety of plants. Perhaps the group-

general public, the most interesting was his orchid grotto where from an artificial mountain flowed a stream of water into several lakes. The light effect in the grotto, reflecting onto cattleya and oncidium orchid plants being both pleasing and effective. Mr. Anderson also had a dining table which was entirely changed each day, also an attractive display of novelties, baskets, bouquets, and suggestions to the buying public.

Two exceptional collections of orchids were shown artistically by Mr. Sandiford for J. J. Albright and Prof. Cowell for the South Park conservatories. Mr. Sandiford also had two immense (six pound) bunches of grapes grown by him. The other exhibitors, all of whom should

The work of the different committees, under the direction of general chairman Kasting was efficient and while from a financial point it was not a success it was from every other and a larger show is what will in all probability be the plans of the Buffalo Florists' Club.

St. Louis Horticultural Society.

The St. Louis flower show was opened November 8. The general effect in the arrangements show great care and too much praise cannot be given to the two workers who put their heads together and the grandeur of the display showed the wonderful work they had ac-

CHRYSANTHEMUM LENOX.

Awarded Dreer Special Prize at Morristown, N. J., Exhibited by Elmer D. Smith & Co., Adrian, Mich

have a detailed description of their efforts here, seemed to surpass the usual exhibition work, for they were allowed to please their own fancy and through the removal of the usual limited scope of ideas were able to show under one roof arrangements and uses of cut flowers not possible in any other way.

Among those to whom credit is due were the exhibits of L. H. Neubeck, J. Benson Stafford, Joseph Sangster, The H. Keitsch Sons Co., The Lenox Flower Shop, Wm. Legg, Stroh's Quality Shop, Henry Arber, D. Newlands & Co., Wm. F. Kasting Co., also the following growers who were ably represented by choice stock: Lake View Rose Gardens, Jamestown, N. Y.; Erie Floral Co., Erie, Pa.; Bauer Floral Co., Indianapolis, Ind.; S. S. Penneck-Meehan Co., Philadelphia, Pa., with double pink Killarneys grown by Robert Scott & Son, Sharon Hill, Pa.; Chas. F. Guenther, Hamburg, N. Y.; Wm. Ehmann, Cooper, N. Y.; C. F. Christensen, Eggertsville, N. Y.

complicated. At the southern end was the beautiful display of palms and foliage plants. The Water Department, in conjunction with the Park Department, had displayed a fountain at the south end, surrounded with plants and ferns, forming a very beautiful arrangement.

The judges were Fred Bruenig, W. Stertzling, J. Bourdet, Mrs. Nicholson and Robert Tesson. Following are the awards:

Shaw Premiums.

Display of decorative plants, no less than 12, nor more than 18 plants.—Wm. Schray & Sons, first; Sanders Nurseries, second; T. J. Fillmore, third.

Eighteen berried plants, one or more varieties.—Koenig Floral Co., first; Sanders, Nurseries, second.

Twenty-five blooming plants, eight or more varieties, chrysanthemums excluded.—Wm. Schray & Sons, first; T. J. Fillmore & Son, second; Sanders Nurseries, third.

Twelve geraniums in bloom, not over 10-inch pot.—Koenig Floral Co., first; F. J. Fillmore & Son, second; Bentzen Floral Co., third.

Specimen palm, size taken into consideration. Wm. Schray & Sons, first; C. Young & Sons Co., second.

Specimen fern, size taken into consideration.—H. J. Weber & Sons Nursery Co., first; Sanders Nurseries, second; C. Young & Sons Co., third.

Blooming plant, other than chrysanthemum.—Koenig Floral Co., first; Wm. Schray & Sons, second; F. H. Meinhardt, third.

Fern dish, not over 10 inches in diameter.—Wm. Schray & Sons, first; Sanders Nurseries, second; C. Young & Sons Co., third.

Pasadena Gardeners' Association.

Third Annual Exhibition.

Held at the Maryland hotel on November 3-4-5, the third annual exhibition of the Pasadena Gardeners' Association was more remarkable for the interesting exhibits than for size and this live association, composed of gardeners at the various fine private establishments in the neighborhood, is to be congratulated on the successful outcome of its efforts. Despite a threatening morning and some rain the attendance was better the first day than at any previous show and the number and quality of the exhibits were larger and better. The cut flowers were generally good in quality but a

cepts, *oncidium varicosum*, a pretty yellow *Cypripedium insigne* after the style of Saudere and several others. Mr. Hertrich came in for much praise for this fine group, which was well deserved. A pretty group of orchids was also put up by A. McKenzie, gardener to A. Kingsley McComber.

The trade exhibits were numerous and interesting. Howard & Smith arranged a large structure in the center of the tent with smilax strings used festoon-like all around it and in the bays formed by the strings were shown a number of choice cactus dahlias. Unfortunately these dahlias were all shown on flat mossed boards with no stems showing, and were unnamed, but a magnificent snow white cactus was greatly admired. Good phloxes and a number of florists' flowers were also shown. E. H. Rust of the Palm Nurseries, South Pasadena, put up a most interesting group of shrubs, evergreens, conifers, ferns and other plants. *Erica Mediterranea* and *E. persoluta* alba from the open nursery were good. *Dracaena Douceti*, with its narrow, white variegated leaves, is perfectly hardy here and a beautiful thing which, in the opinion of J. W. Ross, Mr. Rust's capable foreman, has come to stay. Of ferns, *Pteris Childsi*, a variety of *P. serrulata*, is charming, and *Nephrolepis Scholzii* was also well shown. Coolidge's Fernery and Rare Plant Gardens showed a rich variety of novelties and varieties in fruiting shrubs, of which we especially noted *carissa grandiflora*, shown in fruit, and the rare *Peijoa Sellowiana*. A charming assortment of hardy ferns such as *scelopendrium*s and *asplenium*s was also included. Edwin D. Sturtevant of Hollywood showed a number of flowers of interest as being grown outdoors in November, including *Dipladenias Bolivensis* and hybrids. *Dioecya glycinoides* and many others. The Theodosia E. Shepherd Co., of Ventura, put up a charming series of varieties of single *petunias* with beautifully colored fringed petals and a number of rare botanical species were put up by the Montarrosa Nursery of Santa Barbara, including a very beautiful *jacaranda*, a white *poinsettia* and many others. Dr. Franchesi is a mine of information on this class of plant and was most interesting. Wright's Flower Shop and Morris & Snow, of Los Angeles, Miller of Hollywood, Campbell's Seed Store and other local firms put up fine exhibits not for competition. H. R. R.

ELMER D. SMITH & CO.'S FIRST PRIZE VASE COL. D. APPLETON CHRYSANTHEMUMS.

At the Chicago Show.

Group variegated, foliage plants, not less than 24, nor more than 30 plants.—Wm. Schray & Sons, first; Sanders Nurseries, second.

Group chrysanthemums, plants to occupy 75 square feet. Ferns, palms or foliage plants may be used as accessories.—Koenig Floral Co., first; Wm. Bruecker, second; C. Young & Sons Co., third.

Three specimen chrysanthemum plants, white.—Koenig Floral Co., first.

Three specimen chrysanthemum plants, pink.—Koenig Floral Co., first.

Three specimen chrysanthemum plants, any other color.—Koenig Floral Co., first.

Specimen chrysanthemum plant, white.—Koenig Floral Co., first; Sanders Nurseries, second.

Specimen chrysanthemum plant, yellow.—Koenig Floral Co., first; Sanders Nurseries, second.

Specimen chrysanthemum plant, pink.—Koenig Floral Co., first; Sanders Nurseries, second.

Specimen chrysanthemum plant, any other color.—Koenig Floral Co., first.

Pair standard bay trees.—C. Young & Sons Co., first; Wm. Schray & Sons, second.

Plants.

Twelve begonias, one or more varieties.—Wm. Bruecker, first.

Display of pompons, anemone or single variety chrysanthemums, not less than 12 nor more than 18 plants.—Koenig Floral Co., first; Sanders Nurseries, second; Geo. E. Windler, third.

Twenty-five chrysanthemums, plants grown to single stem not over 40 inches in height above pot, not over 6-inch pot.—Sanders Nurseries, first.

Six blooms, new seedling chrysanthemum, not yet disseminated.—Certificates of merit to M. F. Widmer and Hy Edmunds.

Best display of chrysanthemums, one or more varieties attractively displayed, either cut blooms, plants or both, accessories not permissible.—E. G. Hill Co., Richmond, Ind.

Four vases carnations, 4 varieties, 50 blooms in each vase.—F. H. Meinhardt, first.

Fifty blooms, one or more varieties, competition open to growers of St. Louis and vicinity only.—Oakland Floral Co., first; Bentzen Floral Co., second.

Six vases roses, six varieties, 25 blooms in each vase.—F. H. Meinhardt, first.

Decorated dining room effect, including table and mantel decoration.—C. Young & Sons Co., first.

Exhibit from private garden.—Richard Mound, first; Richard Sudbrook, second.

Collection of hardy evergreens, 20 or more varieties, quality and arrangement to be considered.—H. J. Weber & Sons Nursery Co., first; Sanders Nurseries, second.

W. F.

little rough, showing want of care in finishing and staging. The plants were firm and the immense specimens of *Beatrice May* exhibited by Louis Fried, gardener to Clayton H. Garvey, in the single specimen and three plant classes were excellent, well finished, fresh and finely flowered.

Certainly the finest exhibit in the show and, according to old timers here, the finest ever staged in Southern California, was the grand groups of foliage plants and orchids put up by Wm. Hertrich, gardener to H. E. Huntington. Graceful palms, including some exceptionally good specimens of *Phoenix Roebelenii*, were used in conjunction with fine dracaenas, crotons and ferns to arch over a large sheet of water in which some of the finer nymphaeas were very naturally grouped, and in front of this was a beautiful bank of *Adiantum Farleyense* and some choice orchids, including good color varieties of *Cattleya labiata*, *Laelia an-*

Milwaukee Flower Show.

The annual flower show of the Milwaukee Florists' Club was opened in the Auditorium, November 9, and will continue until November 13. The hall was beautifully decorated and the exhibits were fine. The table decorations were a very attractive feature and were very handsome, the different exhibitors showing in their rivalry some very artistic work. The following were those who arranged the tables: J. M. Fox & Son, E. Wilke & Co., William O. Zimmermann, Walter M. Maas, Edelstein-Leidiger Co., Currie Bros. Co. and W. A. McKenney & Co. The Loveland Floral Co. exhibited a table of baskets. Following are the awards:

Best specimen chrysanthemum plant, white.—Vaughan's Seed Store, Chicago, first; C. C. Pollworth Co., second.

Best specimen plant, pink—E. Praefke, second; third.

Best specimen plant, yellow—E. Praefke, third.

Best specimen plant, any other color—C. C. Pollworth Co., second.

Best specimen plant, single variety—Vaughan's Seed Store, first; E. Praefke, third.

SPECIMEN CHRYSANTHEMUM PLANTS AT THE CHICAGO SHOW.

Adam Graham, Cleveland, O.

JUDGES AT THE CHICAGO SHOW.

W. L. Rock, Kansas City, Mo.

J. F. Cowell, Buffalo, N. Y.

Best specimen plant, anemone—Vaughan's Seed Store, second.

Best group of chrysanthemums, plants arranged for effect to cover 150 sq. ft. of space—C. C. Pollworth Co., first; A. Klakner, Wawatosia, second; Edelstein-Leidiger Co., third.

Best grafted specimen chrysanthemum, must have at least 3 inches clear stem above the pot—C. C. Pollworth Co., third.

Best vase 40 blooms, white chrysanthemum, 1 variety—C. C. Pollworth, first; Poehlmann Bros. Co., Morton Grove, Ill., second; Currie Bros. Co., third.

Best vase 40 blooms, pink, one variety—C. C. Pollworth Co., first; Poehlmann Bros. Co., second; Edelstein-Leidiger Co., third.

Best vase 40 blooms, yellow, one variety—Elmer D. Smith & Co., Adrian, Mich., first; C. C. Pollworth Co., second; Poehlmann Bros. Co., third.

Best 20 blooms, white, one variety—Elmer D. Smith & Co., first; Poehlmann Bros. Co., second; C. C. Pollworth Co., third; H. W. Buckbee, Rockford, Ill., fourth.

Best 20 blooms, pink, one variety—W. Helwig, first; Poehlmann Bros. Co., second; C. Pollworth Co., third; Edelstein-Leidiger Co., fourth.

Best 20 blooms, yellow, one variety—C. C. Pollworth Co., first; H. Staeps, Elm Grove, second; Poehlmann Bros. Co., third; Edelstein-Leidiger Co., fourth.

Best 20 blooms, any other color, one variety—C. C. Pollworth Co., first.

Best 12 blooms, yellow, one variety—Elmer D. Smith & Co., first; H. W. Buckbee, second; C. C. Pollworth Co., third.

Best 12 blooms, pink—C. C. Pollworth Co., first; H. W. Buckbee, second; Elmer D. Smith & Co., third.

Best 12 blooms, white, one variety—C. C. Pollworth Co., first; Elmer D. Smith & Co., second; Wm. Eschrich Floral Co., third.

Best 12 blooms, any other color—Elmer D. Smith & Co., first; C. C. Pollworth Co., second.

Best 20 blooms, 20 varieties, in vases, not less than 12-inch stems—Elmer D. Smith & Co., first; C. C. Pollworth Co., second; H. W. Buckbee, third.

Best collection anemone varieties—Aloise Frey, Crown Point, Ind., first; Fox Point Floral Co., second; Holten & Hunkel Co., third.

Best collection single varieties—Aloise Frey, first; Holten & Hunkel Co., second.

G. R.

San Diego Floral Exhibition.

The fourth fall flower show of the San Diego Floral Association held in the Palm Court of the Grant Hotel was superior in every respect to all former efforts. The educational value of the Coolidge exhibit of new fruits and ferns was very great and E. D. Sturtevant's water lilies were a distinctive feature. Howard & Smith's show of dahlias was a rare treat, showing a large number of new seedlings. The chrysanthemum exhibit was very good and especially the potted plants of G. F. Otto and P. Richtmeyer. The well arranged section of palms, shrubs and conifers, arranged by E. Benard, was a very fine exhibit. The awards were as follows:

Largest and best collection of chrysanthemums—G. F. Otto.
Twelve blooms, one variety—G. F. Otto.
Best single bloom—G. F. Otto.
Collection of potted plants—G. F. Otto.

Largest and best collection, one bloom of a kind, open to amateurs—P. Richtmeyer, Colorado.

Best arranged basket or vase of flowers—Mrs. F. T. Scripps, first; Mrs. W. M. Crouse, second.

Best display of cut flowers by child not over 14—Master Francis de Pons, first and special.

Best collection flowering begonias—J. H. Bradshaw.

Best begonia plant—Mrs. A. R. Schimpf.

Display of potted ferns—A. D. Robinson.

Display of nephrolepis—A. D. Robinson.

Best novelty plant—Frank Frye, Jr., first; Mrs. Stephen Brown, second.

Collection of conifers, special prize, E. Benard.

Coleus, special prize—L. A. Blochman.

Bougainvillea, special prize—W. H. Harris, G. F. Otto.

Display by boy, special prize—John Chamblin.

Orchid, special prize—Dr. Francis Mead.

Seeding dahlias and nephrolepis, special prize—Howard & Smith.

Collection of ferns, special prize—D. W. Coolidge.

Water lilies, special prize—E. D. Sturtevant.

Six blooms, open to amateurs—Mrs. Sturgis, first; Fortune Lanier, second.

Best single bloom, open to amateurs—Fortune Lanier.

Best pink—S. A. Blockman.

Best decorative plant—E. Benard.

Best pair of plants standing exposure—E. Benard.

Best 25 shrubs for garden—E. Benard.

Best novelty plant—E. Benard.

Best specimen fern—E. Benard.

Largest and best collection of carnations—Fortune Lanier.

Best ten blooms carnations, one variety—Alfred D. Robinson, first; Fortune Lanier, second; A. D. Robinson, third.

Largest and best collection of dahlias—Paul G. Thiene, Old Town, first; Miss Sara Reese, Los Angeles, second.

Best 10 varieties dahlias—A. D. Robinson, first; L. A. Blochman, second; Mrs. Price, third.

Best six varieties cactus dahlias—A. D. Robinson, first; Mrs. F. T. Scripps, second.

Collection of cannas—Mrs. W. M. Crouse.

Display of perennials—Mrs. B. A. Neff.

Display of begonias—Mrs. F. T. Scripps.

Indianapolis Flower Show.

After an intermission of six years the Indiana State Florist Association held a Flower Show at Tomlinson Hall, Indianapolis, November 8-12. The show opened with ideal weather and the management felt optimistic in the outcome. The old hall was nicely decorated, as in former times, with laurel wreathing and wild smilax. An air ship was suspended from the center, and seven large groups of palms added much to the attraction of the show. What the exhibition lacked in specimen chrysanthemum plants, it made up in cut flowers. In the class of fifty blooms, E. G. Hill Co.'s Timothy Eaton, F. Dörner & Sons Co.'s Golden Eagle, and Raepke & Rieman's new seedling pinks, were marvels of beauty. A fine vase of R. F. Felton was also shown by the E. G. Hill Co. The latter company and Elmer Smith & Co. ran neck and neck for first honors in the twenty-five blooms to be shown on mossed tables, but the judges finally decided in favor of the E. G. Hill Co., however, they were both magnificent collections. A table of cattleyas and maiden hair fern was much admired by the ladies, judging from the large crowds usually

seen around the spot. Large bay trees and Boston ferns with a few vases of cut chrysanthemums made up the decorations for the stage.

In carnations, White Perfection took the lead in its color. In flesh pink, Fink Delight out-classed Enchantress, winning both first and second. In dark pink, Bright Spot won first, but showed up poorly after being staged a few hours, after which time Afterglow showed better keeping qualities. In light pink, Gloriosa won first and seemed to keep well. In red, Hill's new Mrs. Beckwith was first with Hoosier Tad as second, beating both Victory and Beacon. Dörner's new Crimson No. 113 ('97) won in its class.

W. W. C.

Washington Florists' Club Exhibition.

The fourth annual flower show of the Washington Florists' Club took place at Convention Hall October 30. It was a gorgeous display, breaking all previous records, and was more elaborate than any of its predecessors. The centerpiece of the exhibit is a superb Greek temple which rises in all the majesty of white in a dazzling setting of plants and flowers. Flanking it on one side is a Japanese pagoda on Fushimi mountain and on the other a quaint Dutch windmill with mountain stream and rustic bridge. All the members of the club contributed to make up these beautiful pieces of work. Among the exhibitors are Gude Bros., George Field, Theodore Deidrich, W. W. Kimball, John Robertson, George C. Schaeffer, George C. Cooke, Ley & Bickings, E. J. Schultz and James Carberry. The out of town firms represented are Henry A. Dreer of Riverton, N. J.; W. W. Evans of Hamilton, Va.; William Moore of Morrisville, Pa.; S. S. Pennock-Meehan Co. of Philadelphia; R. Vincent, Jr., & Sons Co., White Marsh, Md., and W. A. Bollinger, Bethesda, Md. The different evenings of the show are named and devoted to certain societies or features. Halloween night October 31 and Veterans' night November 1, to be followed by German-Irish night November 2. The committee in charge of the show are John Robertson, W. F. Gude, O. A. C. Oehmler, W. W. Kimmel, George Cooke, James Carberry and Elmer Mayberry.

Minnesota State Florists' Association.

The first chrysanthemum show of the Minnesota State Florists' Association was held in the Armory November 9-13, 1910, and was opened very auspiciously. The hall was beautifully decorated and the arrangements are fine, the lighting being perfect and the music is grand and greatly enjoyed. The exhibits are gorgeous, some magnificent plants and blooms being shown. The weather is clear and fine and quite cool, and the attendance on the opening days of the show is good. The chrysanthemum plants and flowers were both judged the first day, the principal exhibitors being Elmer D. Smith & Co., Adrian, Mich.; H. W. Buckbee, Rockford, Ill.; La Crosse Floral Co., La Crosse, Wis.; Holm & Olson, St. Paul, Minn.; L. L. May & Co., St. Paul; Will Bros., and L. S. Donaldson Co. of Minneapolis. Holm & Olson, L. L. May & Co., and Swanson displayed very handsome collections of decorative plants.

Panel designs that are very beautifully arranged are exhibited by Holm & Olson, L. S. Donaldson Co., L. L. May & Co., and Vasatka. The judges who will pass on the exhibits are J. S. Wilson of Des Moines, Ia.; J. J. Hess of Omaha, Neb., and F. W. Plummer of Kewanee, Ill.

OBITUARY.

Prosper J. A. Berckmans.

P. J. A. Berckmans, one of the most noted and eminent horticulturists and pomologists of America, passed away at his home, "Fruitlands," Augusta, Ga., November 8, after a very short illness. He was born in Belgium, October 13, 1830, at Aerschat, Province of Anvers, near Antwerp. He was the son of Dr. Louis Edouard Berckmans, a recognized authority among distinguished horticulturists and pomologists of Europe, and was descended from one of the oldest families of Belgium. He was educated at Tours, and before completing his education in Belgium and Paris, had attained note as a student of botany, and had assisted his father in the preparation of the "Album de Pomologie," the best and most complete work of its time.

In 1850, Mr. Berckmans visited the United States, and after prospecting concluded to remain, and with his father settled in Plainfield, N. J., in 1851. Six years later he moved to Georgia, purchasing the property near Augusta which he named Fruitlands. This place was improved, beautified and extended, and here Mr. Berckmans, the first of his family, turned to profit the profession and tastes which his forefathers for generations had followed for diversion and scientific study. Here his earnest life began, and he devoted time, energy and means in the pursuit of horticulture and the establishment of the largest commercial nurseries in the southern states, which have become famous not only in this country but all over the world. He early took as his mission the promotion of horticulture, and became a member of the first horticultural society in Georgia, upon its organization, in 1859. After the war, Mr. Berckmans brought together a few kindred spirits, and in 1876 organized the Georgia State Horticultural Society, of which he was elected the first president, and is the only president the society has ever had, being continuously elected to that office. In 1860 he became a member of the American Pomological Society and was at once intrusted with important committee work, serving with Dr. Warder and Robert Buist. In 1871, he succeeded Charles Downing as chairman of the committee on Native Fruits, and in 1887 became the president of the society, succeeding the late Hon. Marshall P. Wilder, which position he retained for a number of years. He was a member of the Georgia State Board of Entomology and many state and national organizations, and an honorary member of many scientific societies in England and on the continent of Europe, among which might be mentioned the "Societe d' Horticulture et d' Histoire Naturelle de L' Herault," of Montpellier, France, whose membership is limited to but twenty foreign members, and a member of one, which receives but four from outside of their own country. At the Horticultural Congress held in connection with the World's Fair at Chicago in 1893, Mr. Berckmans made the opening address.

He built up the great industry which he originated and from which he retired about ten years ago, leaving it to his sons, by close attention to business, study and travel, constantly learning and adopting the best, and by strictly honest dealings with his patrons, and could always be depended upon to send out exactly what was ordered and the best obtainable, and any just complaint was promptly attended to, and the purchaser made satisfied or his money returned. By this integrity and honesty he held a very strong place in the esteem and affection of the people of his city and was

an honored and beloved member of the community in which he lived, and leaves the legacy of a well spent, honorable and successful life and the example of a public spirited, loyal and distinguished citizen.

He was twice married, his first wife being Miss Mary Craig of New Jersey, and his second wife Mrs. Edith Frome Berckmans, who survives him. He also leaves three sons, Robert Craig, S. A. and P. J. A. Berckmans, Jr., and a step-son, Alonzo F. Purdy.

The funeral services were held November 9 at his late home on Washington road, and the interment was in the Summerville cemetery.

European Horticulture.

The Blue Rose Again.—When our American friends make a real effort at description they generally produce wonderful results. With the rambling Rose Veilchenblau as subject, the following description was given in a circular sent out by an enterprising American florist: "It is here at last, and it has remained for this first decade of the twentieth century, which has seen the discovery of the North Pole, the practical application of the flying machine, and development of many other heretofore 'impossible' things, to witness this latest triumph in the realm of growing things—The Blue Rose. The easiest way to describe it is to say it is a Blue Crimson Rambler—that is, imagine a climbing rose with all the strength and vigour of the Crimson Rambler, covering im-

of flowers are so well known that to recommend the growing of plants seems almost unnecessary, but, strange to say, there are many who do not grow these hardy plants which do well in any moderately good soil so long as the situation is a sunny one. Is it understood, asks the "Scottish Gardener," how easy plants may be raised from seed? We think not, and so send this reminder now when seed may be sown at once in boxes of any light soil, the seedlings being transplanted afterwards in a bed. Some of the plants so raised will bloom a little next year, but good results may be had from second year's plants. Many would grow these most useful plants if they only realized what little attention they really required when once they are established. Give seed sowing a trial this year by purchasing a small packet.

Mignonette Industry on the Mediterranean.—The raising of cut flowers for the wholesale trade, and particularly for exportation to the countries of northern Europe, is engaging a large number of growers along the shores of the Mediterranean, who specialize more and more in those plants that are of the greatest importance commercially. Three-fourths of the cut flowers grown in the Department of the Var, southern France, are shipped to Paris, London, Berlin, and Brussels, the rest go to other European markets. This Department exports annually not less than 800,000 to 900,000 postal packages of 6lb to 11lb each, representing a value of £160,666 to £208,333, including cost of packing and shipping. One of the

GROUP OF PLANTS AT THE CHICAGO SHOW.

mense spaces with its wondrous heavy canes and large, splendid foliage, and bearing immense trusses of roses, all the way from twenty to one hundred in number, but, instead of the gorgeous crimson flowers we all know so well, picture it in your mind with similar clusters of exquisitely beautiful violet-blue roses. The rose world is wild about the blue roses, and we expect even our enormous stock of the plants to be speedily exhausted. This wonderful production of the heretofore elusive colour in the rose world is a seedling from the Crimson Rambler discovered by a poor German florist. What a beautiful effect can be produced by having a red, white, and blue Rambler all trailing on the same porch, fence, or trellis, forming the national colours, or even on the lawn, or in the rose garden. It is a mistaken idea that rambles have to have a support; they can be grown very successfully in bush form."

Gypsophila paniculata from Seed.—The graceful sprays of Gypsophila paniculata for mixing with many kinds

flowers now largely cultivated is Mignonette, both as a cut flower for the foreign markets, and for the perfumery industry, the robust varieties producing thick, compact, and pointed racemes are the ones grown; the most perfect type is Reseda odorata, var. pyramidalis, which is in the greatest demand on account of its heavy racemes. Mignonette demands a soil which has been well worked over some months in advance, with good decomposed manure worked into it at the same time. Its culture includes two seasons, and hence two different methods. For the first year's crop in this section the seed is sown in August, in soil that has been first watered and then trench-plowed. After sowing, the beds are covered with litter or fresh dung. There is also an October sowing, following vegetables. The Mignonette is sown into the beds, which have again been moderately worked over. It comes up in about two weeks, and is sprinkled about once a week during the winter. Before the watering a little nitrate of soda is scattered

around; this promotes the growth and enhances the beauty of the flowers. The beds are protected at night from the 1st of December to the end of February. By February the plants have developed stout racemes. Mignonette is injured by prolonged rains, and still more by the flea-beetle, especially the first-year crop, this insect eating the young leaves as soon as they come out. It is fought by frequent sprinklings and the other usual means. The sowing of Radish seed at the same time with the Mignonette is recommended as a preventive, the flea-beetle then attacking the young Radish, which they prefer.—*Revue Horticole.*

Toronto.

COOLER WEATHER.

Cooler weather has had the effect of checking up the supply of flowers, and in roses particularly the output is limited. The quality is excellent and all that could be desired at this season of the year. The carnations are coming in fairly plentiful and the stock is good. At times there has been quite a demand for crimsons and reds, there being fewer of these varieties grown than formerly in this vicinity. Chrysanthemums are now at their best and some very fine blooms are coming in. Although a number of people like the large blooms, the majority are inclined to favor the medium sized ones. The pompons and singles are having quite a run, and some very pretty arrangements are noticed. Decorations for fall weddings have been fairly numerous and are pretty well divided up. The report on all sides is that business is very good. Some complaint is heard regarding the cheapness of chrysanthemums, but there are so many more of these grown each season the chances are they are a little over done. Violets have been the scarce article in the past week. The stock coming in generally is of poor quality and hardly worth the price being asked. Lily of the valley remains of very fine quality and is plentiful enough to fill orders.

NOTES.

Miss Margory Dunlop, daughter of John H. Dunlop, was married in Bonner Presbyterian Church to W. Farity. The church was beautifully decorated, and Mr. Dunlop's handsome residence, where the reception was afterwards held, also showed an artistic wealth of bloom.

All are looking forward to the coming chrysanthemum show, to be held at St. Lawrence Arena November 15-19, and there is every promise that the different classes will be well filled. The special railway rates will be taken advantage of by many outside florists.

George Hollis has almost completed a new house, 21x160, which will be devoted to carnations. At present he is marketing chrysanthemums in quantities, and has, as usual, a number of seedlings which show great promise.

Grobba & Wandrey have been busy lately with decorations for the department stores. Plants are used in such quantities that they find it convenient to ship car lots by freight, which saves them a haul of seven miles.

The Bedford Park Floral Co. are again cutting fine Richmond roses. This variety has always proved very successful with this firm, and they are planting more of it each season.

Thomas Manton is cutting some very fine blooms of cattleyas. The crop will now be held back for the chrysanthemum show, which takes place November 15-19.

Albert Houle, who has been ill at St. Michael's Hospital, is again able to be around, his illness having been more severe than was at first expected.

Our Canadian Thanksgiving Day, which took place October 31, was a great one for the florists, both Saturday and Monday being exceptionally good days, and were far ahead of last year. H. G. D.

Nashville.

Several killing frosts and a flurry of snow on October 28 brought a crispness and frigidity to the atmosphere that was not unexpected at this season but it put all the growers on the alert that their stock should not get a first chill. The long warm weather that continued so late enabled every grower to have his plant in readiness and no inconvenience was experienced at the sudden change. Trade has been fair, and the supply seems to be abundant for all purposes. Chrysanthemums, especially are fine, and are in great demand. All-Saints Day and All-Souls Day will enliven the coming week and have the effect of making trade brisk; already many orders have been taken; much more than formerly for these occasions. Several brilliant weddings occurred during the past week giving all a share in the work. At one of the most brilliant the church was decorated very elaborately with palms and white chrysanthemums. Through the palms extending from one bunch of chrysanthemums to the other were large bows and streamers of fluffy

The Late P. J. Berckmans.

white tulle. The ribbon pews were each marked with bunches of white chrysanthemums. The bridesmaids carried empire baskets filled with Killarney roses, the handles covered with asparagus and tied with dainty blue chiffon to match the dresden tints of their gowns. The brides' bouquet was of white orchids and lily of the valley with chateleine. The bridal table had a central plaque of bride roses and lily of the valley while over it, on the electric light dome, was a bridal bell. Tulle bows caught with lily of the valley extended to the table.

NOTES.

Joe Browne, proprietor of the Lischey Nurseries, has put up two new houses 20x75 feet. He grows a miscellaneous stock more for the plant market and also has a good trade in floral designs and in furnishing plant to the hotels and such places as use them. His principal stock is in the nursery business for which he has a fine stock of all kinds of shrubs, plants and trees.

The new Hermitage Hotel, just completed, is making an effort to have some one of the local growers, who have not an up town store, to take one of the small stores beneath the hotel lobby, from whom they would take their decorations and entire floral sup-

ply. This would probably be a fine stand for someone willing to undertake it. M. C. D.

Northern Indiana Florists' Association.

The Northern Indiana Florists' Association met at South Bend, Ind., October 19, and after a fine dinner provided by the South Bend florists, we were treated to a car ride to see the various greenhouses.

When we finally assembled at the store of Willis Kinyon, it was four-thirty o'clock. After disposing of the routine work, we had a discussion on the poinsettia by Mr. Humfeld, of Muncie; and the cyclamen by Mr. White, of N. Manchester.

We then discussed the advisability of establishing a buying agency, to buy pots, boxes and other needed supplies in quantity and thereby secure better prices.

The exhibits were quite a feature; a large representation being shown: Wagoner Floral Co., Columbia City, a vase each of Dorothy Gordon, Enchantress and Columbia carnations; Muncie Floral Co., vase of Kaiserin roses with three-foot stems from solid bed ten years old, vase of Golden Gate roses vase of chrysanthemum Clementine Tousey table-ferns, plumosus and sprengerii; Johnson Floral Co., Kendallville, vase of White Perfection and Seedling No. 1 (purple) and vase Pompon dahlias; Harry White, N. Manchester, vase each of Victory, White Perfection, White Enchantress, Harlowarden, Rose Pink Enchantress and Mrs. Lawson carnations; Willis Kinyon, South Bend, vase Richmond roses; W. W. Dederick, Tubuous begonias; W. H. Trayer of Elkhart, vase Polly Rose chrysanthemums, vase Enchantress and White Enchantress carnations. Arnold N. Judson, gladiolus America, bulbs measuring 2½ to 2¾ inches in diameter, Ten Eyck, Auburn, photo of gladiolus not named, which appeared to be exquisite; South Bend Floral Co., vase chrysanthemum Clementine Tousey.

After tendering the South Bend florists a vote of thanks for their royal entertainment, we adjourned to meet at North Manchester the third Wednesday in January, at which time we expect to receive samples and prices on boxes, etc., and decide on a make we will all use. This will mean several thousand dollars for the one we select, as we now have thirty-three members representing eighteen flourishing cities and towns in Northern Indiana.

A. J. WAGONER.

St. Louis.

The bright, cool weather continues and stock has shortened up but there has been but little demand and quite a few chrysanthemums, of the poorer grades, are left over. Violets are very slow and poor, the warm spell evidently hurting them. Greens are selling well.

NOTES.

C. Young & Sons Co. have a beautiful display in their west window of yellow chrysanthemums tastefully arranged in fancy baskets. The east window has a display of bulbs and orchids.

J. E. Meinhardt, of Webb City, was here last week to look after his interests at the coming flower show, and he will also show in Indianapolis and Chicago.

Charlie Kuehn was down to the store for a few minutes during the past week, but the doctor advises more rest. Everyone was delighted to see him.

Alex Siegel had the decorations at Schafer Bros.' opening of their new store, which was beautifully decorated with ferns, palms and wild smilax.

LADY TWEEDALE, who recently opened a flower show in Edinburgh, Scotland, frowns on the ambition of horticulturists seeking great size in flowers, and advocates that more time be given to the development of perfume. "Perfume," says her ladyship, "is an indication of the quality of a flower as the words and expressions of a woman's face are an indication of her refinement and her character."

Personal.

Announcements are out for the marriage, November 23, of P. J. Lynch, West Grove, Pa., and Miss Caroline Forkner, daughter of Judge Forkner, New Castle, Ind.

THE parks in most of the large cities, the experiment stations and many private places are making displays of their chrysanthemums, opening their houses to the public, and in many cases installing electric lights that they may hold the exhibitions open during the evenings.

The Glass Situation.

There was a decided break in the price of glass last week, made by the manufacturers for stock on hand, but no futures were offered. These prices were withdrawn toward the end of the week. An advanced price was announced November 8 and withdrawn almost as soon as issued. It is said that the supply of cheap greenhouse glass was exhausted within two or three days of the time the low price was made and it is probable new prices will be announced this week. The present outlook indicates that the new prices will be higher, not so high as those that ruled during the past few months, but considerably higher than the low prices two or three years ago. Intending purchasers should place their inquiries early, however, so as to secure the advantage of any low prices that may be made.

Chrysanthemum Society of America.

WORK OF EXAMINING COMMITTEES.

Cincinnati, O., October 29.—No. 13-09, white Japanese incurved, scored 77 points commercial scale, exhibited by Roepke & Rieman Co., Indianapolis, Ind. Elmer D. Smith & Co., Adrian, Mich., exhibited Dick Witterstaetter, crimson Japanese reflexed, scored 86 points commercial scale, 88 points exhibition scale; Minta, pale pink pompon, scored 82 points. E. G. Hill Co., Richmond, Ind., exhibited R. F. Felton, yellow Japanese incurved, scored 87 points commercial scale and 87 points exhibition scale; Golden Gem, yellow incurved, scored 89 points commercial scale.

Morristown, N. J., November 2.—Elmer D. Smith & Co., Adrian, exhibited the following varieties, which were examined by the committee: Lenox, yellow Japanese, scored 87 points exhibition scale; Tarrytown, pink Japanese, scored 69 points exhibition scale; Poughkeepsie, sulphur yellow Japanese incurved, scored 73 points exhibition scale.

New York, November 4.—Minta, blush pompon, scored 92 points, exhibited by Elmer D. Smith & Co., Adrian, Mich.

PRESIDENT SMITH'S ANNUAL ADDRESS.

Members of the Chrysanthemum Society of America:

Another year has passed and we are again assembled to consider ways and means for the betterment of our society. The membership is far too small when we consider the vast number interested in the Queen of Autumn. The desire to gain knowledge is apparent from the many inquiries showered upon those conversant with such topics, and yet we seem unable to bring these inquirers within our fold. We should have five hundred more enrolled as members of good standing. Will some one please suggest a plan to bring about this end? No florist who grows any quantity of chrysanthemums can afford to remain aloof. He owes this obligation to himself for the practical knowledge that may be

gained. At New York last year I suggested we consider the affiliation of this society with the Society of American Florists. I still believe it is our best course to take. We certainly have nothing to lose with the possibility of much to gain. I hope at this meeting the subject will be thoroughly discussed.

One change in the scale for judging exhibition blooms has been proposed, reducing the number of points allotted to size and adding same to color. If such a course meets your approval it should be remembered that size is quite an important factor in considering varieties which are suited for this purpose, and especially so if color or long necks prevent them from being considered from a commercial standpoint. If I were permitted to express my views I would say color is of equal importance to fullness, form and depth even from an exhibition point of view. Should you decide to make them equal the new scale would then be, color, 15; foliage, 5; fullness, 15; form, 15; depth, 15; stem, 5; size, 30.

The fine specimens displayed in the Exhibition Hall are positive proof there has been no retrogression, and it affords me great pleasure to know our course is upward and onward. Some ten years ago a worthy gentleman at one of the western shows in responding to his toast stated that the limit in size had been reached and it was folly to try to produce larger ones. I will leave it to you to decide the truth of this statement by bringing to mind those shown at that time in comparison with those before you today. As in the past there are still many possibilities. Soil that is still unturned and so it behooves us to keep our eyes to the front and strive for greater achievement.

This has been a very trying season in the development of chrysanthemums. In the middle west we had ten days in early March with the thermometer around the 80 mark and a cold April and May. Through June, July and August the weather was warm and air very dry with practically no precipitation during these months. October, the month for finishing, has been extremely warm for the buds to expand freely and many cases of burning have resulted therefrom. As near as I can learn these conditions have prevailed to a certain degree throughout the country so that many have suffered losing fine blooms. Hope is the anchor of the soul and so we must wish for better conditions another year.

Since our last meeting one of the world's most prominent originators has passed to the great beyond, M. Ernst Calvat of Grenoble, France. His products have been very popular both in England and America. While most novelties are soon cast aside and later products take their places, yet there are several originated by this worthy raiser which have gladdened the hearts of exhibitors and are today among the best for this purpose. I refer to such varieties as M. Loiseau-Rousseau, Pres. Viger, Mme. Carnot, S. A. Naceur-Bey, Chrysanthemiste Montigny and Pres. Loubet.

Before adjournment we should decide on the next meeting place, and I would suggest that our vice president be selected from the same city or immediate vicinity. I wish to thank

the press who have so kindly printed our notices and the members of the committees who have given their time regardless of other duties to be on hand to examine seedlings. I am assured these gentlemen are benefactors not only to this society but to the growers at large in pointing out such of the new creations as are best adapted to the various purposes.

In leaving the president's chair I have but one wish and that is this society may grow to be stronger in every particular so that its influence for good will be felt far and near. Thanking you for the many courtesies extended and wishing you one and all success, I bid you adieu.

Meetings Next Week.

Baltimore, Md., November 14, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Boston, Mass., November 15.—Gardeners' and Florists' Club of Boston, Horticultural hall.

We make these a specialty.
Can supply them all the year.
Once tried you will have no other.

Chicago.

A week of exceedingly pleasant fall weather has been enjoyed by the trade. The nights have been cool and the days pleasant and the air sharp, the typical weather to make everyone feel good, and trade has felt the impetus that such weather produces. Chrysanthemums are still the flower of the market and can be procured in quantities in all grades and colors, although there has been a shortage of fine pink blooms on some days. The large and medium sized blooms have found a very good market and have sold well, but there have been too many of the smaller grades. The rose growers seemed to have timed their crop splendidly so far, for with the cooler weather the cut has shortened up considerably and there is no surplus at all, in fact some days there is a little hustling to fill orders. The roses that are coming to market are of superb quality, fine buds with nice long stems, and American Beauty is grand and of excellent color. Carnations are now in fine shape, but the supply is a little short and the call is increasing and it looks now as if there might be quite a shortage as soon as the chrysanthemums are through. Orchids are quite scarce, not many blooms being sent into the market, and are sold almost as soon as received. Sweet peas are in much better quality and the demand is fair. Violets are meeting with much better sale and the quality is improving very fast.

NOTES.

J. A. Budlong is cutting an exceptionally good grade of roses with White and Pink Killarney, American Beauty, Jardine and Maryland showing up remarkably well. The latter are of A-1 quality, the foliage, color and stem being all that can be desired, and a large quantity of these are disposed of daily. This firm extends a cordial invitation to all visiting florists to look over their large greenhouse plant while in the city.

At Wiator Bros. we noticed an exceptionally good quality of roses of all the leading varieties, with American Beauties and Richmonds showing up very good. The latter are mostly of a long and medium stemmed grade with an excellent foliage and color. Chrysanthemums of all leading varieties are among the daily arrivals and some extra large blooms of Timothy Eaton were very noticeable.

ORCHIDS A SPECIALTY.

I am now receiving daily shipments of Fancy Cattleyas, Vanda Caerulea, Dendrobium Phalaenopsis, Oncidiums and other choice Orchids, Fancy Valley, Roses, Carnations, and all Seasonable Flowers and Decorative Stock.

Supplies of All Kinds.

CHAS. W. McKELLAR
51 Wabash Avenue.
CHICAGO.

J. A. Mendel, West Eighteenth street, was elected county commissioner on the democratic ticket and, according to late reports, was leading the ticket by a big margin. Mr. Mendel wishes to thank all for the liberal support given him at the polls November 8, especially N. J. Wiator, who spent the entire day working for his interests and who is as enthusiastic over his victory as he is himself.

Kennicott Bros. Co. is receiving an extra fine grade of chrysanthemums from George Bayer of Toledo, O. Happening to be in when a shipment arrived we were greatly impressed with the excellent way in which the blooms were packed and the fine condition of the stock after its arrival. Mrs. E. E. Piester is at Mudlavia receiving treatment for a severe case of rheumatism.

Chas. W. McKellar is receiving an extra fine grade of Cattleya labiata and other leading varieties of orchids. A large number of orders have been filled the past week for the different flower shows held throughout the country and we stopped for a minute

to admire the skillful manner in which the proprietor packed these beautiful flowers, preparing them for shipment.

Hoerber Bros. are cutting a large quantity of white, pink and yellow chrysanthemums in all leading varieties. Large shipments of roses are also among the daily arrivals and some Brides and White Killarney of exceptionally good quality were very noticeable. Business has been very good and the demand for carnations the past week was exceedingly heavy.

The Chicago Carnation Co. is cutting large quantities of carnations, with Victory, Conquest and Washington showing up remarkably well. The latter is a sport of Enchantress and is of a true Lawson color at all times. Manager Pyfer is well pleased with this carnation and large quantities of these magnificent blooms are disposed of daily.

E. H. Hunt is receiving large quantities of white, pink and yellow chrysanthemums of an exceptionally good quality. An extra fancy grade of carnations, roses, and all other seasonable stock is among the daily arrivals.

Heavy Supply of Roses - Carnations - 'Mums

Our stock is in exceptionally good condition, and if you want to please your customers you should place your order with us immediately for

Beauties, Maryland, Jardine, Richmond, and Pink and White Killarney Roses. They are sure to give satisfaction. None better in the market.

Violets. Fragrant home-grown singles, you will find these hardy enough to stand long distance shipments. Can also supply the New York or Hudson River Violets, but only at buyers' risk, owing to the reason that they are several days in transit before reaching Chicago.

Carnations. All the leading varieties. You will find them to be large sized flower and long stem grade, and of a quality far above the average to be seen in this market. Try them and be convinced.

Chrysanthemums. Pink, White and Yellow in large quantities. Chrysanthemums of the Pink variety have been scarce, but we are again cutting some choice blooms from the late sorts.

Plenty of other Seasonable Stock.

Visitors are cordially invited to inspect our plant and any Lincoln Avenue car will take you right to the door.

We
Strive
To
Please.

J. A. BUDLONG

37-39 Randolph Street, CHICAGO.

Roses and
Carnations

WHOLESALE
GROWER of

CUT FLOWERS

A Large
Supply to
Meet all
Require-
ments.

Bassett & Washburn's shipments are very heavy and the stock is being forwarded to their customers as soon as received at the store. The chrysanthemums this fall have been of a very high grade and the varieties which they grow are selected in a very careful manner, so as to secure only those that will stand long shipments.

The Golden Eagle chrysanthemums which the J. B. Deamud Co. is receiving are grand flowers, with fine finish and are bringing top prices in the market. Stock of all kinds is arriving in elegant condition and a good steady supply of high grade stock is the outlook for the holidays.

The Geo. Wittbold Co., 737 Buckingham place, have on hand and are sending out some extra fine stock of Verschaffeltii, John Pfister and Annie Pfister coleus from two-inch pots. The latter is a beautiful curly red variety, while John Pfister is a beautiful curly yellow.

Poehlmann Bros. Co. is now cutting as handsome American Beauties as are often seen on the market. The stems are of extra length and the blooms of fine color. The lily of the valley grown by this firm is of the best quality and is constantly received at the store.

The Florists' Club bowling league gave a grand ball and reception at the Coliseum Annex Friday night, November 11, in honor of the visiting florists to the Flower Show. There was a large crowd present and all report having had a very good time.

H. Van Gelder is receiving daily extra large shipments of New York double violets for which he is filling a large number of orders. The violets are as fine a grade as are coming in the market, the stems are long, the flowers extra large and of good color.

J. M. Cochrane is enjoying a very busy season at his place of business at 548 West 119th street, and 10,000 feet of glass are devoted to the growing of cut flowers and other miscellaneous stock that is needed to successfully conduct a retail business.

Mrs. K. N. Cooper of the Auburndale Goldfish Co., 920 West Randolph street, extends a cordial invitation to all local and visiting florists and their friends to call and look over her goldfish, aquarium plants, castles, globes and other supplies.

Joseph Ziska of the Chicago Rose Co. has been laid up the past week with a severe attack of rheumatism. John has also been absent from the

store a greater portion of the past week, having been called upon to serve on a jury.

Vaughan & Sperry are the recipients of large quantities of splendid stock of all kinds. American Beauties of a high grade and of splendid color, foliage and stem are among the daily arrivals and are eagerly sought for by the trade.

At Zeck & Mann's we noticed large quantities of roses, chrysanthemums and carnations and all other seasonable stock. This firm is now offering an exceptionally good grade of Lily of the Valley, sweet peas and violets.

H. N. Bruns, 3040 Madison street, informs us that according to the latest reports from his growers abroad the Lily of the Valley pips that are now being imported will be the best that ever came into this country.

Sinner Bros. of the Flower Growers' Market are offering large quantities of white, pink and yellow chrysanthemums in all leading varieties.

At Kyle & Foerster's a large quantity of white, pink and yellow chrysanthemums were noticed of an exceptionally good quality.

O. Johnson of the Flower Growers' Market is handling a very good grade of American Beauty and Bride roses.

CHRYSANTHEMUMS

WHITE YELLOW PINK

ROSES - CARNATIONS

OF ALL LEADING VARIETIES.

We can furnish them by the dozen, hundred, thousand. Send for our special price on large lots

Sweet Peas, Violets, Lily of the Valley

And all other seasonable stock that a florist may need. Our stock is arriving in excellent condition and in as good a grade as can be found in the market.

We are also handling large quantities of Greens of all kinds and have just received an extra large shipment. Send us your orders and we will see that it is filled to your satisfaction. Get your Thanksgiving Day orders in early.

ZECH & MANN, Room 218
51 Wabash Avenue, Chicago
Telephone Central 3284

Wm. F. Henning of Blue Island, reports business as brisk with plenty of funeral and wedding work. 3,000 feet of glass are devoted to the growing of cut flowers, bedding plants and other miscellaneous stock which at present is in fine condition.

J. Andrews of Andrews Bros.' is to be found constantly on the local market buying stock for their store at Cleveland, O.

Miss M. C. Gunterberg of the Flower Growers' Market is now offering some very good American Beauty roses.

The Lakeview Rose Gardens of Jamestown, N. Y., are sending some very fine chrysanthemums to this market.

John Risch of Wieland & Risch is still reported to be seriously ill.

Visitors.—W. S. Mudge and wife, Gasport, N. Y.; Mr. Raasch and wife, Kankakee; R. A. Smyth, Benton Harbor, Mich.; N. H. Long, Dixon; Mrs. C. Bond, Danville; J. E. Meinhart, Webb City, Mo.

Chicago Bowling,

The Orchids are still in the lead and have won twelve and lost six games. The Carnations are second, having won nine and lost an equal number. The Violets are third with eight won and ten lost. The Roses are last and have won seven and lost eleven games. The teams are all evenly matched, and

some very interesting contests take place every Wednesday evening. T. C. Yarnall has the highest individual average, with Allie Zech a close second. The following table shows the individual and team scores for games played November 2:

Pittsburg.

The beginning of the past week found things in the flower line rather dull, but by Saturday night the wholesalers did not have a flower of any description on hand. It looks as though the beginning of the end is in sight with chrysanthemums, many of the late varieties now being in. This will cause no regret among the wholesalers, who claim there is no profit in them when cost of handling and boxes are taken into consideration. The wholesale growers also state that this season is one of the worst that they have experienced; to start with, the early chrysanthemums had to compete with very large quantities of out door stock, and the warm weather brought on the late varieties on top of the early ones. At present the medium sized Ivory that retails for a dollar a dozen is the most active. Carnations are in better demand, while violets and lily of the valley are very strong sellers. Paper white narcissus have made their appearance (another flower for which the wholesaler has not much love). American Beauties move out well for the chrysanthemum season.

NOTES.

At the last meeting of the Florists' and Gardeners' Club there was a magnificent exhibition of chrysanthemums by the Phipps Conservatories, Schenley Park and North Side, David Frazer, gardener for H. C. Frick, H. C. Totty, Madison, N. J., Pittsburg Cut Flower Co., and R. Wissenbaugh. Phipps Conservatories showed Col. D. Appleton; Wm. Duckham; Sunstone; Sulan; David Lyne, white; Rose Ellis, a new light pink; Ounda (new), May lemon color; W. Wood Mason, new red reverse bronze; Mrs. J. Wells, red, Bright-hurst; R. H. Bromhead, Winfred, yellow; Alice Lemon, (new); Pockets

Crimson; F. S. Valis; Miss J. A. Miller, bronze; Mr. Jones, foreman, stated that W. Wood Mason was a favorite with him, as he found it a pleasing color and the easiest chrysanthemum to grow, always being healthy. The Pittsburg Cut Flower Co. showed commercial varieties. C. H. Totty sent in a fine collection of pompons, including Biddy, small pink; Little George; Mrs. Bassett, white; Matilda, red; Lilia Viola, Penelope and Jas. Boone. R. Wissenbaugh also showed a fine collection of pompons. A motion was passed to invite R. Vincent, White Marsh, Md., to visit us and exhibit his slides, taken during a recent trip abroad.

A new bell telephone was added to the equipment of the McCallum Co. This firm is handling a fine lot of cattleyas and American Beauties.

Mrs. J. Elicker, Homestead, purchased the contents of the chrysa-

GREAT STORM.

While these was a considerable movement in stock during the past week, there was room for improvement in business. The great storm that swept the state dealt out a very generous portion of rain and snow to this city. November 3 and 4 were particularly bad days, and the shopping districts were not well patronized. Many good chrysanthemums are now seen. Dear Friend, a fine yellow, grown extensively at the Harris range, is popular in the stores, and the Col. D. Appletons and Major Bonnaffons are also seen. No fault can be found with the quality of stock and it is plentiful enough to keep the wholesalers hustling.

NOTES.

The Overbrook Gardens, Edward A. Stroud, proprietor, held its second annual chrysanthemum show November 4 and 5. It was at the spacious quarters of the Overbrook Golf Club, and in addition to the excellent quality of stock shown, much credit is due Mr. Stroud and his efficient manager, J. W. Prince, for their excellent arrangements. A great feature was the splendid display of pompons and singles. The club rooms were profusely decorated with southern smilax and autumn foliage, and the arrangements were all that could be desired. An orchestra furnished excellent music. Among the noteworthy pompons were yellow, Overbrook and Goldfinch; white, James Boon and Northumberland; bronze, Al-lentown and Henrietta. Fine singles

were, pink, Mary Colladay; white, Nippon; yellow, Mikado and King Midas.

A recent visit to the range of W. K. Harris showed not only a wealth of fine chrysanthemums, but likewise a great stock of the staple pot plants for which this range is noted. They have put in a large and fine stock of azaleas. Another feature is their large gardenia plants grown in pots.

John W. McIntyre has, since October 2, when he received his first shipment of lilacs, been growing more active in that line. He is only receiving a limited quantity at present, but expects in a short time to be able to fill all orders. He states that the quality will be the best grown and that he will handle more lilacs than anybody in the country.

N. B. Gachor, who for over twenty years kept the flower store in the Broad Street Station, has opened a nice store at 110 South Sixteenth street. The location is a good one, and as Mr. Gachor thoroughly understands his business he will doubtless be successful.

Cleveland.

BUSINESS IMPROVED.

Business the past week has been very much improved. The outside stock being done for, the demand for chrysanthemums and carnations is much better. Roses are very plentiful, with only a fair demand. A few sweet peas are coming in of good quality. Violets are having a good call. Lily of the valley and orchids are in fair demand, and smilax is plentiful.

NOTES.

Ed. A. Wilhelmy was passing around a box of good cigars Saturday, the occasion being the arrival of a five-pound baby girl at the Wilhelmy home November 2. Both mother and baby are doing finely.

MARKET IMPROVING.

The general conditions of the market show improvement but chrysanthemums, carnations and roses are all selling at low prices.

NOTES.

The figures of the Doyle failure have grown to \$57,000. The proposition made by Mr. Doyle to settle for 20 cents on the dollar was not accepted by the committee who will meet November 16 and make their recommendations. The feeling toward Mr. Doyle is very friendly and it is thought he will be able to continue the business.

At the next meeting of the Gardeners' and Florists' Club, November 15, Michael Barrett will be the lecturer, his subject being, "Bees as an Aid to Horticulture." The annual nomination of officers for 1911 will be made.

The schedule committee of the National Flower Show will meet in Boston next week to arrange for the cut flower schedule. Stickers for the great show will be ready for anyone who may wish them in a short time.

Andrew Christiansen is welcomed back from his two months' trip to Germany, Denmark, Sweden, France and England, which he thoroughly enjoyed. He reports finding things at home every way satisfactory.

The schedule of prizes for the mid-winter flower show of the Massachusetts Horticultural Society is out. The date is February 24-26. The usual liberal prizes are offered for plants, flowers and vegetables.

Two new retail stores on Boylston street; Quint & Weis opened two weeks ago, and James Petros, formerly with Casey, on Clarendon street, will open a store in the Y. M. C. A. building.

Malcolm Orr of North Saugus is shipping his sweet peas and W. C. Ward of East Milton his pansies to New York where they get better prices than in this market.

The directors of the Co-operative Flower Market elected Norris F. Comley, president; John McFarland, clerk, and Donald Carmichael, treasurer.

A. Arronson, the Crawford House florist, was married November 3. A delegation from the flower market attended the wedding.

H. W. Vose, Hyde Park, was the earliest to bring in Paper White narcissus.

A visit to the supply department of all of the wholesalers indicates a big trade. W. T. H.

FOR CUT FLOWERS: in two colors on gummed paper; your card, etc., in black and leaf adopted by the S. A. F. in red. Price per 500, \$2.85; per 1000, \$4.50. Samples on request. Electro of leaf, postpaid, \$1.25. Cash with order.

AMERICAN FLORIST CO., 324 Dearborn St., Chicago

New York.

SUPPLY PLENTIFUL.

Several days of wet and stormy weather had created a rather demoralized condition in cut flower circles; in fact, trade was at an extremely low ebb, until the bright sunshine of Saturday morning last came and seemingly put new life and vim into the business. The market is plentifully supplied with everything in the cut flower line, with the possible exception of cattleyas. These are quite scarce, and it is only very favored customers that are enabled to secure a few to fill their wants. Roses of all grades and varieties are available, and of excellent quality. Prices for special grade stock on both American Beauties and the "Teas" are reasonably firm, but in the number one and two grades more elasticity is evident, the quantity required being a prime factor in regulating the price. Carnations are running fairly well, indeed, considering we are in the midst of the chrysanthemum crop, the prices obtained are satisfactory all around. Those in a position to know say that the chrysanthemum crop this year is larger than ever before. Many of the old standard varieties are still at the head of the procession and cannot be equaled as money-makers for the commercial growers. Lilies and lily of the valley are in constant daily supply; no more seasons for these specialties, they are available every day in the year. Violets have been very erratic; that is, the demand for them. Prices are improving a little now, however, and from now on we should see a little better tone to the violet question. It has not been on account of the quality of the flowers that the demand has hitherto been so meagre, but rather from the fact there has been so much other material on the market and that the social season has not yet got into full swing.

NOTES.

On account of the strike of the express drivers and their helpers, the wholesale men are experiencing quite a little difficulty in getting consignments from the growers delivered to them. The strike was inaugurated about two weeks ago. At the present time the chief point at issue seems to be the question of recognition of the union. The express companies profess a willingness to take the men back and adjust the wage scale afterward, but want to treat with the men individually, a mode of procedure which the strikers are firmly opposed to. Some express wagons are running, however, under protection of mounted police, and driven by strike-breakers, but what the ultimate outcome will be, or how much inconvenience the general public will yet have to bear before a satisfactory arrangement of the trouble can be reached, remains to be seen. It certainly does not look very promising at the present time.

The November meeting of the New York Florists' Club will be held on Monday, November 14, in the club's rooms, Grand Opera House Building, Twenty-third street and Eighth avenue. Chairman W. F. Sheridan of the Essay Committee, has secured Mr. J. T. Withers to give his celebrated lecture, "A Trip Around the World," illustrated with stereopticon views. Many of the club members will remember the very charming illustrated talk on Forest Trees that Mr. Withers gave a few years ago and will be glad to hear him

The Opening of the Season Finds Us Better Prepared Than Ever To Do a Strictly First Class Commission Business

We have made a large addition to our salesroom and selling space, therefore we are in better shape to handle all shipments to good advantage. This has been our banner year, but we expect to do a lot of record smashing in 1910

again. The Nominating Committee will report at this meeting (an event always interesting), and we are also informed that it will be a "Ladies' Night," with Chairman John B. Nugent in charge of the cuisine. A large and enjoyable meeting is assured.

Owing to November 8 being election day, Wm. Elliott & Sons held their regular auction sale of plants on November 9. On November 11 they held their first sale for the season of conifers, roses and rhododendrons, and will continue to sell under the hammer this class of stock twice a week until the end of the season.

Owing to extremely wet weather in the Lowlands, in Germany, it is believed that high grade Lily of the Valley pips will advance materially in price next season; azaleas also, it is believed, will cost more.

According to a recent cablegram from Japan to Ralph M. Ward & Co., 12 W. Broadway, the price of Lillium giganteum bulbs will advance about ten per cent. This, of course, refers to the crop of 1911.

Frank McMahon, the enterprising rose grower of Seabright, N. J., will

YELLOW TULIPS are selling slower than usual.

VISITED CHICAGO.—A. Emerich, representing Vilmorin-Andrieux & Co., Paris, France.

HOLLY in the choice grades will be a short crop. Reports from eight shipping points verify this. Few berries are the rule.

CHICAGO.—Prices on the board of trade November 9 for grass seed were noted as follows: Timothy, \$8 to \$9.25 per 100 pounds. White clover, from \$22 to \$28.

BOUQUET GREEN will be scarce; some snow has fallen in the Wisconsin woods and unless the weather warms up the output will not be over 50 per cent, if that.

ONION SETS at Chicago are now mostly under cover. The weather has been favorable for field storage and for shipping. Prices are favorable now for the buyer.

J. C. VAUGHAN, in his candidacy against James R. Mann, lost out by about 1,600 votes, reducing the latter's majority from 17,600 two years ago, the second probably being the strongest republican district in the state.

HOUSTON, TEX.—The Reichart and Schulte company, known all over the south as "The Texas Seed Store," has moved into its new building, 206-208 Milam street. They occupy three floors with a frontage of 50 feet and a depth of 100 feet.

BALTIMORE, MD.—There is a new seed house opened here, the style of the concern being The Meyer-Stisser Company, and the location 32 Light street. The principals have been long in the trade and their situation is right in the midst of the seed and implement houses, the street having been largely dedicated to that line for so many years that the memory of old men runs not to the contrary. There is abundant room for the new entrant and if "competition makes trade" it will find its fair share of business.

Pape & Bergmann's Novelties for 1911.

In the list of novelties for 1911 offered by Pape & Bergmann of Quedlinburg, Germany, the following should prove of interest to plant growers:

Ageratum nanum compactum, Rotkappchen.—This is the first dwarf ageratum with pink flowers, which fills a long felt want in the way of a dwarf pink border plant and for carpet bedding. This originated from Bluestar, forms dwarf compact bushes covered with flowers throughout the entire season and also blooms very uniformly. The color is pale pink showing a dark center when opening.

Antirrhinum nanum grandiflorum, Montblanc.—A large flowering, pure

A. T. Ferrill, Saginaw, Mich.

Manufacturer of Seed Cleaning Machinery.

white variety of the half-tall snap dragon, very free blooming, much more so than the old type, Nanum Elbium. The spikes are produced early in the season and very profusely, absolutely pure white and are therefore extremely valuable for cut flowers.

Chrysanthemum, new single early flowering hybrids.—This is an entirely new rose which will bloom in July and continue until fall. Seed sown in February or March and pricked off as soon as strong enough and planted out in the garden the beginning of May, will start to bloom in July. For florists

it is advisable to plant in the open and pot as soon as they show buds and they will make beautiful pot plants. This type is offered in separate colors.

Mignonette, Giant Machet.—A valuable improvement with extra long and thick flower spikes. Color is the same as Machet but the plants grow somewhat taller and branch out more.

The Pollinization of Forced Tomatoes.

A very interesting and researchful paper of the above title was read before the Market Gardeners' convention at Grand Rapids, Mich., by Prof. O. I. Gregg of the Michigan Agricultural College. The first portion deals with the construction of the tomato's flower, which was illustrated with a chart and after describing the several organs and their part in pollinization states: "The number of pollen grains germinating, determine the number of seeds in the fruit up to the limit that the ovary contains ovules. To explain: If six pollen grains germinate, there would be very likely, a similar number of seeds form but no more. On the other hand, if a large amount of pollen grains were applied, there might be more than enough pollen grains germinate to unite with the number of ovules in the ovary. In the first instance the resulting tomato would be small, containing but a few seeds. In fact, it has been shown that by placing one pollen grain on the stigma, but one seed would form in the fruit, the fruit being seldom over an inch in diameter and very solid and meaty. The tomato resulting from a few pollen grains is also very slow in beginning to grow and takes a longer time to mature, as a large amount of pollen seems to be a stimulant in starting growth. It sometimes happens that a good sized tomato forms containing no seeds and it has been shown by experiments, that they may form without pollination or simply by an irritation of the pistil by some foreign substance as fine dust, magnesium sulphate or similar substances. These cases, however, are very rare and not of practical value. Experimenters have also shown that if a plant has several well pollinated fruits, these fruits will enlarge and take a larger proportion of food than those containing but a few seeds, but if slightly pollinated fruits are alone on the plant, they often grow to as large a size as well pollinated fruits. On the other hand, the one having plenty of pollen on the stigma would cause a large number of seeds to form, resulting in a larger tomato containing 250 seeds or more. In pollinating, it is best to apply plenty of pollen even though all of it is not necessary as larger, better and more uniform fruit results. It is also necessary to have the pollen applied at very nearly the right time. If pollen is applied before the pistil is mature, the stigma is liable to be injured and even though it remains on until the pistil matures, poorer fruit is liable to result or it may blight after it sets. The correct time to pollinate is when the flower becomes mature and the petals or flowers are fully expanded and the stamens turned slightly back, leaving the stigmatic surface exposed. The stigma becomes slightly moist and sticky at this time and may remain several days in this stage before falling, but the ovary begins to enlarge very soon after the pollen is applied. It is not necessary to pollinate a flower more than once. It is better to wait until the flower is fully developed before pollinating, then do a thorough job once than to pollinate all of the flowers on each truss each time the

tomato plants are gone over, whether fully developed or not.

With greenhouse tomatoes especially, many irregular, lopsided fruits occur. This is due to an irregular pistil or poor pollination. With some varieties like the Lorillard, the first flower on each truss that develops is very liable to be large, flat and faciated which if pollinated, makes a very large and irregular fruit. This can be obviated by pinching these off as soon as they develop. Other varieties like the Frogmore seldom have distorted pistils, but lop-sided fruit sometimes occurs by insufficient pollination or pollen not being evenly applied. It has been demonstrated that if pollen is applied on one side of the stigma only, seeds will form in the cell in the ovary on the side of the ovary corresponding to the side of the stigma pollinated. This causes one cell to become greatly enlarged, these forming two-thirds of the tomato causes the fruit to be one sided.

A word concerning cross pollinization. By this is meant the pollinating of one variety of tomato with pollen from some other variety. Quite an extensive experiment was carried on in the college greenhouses, a few years ago, to see if larger or better fruits were obtained by cross pollinating varieties than by pollinating the same varieties with their own pollen and in all cases, four varieties being tested, the experiments showed that there was no benefit in cross pollination. The varieties were Lorillard, Sterling Castle, Frogmore and Best of All. This showed that it was not necessary to grow more than one variety of tomatoes in a house, but that no harm is done if more than one variety is grown.

PRACTICAL METHODS OF POLLINATION.

There are several methods by which greenhouse tomatoes are pollinated, namely: with a spoon, glass slide, camel's hair brush and jarring the support. All are successful. Where a spoon is used, it is placed beneath the flower and the flower tapped into the spoon with a small stick or with the hand. In this case pollen is generally shaken from the flowers at the same time that the pistil is being pollinated as it touches the pollen already in the spoon. This method is sure but rather slow as compared with jarring the support. Pollinating by using a glass slide differs but little from the spoon. It is not always necessary to tap the flower from above but the flower may be tapped from below sufficiently to cause the pollen to drop but at the same time, pollinating the pistil. The camel's hair brush does not seem as practical a method with the tomato as with the spoon as the pollen is not easily liberated except by jarring, although it is very successful with the cucumber which has its pollen on the outside. The brush is not as apt to injure the pistil, is rapid but not as sure as the spoon.

In pollinating by jarring the support, a person is not as sure to get good results, this is especially true in the cloudy dull days in winter, but later in the year very satisfactory results may be obtained by simply hitting the support sharply two or three times with a stick or a padded stick preferred, if the plant itself is struck.

With any method of pollinating, it should be done when the plant is dry and in the middle of the day is the best time after the water has evaporated, leaving the air dry and warm. Pollinating once every two days or three times a week is sufficient and if the weather is extremely dull for a long period, a much longer period may intervene between the times the pollinating is done.

SYNOPSIS.

As the tomato belongs to a group of plants which are ill-smelling and have

no nectar in the flowers, but few insects work upon them to aid in pollinating them, for this reason, the tomato when forced in the greenhouse must be grown when the weather is more or less dull and with no winds to drive the pollen, artificial pollination must be resorted to.

The practical methods in use is by aid of a spoon, camel's hair brush or by tapping the support; the latter method being the quickest but not always sure in dull weather. Pollinate when possible, in the bright sunshine while the atmosphere is dry and temperature is high, as the pollen is given up best under these conditions. Pollinate thoroughly and do not touch flowers that are immature but simply those which are mature as premature pollination causes the fruit to drop or become small. Pollinate thoroughly that plenty of pollen may adhere to the stigma, as the size of the fruit depends almost entirely upon the number of seeds in the fruit and one pollen grain must germinate to unite with each ovule. Besides a fruit resulting from a well pollinated pistil, matures quicker than one from a few pollen grains. Irregular fruits are generally caused by irregular pistils and poor pollination, as an irregular, flat pistil causes a similar shaped fruit and pollinating on one side of the stigma causes one sided fruit with seeds on the same side as that on which the pollen was placed in the stigma.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

ABINGTON, MASS.—The Bay State Nursery Co. is setting out several acres of their property to shrubs and trees this fall.

NEW HAVEN, CONN.—The Elm City Nursery Co. have just let contracts for a large addition to their packing shed facilities and also storage cellars, where bay trees and other half hardy plants can be stored through the winter. They are also extending their office floor space and adding to their drafting room.

Notes From Southern California.

The effect of the first moderately heavy rains, after the summer's drought, upon the trees and shrubs of southern California is very remarkable, foliage and flowers that, before the rain, had a very dried up appearance immediately taking on new color and freshness. The eastern visitor finds a curious combination here of what appear to him to be hardy and tender shrubs and trees, growing in close proximity. Just as in the east, some growers attempt the culture of exotic shrubs that are not nearly as suitable to the climate as those of native growth, so the Californian planter largely neglects the many fine native trees and shrubs to grow those from other lands. He is more successful, however, than his eastern contrere, owing to the immense advantage of climate. Australian species are very well represented here, from the ubiquitous eucalypti to the wattles or acacias and the bottle tree (*Sterculia rupestris*). *Acacia dealbata* is largely planted as a street tree and makes a welcome change from the various palms, such as *Washingtonia filifera*, *chamerops*, *phoenix*, and others. The *sterculia* is also popular as a street tree, as are the *jacarandas* and, of course, the *California pepper* (*Schinus Molle*). *Acacia cultriformis* and *A. armata* are both dwarfier than *A. dealbata* and are popular shrubs or small trees for planting around home grounds. *Poinciana pulcherrima* makes a showy tree that flowers over a long season and is much more frequently seen than *P. regia*, a far superior tree.

As a lawn shrub, *Clanthus puniceus* is very popular, its pretty scarlet flowers contrasting well with the deep green leaves. *Malvaviscus arboreus* makes a fine companion plant to it and is one of the best species for planting on dry, sunny banks. Its flowers are a brilliant scarlet, something between an abutilon and a hibiscus, and the leaves are a pretty soft green. The Spanish broom (*Spartium junceum*) is attractive when in flower and is freely planted. *Escallonia* in variety grow well here and flower freely, but the flowers lack the brightness seen in cooler climates. *Erythnia crista-galli* and *E. splendens* are both showy and attractive and a welcome and refreshing bank of deep green is noted in the highly polished foliage of *Choisya ternata*, a plant that does well here if freely irrigated. As a fine foliaged shrub the rice paper tree (*Fatsia papyrifera*) has a noble appearance and is one of the most striking.

Dreer's Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of summer-flowering plants, and we are prepared to furnish many of the latter as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox

We would particularly call attention to the following *Three New Varieties* as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice:

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flowers; of dwarf habit,

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

PRICE: Any of the above three new varieties, \$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

HARDY PHLOX.

General Collection of Hardy Phlox

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Aglac Adanson (Medium). Immense flowers, snow-white, with red eye.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish lilac; large, white halo.

Bacchante (Tall). Tyrian rose, with crimson-carmine eye.

Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.

Bridesmaid (Tall). White, with large crimson-carmine centre.

Belle Alliance (Medium). White, with large pure red eye.

Charles Seller (Dwarf). Bright reddish-violet, with large white star-shaped centre.

Clara Benz (Dwarf). Lovely carmine-rose, with darker eye.

Colibri (Tall). White, with crimson-carmine centre; very late.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.

Champs Elysee (Dwarf). A very bright rosy magenta of an effective shade.

Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.

Caran d' Ache (Medium). Geranium-red, with old rose shadings and white eye; very effective.

De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.

Diadem (Dwarf). A fine dwarf pure white.

Danton (Medium). Scarlet, with pure red eye.

Etna (Medium). Crimson red, suffused with fiery red; cherry-red eye.

Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre, with an exceptionally large white centre.

Eugene Danzavillier (Tall). Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.

Eclairer (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.

Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.

Gruppenkonigin (Tall). Delicate, pale rose mauve, with claret-red eye.

George A. Strohelein (Medium). Bright scarlet, with crimson-red eye; does not bleach.

General Giovaninelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal; a pure red eye; very effective.

General Van Bentsz (Medium). Scarlet, with rose shadings and crimson-red eye.

Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

PRICE: Any of the above General Collection, \$5.00 per 100; \$40.00 per 1000.

For a complete list of seasonable stock see our current wholesale list. If you have not received a copy it will be mailed to you on application.

HEAVY SNOW STORM.

The last week opened with promise of an extra good business outlook; weather was propitious, crisp enough to be stimulating and not cold enough to frighten people into believing winter was near. Quite a number of weddings were to take place in social circles. The races were on, and the new interest, that of the aviation meetin., came at the same time, and with the ever attendant dinners and luncheons and other entertainments, there was hope of a cheerful and busy time. To the surprise and disgust of every one, a winter storm, almost unparalleled at the date for violence of wind, heavy snow and general discomfort, struck the whole southeastern Atlantic coast and knocked things to smithereens generally. The aviation grounds were swamped, the great tents were blown down, many of the flying machines damaged, some almost irreparably, six inches of snow covered the ground, and dismay and blues following the enthusiastic expectation that a new and thrilling sport was to be inaugurated. The storm lashed two days and interfered very much with all kinds of business and was a damper on social events. Of course the weddings and dinners came off, but the weather had great effect on the gaiety of the week. The bird-men have repaired the damages and the meeting and trials will go on, but the edge is off and the florists feel the disappointment as much or more than any other interest.

NOTES

The recent rains have given an impetus to nursery operators. During October, here the customary month for planting, the ground was too dry for almost any out-door work. It was almost impossible to plow and get the ground in order, and planting had the go-by. Now everyone is hustling to get their planting and seeding done, and the nurserymen are busy executing delayed orders.

The Gardeners' and Florists' Club has begun actively to make preparations for the meeting of the Society of American Florists in this city next year and a number of committees have been appointed amongst which the work is divided, all of the members taking hold with interest of the various branches committed to them.

The chrysanthemum product this year has been great in quantity, and as a rule, good in quality. There seems no diminution in the popular fondness for this autumn queen and the shops and markets, the market men and curbstone vendors, have had abundant supplies, sufficient to suggest that the thing is overdone.

ST. JOSEPH, MO.—R. G. Rau, park superintendent, is preparing for the annual chrysanthemum show at Krug Park. The varieties this year will be larger and more varied than at any previous time.

JACKSON, MICH.—The opening of the new flower store, 141 East Main street, by Henry M. Burt, October 26, was attended by 10,000 people. The place was richly decorated with plants and blossoms of all kinds. Mr. Burt was formerly in Battle Creek, where he successfully conducted business for ten years, selling out his business there and coming to this city.

Surplus Shrubs, Roses Dahlias and Other Stock

We have the finest lot of large-sized, strong, lusty shrubs you ever laid eyes on, which we will be glad to convert into ready cash at the following ridiculously low prices:

HIGH CLASS PALMS

and Novelties in Decorative Plants.

Market and 49th Sts., Philadelphia, Pa

HOME AGAIN!

Godfrey Aschmann, chief of the old reliable firm, Godfrey Aschmann, 1012 W. Ontario St., Philadelphia, has returned from his trip to Europe. He sits at his desk, looking after the interests of his countless customers, and is as lively and as jolly as ever. **Leader in our specialty, the Araucarias, 8,000 in all sizes now ready; more coming.** See us growing. Remember this is our 25th anniversary in importing and shipping Araucarias. Ready for business. Can handle the largest order at short notice.

AZALEA INDICA.

Owing to the cold and wet weather this summer in Belgium and the large demand all over the world Azaleas this year are very scarce and high in price. But in spite of all that, I want all florists to know that I have just arrived from Europe with the finest cargo of **Azalea Indica** obtainable in Ghent. My grower over there always looks after my interests and has reserved for me the cream of his 200-acre azalea field—my own pick.

☞ When a cigarmaker smokes a cigar, what will he smoke? The worst? No, certainly. He smokes the best. The fragrant aroma of his production will tell his customers what a fine cigar he makes. So do I. What I force for myself is surely good enough for you, as I send my customers the same kind I force.

☞ Now is the Time to Force Azaleas for Christmas. What varieties will you take? Which ones will force well? Take my advice. There is the *Deutsche Perle* one of the best well known double whites; we have plants of these at 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00. Next, *Simon Mardner* double, bright pink 50c. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00. *Vervaneana* is so well known that there is no need to talk about it; big, variegated rosy flowers, 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00. *Apollo*, single, red varieties, much admired, 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00. Dozen and hundred at the same price. How about *Mme. Patrick*? This is one of the earliest pink varieties, very scarce this year in Belgium and high in price; a few of this variety you must have. Price: \$1.00. \$1.25. \$1.50 to \$2.00.

☞ For Easter Forcing we have only the well known standard American market varieties, such as *Mme. Van der Cruysen*, pink, very scarce this year in Belgium, 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Niobe*, double white, 50c. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Deutsche Perle*, 50c. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Helena Thielman*, light pink, \$1.00. \$1.25. \$1.50 to \$2.00; *President Oswald de Kerkove*, \$1.00 to \$1.50; *Schryveriana*, 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Empress of India*, double variegated, 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Professor Wolters*, 75c. \$1.00. \$1.25 to \$1.50; *Vervaneana*, 60c. 75c. \$1.00. \$1.25 to \$1.50; *Apollo*, 60c. 75c. \$1.00 to \$1.25; *Simon Mardner*, 50c. 60c. 75c. \$1.00 to \$1.50.

☞ Remember, small sizes of Azaleas are scarce this year in Belgium; therefore I had to buy mostly large sizes.

☞ Remember, it is the wide awake man that is not afraid to invest a dollar that makes the money.

Cash with order, please.

All plants must travel at purchaser's risk.

Begonia Gloire de Lorraine

This is another specialty of ours. We have a secret in growing them to perfect ion, only known to us giving them a rich deep pink color. They stand shipping well, traveling 2,000 to 3,000 miles without injuring or killing them in transit, if properly handled. We have a big housefull in 6 to 7 in. sizes, in bud and partly in bloom ready for immediate sale or for the holidays. Everybody knows that last Christmas we had the best *Begonia Gloire de Lorraine* on the market. They were crackjacks indeed! We have the deep pink and the light pink (*Lonsdale*) varieties, 6 in. pots, 50c, 75c to \$1.00; 7 in., \$1.25 to \$1.50; 3 in. (if transplanted soon will make good 4 in. for Christmas), 15c each \$15.00 per 100. If you have room you should order now, because they are always scarce at Christmas.

Begonia Erfordii, latest improvement; this variety is always in full bloom during winter. Christmas and Easter: 4 in. pots, in bloom and bud, 20c. *Begonia Rex*, 4 in., 20c.

Adiantum Hyb., 2½ in. pots, 5c; 3 in., 8c; 4 in., 12c; 5½ in., 25c.

PANSY PARK PERFECTION

Is the best market strain of Giant Show and Fancy Pansies—flowers of largest size and greatest variety of rich rare and odd colors and markings, the reds in many varieties.

I have made a specialty of growing Pansy seeds and plants nearly 40 years, and this strain is the result of many years of breeding and selection and includes all the new varieties introduced by Foreign Specialists during all these years.

From C. A. Lane, Daytona, Fla.: "Pansy plants received and were in fine condition and very nice plants—think every one will live."

From G. H. Taepke, Detroit Mich.: "Send me \$10.00 worth of your best Pansy seed. If as good in colors and size as they were last year, I will need double the amount next year."

A large stock of fine stocky, field-grown plants from seed sown thinly broadcast, causing extra good roots. Over 60 varieties mixed or separate: 1'00, \$3.00; 500, \$1.75; 5000 \$14.00; 10,000, \$27.00; 20,000 \$50.00; cash. Shipped any time you want up to Dec. 15.

STAKES.

Cane Stakes. Standard grade 6 to 8 feet, per 100, 85c; 500 for \$3; \$5.50 for 1,000.

Pipe stems, about 6 feet, per 100, 60c; per 1,000, \$5. Vaughan's Seed Store, Chicago.

This is the way the Eben Jordan range looked after being erected ten years, when at Plymouth, Mass. Two years ago we took it down and re-erected it at Wenham, Mass., and it is still good for a lifetime in its new home. Construction is our Sectional Iron Frame.

It is just another proof that the principle upon which it is constructed is right, and that the construction is right. It is framed in sections, each part bolted together. Easy to erect, quick to erect, and once erected has a life of generations.

The New Insecticide Law Requires Guarantees!

As a result, you will perceive just what value you are getting for your money when purchasing the various preparations offered you.

Just here, it may be of interest to you to know that, although this Law is not operative before January, the labels on "Nico-Fume" Tobacco Paper and Liquid have for a long time plainly set forth the specific information that the new Law requires.

So, in buying the "Nico-Fume" products now, you are just as fully informed as you will be next year under the new Law.

Do you realize how this protects you in the purchase of your supplies?

Do you also realize the "value-received" you obtain from "Nico-Fume" products as compared with that offered by competing preparations?

It Certainly PAYS To Keep INFORMED

If you are not fully informed upon this subject, won't you investigate? For full particulars write to the manufacturers;

THE KENTUCKY TOBACCO PRODUCT CO., Inc., **Louisville, Ky.**

Providence.

An oversupply of carnations, violets and roses is a condition which prevails every season from November 1 to about November 20, as chrysanthemums overshadow all other flowers and will for some time to come. Carnations are more plentiful and of better quality and prices only normal. Good stock roses of all the popular kinds are very plentiful and prices low, and fine specimens of orchids are seen in the stores, but the demand is limited. Gardenias are of good quality, enough to supply all demands. Violets are over abundant and selling for low prices, and enough lilies and lily of the valley to meet all calls. Plant trade and the filling of fern dishes have been good, but flowering plants are scarce and greens are very plentiful.

NOTES.

John A. Macrae is cutting large quantities of chrysanthemums and has taken the greatest number of prizes of any exhibitor at the show here in the past five seasons.

The greenhouses on Mill street, Newport, where Carl Jurgens commenced forcing of lily of the valley, are now being torn down.

William Appleton, E. J. Johnston and George A. Johnston are all convalescent after being confined to their homes for some time.

S. J. Reuter & Son, of Westerly, are cutting some very fine chrysanthemums which they send to the Boston market.

James J. King is building a new dwelling house and a greenhouse on the place he recently bought on Plainfield street.

William Fly and Howard Dickey, on South Main street, Woonsocket, are cutting immense quantities of chrysanthemums.

M. J. Leach & Sons and William Hoffman, of Pawtucket, are making grand window displays.

A. W. Vose & Son, Cumberland Hill, have just completed two greenhouses 35x100 and 24x68 feet.

Gibson Bros. have installed a new Lord & Burnham boiler in their greenhouse at Newport.

Samuel Kinder, of Bristol, has a new red carnation seedling and all speak very highly of it. G. A. J.

Montreal.

LIVELY BUSINESS.

Business is quite lively and has been so for the last two weeks. Chrysanthemums are at their full season and are seen everywhere and of very good quality, but local growers complain of poor bud formation, although the growth was vigorous enough. The singles are more numerous than last year, but there are still some people who persist in calling them "daisies." There will be a show in a small way at the club rooms of the Montreal Gardeners' and Florists' Club on Monday, November 7, and as this is chiefly intended for the members, it will bring out all the newest varieties grown in and around Montreal. Rose growing is apparently on the decline here, at least there has been no increase in the area of glass devoted to roses for years; but the quality grown in some of our plants compares favorably with the imported flowers. Carnations are not too plentiful, but are very good and find ready sale against the chrysanthemum. There are more violets on the market than can be profitably sold. The quality is fairly good, but there is a glut at present.

A severe windstorm November 5 caused considerable damage to several greenhouses. At A. C. Legare's some ventilators were torn off their hinges and about a thousand feet of glass broken. At Hall & Robinson's, Outremount, a large King construction house was blown a foot out of plumb, and a lot of glass broken. The wind was

L. J. WAITE, 293 Main St., Springfield, Mass.

Albany, N. Y.

Many friends of Alfred E. Whittle, of 1020 Madison avenue, are extending him sincere sympathy on the death of his wife, which occurred on Saturday, October 29. The funeral took place on November 1 from St. Andrew's Protestant Episcopal Church. Mrs. Whittle has been a sufferer from heart trouble for some time. The Albany Florists' Club sent a floral piece suitably inscribed.

At the November meeting of the Albany Florists' Club arrangements for the flower show, now under way in the armory, were discussed. Some minor changes were made in the premium list and a resolution passed to notify those interested. Seven new members were admitted: Clarence H. Gordonier, Troy; Edward W. Stearns, Hoffmans; Ernest Harris, Frank E. Berberick, Adell Van Wie, Morton R. Tank, and Edson C. Lovell of this city. The question box brought forth some discussion. Whether it was best to pull or to cut asparagus sprengeri was settled by experiences of the growers present, all of whom agreed that it is best to pull sprengeri and to cut asparagus plumosus. Why poinsettias droop in beds brought out a great deal of information on the habits of this holiday favorite. It seemed to be the consensus of view that poinsettias grown in pans or boxes are not so likely to droop as those grown in open benches, where the roots have a chance to ramify for long distances. When kept in the confined space the bark on the stem hardens more quickly and the whole plant seems to be more sturdy. Experiences confirming these views were related by several of the members. Following the meeting the members went to a nearby jewelry store to view the twelve cups offered as prizes at the flower show. These trophies were displayed in several prominent store windows, where they attracted much attention. R. D.

Los Angeles, Calif.

The past two weeks have been very dull with large numbers of chrysanthemums, carnations and other stock going to waste. The hot spell brought along outdoor chrysanthemums very rapidly and the market has been glutted. A better tone set in at the beginning of the month and the cooler nights have greatly improved the rose stock.

NOTES

Wright's Flower Shop had the decorations of the house and grounds of Mrs. E. L. Doheny, who entertained the American Bankers' Association. The house was decorated throughout with chrysanthemums and American Beauty roses, while the spacious and picturesque grounds were transformed by a most lavish display of all the different flowers in season. About 100 cattleyas, 1,500 chrysanthemums, and many thousands of roses were used, besides large quantities of outdoor carnations, centaureas, scabiosa, cosmos and others. Fifteen experienced decorators were kept busy for two days, and the whole formed a most brilliant climax to the round of entertainments given in honor of the bankers. In the store business has been exceptionally good and all hands have been kept hustling from Tom Wright and Manager Wern downwards. This house has more than a local reputation for good flowers, and is a spirited buyer, outside of the fine stock grown in its own greenhouses.

Wm. Haerle, of the El Reah Nurseries, has been on the sick list and has been missed from his usual rounds. Starting in with a severe cold, which threatened pneumonia, a rather bad case of varicocele developed. He was confined to the house for about a week, but is now able to get a round the greenhouses with the aid of a cane.

Changes are the order at the Hayward Floral Co., J. Reeve Darling having bought out his partner, Charlie Morton. Mr. Morton has joined forces with E. R. Meserve, a local violet grower of some repute, while Mr. Darling will continue the business in the Hayward building.

Dr. C. G. Dwight, who sold out his greenhouses at Janesville, Wis., to Ed. Amerpohl, now resides at Hollywood. Having to relinquish his practice for a time on account of overwork, he is trying the effects of the California air and is interested in a large automobile concern.

HEATING PLANTS

Standard Steam and Hot Water Heating Plants.

Wonderful Values. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. W. G. Gowans, superintendent of the conservatories at Eastlake park, has a fine show of orchids now. Two hundred blooms of Cattleya labiata, and a fine bench of Oncidium varicosum Rogersii are among the principal attractions.

A. F. Borden, the popular florist at Levy's cafe, was presented by Mrs. Borden with a Halloween present in the form of a fine baby girl. Mother and child are doing well.

H. R. R.

SANFORD, FLA.—L. H. Temple has built up a nice business and contemplates adding a few thousand feet of glass. At the present the propagating is done on sheltered beds and frames, and lath houses do well at all seasons. The coming season promises to be a good one for all agricultural pursuits.

Use Sunlight Sash side by side with ordinary Sash this Winter

See how much bigger and sturdier the plants under Sunlight Double Glass Sash will be. See how little care they require—how they save time and labor because you never have to cover them.

The double layer of glass does it. Between the two layers of glass is a 3/8 inch transparent blanket of dry, still air—a perfect non-conductor, keeping in the heat, keeping out the cold. Since the sash are never covered the plants get all the light from sun-up to sun-down.

Agents Wanted: A splendid opportunity. Write for details.

Send for these two books 1. Our Free Catalog—Contains the details of this new invention for hot-beds and cold-frames our freight prepaid and guaranteed delivery proposition.

2. Send 4c in stamps for a valuable booklet on hot-bed and cold-frame gardening by Prof. W. F. Massey. There is no higher authority in the country. This book will interest the most expert gardeners.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Cinerarias.

The cinerarias will now need their last shift, which with most growers is a 6-inch pot. While the culture of this plant is very easy they need as much attention as any plant that is grown. A good fibrous loam, not too fine, a little rough is preferable, with about one-fourth good rotten manure is just what they require and at the last potting made pretty firm. A good cool temperature in a good light house all the time, with all the ventilation possible during bright weather, gives the best results. They should be spaced out as rapidly as they grow, so that the broad leaves will have an opportunity to attain full size without obstruction. Sometimes, cinerarias die off, one by one, and in most cases this can be attributed to overwatering. They will not endure too wet a soil and if they once droop from this cause will never recover, but if they wilt from being too dry, a good watering will immediately bring them back, with perhaps the loss of a leaf or two. Few plants are more troubled with aphids than cinerarias, and a constant watch should be kept for them. Syringe the under sides of the leaves where the insects gather, on bright days, and regular fumigation should be maintained. A layer of tobacco under the plants constantly renewed is a great benefit.

Rambler Roses.

The rose bushes of the rambler varieties that are intended for spring forcing should now be lifted and potted if they have been grown in the open ground. They should then, as well as those that have been grown in pots, be planted in the ground, where they can be subjected to good freezing weather so that the wood can thoroughly ripen. Tie the growths to a stake and keep them upright and away from the ground. If they are left out until heavy freezing commences the pots should be covered with leaves or litter to prevent them from freezing hard enough to break. Those that are wanted for Easter blooming should be

placed in a cool house after the holidays where the night temperature will run quite low, and frequently syringed to soften up the eyes. The soft and weak growths should be cut out and before the eyes begin to break the canes should be tied in the forms in which the plants are to be grown. After the eyes have become well broken out and the leaves begin to form they should be moved into a warmer house but as Easter does not come until April next year, they will not have to be forced as hard as was the case this year. The Baby Ramblers that are intended for Christmas blooming should now be in a house of rose temperature, that is about 60° at night, in a light sunny location, with ventilation on bright days and frequent syringing to keep down red spider.

Poinsettias.

The pot plants of poinsettias should now be starting to make their bracts, and as they have nearly reached their full height, should be tied to their stakes to keep them erect. A small green-painted stake makes by far the neatest appearance. While poinsettias can be grown in a fairly cool house, that is, one that has a night temperature of 50°, yet the bracts will be much smaller than when grown warmer. A house that will hold a night temperature of 60° is the best and will insure fine large heads at the proper time, the holidays. But the main thing is to keep the temperature the same. If they are grown at 60° and the house drops to 55° or 52° for a couple of nights the foliage is sure to drop and unless the even temperature is maintained until the plants are mature they are very apt to have lost a majority of their handsome leaves. A watering with weak liquid manure once a week will increase the size of the head and brighten the color. In selling a poinsettia plant under no circumstances give the customer any idea that they are going to last any length of time, but let them fully understand that they are buying the

**Turn Your Surplus
Stocks Into Cash
By Advertising in the
Ready Reference
Department.**

plant for Christmas and they are getting a great show for their money. A week in the ordinary dwelling is about all this plant will stand and look respectable.

Fern Dishes.

The pretty little fern dishes have attained great popularity in the last few years, notwithstanding the many failures and complaints, and are one of the leading demands of the plantsman from early fall to late spring. Keep a few ready made-up pans and give them a good saleable location where they can be seen. In making them up have a little variety, not all alike, and at different prices to meet the different classes of trade. Make up some of one variety of fern, a pan of *Cyrtomium Falcatum*, so often called Holly fern, is invariably a good seller and gives general satisfaction, and small pans of *asparagus plumosus nanus* are always in demand. Keep a careful watch on the dishes as they come back to be refilled and see which are the better varieties for each individual customer; some varieties seem to be peculiarly adapted to certain locations, and while they do well with one customer, are the first to die with another. A good idea is to keep a memorandum book where the trade will warrant it, writing the dates when the dishes were delivered and when they are returned to be replenished; note the date and the varieties of the ferns which have seemed to succeed the best. Never mind the little complaints, but do all that can be done to keep the customer satisfied. The white china ware, now so much in vogue, is very attractive and with well filled dishes finds ready sale.

Palms.

There is a little let-up now in the work around a greenhouse and the palms should be given a thorough going over, cleaning them up and trimming where necessary, for the demands for rental will soon be on hand. The house in which the plants that are used for decorations are grown should be kept at a little cooler temperature than is the custom by the growers of this line of stock, and they will then withstand the being continually tied up and shipped out during the cold winter weather much better. Now is the time to procure the stock of these plants for the holiday and fall sales, for the growers now have a fine line from which to make a selection, and when the new stock arrives, do not mix it with the stock that is used for rental but make a dividing line and keep the salable plants by themselves or they are sure to get damaged more or less if rented for decorations and the holidays will find them in far from the perfect condition necessary to please the fastidious customer.

WOBURN, MASS.—A fire destroyed the greenhouses of J. Howard at the Lexington and Woburn line October 20. The cause of the fire was unknown.

BANGOR, ME.—A. J. Loder, of Pittsfield, has purchased three greenhouses of Carl Beers, who is closing out his business interest and will move and rebuild them in connection with his plant on Lancey Street.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Decoration of the Grave.

The decorating or lining of the grave is often of considerable importance and at times quite extensive orders are given which require skill and judgment in their execution. When any floral or green work is considered necessary, the least that can be done, and I dare say that more than half of the work is done in this manner, is to line the sides of the grave to the bottom and around the top with branches of hemlock. This is attached to the sides with stout pieces of wire, bent in the shape of hair pins. Com-

White Cattleya Gaskelliana.

Exhibited by J. A. Carbone at San Francisco Show.

mencing at the bottom one spray of green is laid over another until the top is reached. In this way the branches are all turned down and offer no obstruction to the casket as it is being lowered. It is always best to have the box in the bottom first before you begin, as then not so much green, or flowers, if same are used, are required, and if, as it sometimes happens, the box will just go down through the bare earthy walls, you have the work to do all over again.

Like florists and other people grave diggers are not always on time nor are undertakers and I have known cases where the funeral procession was taken a round-about way through the cemetery to enable the diggers to gain time enough to finish their work. The necessary box has also been known to be delivered or reach the ground just a shade before the body, and when the lining either has to be taken out or go to the bottom with the box there is a situation that requires quick and careful handling. In some cemeteries the lining of the grave is considered one of the perquisites. Wire frames are made in sections and covered with hemlock. These fit into the grave and are quickly attached to the

sides and ends. Loose sprays are laid around the top and the soil is covered with other boughs. After the ceremony and the friends have departed, these frames are taken out, the loose green is bundled up and used again and again, as long as it is presentable. Smilax is often used for this purpose where the work is more elaborate, and makes a very graceful lining. The strings are often studded with flowers of various kinds which have to be used rather short so that the blooms shall face to the top, not face toward the bottom, in which manner half their effect would be lost.

The soil, if exposed, should always be covered with green, and in many cases growing palms are used for this purpose. On other portions of the lot and sometimes to mark the avenue or walks leading to it, palms are found necessary. In quite a few cemeteries the soil from the grave is placed in a wooden enclosure or box at the side of the opening, which is then covered with white muslin or cheese cloth. This can also be decorated with green or used to place pieces from the house. Where flowers are used it is a help to have four thin boards mossed that will fit around the top of the grave; these are then filled with flowers and are quickly placed as a finish when the rest of the work is done. The proper arranging of the various pieces sent to the house and which are taken to the cemetery is, or should be, the work of the florist, although it is often done by the funeral director's men or the grave digger. These flowers are taken out the back way the moment the services are over and loaded with as much care as possible; they are then hurried to the cemetery and placed about the open grave to the best advantage. This is work for which a charge should be made, as they are much better handled by the florist and in his wagons than when crowded into funeral hacks. They are also found placed when the cortege arrives, which is much better than having them dumped down any place at the last moment.

K.

Table Suggestions for Holidays.

A tall vase, the center filled with Arum blooms and four bracts of Poinsettia—close to the glass stem place three large bunches of holly berries and up the stem of the vase twine a spray of a small-leaved ivy.

Another suggestion is made of scarlet bouvardias and holly berries finish vase with white flowers of the dwarf Roman hyacinth—scarlet begonia and holly and maiden hair. Bring down four long sprays of creeping fern to trail out on the tablecloth.

Again—scarlet geraniums and camellias are good. Use plenty of maiden hair fern. Opposite each guest place a specimen glass in which place a bouquet made of flowers that will harmonize with the center piece; lily of the valley are good. Floating in the water of the finger bowls put three leaves of the rose geranium, the center of each being pierced with a stem of a blossom of double scarlet geranium so as to allow one flower to rest on each leaf. This can be used effectively where a decoration is to be considered for display purposes.

THE LUCAS JEWELL CO.
HOTEL LAMAR
CHICAGO NOV 10 1910

WITH THE GROWERS

Wietor Bros., Chicago.

One of the large wholesale flower concerns that are extensive growers and owners of a large greenhouse plant is that of Wietor Bros. The greenhouses are situated on the northern side of the city at High Ridge in a beautiful location where the firm own a piece of property of 40 acres, and which were it not within the city lim-

another is soon to be added besides these. There are 20 hot water boilers to aid the heating. The arrangement of the houses is of the best. A broad walk extends through the center of the range from house to house, making it very convenient and economical of time and labor.

Stepping into the houses we first come to the American Beauty roses which are in excellent condition, long canes with splendid foliage reaching almost to the glass on both sides of the walk, with a splendid crop prom-

blooms and in extra large quantities for this season of the year. The White Perfections were in grand shape and extra large flowers of splendid substance were to be seen on these plants. Enchantress were fine and Mrs. Lawson, White Lawson and Winsor were in excellent condition. While the past summer has been very hard on the carnation plants in the field, yet these plants have obtained such a good hold on the soil in the houses that they have nearly caught up with their usual growth and are in an exceedingly promising condition for the winter. The varieties grown are:

Mrs. Thomas W. Lawson.....	25,000
Winsor	25,000
Enchantress	25,000
Victory	20,000
White Perfection	18,000
White Lawson	15,000

While the early and midseason chrysanthemum had been cut upon our visit yet the late ones were splendid samples of the stock which had been produced. The W. H. Chadwicks, Golden Chadwicks and Nagoyas were of splendid quality, one house containing these varieties being a beautiful sight with some beautiful stock for the Thanksgiving trade. There are grown in all 60,000 chrysanthemum plants and are marketed from 75,000 to 85,000 blooms. Besides the varieties mentioned others grown are Golden Glow, Monrovia, Early Snow, October Frost, Ivory, Timothy Eaton and other commercial va-

CHRYSANTHEMUMS AT WIETOR BROS., CHICAGO.

PARTIAL VIEW OF WIETOR BROS. GREENHOUSES, CHICAGO.

its might properly be called a farm but the farming or at least the cultivation is carried on under glass. Starting in 1893 the two brothers who comprise the firm—Henry and N. J. Wietor—have enlarged and added to the original plant until now their glass area aggregates 800,000 square feet, consisting of 25 houses 27x125 feet, 45 houses 27x260 feet and eight houses 33x300 feet. The houses are all in fine condition and producing a very high grade stock of roses, carnations and chrysanthemums which they make their specialties. The houses are built on the ridge and furrow plan with Garland gutters and Moninger construction and furnished throughout with Evans Challenge ventilating apparatus. The plant is divided into sections and the illustration which we publish shows but a part of their immense plant. Having been enlarged by gradual additions there are five different boiler houses in which are installed six Superior steam boilers and

used for the holiday season and the cut at present is of elegant quality and fine color. Next come the Killarneys, and it is a sight to see the splendid foliage that is breaking upon some of the houses of that beautiful healthy high color which betokens vigorous growth and great promise. The houses that are in crop are bearing an extra fine grade with long stems and luxuriant foliage and excellent color. Richmonds are in fine shape and good cut. The quantities of the several varieties of roses grown is as follows:

American Beauty	50,000
Killarney	25,000
White Killarney	20,000
Richmond	15,000
Mrs. Jardine	15,000
Bride	9,000
Uncle John	8,000
Kaiserin	5,000
Bridesmaid	2,500

To the east of the large range are the carnation houses and the plants are in splendid condition and producing fine

varieties. Houses of asparagus both sprengeri and plumosus were in good shape and yielding finely.

The large estate upon which these houses are built and which the firm owns enables them to solve a difficult problem for many large growers for they are able to procure the necessary sod for their houses on their own property. This is cut and stacked, mixed with the manure a year in advance and large heaps of compost are seen handy to the houses on every side for next year's renewal. The old soil as soon as removed from the houses is again spread where the sod is cut off and sown to grass seed and in four years on this strong land will grow a sufficiently heavy sod to be again cut for use.

The houses are in charge of Henry Wietor and with his foreman, James Psenicka, who courteously escorted us around the large plant, can feel justly proud of the fine condition in which

we found everything connected with the place. The crop is marketed at the store at 51 Wabash avenue, where the popular Nick Wiator, as he is known to the trade, with the assistance of his able manager, C. A. Alles, carefully look out for the customer's interest in the handling of the large amount of stock so splendidly grown at this establishment.

Godfrey Aschmann, Philadelphia, Pa.

It has been said that some people travel much and see but little but such is not the case with Godfrey Aschmann. His astute mind and buoyant spirits enable him to take a wide and comprehensive view. Having recently returned from an extended tour of Europe, he tells interestingly of what he saw there. He also kept a diary of his travels and its various entries show that his observant eye took in about all that was worth seeing. His trip, however, was not wholly one of pleasure, as a recent visit to his range disclosed. His place is now finely stocked with the leading specialties in the plant line that have made his name famous in the trade.

THE FALL EXHIBITIONS

The Chicago Show.

On Thursday, the fourth day of the Chicago Show, the chrysanthemum seedlings were the attraction and while no really startling new varieties were shown, fine novelties that look promising were shown by Elmer D. Smith & Co., of Adrian, Mich., E. G. Hill & Co., of Richmond, Ind., and H. W. Buckbee, of Rockford. There are so many very beautiful varieties now grown in all the different classes and colors that the production of a new variety of midseason time of blooming that is a marked advance in many of the different qualifications, is exceptional, and to produce a novelty that is an improvement in any one of the different characteristics is to be commended. In the white seedlings, E. G. Hill & Co. showed Debutante, a beautiful large Japanese incurved pure white with a beautiful lustre upon the petals and with fine foliage and stem

that won first prize. Elmer D. Smith & Co. exhibited Poughkeepsie, an immense cream white of the Timothy Eaton style, which will make a valuable addition to the exhibition class of blooms, but with too long a stem devoid of foliage to figure as a commercial flower. For dark yellow, E. D. Smith & Co. was first with Roman Gold, a large deep compact golden yellow Japanese, the crown buds made a perfect gold ball but the terminals looked as if unless well grown that they would show an eye in the centre. E. G. Hill Co. showed Golden Gem, which looks as if it might prove true to its name as a commercial variety, but lacks size for an exhibition bloom. In class 147 for light pink, E. D. Smith & Co. won first with a fine large Japanese incurved No. 512-7-08. These were beautiful blooms of day-break pink shade of large size with fine petalage and foliage. This firm also showed No. 340-2-08, a large light pink shading to white on the lower petals and to deeper pink in the center, making a very handsome flower. H. W. Buckbee showed three varieties in the dark pink class, all of which shaded toward the magenta marked F. C. & B., the former carrying off the honors. This was a finely built flower, very full and will make a good exhibition bloom. C. was also a well built dark pink flower. In the class for any other color, H. W. Buckbee showed two marked E. and G., the former a Japanese reflexed variety of reddish bronze and the latter a beautiful buff or chamois color with straight ray petals of good depth, making a very showy flower. This variety was awarded the sweepstake prize, a silver cup for the best seedling chrysanthemum at the show.

In the seedling carnations the exhibit though not large had some very fine promising varieties which were noted, the Mount Greenwood Cemetery association had two No. 2807A, a very large dark crimson, winner of the sweepstake prize, and Greenwood, a

HOUSE OF KILLARNEY ROSES AT WIATOR BROS., CHICAGO.

He speaks of the scarcity of good azaleas on the other side this season, but he managed to secure a very attractive stock.

Though Mr. Aschmann is widely known as an importer, it must not be overlooked that he is also a good grower. One of the very notable features of his range at present is a large lot of Begonia Gloire de Lorraine, all in splendid condition. His houses of araucarias are alone well worth the time spent in making a visit to his range. His great stock and variety of ferns are certainly of the quality that the people want, for during a brief stay with him we were much impressed with the rapidity of packing and shipping. Express wagons were coming and going and the whole force was working like beavers. The great stock of palms, rubber plants, dracenas, primroses and small ferns for dishes are also very striking features. In conclusion it may be stated that it is always pleasing to visit Mr. Aschmann and his entertaining and instructive conversation makes time fly rapidly and pleasantly.

WHITE PERFECTION CARNATIONS AT WIATOR BROS., CHICAGO.

light pink, and E. G. Hill Co.'s scarlet, Mrs. Beckwith, looked promising. The two new roses, Rose Queen and Sunburst, exhibited by the latter concern, were the centre of an admiring group throughout the show. The six vases of lily of the valley, exhibited by Poehlmann Bros. Co., were superb.

In one corner of the hall was a display made by the University of Illinois, illustrating the work that is being done in landscape gardening, and in front of these illustrations was the educational exhibit prepared for the

The table decorations, which for many years have been a great feature of the Chicago shows, were not arranged by the retailers to the extent that they have been in former years, and this lack of interest was very much noticed and commented upon by the spectators who have annually visited the exhibitions. There were but three florists who arranged tables, Schiller the Florist, The A. T. Hey Floral Co., of Maywood, and The Geo. Wittbold Co. One very beautiful table by the latter concern was arranged

valley, a very handsome vase of roses in the centre, with six smaller vases of roses and lily of the valley. The corsage of the latter flower and the boutonnieres of a single Richmond rose. The A. T. Hey Floral Co. arranged their table with lily of the valley and adiantum ferns, which was very simple and neat. Both the Schiller and Wittbold booths in which the tables were arranged were further decorated with fine palms and decorative plants and large vases of chrysanthemums.

The manager, George Asmus, and the

POEHLMANN BROS. CO.'S FIRST PRIZE LILY-OF THE VALLEY AT THE CHICAGO SHOW.

Horticultural Society of Chicago by H. J. Stockmans, which consisted of two models of gardens, each with its own cottage with walks and lawns planted to shrubbery, one arranged with tennis court in the rear and the other with a vegetable garden.

with orchids and adiantum, a vase of phalaenopsis in the centre, around which were four smaller vases of cattleyas. The corsages were of gardenias and phalaenopsis and the boutonnieres of gardenias. The Schiller table was of Richmond roses and lily of the

secretary, J. H. Burdett, have had their hands full all the week, but have maintained a bright, cheerful smile throughout all their hustling hard work and have been ably assisted by the following executive committee: J. C. Vaughan, Charles A. Samuelson,

POEHLMANN BROS. CO.'S FIRST PRIZE VASE OF MY MARYLAND ROSES, AT THE CHICAGO SHOW

BASSETT & WASHBURN'S FIRST PRIZE VASE OF 100 AMERICAN BEAUTY ROSES AT THE CHICAGO SHOW.

C. Cropp, J. B. Deamud, R. J. Haight, E. A. Kanst, August Poehlmann, W. N. Rudd and the officers of the society.

The lectures which were delivered during the week were very well attended and enjoyed and the spectators were ably entertained and instructed by the several lecturers who thoroughly handled their subjects, and the stereopticon views with which they were illustrated were a pleasing addition to the show. The following is the programme of the lectures and the subjects which were delivered: Prof. H. B. Dorner, professor of Floriculture, University of Illinois, "What Illinois is doing for the Florists," Tuesday evening; Jens Jensen, on "Native Trees and Shrubs for the Home Gardens," Wednesday evening; John J. Davis, "Insect Pests," Thursday afternoon; Howard Evarts Weed, "The Ornamentation of the City Lot," Thursday evening; Mrs. A. R. McCrea, "Landscape Gardening," Friday afternoon; Prof. J. C. Blair, chief of Department of Horticulture, University of Illinois, "Ornamental Gardening," Friday evening; J. H. Prost, "Tree Planting," Saturday afternoon; Dr. Frank Johnson, "Pruning Trees and Shrubs," Saturday evening.

The banquet held Tuesday evening by the Florists' Club, complimentary to the many visitors to the Flower Show, was a very enjoyable affair. Nearly two hundred sat down to the tables in the Red Room at Hotel La Salle and

after enjoying a bountiful repast were entertained by songs and speeches.

The awards of the last days are given herewith.

Carnations.

Best 50 blooms White Lawson—Poehlmann Bros. Co., first.

Best 50 blooms White Enchantress—Northwestern Floral Co., first; C. C. Pollworth Co., second.

Best 50 blooms White Perfection—Northwestern Floral Co., first; Poehlmann Bros. Co., second.

Best 50 blooms any other white—Mount Greenwood Cemetery Association, first.

Best 50 blooms Victory—Northwestern Floral Co., first; C. C. Pollworth Co., second.

Best 50 blooms O. P. Bassett—Bassett & Washburn, first; J. A. Budlong, second.

Best 50 blooms Beacon—C. C. Pollworth Co., first; Desplaines Floral Co., second.

Best 50 blooms Winsor—Bassett & Washburn, first; Chicago Carnation Co., second.

Best 50 blooms Enchantress—Wellsworth Farm Greenhouses, first; Northwestern Floral Co., second.

Best 50 blooms Mrs. Thos. W. Lawson—Poehlmann Bros. Co., first; J. A. Budlong, second.

Best 50 blooms Afterglow—Mount Greenwood Cemetery Association, first; Chicago Carnation Co., second.

Best 50 blooms any other pink, Flesh Pink Class—Chicago Carnation Co., first; Desplaines Floral Co., second.

Best 50 blooms any other pink, Light Pink Class—Poehlmann Bros. Co., first; Chicago Carnation Co., second.

Best 50 blooms any other pink, Dark Pink Class—Poehlmann Bros. Co., first; Chicago Carnation Co., second.

Best 50 blooms, Introduction of 1910, Flesh Pink Class—Poehlmann Bros. Co., first; Poehlmann Bros. Co., second.

Best 50 blooms, Introduction of 1910, Light Pink Class—Chicago Carnation Co., first; Desplaines Floral Co., second.

Best 50 blooms Introduction of 1910, Dark Pink Class—Poehlmann Bros. Co., first.

Best 50 blooms red, Introduction of 1910—Chicago Carnation Co., first; Poehlmann Bros. Co., second.

Best 50 blooms any other color, Introduction of 1910—Chicago Carnation Co., first.

Best 100 blooms, white—Northwestern Floral Co., first; Poehlmann Bros. Co., second; C. C. Pollworth Co., third.

Best 100 blooms, pink, Flesh Pink Class—Northwestern Floral Co., first; Chicago Carnation Co., second; J. A. Budlong, third.

Best 100 blooms, pink, Light Pink Class—Chicago Carnation Co., first; Poehlmann Bros. Co., second; J. A. Budlong, third.

Best 100 blooms, pink, Dark Pink Class—Chicago Carnation Co., first; J. A. Budlong, second; Poehlmann Bros. Co., third.

Best 100 blooms, red—Bassett & Washburn, first; Northwestern Floral Co., second; Wellsworth Farm Greenhouse, third.

Best white seedling 20 blooms—Chas. Knopf Floral Co., bronze medal.

Best red 20 blooms—E. G. Hill & Co., bronze medal.

Best flesh pink 20 blooms—Mount Greenwood Cemetery Association, bronze medal.

Best 20 blooms any other color—Mount Greenwood Cemetery Association, bronze medal.

Sweepstakes. Best seedling carnation, excluding varieties as have been exhibited previous to this season, silver cup—Mount Greenwood Cemetery Association.

Best display not less than 800 blooms single violets—Gustav Swenson, first.

Best display of 500 blooms lily of the valley—Poehlmann Bros. Co., first.

Best display Lilium Harrisii, not less than 100 bloom—Poehlmann Bros. Co., first.

Private Gardeners' Exhibit.

Best 10 geraniums in not over 10-inch pots—Robt. Mueller, first; John Cook, second.

Best palm—E. G. Uihlein, first; John Cook, second.

Best crotch—John Cook, first; Robt. Mueller, second.

Best dracaena—E. G. Uihlein, first; John Cook, second.

Best pandanus—John Cook, first; E. G. Uihlein, second; Robt. Mueller, third.

Best decorative plant other than above—E. G. Uihlein, first; Peter Schilt, second.

Best Boston fern or its sport—Peter Schilt, first; John Cook, second.

Best flowering plant, orchids and chrysanthemums excluded—Robt. Mueller, first; John Sahl, second.

GENERAL VIEW OF MINNEAPOLIS FLOWER SHOW.

Best five foliage plants, five varieties, not over 12-inch pots—John Cook, first; Robt. Mueller, second.

Best grafted specimen plant, except chrysanthemums—E. G. Uihlein, first.

Best novel or rare plant—Julius Rosenwald, first; John Cook, second.

Best specimen chrysanthemum plant—Robt. Mueller, first; Mrs. H. B. Crowell, second.

Best standard chrysanthemum—Robt. Mueller, first.

Best half-standard chrysanthemum—Robt. Mueller, first.

Best 12 blooms, yellow chrysanthemum—Peter Schilt, first; E. M. Barton, second.

Best 12 blooms, pink—E. M. Barton, first.

Best 12 blooms, any other color—E. M. Barton, first; E. M. Barton, second.

New Chrysanthemums.

Six blooms, white, one variety—E. G. Hill Co., bronze medal.

Six blooms, yellow, one variety, darker than Major Bonaffon—Elmer D. Smith & Co., bronze medal.

Six blooms, pink, one variety, lighter than Vivland Morel—Elmer D. Smith & Co., bronze medal.

Six blooms, pink, one variety, not lighter than Vivland Morel—H. W. Buckbee, bronze medal.

Six blooms, any other color, one variety—H. W. Buckbee, bronze medal.

Sweepstakes. Best seedling chrysanthemums entered in above classes, excluding such varieties as have been exhibited previous to this season, a silver cup—H. W. Buckbee.

St. Louis Horticultural Society.

The feature of the second day of the exhibition was the grand display of carnations and baskets of carnations and cut blooms of chrysanthemums. The third was the banner day of the show, the principal feature being the grand display of roses made by Poehlmann Bros. of Chicago. Richard Sahn is deserving of all the praise that can be given him for the admirable staging of the beautiful roses. The exhibits of violets, bridal bouquets were also displayed on this day. On Friday, the fourth day the features were the baskets of roses and the floral arrangements. The following awards were made on the last three days:

Best display of carnations one or more varieties attractively displayed either cut blooms, plants or both, accessories not permissible—The E. G. Hill Co., first.

Thirty American Beauty roses—Koenig Floral Co., first.

Basket of carnations—Metropolitan Floral Co., first; C. Young & Sons Co., second.

100 roses arranged for effect, any variety—Koenig Floral Co., first.

Twenty-five blooms white chrysanthemums, one variety—The E. G. Hill Co., first; Hy. Johann & Son, second; W. J. & M. S. Vesey, third.

Twenty-five blooms, yellow, one variety—The E. G. Hill Co., first; W. J. & M. S. Vesey, second; F. H. Meinhardt, third.

Twenty-five blooms of any other color—Koenig Floral Co., first; The E. G. Hill Co., second; F. H. Meinhardt, third.

Fifty blooms not less than 20 varieties, short stem (moss back)—Elmer D. Smith & Co., first; The E. G. Hill Co., second.

Mrs. I. W. Morton prize, 50 blooms, white carnations—E. G. Hill Co., first; J. E. Meinhardt, second; Oakland Floral Co., third.

Schroeter Bros. Hardware Co. prize, 50 blooms, light pink carnations—E. G. Hill Co., first; Oakland Floral Co., second; J. E. Meinhardt, third.

Chas. Gerber prize, 50 blooms, dark pink carnations—Oakland Floral Co., first; J. E. Meinhardt, second.

Mrs. Wm. E. Guy prize, 50 blooms, red carnations—J. E. Meinhardt, first; E. G. Hill Co., second.

St. Louis Seed Co. prize, display of 1,000 violets, accessories admissible—C. Young & Sons Co., first; Metropolitan Floral Co., second.

Dr. Enno Sander prize, bridal bouquet, accessories admissible—C. Young & Sons Co., first; Metropolitan Floral Co., second.

One hundred blooms chrysanthemums, any color—E. G. Hill Co., first.

Best display of cut roses, one or more varieties attractively displayed, accessories not permissible—Poehlmann Bros. Co., \$500 prize.

Fifty chrysanthemums arranged for effect, any variety—Metropolitan Floral Co., first; Hy. Emmonds, second.

Certificates of merit were awarded to E. G. Hill Co. for new roses Rose Queen and Sunburst.

Mrs. E. Medart prize, 50 Richmond roses—Poehlmann Bros. Co., first.

Edward Mallinckrodt prize, 50 Killarneys—Poehlmann Bros. Co., first.

Mrs. Edward Mallinckrodt prize, 50 White Killarneys—Poehlmann Bros. Co., first.

Fifty any other variety roses—Poehlmann Bros. Co., first.

Basket of roses—Metropolitan Floral Co., first; C. Young & Sons Co., second.

Floral basket—Metropolitan Floral Co., first; C. Young & Sons Co., second.

Mrs. R. Mc. K. Jones prize, display of pompons, anemones and single varieties chrysanthemums—E. G. Hill Co., first; Koenig Floral Co., second.

Floral display, not less than four pieces—C. Young & Sons Co., first.

Visitors:—Will Schmaus, Paducah, Ky.; J. E. Meinhardt, Webb City, Mo.; Mrs. R. S. Estill, Moberly, Mo.; P. Ellings, Adrian, Mich.; Jos. Hill, Richmond, Ind.; M. F. Widmer, Highland, Ill.; J. F. Ammann, Edwardsville, Ill.; H. Johann, Collinsville, Ill.; H. Emmonds, Bellevue, Mo.; G. W. Grossart, Bellevue, Ill.; A. G. Fehr, Bellevue, Ill.; Richard Sahn, Chicago; I. O. Milwaukee Flower Show.

The annual flower show held by the Milwaukee Florists' Club on Nov. 9-15 at the Auditorium was beautiful and a financial success. The hall was laid out in the order of a forest scene decorated with southern smilax, magnolias and evergreen trees. The executive committee worked day and night to complete everything and much praise is due them for their work and ability. The stage was banked with foliage and on each side were evergreen trees, and in the center a rustic bridge with a rivulet under the same. On the west end was a water-fall about twenty feet high leading to the rivulet and winding its course through the hall.

A feature which attracted much attention was an exhibit of plants, Celosia, Pride of Castle Gould, being the most attractive, by Julius Roehrs Co., of Rutherford, N. J.

The executive committee in charge of the show were H. V. Hunkel, C. C. Pollworth, Nic. Zweifel, J. G. Heitman, W. C. Zimmermann, A. Leidiger, Gus Kellner and O. Dallwig. Much credit is due

GENERAL VIEW OF BUFFALO FLOWER SHOW.

Aug. F. Kellner for his decorative ability and in arranging such a beautiful and artistic display. The judges were J. E. Matthewson, Sheboygan; Edw. Amerpohl, Janesville, and Otto A. Spedel, Oconomowoc.

Following are the awards in addition to those previously published:

Best display double violets, 500 blooms.—Loeffler & Benke, first; Albert Loeffler, second.

Best display of lily of the valley.—Poehlmann Bros. Co., first; Holton & Hunkel Co., second.

Best display of 50 lilies.—C. C. Pollworth Co., first; Heitman & Baerman, second.

Best display of snapdragon.—Mueller & Schroeder Co., first; Gus Pohl, second.

Best six cibotium Schiedei.—Aug. Kellner, first; C. C. Pollworth Co., second.

Best collection of ferns, 15 varieties.—A. Kellner, first; C. C. Pollworth Co., second; Currie Bros., third.

Best group of Boston ferns.—C. C. Pollworth Co., first; Holton & Hunkel Co., second.

Best group sports of Boston fern.—Holton & Hunkel Co., first; C. C. Pollworth Co., second; Currie Bros. Co., third.

Best group of palms.—Edlefsen-Leidiger Co., first; Holton & Hunkel Co., second; A. Kellner, third.

Best group of decorative plants, arranged for effect.—Currie Bros. Co., first; Edlefsen-Leidiger Co., second; A. Kellner Co., third.

Best specimen kentia.—Edlefsen-Leidiger Co., first.

Best specimen latania.—Theo. Boettcher, first.

Best group of araucaria.—Holton & Hunkel Co., first; Edlefsen-Leidiger Co., second.

Best 10 plants, begonia Gloire de Lorraine, or sports.—C. C. Pollworth Co., first; Jacob Freytag, second.

Best 10 plants, Primula Obconica.—Otto Eggebrecht, first; Thos. Griebler, second.

Best display of geraniums.—Otto Eggebrecht, first; Heitman & Baerman, second; Thos. Griebler, third.

Best five cannas, 1 variety.—Aug. Kellner Co., first.

Best hanging basket flowering plants.—C. C. Pollworth Co., first; Aug. Kellner Co., second.

Best hanging basket without flowering plants.—C. C. Pollworth Co., first; Aug. Kellner Co., second.

Best 10 cyclamen.—Fox Point Floral Co., first; C. F. Kitzrow, second; J. C. Rost, third.

Best 100 blooms, white carnations.—C. C. Pollworth Co., first; Poehlmann Bros., second; N. Zweifel, third.

Best 100 blooms, light pink.—Muehler & Schroeder, first; A. Isroth, second; Manke Bros., third.

Best 100 blooms, pink, Winsor shade.—N. Zweifel, first.

Best 100 blooms, dark pink.—N. Zweifel, first.

Best 100 blooms, red.—C. C. Pollworth, first.

Best 100 blooms, sweepstake.—C. C. Pollworth Co., silver cup.

Best 50 blooms, White Perfection.—C. C. Pollworth Co., first; N. Zweifel, second; Mueller & Schroeder, third.

Best 50 blooms, White Enchantress.—C. C. Pollworth Co., first; Chicago Carnation Co., second; Manke Bros., third.

Best 50 blooms, any other white.—C. C. Pollworth, first; N. Zweifel, second.

Best 50 blooms, Victory.—C. C. Pollworth, first; Chicago Carnation Co., second; N. Zweifel, third.

Best 50 blooms, Beacon.—Manke Bros., first; Nic Zweifel, second; C. C. Pollworth, third.

Best 50 blooms, O. P. Bassett.—Mueller & Schroeder, first; C. C. Pollworth, second.

Best 50 blooms, Enchantress.—Mueller & Schroeder, first; Manke Bros., second; Nic Zweifel, third.

Best 50 blooms, Winsor.—Nic Zweifel, first; C. C. Pollworth, second.

Best 50 blooms, Mrs. T. W. Lawson.—Manke Bros., first; W. Hellwig, second.

Best 50 blooms, any other pink.—C. C. Pollworth, first; Nic Zweifel, second; Mueller & Schroeder, third.

Best 50 blooms, yellow or variegated on yellow ground.—C. C. Pollworth, second.

Best 50 blooms, white, introduction 1910.—C. C. Pollworth, first.

Best 50 blooms, pink, Winsor shade, introduction 1910.—Nic Zweifel, first; C. C. Pollworth, second.

Koerner, trees, shrubbery, perennials, gladioli and dahlias; Wm. Eschrich, trees and shrubbery.

G. R.

Dobb's Ferry Horticultural Society.

The Dobbs Ferry Horticultural Society held their eleventh annual flower show on November 4-5, at the Town Hall. It was one of the best in the existence of the association and great credit is due the exhibitors, as this section has had no rain in five months and all of the exhibits were first class in every respect, there being about 120 exhibits staged. The following are the winners of prizes:

H. Kastberg, 5 firsts, 7 seconds; H. Kelling, 5 firsts, 3 seconds; C. Wilson, 2 firsts, 1 second; J. Canning, 3 firsts, 1 second; M. Hayes, 1 first, 4 seconds; J. Bradley, 5 firsts, 2 seconds; J. Goff, 4 firsts; F. A. Lea, 5 seconds; Wm. Hutching, 1 first, 1 second; C. Kurkevich, 1 first, 1 second; D. Macrea, 2 firsts, 5 seconds; H. Holgerson, 2 firsts; F. Flanagan, 2 firsts, 4 seconds; H. Jordan, 3 firsts, 1 second; E. Kain, 3 seconds; J. Schreiber, 5 firsts, 1 second; J. Thomas, 1 second; Mrs. Wm. Pallen, 1 first; R. Borham, certificate of merit.

DR W. VAN FLEET lately located at the Department of Agriculture Experiment Station at Chico, Cal., has been transferred to similar work in Washington, D. C.

WE go to press on Tuesday next week, one day earlier than usual, on account of Thanksgiving. Advertisers and correspondents will oblige by mailing their copy accordingly.

THE general press has given much space to the flower shows throughout the country this season. It is the duty of the trade to help the newspaper writers with reliable information at all times.

College Floral Designs.

During the short course in floriculture at the Massachusetts Agricultural College, Amherst, a designer from Thos. F. Galvin, Inc., Boston, will give a lecture-demonstration on design making. This will be followed by a series of afternoon exercises in making up.

THE GOOD & REESE Co., Springfield, O., are offering half a million hardy phlox, another indication of the great popularity of these plants.

Chrysanthemum Society of America.

WORK OF EXAMINING COMMITTEES.

Chicago, November 12.—Elmer D. Smith & Co., Adrian, Mich., exhibited Poughkeepsie white incurved, scored 85 points exhibition scale; Roman Gold, yellow incurved, scored 87 points, commercial scale; No. 340-2 light pink incurved, scored 86 points, commercial scale; No. 130-22, pink incurved, scored 89 points, commercial scale; No. 512-7, pink incurved, scored 87 points, commercial scale.

Cincinnati, O., November 5.—Roman Gold, yellow incurved, scored 87 points, exhibition scale; 88 points, commercial scale, exhibited by Elmer D. Smith & Co., Adrian, Mich. Hoosier Maid, white Japanese incurved, scored 82 points, commercial scale, exhibited by H. W. Rieman, Indianapolis, Ind. November 12—Gerald Haschke, crimson overlaid, dark maroon, reflexed Japanese, scored 80 points, commercial scale, exhibited by Mrs. B. Haschke, Dayton, O.

New York, November 9.—Driftwood, light yellow Japanese, scored 85 points, exhibition scale, exhibited by Thomas Atchinson, Mamaroneck, N. Y.

Experiment Stations and Horticulture.

Commenting upon the paper by W. N. Rudd on the "Value of the Experiment Stations to Ornamental Horticulture" which was read before the Society of American Florists at Rochester, N. Y., August, 1910, and printed in THE AMERICAN FLORIST issue of October 15, page 569, the following have been received:

I have read with interest the paper by W. N. Rudd which was published in THE AMERICAN FLORIST in the issue of October 15. This should receive the earnest consideration of all florists. As we wrote you some time ago at your request, we have already taken up investigations with carnations and roses; this is now our third season and we have a considerable amount of material but have decided not to publish anything until we can add another season's results to those already secured. We have secured excellent results with chemical fertilizers entirely. One experiment with the variety My Maryland, is being conducted for the second year with the same soil and the same plants. Several of our prominent florists have visited us recently. Our investigations with carnations have been largely studies of the physical character of the soil. During the past year we have fumigated a number of commercial houses with cyanide of potassium and have started a co-operative fertilizer experiment with one of our prominent florists.

The greenhouse space which is available for investigations here is quite limited. We can carry out work which we think will be of considerable value, but results could be secured in a much shorter space of time if we had the proper greenhouse equipment and the funds to carry on the work. We have not attempted to secure an appropriation for greenhouses especially planned for experimental work. We have felt that it would be better to first accomplish something of value in order

to assist in securing such appropriations at some future time.

W. A. BLAKE.

New Brunswick, N. J.

I have carefully read the paper by W. N. Rudd, which was published in THE AMERICAN FLORIST in the issue of October 15, and consider it one which should interest every experiment station in the country. There is no doubt whatever about experimental work in floriculture having been neglected at most of our stations. There is also no doubt about the universal desire to take up research work in floriculture. Then, what is the trouble? Lack of funds in nearly all cases. It takes money to build greenhouses, to employ experts and to conduct experiments. The men who are most directly interested must get busy and see that funds are forthcoming for this work. Pennsylvania is justly scored in the article by Mr. Rudd. Our state college is eager to do everything the florists want done. We have planned for extensive greenhouses and part of the range has been constructed, two greenhouses each 30x100 feet in size and a head-house or greenhouse laboratory 25x72 feet in size. This equipment, which is merely a start of the more extensive range, is devoted exclusively to student work. There are thirty-two students in vegetable forcing who are engaged in the growing of tomatoes, radishes and lettuce. With the beginning of the next year the experimental work in floriculture will run throughout the college year. The course will consist of lectures and laboratory work which will require the attention of the student at the greenhouse every day. In this kind of organized class work we hope to give most thorough technical and practical work in floriculture.

With the extension of this range of houses it is planned to take up experimental work in floriculture on a broad and comprehensive scale. Plans for the next legislative campaign have not been completed but it is highly probable that the bill will ask for aid for this purpose. The management of the college well realizes that the floricultural interests in Pennsylvania are very great and we have reason to believe that their interests will be looked after at State College.

B. L. WATTS.

State College, Pa.

The Boskoop Exhibition.

The exhibition of famed shrubs and perennials, which will be held in April, 1911, has met with very good support, and will in its extent and importance fairly surpass all the committee's expectations. His Royal Highness, Prince Henry, has consented to become a patron of the exhibition and the Royal family have promised several medals. The hundreds of exhibits will require much more space than we expected at first, so that the space occupied by the exhibition will be at least 3,400 square meters. There will be exhibits in almost every class. The number of novelties amounts already to 77. One can therefore easily understand that Boskoop is working with enthusiasm and that everything possible will be done to make the exhibition one of the most successful that has ever taken place in Holland.

C. PH. MOERLAND, Sec'y.

Meetings Next Week.

Detroit, Mich., November 21, 8 p. m.—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue.

SUPERB STOCK.

The many flower exhibitions in the cities within easy access of this city and the large show held here have caused a heavy drain on the high grade stock, especially in chrysanthemums, roses and carnations, and besides taking up considerable time of the prominent growers who not only have exhibited and attended the various shows in person, but have shipped large quantities of high grade flowers that have eventually found their way to the exhibition tables and won prizes. A glance over the different prize winners at the several shows will at once demonstrate what an important factor the superb flowers grown in Chicago are to the surrounding country. The withdrawal of such a large amount of stock from the market while it did not create a shortage, yet it required some little hustling on the part of the dealers to fill all the orders received. Chrysanthemums have now passed the mid-season stage and the later varieties are now the dependency of the market. W. H. Chadwick, Golden Chadwick, Mdle. Jeannie Nonin and other late varieties will be the mainstays for the Thanksgiving trade. Roses are in elegant condition and the stock received at the stores is of high quality, but many of the growers are in short cut in popular varieties and the prices are tending upward. American Beauties are of high grade and elegant long stems, but not many of the shorter lengths. Carnations are now of excellent grade, and it looks at the present writing as if there would be none too many to go around at Thanksgiving time, and a good advance in price is one of the probabilities. Sweet peas are now coming in of excellent quality and with long stems and are having good sale. Orchids are rather short of the demand and the prices higher. Lily of the valley is none too plentiful

and has to be secured early. Violets are now feeling the cooler weather, and are of good quality with steady call. Lilies are just about meeting the demand. Greens of all kinds are still plentiful and of fine quality.

NOTES.

Peter Reinberg is now cutting an excellent grade of carnations with Enchantress and White Enchantress, showing up remarkably well. Blooms of the different red varieties were also very fine and were moving readily at good prices. In roses we noticed some extra fine Mrs. Marshall Field and Sunrise, the latter being used extensively by the leading florists for table decorations and their best floral work.

The display of chrysanthemums at Garfield Park was thoroughly enjoyed by the thousands of visitors who took advantage of the kind invitation to view the grand show at the greenhouses on Sunday last and during the week. Head gardener, John Sell, was on hand to escort the visitors and kindly point out the particular blooms and varieties and other interesting features of the houses.

Wietor Bros. are cutting an exceptionally good grade of White and Pink Killarney, Mrs. Jardine and American Beauty roses. Chrysanthemums and carnations are among the daily arrivals and a recent visit to the greenhouses found the stock in splendid condition and the cut is now so large that there will be no question as their ability to handle a large Thanksgiving trade.

At the regular meeting of the Florists' Club, November 3, Vice-President Philpott was presented with a beautiful pair of diamond cuff buttons in recognition of his many valued services. The new members admitted were F. W. Martin, 600 East Fortieth street, John Then, 5038 Lincoln avenue, Thos. Laing, La Grange, Ill., and Fred Dietsch, 2640 Sheffield avenue.

The greenhouses at Lincoln Park have been crowded with the residents of Chicago enjoying the beautiful display of chrysanthemums on exhibition as this popular resort of the citizens of the city. In a few weeks a beautiful display of orchids is promised at these greenhouses.

The Auburndale Goldfish Co., 920 West Randolph street, recently shipped 225 gold fish to the Gate City Conservatories at Canon City, Colo., and have since received a very complimentary letter stating that when they arrived only one had perished on the long journey.

Clara Frances Martin, only daughter of Mrs. Margaret Thorpe Flint, and granddaughter of the late John Thorpe, was married November 14 to G. Wilford Embleton of Woodstock, N. B., Can. Mr. and Mrs. Embleton will reside at 3613 Wabash avenue, this city.

Although there is a shortage of orchids reported all over the country Charles W. McKellar is receiving a good supply of excellent quality. A shipment which arrived this week contained some handsome specimens of Cattleya Percivaliana and C. Trianae.

The American Beauty roses that Vaughan & Sperry are receiving from William Dittman of New Castle, Ind., are of A1 quality and find ready sale. An extra fine line of Cattleya labiata orchids are among the daily arrivals and are bringing good prices.

Some excellent blooms of Col. D. Appleton and Golden Wedding chrysanthemums were noticed at Kyle & Foerster's this week. The Lakeview Rose Gardens of Jamestown, N. Y., are shipping a large quantity of these flowers to this concern.

John Welsh, Jr., will in the near future open a store at the corner of Evanston avenue and Montrose boulevard. Mr. Welsh is a son of John Welsh, the well known florist of Ravenswood.

"The Busiest House in Chicago."

"The Proof of the Pudding is in the Eating."

In competition with the largest growers of carnations of the middle west, one of our growers took

FIVE FIRST PRIZES and TWO SECOND PRIZES

with seven entries.

Another of our growers had six entries and was awarded **Four Prizes.**

If you "**Buy of the Grower**" through us you not only get prize stock, but get it at a price that other houses charge for inferior stock.

We want you to keep in touch with the Chicago Market and are issuing a weekly trade letter to that purpose. If you are not receiving it send us your name and address and we will see that you do.

WE MAKE NO CHARGE FOR PACKING.

J. B. DEAMUD CO.,

51 Wabash Ave., L. D. Phone Central 3155 CHICAGO.

The Chicago Carnation Co. was very successful in its entries at the several exhibitions with the superb carnations that are being grown at Joliet. This concern was awarded 28 prizes at the Milwaukee, Minneapolis and Chicago shows, divided into 15 firsts, 12 seconds and one third. Their new variety Washington won two firsts at Minneapolis and one first at Chicago. Thursday and Friday a large number of the visiting florists took advantage of their kind invitation and visited the houses and were very much pleased with the appearance of the stock.

J. A. Budlong is cutting some choice blooms of white, yellow and pink chrysanthemums and from the present outlook will have plenty of stock for Thanksgiving day, some excellent blooms of President Roosevelt were seen at the store this week. This firm won 14 prizes out of 16 entries in roses at the show last week and also received five awards in carnations which speaks well for the stock considering no effort was made to enter until the last moment.

Poehlmann Bros. Co. was the recipient of first prizes at all the shows held in the several cities with their high grade chrysanthemums, roses and carnations, winning the \$500 premium at St. Louis for the display of roses and being large winners at Minneapolis, Milwaukee and Chicago. The number of prizes which this concern were awarded this fall came very near reaching the century point.

Bassett & Washburn were very successful at the flower show held last week, winning a large number of prizes. This firm is particularly proud of the showing made with their American Beauties and other roses. They were also awarded first prizes for their chrysanthemums in 50 blooms Timothy Eaton and Dr. Enguehardt and in 12 blooms of four other varieties.

The feature of the dance given by the Florists' Club bowling league at the Coliseum Annex, November 11, was the grand march, which was led by Master Orville Daly and Miss Katherine Yarnall. B. Zima, the well known florist of Twenty-second street, and his orchestra furnished the music, which was greatly appreciated by all present.

Hoerber Bros. are now receiving a high grade stock of roses, carnations and chrysanthemums from their range at Des Plaines. Business has been very good and Harry Manheim, the manager at the store, has been kept very busy filling the many orders which are constantly received.

The Chicago Rose Co. is handling an exceptionally good grade of Timothy Eaton chrysanthemums. Joseph Ziska is again back at the store, after having been confined to his home the past week with a severe attack of rheumatism.

Miss L. Anderson with Frank E. Rue, Peoria, accompanied by her mother spent the past week in the city. Fred Nichols of the George Reinberg establishment had the pleasure of escorting the visitors around the city.

The J. B. Deamud Co. is the recipient of large quantities of splendid stock of all kinds. Chrysanthemums of all colors are among the daily arrivals and some magnificent blooms of Wm. H. Chadwick were seen.

White and yellow Bonnaillon chrysanthemums are arriving in quantity at Percy Jones, and Henry Van Gelder informs us that he has some 35,000 blooms to dispose of between now and Thanksgiving.

Miss Viola Mae Jones and Robert Leesley, it is announced, will be married December 10. The fiancée is the daughter of A. L. Jones and granddaughter of the late L. A. Budlong.

Gladiolus crops, now being taken in, show a good yield. The late fall gave

them a long growing season, which matured more full sized bulbs than usual.

Zech & Mann are receiving a large quantity of roses with White and Pink Killarney showing up remarkably well. This firm has filled a large number of orders the past week for lily of the valley.

Dr. W. Van Fleet, accompanied by Mrs. Van Fleet, passed through Chicago on the 16th inst. en route from California to Washington, D. C.

The Poehlmann Bros. Co. have placed the contract for another range of 13 houses, each 27x250 feet. The Foley Mfg. Co. has the order.

W. N. Rudd will make an eastern trip the coming week in the interest of the Horticultural Department of the University of Illinois.

O. Johnson of the Flower Growers' Market is handling an exceptionally good grade of American Beauty roses.

George Reinberg is handling a large quantity of Maud Dean chrysanthemums of a very good grade.

Visitors: Miss L. Anderson, Peoria; A. L. Glaser, Dubuque, Ia.; P. J. Smith, Sandusky, O.; Paul Zoellner, LaCrosse, Wis.; John Bertermann, Indianapolis, Ind.

St. Louis.

The week just passed has been nice and cool. Stock has shortened up considerably, but as trade is only fair, prices are not high. Violets are slowly improving, and are in demand.

NOTES.

One of the most interesting meetings ever held by the Florists' Club, was that of the afternoon of November 10, there were 58 members present and four new ones elected. After the general business was concluded an entertainment was given. Visitors to the show were entertained by the Florists' Club at Cambridge Court with an

We Offer For Thanksgiving

OUR PRIZE WINNING

Roses and Carnations

Pronounced by judges at the **Ch'cago Flower Show** as **exceptionally good** we securing **19 Awards**. Stock exhibited was taken from our **regular cuts** and as such we are able to supply customers with the **selfsame stock** which in turn will surely satisfy your customers. Heavy supply of

Beauties, Maryland, Jardine, Richmond, Field, Kaiserin, Maid and Bride They are sure to give satisfaction. None better in the market.

Carnations. All the leading varieties. You will find them to be large sized flower and long stem grade, and of a quality far above the average to be seen in this market. Try them and be convinced.

Chrysanthemums. Yellow, Pink, White in large quantities, fully up to standard.

Violets. Fragrant home-grown singles, you will find these hardy enough to stand long distance shipments. Can also supply the **New York or Hudson River Violets**, but owing to length of time requiring for these to reach Chicago, we can only bill orders for such Violets at buyers' risk.

Plenty of other Seasonable Stock.

elaborate lunch, after which many speeches were made, and then taxicabs were taken and all visited the show.

W. J. Paul, manager of the Ammann & Johann Floral Shop of East St. Louis, reports trade as very good last week. The window displays of this store have attracted a great deal of attention.

Venneman Bros. are shipping some nice violets and carnations. They have completed three new houses 30x100 feet, and are now building a residence.

Harry Schlechter, formerly with Adolph Brix, is now with Geo. Angermueller. Miss May Taylor is now bookkeeper at Angermueller's.

A two week's chrysanthemum show opened at Shaw's Garden November 13. The greenhouses will be open until 10 o'clock in the evening. W. F.

Milwaukee.

GOOD DEMAND.

Last week saw considerable change in the market, practically everything shortened up and the only thing that was conspicuous in the market was the inferior grade of chrysanthemums. Violets were very scarce and it was impossible to take orders for them. Carnations took quite a jump, fancy grades bringing three and four dollars a hundred, there being a much greater demand than supply. Roses enough to fill orders, the demand being mostly for shorts, and American Beauties were practically out of the market. Lilies have shortened up again and are selling at normal prices; chrysanthemums of the fancy variety sold read-

ily, bringing good prices. Enough greens to fill all orders.

NOTES.

Holton & Hunkel Co. are cutting some fine Killarney roses, a new crop just coming on. This firm has a fine crop of American Beauties in view which they expect to cut within a few weeks.

W. C. Zimmermann reports business good, having had quite a number of funeral orders during the week.

Miss Hattie Weigle, formerly of the Pfister Florist, has accepted a position with the A. Currie Co.

The new store of A. Currie & Co., is now open for business at 130 Wisconsin street.

VAUGHAN'S SEED STORE,

CHICAGO: 84-86 Randolph St.

NEW YORK: 25 Barclay St.

C. C. Pollworth Co. is cutting some fine chrysanthemums which are selling readily and bringing good prices.

Visitors: Harry Balsley, Detroit, Mich.; Boelter & Quehlke, Appleton; A. C. Brown, Springfield, Ill.; Mrs. H. L. Clapp, Ripon; Geo. Dysinger, Ionia, Mich.; John A. Evans, Richmond, Ind.; E. Everett, Madison; P. J. Foley, Chicago; O. Goerish, Chicago; W. A. Harkett, Dubuque, Ia.; A. Hause, Belgium; A. Helfrich, Burlington; Mrs. T. Hinchliffe, Racine; E. H. Hunt, Chicago; W. F. Kasting, Buffalo, N. Y.; H. Kidder, Ionia, Mich.; C. Kroeschell, Chicago; Fred Lautenschlager, Chicago; A. Loeffler, Watertown; Carl Meier, Green Bay; Edw. Owen Orpet, Lake Forest, Ill.; Adolph Poehlmann, Chicago; Aug. Poehlmann and wife, Chicago; A. T. Pyfer, Joliet, Ill.; Wm. Reed, Antigo; Jos. Reisinger, La Crosse; A. Ringier, Chicago; W. J. Rupp, Chicago; Wm. A. Schaefer, Platteville; Frank Scholl, Pewaukee; G. A. Sillentine, La Crosse; Max Stadler, Oconomowoc; C. B. Tremain, Hartford; Geo. E. Valke, Minot, N. Dak.; Adam Zender and wife, Chicago; Miss Zender, Chicago; Paul Zoellner, La Crosse.

Cincinnati.

MARKET IMPROVING.

Business is improving. An increase in demand and a decrease in supply has given the market a better tone. A large part of this increased demand comes from out of town buyers who are ordering heavily. Chrysanthemums which have up to this time practically ruled the market will now decrease somewhat in quantity. Choice white chrysanthemums of real good quality were at times hard to obtain last week and pompons have found a fair sale. Roses and carnations are both shortening up. The prices on carnations have advanced, the lighter shades selling most readily. More New York double violets could have been used. Lily of the valley, lilies and sweet peas are also offered. The green goods market is active.

NOTES.

The display of chrysanthemums at the Eden Park greenhouses has attracted thousands of visitors. On Sunday the people were lined up and

walked in the greenhouse as though they were stepping up to the box office for tickets for a popular show. Superintendent H. Greensmith says that the bench of pompons attracted more attention than the many benches of show blooms.

The regular meeting of the Cincinnati Florist Society was held at the club rooms, November 7. The attendance was small. Ed. Foster, R. Witterstaetter, Wm. Murphy, E. C. Gillett and Max Rudolph were appointed a committee to formulate plans and crystallize sentiment among the florists for a flower show and report at the next meeting.

Miss Claire Murphy has returned from California. She is very enthusiastic about the flower gardens there. Roses, carnations and poinsettias were blooming in the gardens when she left.

Mr. and Mrs. P. J. Olinger took in the Chicago flower show and visited their relatives at Evanston and Aurora, Ills.

We regret to report the death of Chas. Murphy's mother-in-law. He has gone to Cuyago, Ontario, where her remains will be interred.

The Florist's Bowling Club will meet at Finke & Craig's alleys, 170 East Sixth street, Monday evening, November 21.

Wm. Murphy and friends visited William Speck's and Julius Schuman's greenhouses at Newport, Ky., and found everything in tip top shape.

E. C. Gillett journeyed to Indianapolis, November 11, to see the flower show.

Morris Meyer, formerly with A. Sunderbuch Son's Co., is now foreman at Bloomhurst.

The Bloomhurst Floral Co. of Lockland, are cutting very fine Killarney and Taft Roses.

The Covington Seed Co. are sending some very choice chrysanthemums to C. E. Critchell.

Mrs. Henry Schwarz has returned from Birmingham, Alabama.

Wm. Speck visited Richmond, Ind., Sunday.

Visitors—Martin Rukoff, representing H. Bayersdorfer & Co., of Philadelphia. C. P. Dietrich of Maysville, Ky.

Cleveland.

BUSINESS GOOD.

The week's business has been very good, and is steadily improving. The cold and dark weather has shortened up the cut of roses and carnations considerably, the growers reporting that snow covers the houses and the flowers open very slowly. Everything cleaned up nicely nearly every day, the demand in most cases exceeding the supply. Carnations have been short for the past two weeks. All varieties of short roses clean up daily, and the stock is exceptionally fine. Violets have been short of demand the latter part of the week. Chrysanthemums are selling well, both in the cheaper and better grades, and are not overplentiful. Good lily of the valley is having only a fair sale. Orchids are moving slowly just now. Asparagus has been short the past week but smilax is plentiful.

NOTES.

There will be an informal meeting at the Cleveland Florists' Club rooms, 2610 Detroit street, on Monday evening, November 28, at 8 o'clock, which all florists are requested to attend whether they are members of the club or not. It has been suggested that a new club be formed, the present quarters abandoned and new rooms with all conveniences be procured. The call is made by President Chas. Schmitt and Henry Renard who hope to be favored with the presence of all florists, as this will be a most important meeting.

The Ohio Floral Co. have removed to their new store in the Bank building. Their opening this past week was a very elaborate affair, the new store being decorated profusely with flowers and greens.

C. F. B.

CONNELLSVILLE, PA.—George Schomer has completed the erection of an addition to his greenhouses on East Fairview avenue of an area of 7,000 square feet. He will in the near future open a down town sales room, having secured one of the front rooms of the Wyman Hotel for this purpose.

Pittsburg.

The market continues very strong on almost all lines. Chrysanthemums, while still plentiful, sell better and clean up almost daily. The quality is very fine, of all varieties. Violets and lily of the valley move very strongly. Lilies are again active, and paper whites clean up nicely.

NOTES.

At the Phipps conservatories in Schenley Park, a very fine show of cattleyas and all varieties of begonias is on. Petersons Glory of Cincinnati shows up nicely.

A recent visit to Geo. L. Huscroft, Steubenville, Ohio, found his place to be one of the neatest and best equipped places in the country.

Harry Hamm has removed to Lang avenue, where he has a larger store room. Harry is very progressive and will soon make himself heard.

Gross & Allridge have re-organized. Mr. Shoub is now connected with this firm which will be known as the East End Floral Co.

McRae-Jenkinson Co. are cutting immense quantities of chrysanthemums which they dispose of at their East End Store.

Walter Dernberg has bought the retail store of the McKeesport Floral Co. and will conduct that place in the future.

Arthur James has severed his relations with I. E. Butler of New Kensington, and has opened a store in Brad-dock.

D. A. Noon, who has purchased the Faulk Flower Store in Homestead has closed his place and quit.

V. A. Cowgill, Salem, O., has purchased the retail store of the Lamborn Floral Co., Alliance, O.

The Zieger Company have a large quantity of paper whites planted in their greenhouses.

ORCHIDS A SPECIALTY.

I am now receiving daily shipments of **Fancy Cattleyas, Vanda Caerulea, Dendrobium Phalaenopsis, Oncidiums** and other choice **Orchids, Fancy Valley, Roses, Carnations,** and all Seasonable Flowers and Decorative Stock.

Supplies of All Kinds.

We took 42 prizes at the Milwaukee Flower Show on

Roses and Chrysanthemums AND INCLUDING THE SWEEPSTAKES ON... **Carnations**

Our growers also were successful with their entries. For All stock we are the people. See record of premiums in this issue.

C. C. POLLWORTH CO., Milwaukee, Wis.

Toronto.

GOOD STOCK SCARCE.

Weather the past week has not been of the variety that is conducive for roses and consequently have become very scarce, especially American Beauties. Richmond, Killarney and Bride are being cut of very fine quality, but not nearly plentiful enough to fill orders. Carnations continue to improve both in quality and quantity but many special orders are being refused daily. Chrysanthemums continue to arrive in very good quantities. The decorations lately have been very brisk, and the market being cleaned up each day. There is at present a shortage of the very large varieties, but these are being held back for the chrysanthemum show. Pompons and singles are having quite a run, being seen around the stores in very effective arrangements and also as pot plants, but there seems to be a general complaint that there is very little in them for either the grower or the store man. Violets are decidedly scarce and the prices have been boosted to \$1.50 per hundred. Valley continues of very fine quality.

NOTES.

Robert Abbs has a house of sweet peas from which he is cutting some very fine flowers. Mr. Abbs at one time had retired from the flower business, but time hung so heavily on his hands that he built a house for his own amusement and now that sweet peas are coming in at the rate of 1,200 to 1,500 a day, they keep the time from hanging heavy on his hands.

A fire broke out in the retail department of the Steele Briggs Seed Co., and did damage to stock estimated at \$5,000, with about \$1,000 damage to the building. The fire started in the basement, and from the pungent odor of the burning seeds and bulbs the fire was a hard one to combat.

Dunlops on Yonge Street have been featuring in their window lately a large gilt frame in which is placed a vase or a bunch of flowers and some very artistic effects have been noticed, but this is more noticeable with natural flowers than with artificial.

The Rosedale Florist, Miss Riggall, manager, has been receiving many orders lately for the old fashioned bouquets. They have a good stand with the residential district, and business continues to improve with them.

So many retail stores are springing up in different parts of the city that it is impossible to keep track of them, but as many of them are only starting in a small way it is doubtful if they will outlast the winter.

William McKay of Dundas Street is busily engaged in remodelling his green houses and residence, and the improvements around the front of the place and on the street line are very noticeable.

Cattleya labiata are supposed to be very scarce in this section, but Thomas Manton has at present a very fine crop of large blooms and well colored, many of which he is sending to the show.

Mrs. Endean of King Street, E., reports very fine business. She keeps a well stocked store, and her business is increasing rapidly. H. G. D.

New Jersey Floricultural Society.

The New Jersey Floricultural Society held their regular meeting November 11, in Lindsley Hall, 240 Main st. There was a fine display of roses, carnations and chrysanthemums and the quality of the exhibit was excellent. The report of the chrysanthemum show was approved as read. Eugene Van Tombaecht was nominated for membership in the society. Nomination and election of officers will take place at our next meeting. William Reid, gardener for S. M. & A. Colgate, will read an essay on the care of apple trees at the December meeting.

The following are the awards of the judges:

A. B. Jenkins, gardener to Albert F. Larson, roses 95 points; Thos. Edison, gardener to Frank Drew, roses 93 points; S. M. & A. Colgate, William Reid, gardener, roses 90 points; William Reid, carnations 95 points; Max Schneider, carnations 75 points; Lager & Hurrell, collection of orchids, 85 points; Wm. Reid, chrysanthemum plant, 98 points; Wm. Reid, Draceana Lindenii, 90 points; Frank Drew, vase of roses, certificate of merit; Wm. Reid, 7 pots chrysanthemums, cult. certificate; Fritz Berglund, chrysanthemums, certificate of merit; The judges were, L. Kindsgren, Edward Persson and James McManus.

WILLIAM REID.

HUNTINGTON, W. VA.—C. P. Dudley, of Parkersburg, is to open a flower store in the Vinson-Thompson building. Miss Lauraine Boreman will manage the new store.

CHICAGO

Minnesota State Florists' Association:

When this appears in print the show at the Minneapolis Armory under the auspices of the Minnesota State Florists' Association will be but a pleasant memory—but a memory that will live long in the minds of those who assisted in promoting the show and gazed upon its beauties. Competent witnesses from all sections of the country say it was one of the prettiest exhibitions they ever saw. The Twin City Florists are, of course, too modest to say that for themselves, but your scribe must record the truth no matter where it comes from. That the show was successful from the exhibitors' point of view cannot be denied; that it was successful from the observers' view is equally true; that it was successful financially remains to be seen when the returns are all in. The attendance on Wednesday, Thursday and Friday was disappointing—but Saturday was more encouraging, while much is hoped for Sunday and Monday.

The exhibits were all good and in most classes only a few points separated the "top notchers" from those that "also competed." Chrysanthemums were shown the first day and the judges were kept busy early and late in order to complete their labors. Local growers showed up well with such strong competitors as Smith and Buckbee, but Merza, Naomah, Mary Donnellan, Pres. Roosevelt and Pickett's Crimson were greatly admired and many comments passed upon them. The baskets and vases of chrysanthemums were a feature of the day and prizes were pretty well distributed among the local growers. The panel design contest was very close and all of the designs shown came in for favorable comment. The groups of chrysanthemum plants were very effective. Swanson's grotto of orchid plants flanked by single and pompon chrysanthemums was in a class by itself, as was May's collection of 20 varieties of evergreens in tubs.

The second day was devoted to carnations. Poehlmann Bros. Co. and Chicago Carnation Co. were the principal winners in this class, although a number of local growers captured some first and a large number of second prizes. Scarlet Glow, Sangamo and Washington received many compliments. The table decorations this day were principally of roses, Swanson winning by a close margin with Killarney-Monson's new rose, showed up in fine effect.

The third day was devoted to roses and brought out strong competition in these queens of beauty. To the surprise of many Holm & Olson carried off first honors in American Beauties, closely followed by Poehlmann Bros. Co. and Donaldson Co. First honors in Brides and Bridesmaid were easily captured by the Donaldson Co., Poehlmann Bros. Co., Wendland & Kelmel and May were the principal winners in the

other classes. The fine Richmonds, Killarneys, and White Killarneys were "eye openers" to many of the local craft. The display of violets while very good was likewise very small owing no doubt to the "off crop" season and the consequent heavy demand on the growers. The novelty table decoration was keenly contested, first honors going to Mr. Holmes, formerly with the Donaldson Co. The main feature of this table was My Maryland roses.

The fourth day was devoted to more table decorations and to bouquets and baskets of orchids. Honors were about equally divided among local houses. One of the most unique and interesting exhibits was loaned by J. S. Bradstreet of Minneapolis. It consisted of several dwarfed Japanese cedar trees about 18 to 24 inches in height, with appropriate Japanese settings. These are said to be 200 or 300 years old and are very interesting from many points of view.

Music by Rossiter's band every afternoon and evening was very entertaining. Vocal soloists each evening lent diversity to the character of the entertainment. Society girls in Japanese kimonos sold refreshments, programs and flowers, producing quite an income for the exchequer.

Harry Balsley of Detroit donated a beautiful silver loving cup, which was awarded to O. C. Swanson as a special prize for his display of orchids, chrysanthemums, palms and ferns.

On Saturday evening a banquet in honor of President Wirth was given at the Donaldson Tea Rooms, Minneapolis, at which 75 representative members of the trade, their wives and friends were present. A. S. Swanson acted as toastmaster and the following toasts were responded to: "Flower Shows Past and Present," by E. Nagel of Minneapolis; "The Inside Work for a Flower Show," by A. J. Smith, Minneapolis; "The Exhibitor's View of the Flower Show," by Lewis Luke May, St. Paul; "The Judges," by J. J. Hess, Omaha, Neb.; "The Value of Flower Shows to the Trade," by J. S. Wilson of Des Moines; "The Value of Flower Shows to the Community," by W. L. Harris of Minneapolis; "The Electrical Feature," by Mr. Clark of Minneapolis; "The Outsider's View," by O. H. Will. T. E. Nagel sang several solos which were roundly encored and the meeting disbanded at midnight.

The following well-known gentlemen were visitors: Elmer D. Smith, Adrian, Mich.; Harry Balsley, Detroit, Mich.; E. W. Buckbee, Rockford, Ill.; F. W. Plummer, Kewanee, Ill.; Mr. French, of Poehlmann Bros. Co.; W. J. Kelmel, of Elmhurst; Mr. Johnson, with E. H. Hunt; Mr. Johnson, representing A. L. Randall Co.; S. Seligman, representing Wertheimer Bros., New York; Mr. Shafer, of the La Crosse Floral Co.; G. A. Clausen, Albert Lea, Minn.; Nels Clarine, Faribault, Minn.; Mr. and Mrs. J. J.

Hess, Omaha, Neb.; J. S. Wilson, Des Moines, Iowa;

S. D. D.

Yonkers Horticultural Society.

The first annual exhibition of the society was held November 10-11, in the Armory of Co. G, N. G. N. Y., on Waverly street, and was a success in every way, although the number of exhibits were not as large as we would wish on account of there being two exhibitions in New York at the same time, yet nearly all of the sixty-eight classes were competed in and the attendance better than any of us could expect for the first show in Yonkers. The success of the show is due largely to the members of the executive committee, all of whom worked well and hard. Music for the occasion was furnished by Compton's orchestra and was very much appreciated by the visitors. The judges were: Wm. Turner, of Oceanic, N. J.; Geo. Middleton, of Tarrytown, and Wm. Smith, of Port Chester. Among the commercial men to exhibit were Millot. A wedding decoration and a group of foliage and decorative plants; Peter Macdonald, a reception decoration; Yonkers Nursery Co., palms and ferns; Scott Bros., of Elmsford Nursery Co., chrysanthemums; Arthur Boddington, vegetables; and L. K. Wood, garden tools. A large number of visitors were present from out of town, among them being E. W. Newbrandt, Secretary of the Tarrytown Society; A. Boddington; Al. Rickard, of Rickard Bros.; C. McGarratt, of the W. E. Marshall & Co.; J. B. McArdle, of Vaughan's Seed Store; Lee Don and John Morrison, of Weber & Don.

Some of the largest exhibitors and prize winners were: Miss G. Iselin (E. Mackenzie, gardener); Adolph Lewishohn (J. Canning, gardener); Lilienthal Estate (H. Scott, gardener); Mrs. J. B. Trevor (H. Nichol, gardener); Miss G. H. Dodge (Wm. Wright, gardener); Fred-

L. WHITMAN.

Westchester County Horticultural Society.

The Northern Westchester County Horticultural and Agricultural Society of Mt. Kisco, N. Y., held their annual flower show on November 4-6. It was a grand success, considering the down-pour of rain during the show. Among the principal prize winners were: Twenty-four cut blooms chrysanthemums of twelve varieties—the Bailey cup. A massive combination of sterling silver and cut glass twenty inches high with a base twenty-four inches in circumference. Won by Wm. Rockefeller, Tarrytown, N. Y. (Geo. Middleton, gardener). Col. William Jay Katonah, N. Y. (A. L. Marshall, gardener), second. Twenty-four flowers, chrysanthemums, eight varieties—Miss C. A. Bliss, New Canaan, Conn. (Burns, gardener); Col. William Jay, second; Mrs. J. D. Laying (David Francis, gardener), third.

Philadelphia.**BUSINESS IMPROVING.**

Business is steadily improving. There has been cold and windy weather during the past week and the supply in some instances has slightly fallen off, but not enough to have any appreciable effect on the market. The demand has been on the increase and everybody seems to be reasonably busy. There are yet many good chrysanthemums, the best kinds being now much in evidence and their season seems now at its height. The most noticeable falling off in supply has been with carnations, but while the chrysanthemums last the carnations can well be spared.

JOSEPH HEACOCK, STATE SENATOR.

Joseph Heacock, the well known grower of Wyncote and president of the Philadelphia Florists' Club, had additional honors thrust upon him at the election held November 8th. He was elected state senator from Montgomery county, defeating his republican opponent by a majority of 1,400. It would appear, however, that party lines were rather loosely drawn, as they should be when men of the high character of Mr. Heacock consent to run for office.

He has built up a great business as a grower of plants and cut flowers and is constantly extending it; he has a nation wide reputation for honesty and fair dealing and possesses the courage, firmness and ability required in a useful public servant.

NOTES.

The correspondent of a contemporary has been criticising the labels and the spelling thereon at the recent show in Horticultural Hall. He reminds us of one of the characters in Eggleston's story, the "Hoosier Schoolmaster," who was a great speller, but was useless for any other purpose. Some very able men, George Washington for instance, never could learn to be good spellers, but they made great records in human affairs. While good labeling and spelling is very desirable in an exhibition an occasional lapse does not warrant an attack on the management in a public print.

Charles Henry Fox, at The Sign of the Rose, has a very novel window display. It is an easel effect with an art picture of mother and babe surrounded with flowers, which are arranged in small vases at various angles about the easel. At the bottom of the easel there is a cradle filled with flowers. The title of the show-card is, "For the New Arrival."

The Pennock-Meehan Co. is handling a very fine stock of American Beauty and other roses, noteworthy being the new yellow rose, Melody, which they receive from Robert Scott & Son, Sharon Hill. They are also strong on chrysanthemums and other leading stocks.

J. J. Habermehl's Sons have been very busy of late with wedding and other decorations. At their fine store in the Bellevue-Stratford there is a continuous decoration and exhibit of the finest stock.

The Leo Niessen Co. reports increased business during the past week, but for that matter, they always seem to be very busy. Their roses, chrysanthemums and carnations are very fine.

Stockton & Howe of Princeton, N. J., who exhibited the new rose, Princeton,

Soil for Roses and Carnations.**ED. AMERICAN FLORIST:**

I forward you samples of soil from an old farm. Can you inform me whether this would make good soil in which to grow roses or carnations?
A. H.

The soil is the storehouse into which is incorporated the necessary ingredients for the growth of the plants. The sample of soil received is of good black loam, and is of a quality to produce strong vegetable growth, and should answer the purpose, but seems to lack the necessary fiber. Florists prefer the top six inches of old grass land having plenty of fiber, in which is mixed one-fourth manure, generally cow manure, which is allowed to stand composted until the sod has rotted enough to be easily pulled apart.
W.

AN IMPROVED MARKET.

While the large quantities of chrysanthemums that are being forwarded to the market have a tendency to keep the prices low, yet the market shows a much better tone. Roses are looking up and show a tendency to resume their normal place. Chrysanthemums have not realized the prices this fall that they have in former years, although the quality has been better. Carnations are selling slowly and it takes an exceptionally good grade to bring anything like a good price. New York is calling on Boston for good shipments of cattleyas. The retail stores have had a very busy week with receptions and funeral work and the fascination for beautiful store windows is very noticeable. There is a large variety of flowers on the market and a fair supply of sweet peas, lilies, violets, cypripediums and bouvardias is constantly arriving and in plants, begonias, primulas, azaleas and crotons are seen.

NOTES.

The Exeter Rose Conservatories of Exeter, N. H., sent into the market a sample lot of a new rose, White Chatenay. It is a buff white with the other characteristics like the well known Mad. Abel Chatenay.

The latest rumor in regards to the Doyle failure is that the committee of the creditors is considering a proposition to settle for 30 per cent cash.

Galvin decorated the reception given to the operatic stars of the season at the Lenox. American Beauty roses and oncidiums were the dominant flowers.

A. S. Parker is the proud father of a new boy which has been added to his family circle.

Potter Bros. of Danversport are new stall holders at the Exchange.

McMulken has been having a big call for cattleyas from New York.

W. T. H.

New York Bowling Club.

The New York Bowling Club met November 11, with rather a slim attendance, caused perhaps by the fact that two flower shows were running in the city. Some of the scores were as follows:

P. J. Smith 140 136 132 H. Ch'dw'k 204 176 256
J. A. Shaw 158 91 97 J. A. Manda ... 130
C. W. Scott 163 135 186 J. B. Nug'tat ... 105 83

The bowling match between the Astoria and New York clubs did not take place on Monday afternoon owing to the lack of attendance of the New Yorkers. Friendly games were in-

AMERICAN FLORIST CO., 324 Dearborn St., Chicago**New York.****TRADE DISAPPOINTING.**

The cut flower business is not quite up to its usual standard for this time of the year. The weather seems to be favorable enough for all purposes and it hardly seems as though the striking express drivers should have much effect on city trade in general. It is a fact, nevertheless, the wholesale men as a body admit that trade is just a trifle disappointing. Roses have diminished materially in quantity, consequently prices are moderately firm, with a slight advance over last week's figures. Chrysanthemums are still very plentiful. Such grades as can be handled around the one dollar per dozen figure are the most popular, seemingly irrespective of color or variety. Golden Wedding and similar high class blooms occasionally touch \$4 per dozen or a little better but the quantities of this grade are very infinitesimal compared with the great bulk of stock available. Carnations are fairly plentiful, standard sorts bringing medium prices and fancy grades going a little higher. Violets are doing somewhat better than they were a week ago. Cattleyas are still limited in supply, though the asking price is not high. Gardenias are selling well. Sweet peas are not by any means very numerous, yet there seems more than enough to meet all demands. There is a little white lilac arriving daily and *Lilium longiflorum*, *L. rubrum* and Paper White narcissus are regular features. Smilax and asparagus are meeting with very fair call with no change in values. There is still a wealth of autumn foliage available which answers nearly all the needs for decorative purposes.

FLORISTS' CLUB MEETING.

The November meeting of the New York Florists' Club was held November 14 in the Grand Opera House building, President A. L. Miller in the chair. Owing to this being a "Ladies' Night" and that an illustrated lecture was to be given, the ordinary business session was made as brief as possible. Secretary John Young read the minutes of the previous meeting, which were adopted; Harry A. Bunyard reported for the Outing Committee and showed that owing chiefly to inclement weather, a deficit of about \$95.00 resulted from the last excursion, on the motion of Mr. P. O'Mara, final action was deferred. F. H. Traendly reported progress for the Bowling Committee and W. J. Stewart as chairman of a committee on resolutions presented the following testimonial on the death of Lyman B. Craw:

"Whereas, our beloved friend and fellow member, Lyman B. Craw, has been called from earth to his eternal home, "Resolved, That in the death of Mr. Craw, the New York Florists' Club has sustained a great and irreparable loss. Mr. Craw possessed the affectionate esteem of our members in the fullest degree and in this loving record we desire to give expression to our loving remembrance of his genial companionship, our admiration for his many estimable qualities of mind and heart, his devotion to his family and his manly fortitude under great suffering and the shadow of death—to his bereaved family we extend our deepest condolence and sympathy."

Anton C. Zvolanek, Bound Brook, N. J., exhibited a few vases of well grown sweet peas, and S. S. Pennock, Philadelphia, Pa., brought in two new roses

from Robert Scott & Sons, Philadelphia, Melody, a yellow, straight stemmed and with clear dark green foliage, the buds cut rather too early if anything for showing to the best advantage, and a sport from White Killarney which is named Double Pink Killarney, deep pink in color and with much fuller petalage than the original Killarney. The committee of awards gave a preliminary certificate to each of the roses and made the request that they would like to see Melody again with the flowers further developed. Chairman C. W. Weatherhead of the nominating committee presented the following names to be balloted on at the December meeting: For president, J. A. Manda and J. B. Nugent; vice-president, H. A. Bunyard and J. H. Fischer; treasurer, W. C. Rickards and J. R. Kennedy; secretary, John Young and J. H. Pepper; trustees, I. S. Hendrickson, F. H. Traendly, Chas. Weber, H. Weismann, J. Rasback and Chas. H. Totty. The following gentlemen were elected to membership: Olaf Blomberg, M. C. Ford, Maurice Kleinmann, Wm. A. Phillips Chas. Shuster, James Fenn, John Graff, W. J. Moore, Percy B. Rigby and Wm. Taat.

John J. Withers then gave his talk about his personal trip around the world, illustrated with views recently taken by himself. He first presented a few scenes from some of the beauty spots of our own country, then proceeded on his circling of the globe, via San Francisco, Hawaii, the Philippines, Japan, China, Borneo, India, Italy, Monte Carlo, etc. The pictures and the discourse were both thoroughly enjoyed, the lecturer holding his audience enthralled from start to finish. At the close of the talk Chairman Nugent of the entertainment committee and his aids, Messrs. Kuhne and Schultz, served an elegant luncheon to the ladies, the male portion of the crowd being regaled with roast beef and liquids in abundance. Following the feast a short musical programme was rendered and a instrumental quartet interspersed with vocal selections. The attendance was extremely large, a great many ladies being present. A little after midnight the assembly disbanded, all declaring that this had been one the best "Nights" ever.

THE STRIKE OFF.

It looks at this writing that the expressmen's strike is nearing the end and we heartily hope this comes true. This strike has dealt particularly hard with those retailers who have a large out-of-town connection for they have necessarily had to refuse all orders that could not be delivered by their own messenger, which practically has limited their territory to within a radius of 30 miles of this city, a great deal of money, we believe, having been lost to retailers on this account.

Later.—The strike has been declared off and the drivers and their helpers went to work Monday, a satisfactory agreement having been reached, for which let us all be thankful.

NOTES.

The seed houses, from what we could gather, are experiencing a general lull in counter sales. Window displays are decidedly attractive in all of the leading stores. Vaughan's Seed Store are making bulbs the chief attraction, as also is The Droelman Co. The Peter Henderson Co. have attractive displays of potted chrysanthemums and specimens of vegetables in many varieties. Wm. Elliott & Sons, in addition to

Charles Weiss & Sons

127 West 28th St. NEW YORK

Telephone 1202 Madison Square

WHOLESALE FLORISTS

Receivers and Growers of Cut Flowers.
Consignments Solicited.

bulbs, are showing a line of evergreens. The Stump & Walter Co. maintain pleasing show windows, with bulbs and hardy plants as special features.

The James Weir (Inc.) Co. is a new name in Brooklyn retail circles. James Weir is the son of the well and very favorably known John Weir, whose Fulton street store and growing establishment at Sixty-fifth street and Fifth avenue are landmarks in Brooklyn's floral history. The personnel of the new company is James Weir, H. Young and E. C. Brown. The company is capitalized at \$5,000.00. All are Brooklyn gentlemen and they have the good wishes of the trade of the city.

Horse show week is bringing a great many people to the city and hotels are benefited a great deal thereby. This feature does not bring the "grist" to the florist trade that used to be the rule years ago, still, the show no doubt will have some effect in stimulating the social set to entertaining, and a slight impetus to retail trade will no doubt materialize.

The many friends of the Manda family, W. A., A. J. and J. A., all of whom are well known to the trade, will hear with regret of the death of their elder brother, which occurred very suddenly on November 13. The deceased was a jeweler with the well known house of Tiffany, where he had been for many years.

Retail show windows are extremely attractive all over town, the wealth of chrysanthemum blooms and the abundance of autumn foliage, together with the reasonable prices at which they can be procured, making it possible for every retailer to put in a magnificent display at but a moderate cost.

The auction salesrooms of Wm. Elliott & Sons and the Macniff Co. are the Mecca of a great many suburban buyers at this season of the year and a vast amount of bulbs and hardy stock is being disposed of.

The bargain sales of chrysanthemums as advertised by one of the leading managers of department store floral trade, has been a great help in relieving the wholesale district of surpluses of these flowers.

C. H. Totty, Madison, N. J., carried his district for office of councilman. He feels rather proud of this achievement, being the only Republican elected on the board.

We are reliably informed that the attendance at the flower shows at both Elberon, N. J., and Yonkers, N. Y., was rather poor.

The Madison, N. J., show had adverse weather from first to last, with rather a damaging result on the finances.

C. W. Scott, of the Yokohama Nursery Co., reached home November 11 from a business trip to Chicago.

PARKERSBURG, W. VA.—The city park committee of the Council have let the contract for the erection of a greenhouse in the park.

FROM THE BRITISH TRADE PAPERS.

Rose Dorothy Perkins.—I have never before seen the flowers of the above-named rose as rich in color as they have been this year. For several years I have noticed the same plants, some growing near walls with south aspects, others on pillars, pergolas, and arches, and those plants trained on the warm walls bore very pale-colored blossoms. This year, however, all seem to be excellent, not in one county only, but in many. I attribute the satisfactory condition of the flowers to the fact that the weather generally has been much cooler and not very bright. For a number of years that grand variety Crimson Rambler, was a failure on hot walls, but always a success on arches and pillars in the same garden.

Of course, we like to grow the various sorts of roses in certain positions, but I am quite sure that, generally, climbing varieties are not as satisfactory when trained on hot walls as in more open quarters. I daresay many readers have noted this fact also, and it would be well if inexperienced persons who intend to plant roses during the coming autumn made a note of it, too.

A good deal of interest has been aroused in the discussion at the International Road Congress at Brussels on the effect on vegetation of tarring the roads in order to prevent clouds of dust raised by motor traffic. Some diversity of opinion prevails among authorities on the matter. Motorists naturally hail the advent of the tarred road as a boon and a blessing. Arboriculturists, on the other hand, assert that in coping with the dust difficulty by means of tarred thoroughfares the evil is accentuated as far as they are concerned. While the dust of the road did comparatively little harm to trees

W. Z. PURNELL, Snow Hill, Md.

and plants, the particles of tar now raised by passing vehicles exercise a caustic action upon them and cause leaves and fronds to wither. The first effect of the particle of tar is to cause a brown spot to appear on the leaf—a prelude to the subsequent crinkling up. Vegetation in the Bois de Boulogne has suffered greatly from the effects of the tarred road, but it is impossible—as far as this country is concerned—definitely to ascribe to this cause the premature appearance of the "sere and yellow leaf."

There is a romantic story connected with the restoration of the parish church of Chatteris, Cambridge, opened last Sunday. The work has been carried out mainly by means of a legacy left by William Right, son of a former sexton. The latter held the post in the early part of last century, and his son, William, left for America when in

his teens. He obtained a humble position in the president's garden at White House, and eventually obtained a position of trust in the gardens under Presidents Grant, Lincoln, Hayes, Garfield, Cleveland and Harrison. Retiring, he came back to England and settled down in Walthamstow. During a holiday visit to his old home some years previously he found the parish church in a state of great decay, and in his first will he left £500 to the Bishop of Ely to create a fund for the repair of Chatteris Church. Later on his affection for the old church increased, and after certain family bequests he left the residue of his property, consisting of houses in Walthamstow and American securities, to the restoration fund, and in all the legacy has amounted to nearly £5,000. This has been augmented by about £3,000, and now, six years after his death, the object of his ambition is completed.

GROUND PINE will be less than half the usual output in the west.

ENGLISH growers are taking California culinary peas at good prices.

VISITED CHICAGO: Lester L. Morse and O. L. Coulter, of Santa Clara, Cal.

CATALOGUE firms should see that their supplies of paper are not delayed by railroad strikes.

HOLLY berries are reported coloring, but not yet ready for shipping. There will be some small lots for Thanksgiving.

CHICAGO.—Prices on the board of trade November 16 for grass seed were noted as follows: Timothy, \$8 to \$9.25 per 100 pounds. White clover, from \$22 to \$28.

DES MOINES, IA.—K. H. Guthrie, formerly with the Iowa Seed Co., and more recently of the Guthrie-Lorenz Co., has organized the Des Moines Seed Co., and will take over the business of E. J. Hahberger, 409-11 Fifth street.

CONRAD APPEL, Darmstadt, made a very attractive display of his specialties in grass and clover seeds, also fir cones, at the Brussels Exposition and for a similar exhibit at the Industrial Exhibition at Allenstein (East Prussia) he was awarded the highest prize, a silver medal with diploma.

F. C. Heinemann's Novelties for 1911.

F. C. Heinemann of Erfurt, Germany, is offering for the season of 1911, the following novelties which are highly recommended as worthy additions in their several species.

Verbena hybrida gigantea, new giant flowered verbenas, the flowerets are enormously large and contain a large percentage of red colors of various shades and have without exception a large brilliant white eye, which gives the flower a very effective appearance.

Dianthus Heddegi marginatus, single Japan-pink, silveredged, a striking novelty forming dwarf compact bushes bearing medium sized flowers of dark blood red with purple hue with a

uniform white edge around the flower which is slightly fringed.

Papaver somniferum, single poppy Black Prince, a novelty for vases. The flowers are of a brilliant blackish brown color with violet hue to which the white stamens and yellowish green seed pod makes a beautiful contrast.

Gloxinia hybrida crassifolia crispa Waterloo, a vigorous healthy plant with gigantic sized flowers having a broad open throat with seven petals, the edge is slightly undulated and ruffled. The blackish purple color of the flower shades toward the edge into shining crimson.

Salpiglossis variabilis superbissima, new Emperor salpiglossis, purple violet with gold, a new valuable color, which will be a welcome addition to this superb strain.

Imports.

During the week ending October 8 imports were received at New York as follows:

McHutchison & Co., 133 cases plants and 12 trees in tubs.

Wm. Hagemann & Co., 87 cases plants.

A. Rolker & Son, 84 cases plants.

H. F. Hall, Grand Rapids, Mich., Vice-President;
S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.
Annual meeting at Boston, Mass., 1911.

NORFOLK, VA.—The Virginia Truck Experiment Station are erecting a greenhouse 21x100 feet. A steam plant is being installed and will be used for the purpose of heating 12,000 feet of hot beds. Considerable attention is now being paid to experiments with the aphis and worms affecting cabbage.

Market Notes.

The lettuce season opens again with slow demand and low prices. It is an undeniable fact that the production of leaf lettuce has fully caught up with consumption under normal conditions and for a man to expect to unload enormous quantities of leaf lettuce is a risky business in our section at least, and more so in the fall months, because there are many other things to attract the buyer's attention. At present choice scarlet Globe radishes, young beets, green string beans, parsley, green onions, cauliflower, cucumbers and tomatoes are eagerly snatched up at good prices, while lettuce is passed by. All the articles mentioned can be produced under glass in the fall months in most sections of the country.

Of course, these things demand greater skill on the part of the grower, but with a good line of such goods one is sure of his market for years to come. The great mistake made by average growers is that they attempt a new crop and if it does not immediately jump into money they drop it forever. Thus the grower may not have the proper variety or come in at a wrong time, or bunch and pick unsuitably, or again, his market may be wholly unprepared—that is not used to such goods. All these things need a little time and patience to develop them and the result is well worth the price. Some growers relieve their glass area by producing part cut flowers in the fall months, such as chrysanthemums. This may work well with some, but the greater part of vegetable farmers could not succeed at this. When we look at the enormous shipments of green vegetables from the south and compare cost and quality, it seems there was yet room for more glass in the north if the growers would produce more variety and build up their markets.

Some of the crops mentioned need advance preparation. Parsley is sown out doors in the spring and housed in September. Cauliflower may be grown out doors to the point of heading and transplanted in October into a cool house. Onions are produced by growing the Egyptian Perennials out doors and either dug as needed or stored in trenches for winter use. They come into use very quickly, as a couple of weeks in a warm house will finish them off. This is a wide field of opportunity and growers should study up on these lines.

MARKETMAN.

Toledo, O.

FLORISTS' CLUB MEETING.

The chrysanthemum show which the Toledo Florists' Club held last week, was a very enjoyable and social affair; it brought all the members and their ladies out in full force to see what we can do and while the entries were expected to be a great deal more numerous than they really were, there was quality on hand to satisfy everyone. Substantial prizes were offered by the club, but they did not seem to be any inducement to the growers to show their skill. There were just five exhibitors, Harry Heintz, Geo. Bayer, J. L. Schiller, Emil Kuhnke and S. N. Peck. The first prize of \$10 for the best six chrysanthemums of any one variety was awarded to Harry Heintz, for six superb, Dolly Dimple; Geo. Bayer also competed for this prize with Major Bonaffon, but was defeated. It is to be regretted that the condition did not specify "a commercial or exhibition variety," it was hard to decide for the judges between two so widely different varieties. Geo. Bayer exhibited furthermore a flower each of the three novelties of this spring introduction Oropa, Elise Papworth and Mrs. Wm. Wincott. J. L. Schiller showed Elise Papworth and the last year's introduction, Mrs. W. E. Kelley. Elise Papworth seems to be a very promising variety, it is easy to grow, has good foliage and builds up an immense snowwhite flower. The prize for the best novelty was awarded for Elise Papworth. S. N. Peck staged President Roosevelt, Baron Victor Reilley, Intensity, Alice Byron and Helen Frick, all showed careful cultivation and Emil Kuhnke exhibited Intensity, and Col. D. Appleton, which were also fine grown, both exhibitors got prizes. The show was held in S. N. Peck's flower store and after the meeting, coffee and cake were served by Mrs. Peck which was greatly appreciated by every one. To reimburse the club for part of the money expended for prizes, the prize winning flower was auctioned off for the benefit of the treasury, the highest price of \$1.20 was paid for one flower of Dolly Dimple.

Business in stores is good, though the weather is bad enough to keep buyers indoors. Potted plants such as cyclamen and primulas are selling slowly, as everyone now has to have his or her chrysanthemum. The pompons which are grown in a limited quantity here, seem to find more favor year after year and they certainly deserve it.

J. H. Sigrist disposed of his greenhouse establishment to Timm & Wirz,

two young fellows employed heretofore with the Calvary Cemetery Association, and John Barrow. They have our best wishes for success.

Another flower show will be held by the club at the first meeting in December and prizes will be awarded for cyclamen, begonia (Lorraine type), primulas and cinerarias. SCH.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911

THE Department of Agriculture has issued a bulletin, the feature of which is the possible utilization of the naturally acid soils in the eastern United States, in the production of blueberries or some other crop that thrives in such a soil.

Conifers at the Arnold Arboretum.—I

The collection of coniferous evergreens in the Arnold Arboretum is very comprehensive, and it includes all of the known species that will prove hardy, or relatively so, in Massachusetts. The pinetum will most certainly be largely augmented by the collection of E. H. Wilson in China. Mr. Wilson discovered many new species of pinus, abies and picea, and of picea particularly the number of new species is said to be large, and Mr. Wilson's mission at the present time in China is mainly to procure seeds of these new species of conifers, which on his previous journey he was unable to obtain on account of them fruiting sparingly.

Many of the conifers planted in the pinetum, at the Arboretum, 30 to 35 years since, are now beautiful objects. Amongst some of the most noticeable is Engelman's Spruce, of which there are a number of fine individuals, in the most perfect health, and densely branched down to the ground line. To see it in its beauty in the Arnold Arboretum, proves conclusively that it is one of the best of the spruces to plant in the Northeastern states in climatic conditions similar to Massachusetts.

The Blue Spruce (*Picea pungens*) looks as well in the Arboretum as it does anywhere, and perhaps a good deal better, but it does not give the promise that Engelman's Spruce does. It shows a tendency to lose the lower branches and does not reveal the same robust, healthy character.

I was much interested in the promising appearance of *Picea omorika*, a most beautiful spruce from Southeastern Europe. It belongs to the flat-leaved section of the spruces and is quite distinctive in its aspects from most of the spruces familiar to gardeners. It is perfectly hardy in the Arboretum, and it is at present passing from the juvenile to the adult stage. I would advise all planters and lovers of conifers to include this handsome and promising spruce in their collections.

Dr. Sargent is much interested in *Picea schrenkiana*, a spruce from Central Asia. There is a juvenile plant or two in the pinetum which is doing nicely, and gives every promise of going ahead. *P. schrenkiana* is rare in cultivation, and I have never seen it except in the Arboretum.

The Japanese spruces, *Picea alcockiana* and *P. ajanensis*, are looking well. It would repay most cultivators to go to the Arboretum and study the characters of these Japanese spruces, for I am certain that their botanical

characters are badly understood in most places in this country outside of the Arnold Arboretum. They are badly mixed up in most American nurseries.

The so-called Douglas Spruce, *Pseudotsuga taxifolia* (it seems a pity to afflict such a beautiful conifer with such a clumsy generic name), is doing splendidly in the Arnold Arboretum, and what a beautiful object it is! This conifer is deservedly popular on most private estates, and gives promise of attaining a healthy adult age.

European Horticulture.

Corylopsis pauciflora.—The genus *Corylopsis* is closely allied to *Hamamelis*, which is fairly well known in gardens by the several early-flowering species called witch hazels. A few species only of *Corylopsis* are in cultivation, the best known being *C. spicata*. That particular shrub has been in cultivation for many years, but *C. pauciflora* is of comparatively modern introduction. The name of *pauciflora* is inaptly applied, for it blossoms very freely when growing under suitable conditions. Unfortunately, it is rather tender, and, except in the mildest parts of the country, it requires protection during winter and spring if the best results are to be obtained. The damage to the shrub cannot, however, be attributed so much to cold during the dormant period as to late spring frosts during the time that the flowers are open and growth buds starting into life. It is a Japanese shrub, growing 3 to 4 feet or more high, with numerous slender, more or less pendant branchlets, which during early spring, the end of March and beginning of April, are clothed with dainty catkins of primrose-yellow flowers which have a decided fragrance. A further period of beauty is apparent when the foliage commences to expand, for the leaves are delicately marked with green and bronze. In Cornwall, Devonshire, and other kind climates, it may be expected to thrive as a border shrub, but in less favored localities it should either be planted in a frame or cold greenhouse, where it can remain the whole year; or it should be grown in pots and stood out of doors for the summer. As a forced shrub it has much to commend it, and it can be had in flower early in January without very severe forcing. It thrives well in light loamy soil to which a little peat has been added.

New Strains of Greenhouse Calceolarias.—An interesting feature in the conservatory at Kew, popularly known as "No. 4," are several groups of Calceolarias. Some few years ago Mr. John Jefferies, of Oxford, introduced a race of tall-growing Calceolarias with small flowers. This strain, which was named Jefferies' Hybrids, may be said to bear the same relation to the large-flowered Calceolaria as the Star Cineraria does to the large-flowered type. The result of crossing the large-flowering herbaceous type with the pollen of Jefferies' Hybrids has still further improved the last named from the present-day point of view. The plants and flowers are intermediate in character. *Calceolaria kerwensis*, as they have been named, produce a profusion of flowers intermediate in size, slightly taller in habit than the florists' herbaceous strain. The plants lack the flat appearance of these varieties which many critics dislike. The principal colors present in the large-flowered type have been reproduced in *C. kerwensis*. The introduction of another type of Calceolaria, to which, unfortunately, three names—*C. Clibrani*, *C. Decorator*, and *C. profusa*—have been applied, provided splendid material for more crossing. The sprays of golden yellow blooms are very light and graceful, in fact so light are the stems they require a considerable amount of tying to support them. This fault has been largely obliterated in the batch of plants raised at Kew, the result of crossing *C. Clibrani* with several of the herbaceous varieties. The flowers are rather larger than those of *C. Clibrani*, and the habit of the plants is much sturdier. The plants exhibit a considerable variation in color and markings. One plant in particular, crossed with the cornuta type of flower, has inherited in a marked degree the curious shaped pouch of the cornuta type.

Surplus Shrubs, Roses Dahlias and Other Stock

We have the finest lot of large-sized, strong, lusty shrubs you ever laid eyes on, which we will be glad to convert into ready cash at the following ridiculously low prices:

Hydrangea paniculata grandiflora	100

We Have No Department Store Customers. We Sell Strictly to the Trade Only.

If you have room, now is the time to purchase your supply while the weather is mild and shipment can be made more safely, and while we have a big stock of everything at bargain prices.

AZALEA INDICA.

Now Is the Time to Force Azaleas for Christmas. What varieties will you take? Which ones will force well? Take my advice. There is the Deutsche Perle one of the best well known double whites; we have plants of these at 60c. 75c \$1.00, \$1.25, \$1.50 to \$2.00. Next, Simon Mardner double, bright pink 50c 60c 75c \$1.00, \$1.25, \$1.50 to \$2.00. Vervaeana is so well known that there is no need to talk about it; big variegated rosy flowers, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Apollo, single red varieties much admired, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Dozen and hundred at the same price. How about Mme. Patrick? This is one of the earliest pink varieties, very scarce this year in Belgium and high in price; a few of this variety you must have. Price: \$1.00, \$1.25, \$1.50 to \$2.00.

For Easter Forcing we have only the well known standard American market varieties, such as Mme. Van der Cruyssen, pink, very scarce this year in Belgium, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Niobe, double white, 50c, 60c 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Deutsche Perle, 50c, 60c 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Helena Thielman, light pink, \$1.00, \$1.25, \$1.50 to \$2.00; President Oswald de Kerkove, \$1.00 to \$1.50; Schryveriana 75c, \$1.00, \$1.25, \$1.50 to \$2.00; Empress of India, double variegated, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00. Professor Wolters, 75c, 1.00, \$1.25 to \$1.50; Vervaeana, 60c, 75c, \$1.00, \$1.25 to \$1.50; Apollo, 60c 75c, \$1.00 to \$1.25; Simon Mardner, 50c, 60c, 75c, \$1.00 to \$1.50.

Remember, small sizes of Azaleas are scarce this year in Belgium; therefore I had to buy mostly large sizes.

Remember it is the wide awake man that is not afraid to invest a dollar that makes the money.

Rubber Plants, 6 in. pots, 35c, 40c and 50c; 5-in., 25c.

Asparagus Plumosus, 2½-in. 3c; 3-in., 5c.

Asparagus Sprengeri, 2½-in., 3c.

Cocos Weddelliana, 3 in. pots, 15c, 18c and 20c.

Primula Chlnensis, 4-in. pots, \$10.00 per 100; 5½-in., \$2.50 per doz.

Hydrangea Otaksa, pot-grown 6-in. 25c.

Christmas or Ornamental Peppers, 5½-in., 15-20c.

Cineraria Grandiflora Hybrida, Aschmann's well known strain 2-in. pots \$3.00 per 100 4-in., 10c.

Dracena Bruanti, 25 to 30 in. high, 6 in. pots, 40c to 50c.

Latania Borbonica (Chinese Fan Palms), 30 to 35 in. high 6 to 7 in. pots, 50c. 75c to \$1.00 each.

Adiantum Hyb., 2½-in. pots, 5c; 3-in., 8c; 4-in., 12c; 6-in. pan. 30c.

Azalea Indica.

Begonia Gloire de Lorraine

This is another specialty of ours. We have a secret in growing them to perfection, only known to us giving them a rich deep pink color. They stand shipping well, traveling 2,000 to 3,000 miles without injuring or killing them in transit, if properly handled. We have a big housefull in 6 to 7 in. sizes in bud and partly in bloom ready for immediate sale or for the holidays. Everybody knows that last Christmas we had the best Begonia Gloire de Lorraine on the market. They were crackerjacks indeed! We have the deep pink and the light pink (Lonsdale) varieties, 6 in. pots, 50c, 75c to \$1.00; 7-in., \$1.25 to \$1.50; 3 in. (if transplanted soon will make good 4-in. for Christmas), 15c each \$15.00 per 100. If you have room you should order now, because they are always scarce at Christmas.

Begonia Erfordii, latest improvement; this variety is always in full bloom during winter Christmas and Easter: 4-in. pots, in bloom and bud, 20c. **Begonia Rex**, 4-in., 20c.

Cyclamen Grandiflora, best strain, 5-in., 25c.

Primula Obconica, finest strain, 4-in., in bloom, 15c, in bud, 10c; 5½-in., 25c; 6-in., very large and extra fine, 35c.

KROESCHELL HOT WATER BOILERS

ORDER NOW

TELEGRAPH AT OUR EXPENSE

This Boiler has found great favor with the greenhouse trade throughout the entire country. The Kroeschell will develop more heat units per pound of coal consumed than any other form of construction.

More Kroeschell Boilers and Generators used for greenhouse heating than any other make.

Send for catalogue

452 West Erie St. CHICAGO, ILL.

WILL SHIP WHEN WANTED

PAY AFTER BOILER REACHES YOU

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

Baltimore.

TRADE ACTIVE.

The wintry storm which wrecked the grounds and prospects last week of the assemblage of foreign and American aviators, mangling many of their flying machines and promising to put an end entirely to the great sport promised, has been followed by a succession of high winds, their violence and long continuance being phenomenal. There have been no great disasters, but many minor losses have made a considerable aggregate, the flower growers suffering with others. The week has been one of considerable activity in trade circles. The aviation meet was resumed with a great number of visitors, officialdom from Washington being well represented. A good many social festivities marked the gathering of people from other cities and lands who are interested in the man-birds, and the hospitality of the city seemed to be put out in abundant measure. There were also a number of conventions of various bodies, some national and some local, each with some function requiring floral or other decorations. A number of weddings were also celebrated, and these—with the never missing funeral occasions—made a good demand for cut flowers. Chrysanthemums were shipped in great numbers, the season being about at its height, but on one or two days roses and violets were entirely sold out. There is a fair shipping business being done and the indications seem to point to a good business for the season.

NOTES.

The Maryland State Horticultural Society will hold its annual meeting from November 28 to December 2, occupying with the various other associations which meet at the same time the great Armory building of the Fifth Regiment of the state's National Guard. Richard Vincent, Jr., of the well-known White Marsh Company, is the president for this year. There will be discussions of topics of interest, a number of papers will be read, and the usual routine of welcoming addresses and replies. There is always a fine exhibition of fruits, nuts, vegetables, canned goods, flowers, etc., and it is expected that this season will find the display more comprehensive and interesting than ever before, the officers having been diligent in arousing a widespread interest in the event. There are quite liberal prizes offered for all kinds of fruits which are grown in Maryland, for goods canned or preserved, for vegetables, nuts and seeds. There is a varied list of offers for ornamental and flowering plants and for cut flowers, window boxes, evergreens, etc. In addition to the regular schedule a number of individuals have offered valuable articles, pieces of silver ware, or money, for specified exhibits, one lady enthusiast giving \$50 for collections of ferns, cut roses and window boxes. The display is open to the public and a very large attendance of visitors is always secured.

A meeting was held, November 14, of growers and consignors who are patrons of the Florists' Exchange for this city to consider the business methods and prospects of that concern. The volume of business done is largely increasing, but so far as the individuals are concerned there does not seem to be an entirely satisfactory outcome. Many think the business of growing flowers has expanded so that the output of product exceeds the demand. As a result prices fall, and profits are steadily diminishing. An interchange of views was had, but not in time for notice in this letter.

S. B.

WEST LEBANON, N. H.—Samuel P. French is building a 50-foot addition to his greenhouse.

The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.

$\frac{3}{4}$ of the heating surface is in the tubes.

Ask the man that knows the one using different style boilers—names are yours for the asking.

After using our boiler one season, you will say like all others: Nothing but "Superior" for me.

This boiler has given better satisfaction than any other boiler on the market

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. \$2.50.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. \$1.25.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

DWARF FRUIT TREES (F. A. Waugh).—Their propagation, pruning and general management, adapted to the United States and Canada. It has 45 illustrations and 123 pages. 50 cents.

HEATING AND VENTILATING BUILDINGS (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide \$4.00.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. \$1.50.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

Superior Carnation Staple

(PATENT APPLIED FOR.)

For repairing split carnations. 1000 for 50 cents
Postpaid. Sample free.

L. J. WAITE, 293 Main St., Springfield, Mass.

Tacoma, Wash.

Jack Frost has given outdoor stock a knockout blow and the florists are beginning to get busy. First class flowers of all kinds are coming to market now with about enough carnations to go around. Ivory—one of the main white chrysanthemums grown here—is this season smaller in size than usual and Major Bonnaftons are not so good or so many as formerly, but generally speaking chrysanthemums will be sufficient in quantity. Potted plants of all sorts are quite scarce and not many are being propagated.

NOTES.

Louis Tschunko has one of the largest places in Tacoma and is in good shape. Ten thousand carnation plants are in fine cut and showing best of health.

F. C. Smith at Wapatee has some excellent carnations, especially Beacon.
S. L. H.

Nassau County Horticultural Society.

The regular meeting of the Nassau Co. Horticultural Society was held in Pembroke Hall Thursday, November 10. One new member was elected and one application for membership received. Mrs. F. B. Pratt was elected an honorary member. Messrs. Barton, Marshall and Westley acted as judges with the following decisions: Society prizes for chrysanthemums, best 12 white, J. McDonald; best 12 pink, S. J. Trepass; best 12 yellow, S. J. Trepass. Cultural certificate was awarded to J. McDonald for a grand vase of mixed chrysanthemums, to Fr. Petrocia for "New Rose" celery, also honorable mention for celeriac.

The winner of M. Troy cup, J. Forbes, Jericho, had same passed around filled with Moet & Chandon's best, supplying all with cigars as well, so that everybody was happy.

Next meeting will be held at 2 p. m. and prizes will be for best 100 violets, best 25 sweet peas and best three cut poinsettias.

Aphine

*The Insecticide that
kills plant Lice
of every species*

"The Aphine has been severely tested, having passed expectations. Used it upon mealy bug, scale, fly and spider without injury to the foliage whatsoever. For red spider used it one part to 15 parts water with the best possible results. I consider Aphine is far ahead of any insecticides I have used in England having had good experience with same there."

"The above is the report of my greenhouse foreman, and from my own observations the results are eminently satisfactory in every respect. You have at last put on the market an insecticide that does all claimed for it and more."

(Signed) JOSEPH ROBINSON, Supt.
to Colgate Hoyt, Oyster Bay, Long Island.

McLAREN Co., Westbank Bldg., San Francisco California.

Dayton, O.

We have had but little November weather to date, consequently the stock is in abundance, luckily chrysanthemums seem to be in demand, of which there is a good supply. Carnations are not cut in abundance, but roses are coming in good quality and quantity. Lilium Giganteums and paper white narcissi are also in this market. Business in general is just moving.

NOTES.

The Dayton Florists' Club held its regular monthly meeting at J. F. Young's establishment on November 7. Plans were discussed to create a better interest and to encourage a better attendance. The committee who have this in charge are G. W. Bartholomew, J. W. McNary and Arthur Schmidt.

Schmidt & Son are growing a number of their seedling chrysanthemums of which there are some promising ones, a tan of a beautiful shade is especially promising, also a pink and a white.

The Heiss Co. reports a slight improvement over last week, and are using chrysanthemums to good advantage in their store.

Walter Horlacher is cutting some very fine chrysanthemums. He has some of the latest varieties out. Business is good.

Mrs. Haschke's new red seedling chrysanthemum is showing better than last year. She reports business good.

G. Horlacher of Belmont will have some fine Mdle. Jeanne Nonin chrysanthemums for the holidays.

PERFECT PLANT FOODS.

THOMSON'S Vine, Plant and Vegetable MANURE

Unrivalled for vines, tomatoes, cucumbers, all flowering foliage and fruit bearing plants; vegetables, lawns, etc. Has stood the test of 30 years. The result of many years of practical experience.

Sold by leading American Seedsmen.

Also Thomson's Special Chrysanthemum and Topdressing Manure,
An Excellent Stimulant.

Freight paid on quantities; liberal terms to retailers. Write for our special offer to the American trade. Agents' circulars, pamphlets etc. to sole makers.

Also Exporters of Pure Scotch Soot Write for prices, etc.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,
and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

Garman's Antipest

INSECTICIDE AND FUNGICIDE
For the Garden, Orchard and Greenhouse
Non-poisonous and harmless
to vegetation.

Kills Green Fly, Aphides, Bark Lice,
Thrips, Mealy Bug, Red Spider, Scale,
Wire Worms, Ants and Snigs.

This is the Grower's Friend. Handy to use, cheap and effective, mixes readily in water. Destroys all insect pests and keeps down filth. Circulars on application. \$1.50 per gallon. Also in quarts, half gallons and in bulk.

Nashville.

Flowers are coming in now very satisfactorily. Pink Killarney are very fine, as are also American Beauty. Chrysanthemums are in all their glory but do not seem to be more plentiful than the demand. Carnations while they have not yet attained the size they will take on later, yet are much improved in quality. Violets are better and blooming a little more freely. Trade has been very good and getting better every day as the social season advances. The weather has been, and continues fine.

Geny Bros., the popular florists, have effected their removal from their former store at 712 Church Street in the Tulane Hotel Building to their new place, 212 5th avenue, north. At their new location they have a much larger store and increased facilities for handling their ever increasing patronage. The new store is 20x120 feet, and is in one of the most popular shopping districts, and shows up fine. The show windows are a mass of blooming chrysanthemums of the finest varieties, and have been attracting a great deal of attention, and have served as a fine advertisement of his new place. Leon Geny who has charge of the store has fitted it up in the newest and most up-to-date style, having new cases, counters, desk and fireproof safe. Near the front of the store is a large new refrigerator with glass doors, which is seven feet long, six feet high, and two feet wide and in the rear of the store is the larger refrigerator, which takes 3,000 pounds of ice to keep it thoroughly refrigerated. Cases containing baskets and other supplies divide the front from the rear where all the designing and floral work is done.

FLORISTS' FERNS.

Farleyense and Other Adiantums.

Ferns for cutting form a useful as-
set in many establishments, whether
they be grown for home consumption
in the retail trade, or for bunching for
the wholesale market, various members
of the Adiantum family being among
those that are most largely grown for
this purpose. Adiantum cuneatum in
either the original type or the variety
of this species known as A. Roen-
beckii, the latter having a somewhat
longer frond, perhaps a little less tri-
angular in general outline, and with
the edges of the pinnae more serrated
than the old cuneatum, are the two
most largely grown. Also a consider-
able number of some forms of A. dec-
orum, among which A. Croweanum is
apparently the most useful, while Adi-
antum hybridum, another fern that is
evidently closely allied to A. decorum,
has many friends among the trade,
both of these ferns throwing a goodly
number of fronds of excellent sub-
stance and very graceful for use
among cut flowers. Adiantum Ghies-
brechtii, formerly known to many
gardeners as A. scutum, is another fine
species for cut fronds, this being pos-
sibly the next in beauty to Adiantum
Farleyense, while its fronds when well
hardened by growing in sufficient
light, are much more enduring than
those of its beautiful relative. Adian-
tum tenerum is another good species
for cutting, especially where large
fronds are in demand, and has the
additional distinction, according to the
botanists, of being the species from
which A. Farleyense originally sprang.
The last named, and most beautiful
fern, is beyond question the best of all
for high-class decorative work, though
the fronds will not bear quite as much
exposure as some of those already
mentioned, and rather more care and
warmth is needed in its culture than is
required for most of the Adiantums to
which reference has been made. In
addition to this, the fact that Adian-
tum Farleyense is propagated by divi-
sion, while many of the others may be
had from spores, naturally makes this
fern a little more expensive to grow.

The propagation of this fern is best
accomplished during the spring and

summer months, the old fronds being
cut down on the stock plants and the
roots being either shaken out or
washed out, according to the consist-
ency of the soil in which they have
been grown, and the crowns then being
separated into as many pieces as may
be found with a growing point on
them. These sections, or divisions, are
then planted in rows in sand or a mix-
ture of sand and chopped sphagnum in
a propagating frame, in which they are
kept warm and moist, and in a few
weeks form new roots and begin to
throw up a frond or two, after which
they are potted off, watered carefully,
and still kept rather warm and shaded
until they become established. As the
plants progress they are shifted on into
larger pots, the shift being given before
the plants become very potbound, and
the watering done with care at this
stage, for should the soil get soured
at such a period the plants are likely
to come to a halt from which they may
not recover. Decayed sod with a lib-
eral quantity of dry cow manure mixed
in it is the most satisfactory compost
used by the writer in growing this
fern, but neither wet soil nor wet man-
ure should be used for them, or the
roots are likely to get a check. Another
point to remember is that while Adian-
tum Farleyense enjoys fresh air it does
not enjoy strong draughts, and this
point should be kept in mind when ven-
tilating the house in which it is grown.
After the plants have reached such a
size as to be ready for sale or for cut-
ting, which is usually about 5 or 6 inch
pot size, they should be given more air
and light, in order to harden the foliage,
else it will not last long when cut.

Adiantum cuneatum, and, in fact, a
majority of those to which reference
has been made in the present article,
are more generally grown planted out
on side benches, or in low houses, than
in pots, where the production of fronds
for cutting is the object. Young plants
from 3-inch pots are a size that should
prove satisfactory when planted out on
the benches in May or June, given
some shade during the hottest weather,
and fully exposed to the sun by the
middle of September. These plants are
put about ten inches apart in a bench
containing five inches of soil, being
careful not to plant too deep, for the
crown should not be buried, and in a
compost similar to that suggested for

**Turn Your Surplus
Stocks Into Cash

Ready Reference
Department.**

A. Farleyense. Care in watching when the plants are first planted is one of the essentials to insure the roots being moist without making the soil sour, then give plenty of ventilation both night and day to avoid the moisture condensing on the foliage, and the Adiantums should grow away freely and produce a good crop of sturdy fronds. When cutting take the whole crop from each plant at a cutting, then keep the crowns slightly drier for a time until they show signs of growth, after which the watering may gradually come back to the normal. For ferns of this class a night temperature of 60 degrees is good, but A. Farleyense prefers a few degrees higher.

W. H. TAPLIN.

Dahlias.

When the frost has killed down the tops of the dahlias they should be dug and stored in their winter quarters. They should be cut to within a few inches of the ground and then carefully dug, and the earth shaken off the tubers. It is well to turn them upside

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

A Bridal Shower.

A unique bridal shower was made for a bride recently which attracted a great deal of attention and was also a most novel and interesting change from the older customs.

The bride and bridesmaid bouquets were all made in individual clusters—for instance, the bridal bouquet was of cattleyas; each orchid was arranged in a separate cluster with maiden hair fern and a smaller white orchid. There were about eight of these corresponding to the number of bridesmaids. They were tied closely together to resemble one bouquet—but each had its individual ribbon so arranged as to resemble a shower and on this shower was attached tiny bunches of maiden hair fern.

The bridesmaids' bouquets were of lavender sweet peas and made in the same manner as described above—about two dozen individual bunches in

individual bouquets of this pretty floral shower. It was a most picturesque sight and carried with it the pretty omen that whoever catches one of these bouquets will be the next in line for the altar nuptials. A. E. KLUNDER.

A Suggestion for the Window.

Suspend an oblong basket with brass chains on each side and fill with poinsettias and holly berries, finish with maiden hair fern, using asparagus to intermingle and fall below, this to be caught up with wide red satin ribbon from which is suspended a ball made of holly leaves arranged in flat fashion on the ball, from which suspend a dozen tiny red immortelle Christmas bells from the center of the ball beneath. Bank and arrange window in holly green, but nothing of a brilliant sort to detract from the basket setting. This is suggestive of larger possibilities where more elaborateness is desired.

A. E. K.

A Green Dinner Decoration.

Make a broad strip or scarf effect of maiden hair, allow this to extend the longest width of the table. In the center use a low flat basket arrangement of lily of the valley, using tiny electric lights covered with green catgut among the maiden hair fern. Give each guest a bunch of lily of the valley and maiden hair fern. The glass service should be green. If a complete green setting is desired and one oddly effective is mignonette in the center instead of valley and then also give each guest a bunch of mignonette tied with green gauze ribbon.

A. E. K.

Table Decoration.

Chrysanthemums combined with geraniums (scarlet), holly berries and a delicate touch of lilac and a few fronds of maiden hair and cover the vase with a variegated ivy. Lily of the valley and white cyclamen with purple tips and a few fronds of maiden hair is excellent. For an orchid arrangement take a tall trumpet-like vase, fill with cattleya orchids and a few of the fine white variety, take asparagus and trail them from mouth of vase to the table, place on table a mat of green galax leaves and at intervals long sprays of asparagus.

A. E. K.

A Garland Table Decoration.

Make an artistic loose garland of pink roses and carnations just inside of the plate arrangement, in other words curve around wine glasses, making the curves as artistic as possible. In the center make a carpet of roses leaving a small round space in the center for a vase of good height, fill this with moss and arrange like a basket with lily of the valley. For each guest place tiny vases filled with lily of the valley, these could be arranged to advantage on the rose carpet with tiny garlands connecting each souvenir vase of lily of the valley. A. E. K.

HAMMONTON, N. J.—J. Murray Bassett will open a first-class florist establishment in the Ballard building, Bellevue avenue, on November 19. A neatly printed invitation was extended to friends and patrons to attend the opening upon that date.

TABLE DECORATION OF MY MARYLAND ROSES.

Arranged by The Geo. Wittbold Co. at the Chicago Show.

down, and let the surplus water in the stem drain off. They should then be placed in a shed, or out of doors, where they can be protected from frosts and allowed to dry. A good frost-proof cellar, preferably with a loam bottom, is the best place to keep them during the winter. Be careful in the labelling, and keep the varieties separate and properly labelled. In placing them in the cellar, cover with fine soil, through which has been mixed a little air-slacked lime, to prevent any decay.

each bouquet with their individual streamers. The bouquets are tied together with a wider ribbon of chiffon—the streamers being of the chiffon ribbon as well. The wide ribbon is so arranged with a knot that it can be easily untied.

As the bride left she scattered her individual bouquets to her bridesmaids—and the bridesmaids in turn scattered their bouquets, throwing them towards the bride, and all there to give the send-off tried to catch these little

PLANT NOTES.

Roman Hyacinths.

The Roman hyacinths can now be forced into bloom very easily, especially if the bulbs were procured early and potted or boxed at once when received. They will require a great deal warmer treatment at this time of the year than they do later on. The early forcing is best done by plac-

the house should be swept out at least once a week, leaving no decaying vegetation in the walk or under the benches. Cleanliness in rose culture is absolutely necessary.

Pansies.

A very good crop to follow the chrysanthemums is pansies, but they should be grown in a house that can be held at a very cool temperature and with lots of ventilation and should not be attempted in a house where

and replace with fresh soil. They will like a good strong soil and if large flowers are desired at least one-third rotted manure should be added. The plants should be of early summer sowing and should be planted eight or nine inches apart. When fresh set give them a good watering and after that, until the plants begin to make a good growth, only water around the plant, or the soil, in which the roots have not yet run, will get sour. The large Trimardeaus Bugnots and giant strains are the best for greenhouse culture. Keep a good watch for aphids and if the house cannot be fumigated owing to other crops, such as violets, syringe with one of the nicotine solutions if these insects appear. If poorer soil is used the plants will need feeding when they begin to bloom in order to get nice large flowers.

Smilax.

The smilax bed should be in cutting now, and when cutting the crop begin at one end and cut all the strings in order. Under no circumstances cut a fine string here and there and leave the rest growing. If this is done the plants that are left with the strings growing will need watering and if the plants that have been cut off are watered the bulbs will rot and the next crop spoiled. After the strings have been cut withhold water for a week or ten days or until the young growths have attained a height of eight or ten inches and then start to water regularly again. By cutting in this manner a succession may be obtained and from now on the grower will always have a crop on hand. Smilax is very easily grown if handled properly but it requires a warm temperature not less than 60° at night and 65° is better. If grown in this temperature the plants will yield four crops in a year. When the second crop is cut off a top dressing of rotted manure will be of great benefit but do not use any fresh manure or the ammonia arising from it will burn the

TABLE DECORATION OF PERLE ROSES AND WHITE LILAC.

Arranged by Schiller at the Chicago Show.

ing the pots or boxes under a bench in a warm house and if possible near the heating pipes, not too close to steam pipes, but they can be placed on top of hot water pipes with a board between the pots or boxes and the pipes. Allow them to stand here until the foliage begins to make quite a little growth and then bring them up to the light. Have one day in the week that is known as "bulb day" and bring up each week as many of each variety of bulb as will be deemed necessary and in this way keep a constant succession throughout the season.

ROSES.

The crucial period for the rose grower is now at hand, and the crop of the winter depends greatly upon the proper treatment of the houses when the shorter days and the cooler nights come on. The plants should have made a good healthy growth and as the weather conditions are now very changeable, constant watchfulness is absolutely necessary. One of the most important things is ventilation and an even temperature should always be maintained. It will be necessary to keep the fires going for the whole twenty-four hours giving air during the day at all times and a little crack of ventilation at night if necessary. Keep the atmosphere bright and while the rose likes a moist atmosphere never allow it grow stale or clammy. Syringe early enough to have the plants dry off by night and if as sometimes happens the morning is bright and later the sun is obscured by clouds it is a good plan to go around them and tap the plants with a light stick dislodging any water that may stand upon the leaves. Keep the beds cleaned from all leaves that drop and

there is other stock that requires heat. They belong to the violas and require very similar treatment to the commercial violets, but will stand a little more warmth than that plant, especially the double variety. Do not attempt to grow them in the soil in which the chrysanthemums have been grown but fill the benches with new soil or if in beds remove the top soil

POEHLMANN BROS. CO.'S PRIZE VASE OF AMERICAN BEAUTY ROSES.

At the Chicago Show.

tender foliage and entirely ruin it. In cutting a bed of smilax the strings at the last end may be left until they begin to flower, but do not allow them to fruit for the fruiting exhausts the strength of the plant and the future strings will not be as fine as they otherwise would be. Be sure and keep the plants strung all the time, and any shoots that get away from the strings wind them in so as to keep them growing straight.

immense stock of asparagus plumosus nanus and adiantum for cutting. Their pot stock covers practically the whole range of demand for a first class retail store. Orchids, ferns, azaleas, stevias and many other plants are seen in profusion.

At their range a piece of work was recently completed that deserves more than passing mention. A babbling brook, which in rainy weather gained the proportions of a torrent, ran

ing and guiding spirit, is large, up-to-date and splendidly equipped. There is a large conservatory in the rear suitable for large palms and other fit plants. The facilities for the rapid loading of wagons are admirable and no expense has been spared to make everything convenient for the rapid transaction of business.

In writing of the personality of these men, we will indulge in no fulsome flattery. Both are admired and respected, both by their neighbors and their competitors in business. Both have always taken an active interest in the Society of American Florists and William F. Gude is one of its past presidents. At present he is president of the Washington Chamber of Commerce, and, like his brother, is active in all that pertains to the welfare of the people of the beautiful capital city.

New Chrysanthemums.

The greater part of the new chrysanthemums which our specialists gave us this season are now almost through blooming and permit us to give our opinion as to their value. Of the ones I have tried I shall grow comparatively heavy the following season, Donatello, Edmund Albe and Elise Papworth. The exceedingly busy summer in our shipping trade, and the building of several new houses made us neglect our chrysanthemums more or less at a time when they should have been taken better care of, but in spite of all this the above mentioned varieties have done well and can be considered "Easy Doers," especially so Donatello, which has given us splendid flowers of good size, color and substance.

Donatello is one of the novelties disseminated by Elmer D. Smith & Co., and deserves a place with every grower to follow up Golden Glow. As the illustration shows the flower is almost round, slightly incurved of a fine deep yellow, foliage up almost to the flower, stem dark brown, the picture of health and did well here from any bud.

Elise Papworth has a fine color, bluish pink, flower medium, incurved and if well handled should make a capital flower for commercial purposes.

Edmund Albe is a big fellow of a pure glistening white, incurved and borne boldly on a good stem with good foliage. We have watched this variety with greatest interest and shall

GROUP OF CHRYSANTHEMUM PLANTS AT MINNEAPOLIS SHOW.

WITH THE GROWERS

Gude Brothers, Washington, D. C.

Though we are living in a time when there is much cynicism and faultfinding, it is a fact that honest, earnest and successful work is appreciated and applauded. We do not mean that all the people are at all times ready to make the welkin ring in honor of successful men, but the plain people, the honest and right-thinking people, whether of high or low degree in the possession of worldly goods, usually show their appreciation of men who have successfully and honestly risen from the ranks to positions of prominence. There are many men in the florist business who have fought their way up to positions of independence and affluence, but for the subjects of this sketch we have selected Adolphus and William F. Gude of Washington, D. C.

Both these men are yet in the prime of life, but they have built up in a comparatively few years a florist business that is the admiration of their fellow citizens and many others who have kept in touch with their activities. Within the past two years, 88,000 square feet of glass has been added to their range, which now comprises a total of 175,000 square feet. At the present time there are 15,000 plants of American Beauty and 25,000 plants of the best varieties of tea roses, the latter including Killarney, White Killarney, My Maryland, Bride and Bride-maid, Enchantress and Perle. They are also extensive growers of carnations, sweet peas and various other stocks for cutting. Recently they have successfully taken up the culture of gardenias. Their chrysanthemum area is extensive and their stock very fine, including many pot plants. They grow an

through their land. It may have been ornamental and inspiring of sentiment, but to the practical eye of Adolphus Gude, who superintends the range, it was not useful. He therefore conceived the idea of putting it in a straightjacket, so to speak. A culvert, 1,200 long and 6 feet in diameter, was built over it. In the construction of this 200,000 bricks and 500 barrels of cement were used. All this did not hurt the brook, and it will enable the Gudes, if they choose, to build another large greenhouse on the site of its meanderings.

The great output of this range is largely sold in their retail store, 1214 F street, Washington. This store, of which William F. Gude is the manag-

CHRYSANTHEMUMS AT THE CHICAGO SHOW.

Experts Said That the Chrysanthemum Plants at the Chicago Chrysanthemum Show This Year Were the Finest Ever Seen in the West. The Effective Group Shown Above Was Made Up of the Exhibits of Various Growers, and Contains Many of Vaughan's Seed Store First Prize Specimens, This Firm Winning 16 of a Possible 17 First Prizes for Chrysanthemum Plants.

certainly grow a good big lot of it next year.

Of last year's novelties, Mrs. W. E. Kelley is just finishing up and is certainly a grand flower of a deep yellow, it takes the eye and is the showiest flower of all the yellows we have ever grown or seen. President Taft is far better this season than last year, we gave it more room and took a later bud, and while last year the neck was too weak to hold the immense flower, we have no fault to find with it this season, and shall certainly devote a large space to it the coming year.

J. L. S.

THE EXHIBITIONS.

Indiana State Florists' Association.

Tomlinson Hall, the scene of the flower show given by the Indiana State Florists' Society, was beautifully decorated for the occasion. Laurel wreathing and southern smilax formed the overhead decoration, while palms and decorative plants grouped in sections added to proper surrounding for a show of this kind. Many of the city's large palms, which adorn the public parks throughout the summer months, were loaned to the society for the show week. About half way between ceiling and floor in the center of the hall was suspended a make-belief airship in small size. Attached to the airship were the flags of many nations. Montani Brother's orchestra of eight pieces was engaged for the week and furnished good music during afternoon and evening. Tomlinson Hall is lighted by gas-light and resultingly many of the fine collections of carnations went to sleep after three or four hours after being brought into the hall. In addition to the above named plants and cut flowers on display, there were some new baskets gotten out by H. W. Fachman, the Excelsior Wire Works man of this city.

On November 10, a banquet was given at the Commercial Club by the Indianapolis Florists in honor of the visitors. About fifty were seated in the banquet hall, and although there was no formal toast list, F. B. Alley, who presided, called upon a number to give short talks. Among those who spoke was J. D. Carmody, of Evansville, the first president of the State Florists' Association, which was organized thirty-five years ago. Fred H. Lemon, of Richmond, expressed the opinion that the florists of that city will ask the State Florists' Association at its next meeting to hold a show in Richmond next year. He proposed a plan to hold a show every year in one of four or five cities which will be formed into a circuit. An orchestra played while the banquet was being served and music was furnished at intervals by a male quartet. A vaudeville team composed of Nilius and Bohnstadt sang and executed a number of fancy steps, which were enthusiastically applauded.

Chrysanthemum Donatello.

The list of guests included the following florists from other cities: E. C. Bissell, of Muncie; G. R. Gause, Hy Shepard, George Fulle, J. A. Evans, Fred A. Lemon, Ray Longnecker and Charles Knopf, of Richmond, Ind.; W. W. Coles, of Kokomo; J. D. Carmody, of Evansville; R. A. McKeand, of Marion; S. Humfeld, Muncie; J. S. Stuart, J. E. Stuart, J. A. E. Haugh, of Anderson; F. E. Dörner, of Lafayette; R. Witterstatter, and J. A. Peterson, of Cincinnati; James Jones, Richmond; William Walker, of Louisville; M. Heller, P. Ollinger and Peter Weiland, of Newcastle; Jacob Schulz, George Schulz, August Baumer, Louisville; B. F. Hensley, Knightstown; H. P. Smith, Piqua, Ohio; P. O. Tauer, Lebanon; E. M. Hyatt, Anderson; Charles Hitz and William Hitz, Madison. The following is a list of the prizes awarded:

Chrysanthemums.

Specimen plant, white.—Roepke & Rieman, first; A. Wiegand & Sons, second.
Specimen yellow.—A. Wiegand & Sons, second; Roepke & Rieman, third.
Specimen pink.—A. Wiegand & Sons, second; Roepke & Rieman, third.

Specimen, any other color.—A. Wiegand & Sons, second; Roepke & Rieman, third.

Six plants, three or more varieties grown in bush form, in 8-in. pots.—A. Wiegand & Sons, second; Roepke & Rieman, third.

Six plants, one variety, white.—Hartje & Elder, second; A. Wiegand & Sons, third.

Six plants, one variety, yellow.—Hartje & Elder, second; A. Wiegand & Sons, third.

Six plants, one variety, pink.—Roepke & Rieman, first; A. Wiegand & Sons, second; Hartje & Elder, third.

Six plants, six varieties.—A. Wiegand & Sons, second.

Six plants, single white.—Hartje & Elder, first; A. Wiegand & Sons, second; Roepke & Rieman, third.

Six plants, single pink.—A. Wiegand & Sons, first.

Six plants, single assorted colors.—Roepke & Rieman, first; A. Wiegand & Sons, second.

Fifty blooms, one variety, white.—E. G. Hill Co., Richmond, first; Roepke & Rieman, second; W. W. Coles, Kokomo, third.

Fifty blooms, 1 variety, yellow.—F. Dörner & Sons Co., Lafayette, first; E. G. Hill Co., second; W. W. Coles, third.

Fifty blooms, one variety, pink.—Roepke & Rieman, first; F. H. Lemon & Co., Richmond, second.

Fifty blooms, one variety, any other color.—F. H. Lemon & Co., second.

Twenty blooms, one variety, white.—E. G. Hill Co., first; Geo. R. Gause, second; Roepke & Rieman, third.

Twenty blooms, one variety, yellow.—E. G. Hill Co., first; Baur & Smith, second; F. Dörner & Sons Co., third.

Twenty blooms, one variety, pink.—E. G. Hill Co., first; Roepke & Rieman, second; F. Dörner & Sons Co., third.

Twenty blooms, one variety, any other color.—E. G. Hill Co., first.

Six blooms, one variety, stems 18 to 24 inches long, white.—E. G. Hill Co., first; Geo. R. Gause, second; P. O. Tauer, Lebanon, third.

Six blooms, one variety, yellow.—E. G. Hill Co., first; F. H. Lemon & Co., second; F. Dörner & Sons Co., Lafayette, Ind., third.

Six blooms, one variety, pink.—E. G. Hill Co., first; Elmer D. Smith & Co., Adrian, Mich., second; P. O. Tauer, third.

Six blooms, one variety, red.—Elmer D. Smith & Co., first; E. G. Hill Co., second.

Six blooms, one variety, bronze.—Elmer D. Smith & Co., first; E. G. Hill Co., second.

Six blooms, one variety, any other color.—Elmer D. Smith & Co., first; E. G. Hill Co., third.

Twenty-five blooms, 25 varieties.—E. G. Hill Co., first; Elmer D. Smith & Co., second; Roepke & Rieman, third.

One hundred sprays pompons, assorted colors.—Baur & Smith, first; Hartje & Elder, second; E. G. Hill Co., third.

One hundred sprays single flowered assorted colors.—E. G. Hill Co., first; Hartje & Elder, second.

Six blooms, seedlings, sports and undisseeded importations, one variety, white.—E. G. Hill Co., Glacier, first.

Six blooms, one variety, yellow, darker than Major Bonnaillon.—E. G. Hill Co., yellow seed-

ling and sweepstakes prize, The Vaughan Silver Cup.

Six blooms, one variety, pink, lighter than Dr. Enguehardt.—Roepke & Rieman, 20-09, first; Elmer D. Smith Co., 454-1-08, second.

Roses.

One hundred blooms, American Beauty.—South Park Floral Co., Newcastle, first; A. Wiegand & Sons, second.

One hundred blooms, Killarney.—A. Wiegand & Sons, first; B. F. Hensley, Knighttown, second. Fifty blooms, Richmond.—Fred H. Lemon & Co., first; A. Wiegand & Sons, second.

Fifty blooms, White Killarney.—E. G. Hill Co., first; A. Wiegand & Sons, second.

Fifty blooms, My Maryland.—A. Wiegand & Sons, first.

American Institute of New York Show.

The seventy-ninth annual fair of the American Institute was a very pretty exhibition when everything was put in place. Chas. H. Totty, Madison, N. J., made an extensive display of hardy chrysanthemums in addition to his fine exhibit of Japanese varieties. He also showed the two new roses, Radiance and Lady Hillington. The former seems to have a pleasing rose pink color and, if its other attributes meet the commercial standard, it should prove a winner. Lager & Hurrell staged a nice collection of orchids, about forty varieties, and all showing some flowers. This firm has many new things, especially in cypripediums. The group of decorative and flowering plants set up by Henry Turner helped materially in enhancing

Ten varieties, one each.—E. McKenzie, first; J. Tansey, second.

Ten blooms, white, any variety.—Alex. MacKenzie, first, with Merza; Geo. H. Hale, second.

Ten blooms any pink variety.—Harry Turner, first, with Mrs. M. Hankey; Geo. H. Hale, second.

Ten blooms any yellow variety.—Alex. MacKenzie, first, with Mary Donnellan; Geo. H. Hale, second.

Ten blooms any crimson variety.—N. Butterbach, first, with Pockett's Crimson; Geo. Hale, second.

Ten blooms any bronze variety.—Harry Turner, first, with Howard Gould; N. Butterbach, second.

Ten blooms in variety.—Harry Turner, first; N. Butterbach, second.

Six blooms any white variety.—J. T. Burns, first, with Mrs. D. V. West; Thos. W. Head, second.

Six blooms any pink variety.—Geo. H. Hale, first, with a seedling; Harry Turner, second.

Six blooms any yellow variety.—Alex. MacKenzie, first, with R. F. Felton; Thos. W. Head, second.

Six crimson.—Harry Turner, first, with Pockett's Crimson; Thos. W. Head, second.

Six bronze.—Thos. W. Head, first, with Rose Pockett; Harry Turner, second.

Six white Japanese incurved.—Geo. H. Hale, first, with Merza; Thos. W. Head, second.

Six yellow Japanese incurved.—Thos. W. Head, first; Geo. H. Hale, second.

Six pink Japanese incurved.—Thos. W. Head, first, with Miss M. Hankey; Harry Turner, second.

Six crimson Japanese incurved.—Thos. W. Head, first, with Pockett's Crimson; James Atchison, second.

Six bronze Japanese incurved.—Harry Turner, first, with Glenview; Thos. W. Head, second.

Six white Japanese reflexed.—Francis Milne, first, with May Seddon; Max Schneider, second.

Six yellow Japanese reflexed.—Geo. H. Hale, first, with Mrs. Thirkell; Thos. W. Head, second.

Six pink Japanese reflexed.—Francis Milne, first; Thos. W. Head, second.

Six crimson Japanese reflexed.—Geo. H. Hale, first, with Pockett's Crimson; Thos. W. Head, second.

Six bronze Japanese reflexed.—Thos. W. Head, first, with Rose Pockett; Wm. Dowlen, second.

Six anemone flowered white.—Wm. Dowlen, first; Geo. H. Hale, second.

Six anemone flowered yellow.—W. Dowlen, first; N. Butterbach, second.

Six anemone flowered pink.—N. Butterbach, first; J. Kennedy, second.

Six anemone flowered crimson.—W. Inglis, first; Francis Milne, second.

Six anemone flowered bronze.—Wm. Dowlen, first; Francis Milne, second.

Six blooms new varieties, pink.—Geo. H. Hale, first, with a seedling.

Six any color.—Thos. Atchison, first, with Driftwood, pale yellow.

Vase mixed anemone flowered.—W. W. Kennedy & Sons, Red Bank, N. J., first; Geo. H. Hale, second.

Vase plumed varieties.—Wm. Dowlen, first; Geo. H. Hale, second.

Vase single varieties.—Geo. H. Hale, first; W. W. Kennedy & Sons, second.

Collection of hardy varieties, 20 vases.—Francis Milne, first; J. O. Everitt, second.

Collection 10 vases.—Francis Milne, first; N. J. Sealey, second.

POEHLMANN BROS. CO.'S FIRST PRIZE VASE OF WHITE KILLARNEY ROSES.

At the Chicago Show.

Fifty blooms, Bride.—P. J. Olinger, Newcastle, first; B. F. Hensley, second.

Fifty blooms, Bridesmaid.—B. F. Hensley, second.

Fifty blooms, any other variety.—Chas. Knopf Floral Co., first.

Carnations.

Fifty blooms, one variety, white.—F. Dorner & Sons Co., first; E. G. Hill Co., second.

Fifty blooms, one variety, flesh.—E. G. Hill Co., first; F. Dorner & Sons Co., second.

Fifty blooms, one variety, light pink.—F. Dorner & Sons Co., first; Baur & Smith, second.

Fifty blooms, one variety, deep pink.—Nic. Zweifel, North Milwaukee, Wis., first; F. Dorner & Sons Co., second.

Fifty blooms, one variety, scarlet.—E. G. Hill Co., first; F. Dorner & Sons Co., second.

Fifty blooms, one variety, crimson.—F. Dorner & Sons Co., first; Baur & Smith, second.

One hundred blooms, assorted colors in one vase.—F. H. Lemon & Co., first; F. Dorner & Sons Co., second.

Specimen nephrolepis Bostoniensis.—A. Wiegand & Sons, first; Pahud Floral Co., second.

Specimen crested form of nephrolepis.—Roepke & Rieman, first; A. Wiegand & Sons, second.

Specimen Adiantum Farleyense.—Pahud Floral Co., first; Roepke & Rieman, second.

Ten plants cyclamens, pots not less than six inches.—E. A. Nelson, first; Roepke & Rieman, second.

Ten plants Gloire de Lorraine begonia, or its type, pots not less than six inches.—E. A. Nelson, first; A. Wiegand & Sons, second.

Display of decorative plants, covering 72 sq. ft. of space.—A. Wiegand & Sons, first; H. D. Shilling, second.

Twenty-five chrysanthemum plants grown to one flower, one variety, white.—Baur & Smith, first.

Twenty-five plants, one variety, yellow.—Baur & Smith, first; Roepke & Rieman, second.

Twenty-five plants, assorted colors.—Roepke & Rieman, third.

Table decorations on vote of visitors.—A. Wiegand & Sons, first, 1,808 votes; E. A. Nelson, second, 1,453 votes; Pahud Floral Co., third, 1,222 votes.

Special Prizes.

The S. A. F. Bronze Medal awarded to the second best exhibit of undissected plant or variety of American origin.—E. G. Hill Co., for new rose, Rose Queen.

Certificate of merit.—Hartie & Elder, for seedling pompon chrysanthemum.

Certificate of merit.—J. A. Peterson, Westwood, Ohio, for begonia, Glory of Cincinnati.

Honorable mention.—H. P. Smith, Piqua, Ohio, for chrysanthemum, Yellow Touse.

A. W. B.

the beauty of the show as a whole. In this group plumed celosias and clerodendron fallax played a distinguished part. Julius Roehrs Co. had a magnificent collection of orchids, crotons and a general assemblage of store ornaments that was also one of the beauty spots of the exhibition.

The quality of the exhibits in the cut chrysanthemum class was superb. Taken altogether the exhibition as a whole was a very pleasing one indeed and well up to the previous records of this society. W. A. Eagleson as secretary and W. C. Rickards as manager used every endeavor to serve everybody to the utmost and succeeded admirably in their efforts. The awards were as follows:

Chrysanthemums.

Twenty-five white.—Harry Turner, first; Alex. MacKenzie, second.

Thirty varieties, one of each.—N. Butterbach, first; Thomas Atchison, second.

Twenty varieties, one bloom each.—Thos. W. Head, first; Wm. Dowlen, second.

POEHLMANN BROS. CO.'S FIRST PRIZE VASE OF KILLARNEY ROSES.

At the Chicago Show.

Plants.

Specimen standard white—Harry Turner, first.
 Specimen pink—Harry Turner, first; Max Schneider, second.
 Specimen yellow—Harry Turner, first.
 Twelve plants, single stem, dissimilar—Harry Turner, first; James Atchison, second.

18 feet in circumference. Other well-known specimens, such as Golden Gate, May Forster, Miss Filkins, Cosmos, Dr. Enguehardt and others, were shown in splendid condition. The large groups of chrysanthemums, with palms and ferns included, were a great attraction. A. J. Smith, gardener to J. J. Mitchell, carrying off

William Currie from Milwaukee, and Mr. Blackwood, Lake Geneva, acted as judges. The society held its annual banquet at the Y. M. C. A. on the evening of November 7, where 120 guests assembled, a very nice course dinner being served by the ladies. The chief speakers of the evening were F. Cransfield, Madison, whose topic was "Reminiscences." W. Currie spoke on the attainments of horticulture; A. J. Smith, secretary of the society, gave a brief history of the work done since the society was organized. Music and singing by Mrs. Dr. Matter were very much enjoyed, and altogether another beautiful evening passed into history.

A. J. S.

Albany Flower Show.

The second annual flower show of the Albany Florists' Club was held in the state armory November 10-13 and on the whole was a larger exhibit than last year. The weather was not so propitious as was desired and considering that fact the attendance was fairly satisfactory.

Some labor devolved upon the judges in making the awards and on the whole their decisions were excellent. Those who passed upon the exhibits were: Edward J. Norman, Lenox, Mass.; Alfred H. Wingate, Lenox, Mass.; W. G. Saltford, Poughkeepsie; Thomas J. Totten, Saratoga Springs; J. R. Fotheringham, Tarrytown, and Dale S. Carpenter, Cohoes. The prize for the handsomest decorated booth, a cup offered by the Albany Florists' Club, went to John J. Berberick of this city. The Danker cup for the best collection of cut orchids went to Alfred Loveless, Lenox, Mass., who brought to this city a collection of 53 varieties well worth going far to see, some of which were rare. Fred A. Danger won first prizes for mantle decoration, vase of 50 White Perfection carnations, six plants of *Oncidium varicosum*, six plants of *Cattleya labiata*, vase of 50 white carnations, specimen *Areca lutescens*, group of plants arranged for effect, specimen of palm, group of palms to occupy 25 feet square, collection of orchid plants, vase of chrysanthemums, arranged for effect, arranged window box of evergreens, vase of 25 white chrysanthemums, best vase of 25 white chrysanthemums in the show with sweepstake honor. W. C. Glockner won first prizes for specimen plant, table decoration, basket of carnations, basket of roses, basket of chrysanthemums, bride's and bridesmaid's bouquets. Henkes Brothers won first prizes for the largest and best exhibit of boxwood trees, collection of ferns, collection of araucarias, vase of 25 pink carnations. The Luther cup for the best collection of 100 carnations, any color, any variety, went to William Hannell, Watervliet, who also took first prizes for a vase of 25 red carnations, vase of 25 rose pink or darker, group of Gloire de Lorraine begonias, vase of chrysanthemums other than white, yellow or pink varieties, vase of 25 Bridesmaids, vase of 25 Pink Killarney, vase of 25 White Killarney. S. P. Shutter, Lenox, Mass., A. J. Jenkins, gardener, received first prize for a collection of cut chrysanthemums and Alfred Loveless, second. A. E. Whittle of this city had on view some very choice roses and received first prizes for vases of 25 Carnot and Kaiserin Augusta Victoria.

R. D.

GREEK TEMPLE AT WASHINGTON FLORISTS' CLUB FLOWER SHOW.

Six plants, one variety—Harry Turner, first.
 Group of flowering and foliage plants—Harry Turner, first.

Collection of orchids—Lager & Hurrell, first, with a group comprising over 40 varieties in bloom. Conspicuous in this exhibit was the new *Cypripedium*, *C. insigne* Hurrellianum, a very charming variety.

Roses and Carnations.

Twelve American Beauty—L. A. Noe, first.
 Twenty-five pink—L. A. Noe, first, with Bridesmaid; Francis Milne, second.

Twenty-five white—L. A. Noe, first, with White Killarney; Francis Milne, second.

Twenty-five red—L. A. Noe, first, with Richmond; Wm. McBean, second.

Twenty-five and other color—Francis Milne.

Three varieties carnations, 25 of each—Geo. H. Hale, first; J. T. Burns, second.

Vase 25 blooms, one variety—J. T. Burns, first, with Enchantress; James Atchison, second.

Best bunch violets, 100 blooms—Harry Turner, first; Max Schneider, second.

Special Prizes.

Special awards were accorded to Geo. T. Schunmeier, Baldwins, N. Y., for collection of sweet peas; Thos. Meehan & Sons for hardy chrysanthemums; Wm. Cordes for specimen chrysanthemum plant, Garza, and one for specimen plant of Brutus; Geo. H. Hale for collection of seedling chrysanthemums; C. D. Schaeffer for collection of anemone flowered chrysanthemums; J. O. Everitt for specimen Begonia Gloire de Lorraine; D. E. Roy for pompon chrysanthemums; Harry Turner for specimen plants of chrysanthemums in bronze, yellow and pink; also for basket of plant; Chas. H. Totty, Madison, N. J., for each of the following: New rose, Lady Hillington; carnation, White House; carnation, Princess Charming; collection of chrysanthemum varieties; collection single and pompon varieties, new; collection new Japanese chrysanthemums; collection Chinese incurved varieties, new; Julius Roehrs Co., Rutherford, for group of ornamental plants.

The judges were Eugene Dailledouze, Geo. Middleton, James Duthie, David MacFarlane, John McNichol.

Lake Geneva Gardeners' Association.

The sixth annual chrysanthemum exhibition of the Lake Geneva Gardeners' and Foremen's Association was held November 7-8, and was a pronounced success. The quality of the exhibits exceeded by far those of any other year, the large blooms, such as Dr. Enguehardt, Mrs. Weeks, Yellow Eaton, Golden Dome, Col. D. Appleton, Timothy Eaton, Major Bonnaillon and many others were the best that were ever exhibited at Lake Geneva. The specimen chrysanthemum plants were one of the chief attractions of the show. A large single variety Catherine Livingston, which is a product of Lake Geneva, was shown by A. J. Smith, the plant measuring

the first prize; Joseph Krupa, gardener to N. W. Harris, being second, and Axel Johnson, gardener to R. T. Crane, third. In the single flowering chrysanthemum groups A. J. Smith, was first, Wm. P. Longland, gardener to C. L. Hutchinson, second. A very creditable showing was made by Wm. Longland, in groups of anemones and pompons. A splendid specimen plant of *Ficus Parcels* was shown by A. J. Smith, J. Krupa being a very close second, with a perfect specimen of *Diffenbachia magnifica*. A. J. Smith and J. Krupa contested very keenly in groups of foliage plants. Roses, carnations, lilies, orchids, and Gloire de Lorraine begonias were shown in fine condition. The vegetable collection surpassed anything shown here before. The A. T. Boddington prizes were won by Robt. Sampson, first; A. J. Smith, second; Joseph Krupa, third. The Vaughan prizes, for the best vegetable collection, were won by Joseph Krupa, first; A. J. Smith, second; Robt. Sampson, third.

THANKSGIVING BUSINESS.—A postal card telling about your Thanksgiving business, mailed any time this week, will reach us in good season for next week's issue and this information will interest many of our readers.

THE La Crosse Floral Co., La Crosse, Wis., advises that our Minneapolis flower show report be corrected as follows: "In the 12 pink we received third on A. J. Balfour, also on 50 Windsor we received first prize, not the Chicago Carnation Co. On 100 white we had Perfection and no White Enchantress exhibited."

American Carnation Society.

CARNATION REGISTERED.

By P. M. DeWitt, Bridgewater, Pa.—Pennsylvania—Boston Market X Harlowarden; color cerise, lighter than Mrs. Lawson; size of flower, two and one-half to three inches. Free from all disease; vigorous in growth. Long wiry stem. Blooms all winter and seldom splits calyx. Very fragrant and one of the best keepers.

A. F. J. BAUR,
Secretary.

Experiment Stations and Horticulture.

Commenting upon the paper by W. N. Rudd on the "Value of the Experiment Stations to Ornamental Horticulture" which was read before the Society of American Florists at Rochester, N. Y., August, 1910, and printed in THE AMERICAN FLORIST issue of October 15, page 569, the following have been received:

I have just read thoughtfully the paper by W. N. Rudd, read before the Society of American Florists at Rochester, N. Y. It seems to me that Mr. Rudd has sounded the key-note to a very important matter. I think he has entirely the right view of the situation.

Personally, I see no reason why certain lines of investigation work in behalf of the florist might not be as potent of beneficial results as has been the investigation work in behalf of the orchardist, the grape grower, the corn grower, or the dairyman.

As evidently was appreciated by Mr. Rudd from the fair way in which he states the matter, the Stations are pushed for the solution of agricultural problems faster than the funds at hand and the number of workers are able to take them up. Naturally then in the past those lines of work have been taken up by the Stations which are more strenuously urged by the largest number of agricultural constituents; or of which there seems to be to the Station workers the greatest need of investigation. I believe that the Experiment Stations could adapt their efforts to working out many problems for the florist, provided funds and men were available for enlarging the work.

J. C. WHITTEN.

Columbia, Mo.

Plants in Hot Beds.

ED. AMERICAN FLORIST:

I have a hot bed 7x14 feet and expect to build more. Can you inform me what kind of plants I can raise and the best manner in which to proceed? Any information you can give will be appreciated.

C. D. E.

In the first place, if C. D. E. contemplates building more hot beds, he will do well to build them six feet wide instead of seven, thus making it possible to use the standard sized sash which is six feet by three. These are easier to handle for one man, last longer, and there is less breakage.

It is not stated whether it is desired to raise vegetables or flowers, but we will assume it is the last named. The great value of a hot bed being the ease with which seeds of annuals, perennials and many other plants can be had, most seeds germinate better in this way than in a greenhouse. To be sure of sufficient heat in the early part of the year, the earth should be excavated to a depth so that there are four feet from the top of boards above ground to the bottom. This will allow for at least a good three feet of fermenting material, well tramped down and made solid. Fresh horse manure is the best for early work, as this gives most heat, but if for later use, a third of leaves may be added. In March, however, it is hardly possible to get the temperature too high. A covering of four to six inches of good soil sifted fine if seeds are to be sown may be put on at once, waiting a week or so for

the whole to warm up, with a little ventilation left at the top to assist the heat in rising. It is most important that the excavation be drained, or water will get in and no heat be generated. After the soil becomes warm, draw drills three inches apart, sow the seeds and cover, if the soil be very wet, cover with sifted dry soil, very little air will be needed until the seeds germinate, it may be necessary to cover up if the nights be cold, using the regular hot bed mats. After the plants appear above ground, careful ventilation is very important, it is the only drawback to their use, for if the tender seedlings are neglected for an hour or two during bright sunshine, all will be injured. If the seeds are sown in rows it is an easy matter to keep out the weeds, and when the seedlings are large enough to transplant, have more frames ready, by this time cold frames may be safe if covered at night, or a little manure be added for warmth. With flower seeds it is generally possible to so harden off the seedlings by the addition of air at night to encourage root growth and keep the top sturdy and hardy until planting out time.

Tomatoes, egg plants, peppers, beets, lettuce, cauliflower, cabbage, celery, parsley and a host of other plants that will all bear transplanting may be started in a hot bed as above, set out when favorable weather comes, and materially lengthen the season of garden flowers and vegetables. Of flower seeds practically all kinds, asters, zinnias, verbenas, heliotrope, cannas, dahlias, snapdragons, stocks, delphiniums, petunias, nicotianas and in fact all flower seeds with the exception of such as do not bear transplanting as poppies, mignonette and sweet peas.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Elmer D. Smith announces the committees to examine new chrysanthemums for the ensuing year which are as follows:

Boston, Mass.—Wm. Nicholson (chairman), James Wheeler, Alex Montgomery. Ship flowers to Boston Flower Market, C. Park street, care of chairman.

New York.—Eugene Dailedouze (chairman), Wm. Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., 55 Twenty-second street, care Eugene Dailedouze.

Philadelphia, Pa.—A. B. Cartledge (chairman), John Westcott, S. S. Pennock. Ship flowers to A. B. Cartledge, 1514 Chestnut street.

Cincinnati, O.—R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott Flower Market, care janitor.

Chicago.—J. B. Deamud (chairman), Geo. Asmus, W. H. Kidwell. Ship flowers to J. B. Deamud, 51 Wabash avenue.

Shipments should be made to arrive by 2 p. m. on examination days to receive attention from the committee. must be prepaid to destination and an entry fee of \$2 should be forwarded to the secretary not later than Tuesday of the week they are to be examined or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees provided the raiser has given them

two years' trial to determine their true character. Special attention is called to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 8, 15, 22 and 29 and November 5, 12, 19 and 26.

WORK OF EXAMINING COMMITTEES.

Boston, Mass., November 5.—Pioneer light pink Japanese, fringed petals, scored 88 points commercial scale and 88 points exhibition scale; exhibited by Alfred J. Loveless, Lenox, Mass.

Chicago, November 12.—Gerald Haschke red reflexed, scored 85 points commercial scale; exhibited by Mrs. B. Haschke, Dayton, O.

Chicago, November 19.—Thanksgiving Queen, white reflexed, scored 88 points commercial scale; exhibited by Elmer D. Smith & Co., Adrian, Mich.

Cincinnati, November 19.—Thanksgiving Queen, white reflexed, scored 89 points commercial scale, and 87 points exhibition scale; exhibited by Elmer D. Smith & Co., Adrian, Mich.

"Wonders of the Harvest."

Given by Mrs. J. C. Vaughan at the harvest dinner of the Forestry Class of the Chicago Woman's Club, November 18, 1910.

We are celebrating today the miracle of the year, the Harvest. In truth, it is not one miracle but a cycle of miracles beginning with the seed and ending with the escape of the seed from the fruits. This cycle of miracles is related to other miracles, more or less remote yet powerful in influence upon plant life.

A seed has a few minute, living cells, short-lived in some seeds, so that opportunity for growth must be immediate or they die, and enduring in others through many, many years. Here are two miracles, life itself, and the persistence of life in exceedingly narrow bounds over stretches of time. Heredity is a third miracle of the seed. The cells in seeds seem alike, the soil and climatic conditions for seeds planted in one neighborhood would be alike, yet the cells of one seed construct a rose, true in every remotest characteristic to the rose type; another not far off constructs an onion, true to the onion type, and yet another an oak-tree, true to the oak type. They never forget, they never substitute, they never associate one with the other. How do they know the pattern so perfectly? Is it imprinted in the cell; if so, how, when and where? What or who made the first imprint? Here are three miracles of the seed beyond the ken of any man. The bed of this seed may be the disintegration of mountains, the grind of glaciers, the bottom of some long-forgotten sea. Down in that dark bed, the seed breaks its bonds, and, careless of how it lies, unerringly turns its roots downward and its leaves upward. When its leaves reach the air and light and the seed leaves no longer act as nurses feeding the baby plantlet, earth, water and the invisible air feed it. Do you want to know how generously the air feeds it? Char the trunk of a great tree, the charcoal column is the visible manifestation of the carbon the invisible air gave to it.

Vapor from distant seas, lakes, rivers, ponds and dewy meadows is driven hitherward by any of the four winds out of the four quarters of the globe, is condensed into water and falls as rain for the refreshment and nourishment of our plant. It fell upon it through the silent, invisible law of gravity. Our plant is heated, lighted and energized by yonder sun, out there in the infinite spaces hanging on nothing, whirling around an orbit with immeasurable speed but held in space, fixed in its orbit by the silent invisible laws of attraction.

Our plant feeds on mineral matters in earth, air and water. It digests and assimilates them, makes combustible out of incombustible matter, organic out of inorganic matter and transforms indigestible mineral into nutritious food for all the animals of the world. Without this work life would soon become extinct and earth a barren waste. Is not this a matchless miracle?

Roots have their mysteries of structure, use, selection of food, movement and reciprocal bacterial advantages. Trunks of trees with wide outstretching branches, the product of a tiny seed, are marvels. Sap-circulation, which is often rapid and enormous,

entirely unlike blood circulation in arteries and veins, is a curious mystery.

The leaf is a whole book of marvelous stories—its structure, its chlorophyll (leaf green), which with light energy becomes the starch factory of the world; its impervious epidermis, cut through to the air-spaces below by mouths called stomates, 400 to 100,000 of them to a square inch, billions on leaves of a moderate-sized tree, each stomate with two lips called guard-cells able to open or close according to the supply or lack of supply of water; the enormous transpiration of water, five or six barrels of water evaporated from one tree of fair height and good leafage, in one warm, sunny day; the cunning leaf arrangements for light and rain drainage, the autumn coloring, leaf-cleavage, an amputation without a wound, though leaving a scar, are all wonder stories in this wonderful book. The transformation of branch and leaves into a flower of lovely shape, of varying tints and colors and of sweetest fragrance, is a transformation scene beyond the brain of man to conceive. The invitation of the flowers to the bees, butterflies and other winged things to attend the wedding feast and marriage rites of the flowers is an astonishing and fascinating romance. An egg soon develops a baby plantlet locked in a little cradle, the seed, for a shorter or a longer rest, which is a new creation, and as I said before, a triple miracle.

The transformation of the lovely flowers into fruits of all kinds, akenes, capsules, pods, nuts, shining grains, the full corn in the ear, the purple grape, the rosy-cheeked apple, the yellow pumpkin, the red, red pepper and all the other nourishing and luscious fruits is another astounding miracle. We must not forget the underground stems and roots. They bring to the harvest marvelous tales of work and methods as well as their quota of tubers, bulbs, ground-nuts and edible roots. What bounty! What generosity! Our plants worked independent enterprises; there was no union of labor, each worked by himself from sunrise to sunset on one piece of work and from sunset to dawn on another piece and at the harvest time laid down the product of hard, unintermittent work at the feet of the sower of the seed as a free gift, almost as free as the rain, sunshine and air.

Our plants are great mathematicians. They not only know that complex leaf-arrangement on the stem, which involves fractions, but they also know the multiplication table by heart, for at the harvest time do they not multiply by 20's, 40's, 60's and sometimes even by 100's?

The harvest, Janus-like, looks behind and before—the backward look is a history of the year's work, the forward look is a prophecy of the future with many of the little prophets "in the hand" shut up in the fruits, clamoring for escape and distribution over the earth; eventually, if they have not already done so, they will take flight on wings of various shapes, float on hairs for rafts, catch on to all manner of moving things by all sorts of hooks and crooks and will call to the winds, the waters, the birds and burrowing things to be their

carriers. Man, who does things in big, lordly fashion, will send them, in packetfuls by many routes, to all parts of the known world.

The ultimate source of many of these miracles, like the ultimate atom, has never been traced by man. Perhaps they were in the beginning when God created the Heavens and the Earth, and set His infinite laws in action.

European Horticulture.

Roses Pressed Into Medical Service.—At the London Medical Exhibition at the Horticultural Hall Westminster, roses were to be purchased in tablet form, and were guaranteed to possess death-dealing properties to the microbes of typhoid, influenza, diphtheria, and pneumonia. "Formarose" is the invention of Wainwright Atkinson, who a year ago evolved the massolette, or sour-milk bonbon. A first sniff of "Formarose" produces an odor of roses, but this is quickly succeeded by a pungent antiseptic flavor. It is interesting to learn that roses have, apart from their ornamental use, a utilitarian and medicinal value.

John T. Priestley, of Bristol University, a descendant of the famous scientist, the discoverer of oxygen, gave a lecture before the Royal Horticultural Society on August 30, on the effects of electrical discharges on plants. Mr. Priestley, in cooperation with Professor Newman, has carried out a series of practical experiments in electrical discharges on plants at the farm of Mr. Bomford, of Evesham, with most encouraging results. The method described by Mr. Priestley consists of the conveyance and dispersion of a high voltage electric current over growing produce both outdoors and in greenhouses. The apparatus is so constructed as to send showers of electric sprays over a portion of a growing wheat field, a vegetable garden, and a conservatory 100 feet in length, constructed for the cultivation of cucumbers. The results have been satisfactory, and in some respects surprising. Carefully tabulated, they showed in respect to the outdoor experiments that wheat gained 29 per cent in the process, mangolds 18 per cent, and strawberries 25 per cent. To illustrate the acceleration of growth under the treatment some striking lantern slides were exhibited. In one a boy was shown standing in front of a hawthorn hedge which had been untouched by the electric sprays. The tips of the branches just reached the boy's shoulder. The next picture showed the same boy and the same hedge after two weeks of electric treatment, when the branches were 2 feet or 3 feet above the boy's head. The results in the conservatory were quite as remarkable. Mr. Priestley claimed, as the outcome of his experiments, two definitely ascertained facts—that the growth of the plants is accelerated, and that the plants become strengthened and more able to resist disease. In reply to a question by one of the audience, Mr. Priestley said the keeping qualities of the electrically grown plants were now under observation. So far as he had been able to determine, the wheat kept longer, but mangolds did not keep so well. The strawberries were not so large as those untreated, but they were sweeter and of richer flavor.

AMESBURY, MASS.—H. G. Leslie is erecting a large addition to his greenhouses on Main street and a new boiler room is being built.

GOOD DEMAND.

The weather for the last week, while not stormy, has been cold and lacking in bright sunshine which has materially reduced the cut on all lines of flowers except chrysanthemums, which are still coming into the market and will be the mainstay for large showy decorations for Thanksgiving. The approaching holiday has called for a large output of all kinds of flowers and has caused a general advance in prices in all the better grades and has cleaned up the market of the best salable stock. Some very handsome blooms of W. H. Chadwick, Golden Chadwick and the beautiful dark golden Nagoya chrysanthemums are to be seen and very fine blooms of both Timothy Eaton and Yellow Eaton are still to be had, but Major Bonaffon is still the stand-by for the medium-sized blooms in yellow, and large quantities of this popular variety have been on the market all the week and can be obtained in all the different grades. Pompons in all the shades are having a good call and very beautiful sprays of the yellows and bronzes are to be found at all the stores. Roses are of extra fine quality but the greater percentage of the stock coming in is of the better grades and a shortage of short-stemmed flowers is noted everywhere. American Beauties, Killarneys white and pink, My Maryland, Richmond and Mrs. Jardine are to be had but it looks at this writing that there would hardly be enough to fill all the orders for the stock that is coming in is being shipped out as fast as it arrives and the market cleaned up remarkably close at the end of last week so there is no surplus to draw upon. Carnations are short of the call and there is really a scarcity of all grades and the price has been advancing

from day to day. The blooms that are coming into the stores are of good quality and the demand has been above the supply for the last few days so all the stock is freshly picked. Violets are scarce; the immense call in the East has prevented many shipments from that quarter and the home-grown stock is not nearly enough to fill the orders and the prices are climbing. Sweet peas are of very fine quality and both white and pink are having good sale at good prices. Marguerites, Paper White narcissus and stevia have become standard offerings and a great help to fill the cheaper orders. The green market is plentifully supplied with splendid stock of all kinds. The holiday pot plants have made their appearance in the stores and some very fine plants of begonia Gloire de Lorraine and cyclamen are being shown at the retail stores.

NOTES.

Anton Then of 2219 Winnemac avenue has been confined to the house with a severe cold and is under the care of a physician. A visit which was made to his greenhouses this week found the stock in splendid condition; 15,000 plants of poinsettia were a grand sight and the Christmas peppers, Jerusalem cherries and cyclamen were in fine shape. The two seedling carnations, No. 291 scarlet, a cross of Nelson and White Lawson with Lawson habit and Nelson stem, and No. 41 white, a cross of Lady Bountiful and Enchantress, were in elegant shape. These two are both good growers with fine stems and never split their calyxes.

The Chicago Pump Co., 1061 Fulton street, have invented and placed on the market a condensation pump used for pumping steam heating returns into the boilers, which at the same time creates an intermittent vacuum on the

heating system which draws hot steam through it, thereby saving, as they claim, 20 to 50 per cent of coal. It operates automatically and requires no attention. A bulletin which fully describes the system has been issued and will be mailed to anyone on request.

Wiator Bros. are cutting an exceptionally good grade of roses, with American Beauties and Killarneys showing up remarkably well. Chrysanthemums are also arriving in splendid condition and some magnificent blooms of Nagoya were very noticeable. This firm expected that their cut in chrysanthemums the present week would be in the neighborhood of 12,000 blooms.

The high-grade stock that enabled the Poehlmann Bros. Co. to secure so many awards at the fall shows could be seen at the store this week, where it arrived in large shipments for the cut at the greenhouse is exceptionally good for the season. The lily of the valley, of which this concern makes quite a specialty, is of the finest quality.

Working for the home beautiful the Chicago Woman's Club has organized a class in landscape gardening. On November 14 Jens Jensen addressed the club on "Study of the Relation of the Lot to the Street, Home Planting, etc." Papers and talks will be delivered each month by the following: W. A. Peterson, John Higgins, O. C. Simonds, W. N. Rudd and Mrs. Annette McCrea.

At Vaughan & Sperry's we noticed an exceptionally good grade of roses, with white and pink Killarneys and American Beauties showing up remarkably well. A good crop of roses is now coming on, which will give them a large quantity for the holiday trade. A shipment of boxwood was received November 21.

We make these a specialty.
Can supply them all the year.
Once tried you will have no other.

The Chicago Rose Co. have about completed the remodeling of their store, which now presents a very pleasing appearance. A partition will divide the wire-working from the cut flower department and when completed will give them plenty of room in each to handle the business of the coming season.

Bassett & Washburn have still a fine lot of their large chrysanthemum blooms, for which they are filling a large number of orders. Business is very good and their prize-winning American Beauty roses and carnations are appreciated by their trade, who report their receipt in fine condition.

Notwithstanding the scarcity of violets, H. Van Gelder of Percy Jones' is receiving large shipments from his growers of the New York double violets which are arriving in splendid condition and are of as good a grade if not the best to be seen anywhere on the market.

Among the high-grade stock which the J. B. Deamud Co. is shipping to its customers, particularly noticeable were the superb blooms of W. H. Chadwick and Golden Chadwick chrysanthemums which were as finely grown as is often seen away from the exhibitions.

E. B. Washburn and wife witnessed the Maroon-Wisconsin football game at Madison-November 19. Mr. Washburn was no doubt pleased over the victory of the Badgers as he was a former student at the Wisconsin university, graduating a few years ago.

Roses are arriving in splendid condition at J. A. Budlong's, and an exceptionally good grade of American Beauties and Marylands were seen this week. This firm is filling a large number of orders for fragrant home-grown violets.

The Geo. Wittbold Co., 737 Buckingham place, is receiving a large number of orders for Dracena Fragrans, Kentias, Poinsettias, Primulas and Lantanas. A complete price list of decorative stock has been issued and will be mailed to anyone on request.

The illness of J. P. Risch still keeps him away from the store, where he is greatly missed by the trade. The Killarney and Richmond roses now being received from the Weiland & Risch greenhouses are of extra fine quality.

Hoerber Bros. are receiving an exceptionally good grade of stock from their greenhouses among which their White and Pink Killarneys and Brides

show up remarkably well and rival any seen in the market.

Peter Reinberg returned November 19 from Duquoin, where he spent the past week hunting. This firm is now cutting an exceptionally good grade of Richmond and other leading varieties of roses.

Joseph Mendel, West Eighteenth street, who was elected county commissioner at the recent election, will enter upon his duties December 5.

The Chicago Carnation Co. is enjoying a very brisk business and the stock that is received daily at the store is disposed of at an early hour.

Kennicott Bros. Co. is receiving an excellent grade of Major Bonaffon chrysanthemums that are bringing good prices.

At Chas. W. McKellar's we noticed an exceptionally good grade of orchids in all the seasonable varieties.

Zech & Mann filled a large number of orders for white and pink Killarney roses the past week.

John Kruchten is receiving an exceptionally good grade of Maud Dean chrysanthemums.

Visitors: H. M. Burt, Jackson, Mich.; Ed. Amerpohl, Janesville, Wis.; A. Siegel, St. Louis, Mo.; C. Rice of Rice Bros., Minneapolis, Minn.

Chicago Bowling,

Some very interesting games were played at Bensinger's alleys, 118 East Monroe street, November 16, when the Florists' Club Bowling League resumed playing after two weeks' intermission. Allie Zech leads the individual average list, with A. Fischer second and T. C. Yarnall third. The following table shows the numbers of games won and lost by each team to date:

Won. Lost.		Won. Lost.	
Orchids.....15	6	Roses.....9	12
Carnations.....10	11	Violets.....8	13

The following table shows the individual and team scores for games played November 16:

Port Dover, Ontario.

MANUFACTURED BY

Aphine Manufacturing Co.
MADISON, N. J.

St. Louis.

All kinds of stock were scarce at the end of the week and Saturday and Sunday were like Christmas. Carnations jumped to four and five cents—in some instances to six. Roses, violets and even chrysanthemums stiffened in price. The outlook for Thanksgiving, however, is, with bright weather, there will be enough flowers to go around. Perhaps the growers are holding back; if so, they will undoubtedly be the losers.

NOTES.

The chrysanthemum show at Shaw Garden is drawing well. Five hundred varieties are shown and over 2,000 plants. Some of the plants have as many as 2,000 blossoms on them; one of these, the Anna, has white blossoms with yellow center.

We Offer Daily our Prize Winning Roses and Carnations

Pronounced by judges at the **Chicago Flower Show** as **exceptionally good** we securing **19 Awards**. Stock exhibited was taken from our **regular cuts** and as such we are able to supply customers with the **selfsame stock** which in turn will surely satisfy your customers. Heavy supply of

Beauties, Maryland, Jardine, Richmond, Pink and White Killarney, Field, Kaiserin, Maid and Bride. They are sure to give satisfaction. None better in the market.

Carnations. All the leading varieties. You will find them to be larged sized flower and long stem grade, and of a quality far above the average to be seen in this market. Try them and be convinced.

Violets. Fragrant home-grown singles, you will find these hardy enough to stand long distance shipments. Can also supply the **New York or Hudson River Violets**, but owing to length of time requiring for these to reach Chicago, we can only fill orders for such Violets at buyers' risk.

Plenty of other Seasonable Stock.

We
Strive
To
Please.

A Specialty.....

WHOLESALE
GROWER OF

CUT FLOWERS

Plenty of
Stock to
Meet all
Needs.

Fred Ammann will now have a retail market for his fine stock. The stores at Edwardsville, Alton and East St. Louis will use a goodly portion.

M. M. Ayers has a splendid show of cut flowers. Some of the finest Richmonds and Killarneys were seen here.

At H. G. Berning's, a great assortment of fine chrysanthemums were on hand and sold well.

The Riessen Floral Co. have very large advance orders for Thanksgiving.

W. C. Smith Wholesale Floral Co. is headquarters for California violets. Geo. Waldbart has a splendid show of plants and cut blooms.

John Barnard is with Grimm & Gortly.

Cleveland.

CLOUDY WEATHER.

Nearly two weeks without the least sign of a ray of sunshine has had its effect upon the market. Stock of all kinds is decidedly short. Violets have been very scarce, as these flowers need plenty of sunshine, and carnations also are coming in in lesser quantities from day to day. Roses of all kinds are short of the demand, particularly in the shorter stemmed stock, which is used for funeral work. American Beauties had a good call, both long

and short stem flowers cleaning up nicely. Some good chrysanthemums are arriving. Major Bonaffon, fine White Cloud and Dr. Enguehardt, sweet peas are being received in small quantities, but with a few days of sunshine they should be plentiful. A few white narcissus are on the market. Orders for Christmas supplies are coming in rapidly and help to keep everyone busy.

NOTES.

Frank Friedly gave a chicken dinner at his home on November 15. Those present were F. Griffin, H. Knoble, Guy, Herb and Geo. Bates, C. M. Wagner, Geo. N. Smith, M. Parks, F. Schoen, Chas. Russell and C. Gibson, besides Mr. Friedly's father and two sisters. After this royal feast, to which they one and all did ample justice, a quiet game of cards was enjoyed by all. The occasion was the celebration of the host's birthday and all wished him many happy returns of the day.

We would again respectfully call attention to all the florists of Cleveland and vicinity to the meeting to be held Monday, November 28, at the Cleveland Florists' Club rooms, 2610 Detroit avenue, at 8 p. m., for the purpose of forming a new club and changing the present quarters to a more central location. This meeting is of

great importance to every florist, and every florist ought to make it his business to attend.

The florists from Alliance have challenged the boys from Cleveland for a return bowling match to be played in Alliance some time before December 15 for a \$15 side bet as an inducement to come. Best two out of three games.

Sonny Kuchner spent a few days near Scotland hunting rabbits. He shot enough to make a few square meals, but he is not yet satisfied and says he is going to try again.

John Blechschmid was out on a hunting trip this week, and was quite successful and enjoyed the trip.

C. F. B.

Cincinnati.

BUSINESS GOOD.

The usual depletion of the supply of stock before the holidays is now taking place and a firm demand has caused most lines to clean up daily. Some prices accordingly have advanced slightly since the last writing. In fact as early as Saturday some chrysanthemums which, of course, form the bulk of the market, especially such as Major Bonaffon, sold at about holiday prices. The rush and eagerness of the buyers helped keep these prices up. Still there was noth-

ing for the buyers to get excited about for there was plenty to go around. When we come to analyze these prices, though they may seem high for this year, they are, however, barely the normal prices of other years. The other leaders among chrysanthemums are Dr. Enguehard, Mrs. Jerome Jones, White Bonnaillon and W. H. Chadwick. Roses, especially pink, are on the short side. American Beauties clean up quickly. Carnations, whether because the growers are holding back or because the plants are naturally off crop and not blooming, are insufficient to meet the demand. Lilium Longiflorum, too, are short in supply. More lily of the valley and violets could have been used. Limited quantities of very fine sweet peas are offered. A sufficiency of green goods of all kinds is on hand to meet every request and the quality is of the best.

NOTES.

Geo. Corbett is sending in some fine W. H. Chadwick chrysanthemums to J. M. McCullough Sons Co. His carnations too are good. The latest improvement at these greenhouses is a shed built entirely of brick.

J. A. Peterson's greenhouses are pretty sights nowadays. Bench after bench of the new Begonia Glory of Cincinnati are just coming into bloom. The effect is one of a solid mass of pink.

The pompons which W. A. Linne-mann of West Price Hill is consigning to C. E. Critchell have been finding favor with the buyers.

Murphyville is as usual right on the job in consigning Major Bonnaillon to Wm. Murphy for Thanksgiving.

Visitors: A. C. Heberling, Georgetown, Ky., and Milton Alexander, representing Lion & Co. of New York.

The Development of Sweet Peas.

During the past quarter of a century, floriculture has developed ideals very different from those which guided the work of the older florists. The precision of form and marking which they regarded with so much enthusiasm is no longer considered of paramount importance. Thus, the old show pansy, the show dahlia, the laced pink, the stage carnation, the ranunculus, the show tulip, the gold-laced polyanthus, and the hooded-flowered sweet pea are now seldom seen. Certainly they are not abandoned, for some of them are still lovingly grown by old enthusiasts, though some are in process of being driven out by new-comers, and we see the operation going on under our eyes, especially in the cases of dahlias and sweet peas. It would be a mistake to say that the waved form has entirely displaced the older form of sweet pea. The latter is still largely grown, but not by growers who count in the forward march of things. Visits to the shows of the National Sweet Pea Society are sufficient to demonstrate that the proportion of waved to hooded flowers is as 10 to one. This change has been effected in less than 10 years. At the bicentenary sweet pea show at the Crystal Palace in 1900 there was

not such a thing as a waved sweet pea. Has any flower, we wonder, ever undergone so hasty a metamorphosis? Our present object is to consider the principal color sections into which sweet peas are grouped, with a view to showing the nature of the work that still awaits raisers of new varieties.

The section having, for the moment, the greatest fascination for raisers, is the so-called yellow and buff section, represented by Clara Curtis, a waved flower of primrose tint; James Grieve, primrose, with an upright standard; Mr. Collier, a hooded flower; and Dora Breadmore, a buff-colored flower. It is the ambition of every raiser to obtain a yellow sweet pea, and in this section we find, at the present moment, the nearest approach to yellow, but it must be admitted that James Grieve, which gives the deepest tone of color, is a long way from being a pure yellow. It is well known that in the sweet pea there is no such thing as yellow sap-color, and this it is which, as it would seem, makes the outlook so hopeless. The primrose tint in all so-called yellow sweet peas is produced by chromoplasts. Now, unless yellow sap-color can be introduced into the constitution of the sweet pea by hybridisation, it will be difficult to in-

tensify or deepen this color. A bolder flower than Clara Curtis, and one possessing rather better substance, should be the aim of raisers working with the material at present available.

In the white-flowered section, the leading flowers are Etta Dyke, waved; Nora Unwin, less waved; and Dorothy Eckford, hooded. There is room for a waved flower of decidedly better substance than Etta Dyke—shall we say larger, of better substance and not quite so crinkled? Nora Unwin does not quite fill the bill. In some respects it is better than Etta Dyke. It never has that excess of crinkling sometimes characteristic of Etta Dyke, which spells confusion in a bunch; but, being of the Unwin type, it can never have the effectiveness of a true Spencer. Possibly a cross between the two would produce a valuable variety.

Amongst pink flowers, Countess Spencer, the forerunner of the Spencer race, has many closely-allied forms. A pale form is Mrs. Hardcastle Sykes and a deeply-colored variety is the apparently unfixable Audrey Crier. Countess Spencer on a cream instead of the original white ground develops into Constance Oliver, Mrs. Henry Bell, Mrs. Hugh Dickson, and a host of other names. There is not much room in this class for further development except to attain fixity, if that is possible, in flowers of the Audrey Crier type, one of the most beautiful forms of sweet pea.

In the orange shades, Helen Lewis, waved; St. George, slightly waved; and Miss Willmott, hooded, are the selections of the Sweet Pea Society. Two or three new-comers will contest with Helen Lewis the proud position of being top in the society's election—Edrom Beauty, fertilized by the N. S. P. S. last year, Earl Spencer, and Nancy Perkin. The two latter are much alike; in fact, there is not room for both. Their color is a rich orange-salmon, which is admired universally; the same color appeared in the old Henry Eckford, but the new-comers

are waved. To make greater confusion in this color class, we have Stirling Stent and Orange King appearing this year, both having gained an award from the R. H. S., whilst Stirling Stent was awarded a silver medal by the N. S. P. S. recently. There is room here for raisers to breed orange-salmon flowers, which will not bleach in the sunshine.

Of rose and carmine flowers, John Ingman and Marjorie Willis represent the best waved forms and Prince of Wales the old type. John Ingman has probably more aliases than any other sweet pea. It is a bold, fine flower, and will be difficult to excel. There does not appear much opportunity for raisers here.

ORCHIDS

A SPECIALTY.

I am now receiving daily shipments of **Fancy Cattleyas, Vanda Caerulea, Dendrobium Phalaenopsis, Oncidiums** and other choice **Orchids, Fancy Valley, Roses, Carnations,** and all Seasonable Flowers and Decorative Stock.

Supplies of All Kinds.

CHAS. W. McKELLAR

51 Wabash Avenue.

CHICAGO.

In the class of crimson and scarlet varieties, The King, waved; King Edward and Queen Alexandra, both of the old type, are given by the Sweet Pea Society. It is obvious that there is room for new varieties, especially as The King, the largest and representing one of the best types, does not stand strong sunshine well. Several so-called sunproof crimsons are on offer, Dobbie's Sunproof Crimson having been certified by both the R. H. S. and the N. S. P. S., but what is really wanted is a crimson of The King type which is sunproof. This, no doubt, will be attained sooner or later. A really first-class flower of the color of Queen Alexandra is wanted. George Stark was a one time expected to satisfy this need.

VAUGHAN & SPERRY

LONG DISTANCE PHONE
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

The place for lavender color was well filled some years ago by Lady G. Hamilton (hooded), one of the most charming sweet peas ever raised. Now, Mrs. Chas. Foster and Frank Dolby, both waved flowers, take precedence. Mrs. Chas. Foster is an almost perfect sweet pea, but it has been well nigh impossible to obtain a pure stock of it. Masterpiece is a new competitor in this class, and it is said to be fixed.

There is plenty of room for good Spencer blues. It has been pointed out by Professor Bateson, and it is known to most raisers, that, up to the present, the Spencer form will not associate with Lord Nelson or Navy Blue color, nor even with the paler, pure blue represented in Mid Blue. There are blue-waved flowers, Zephyr for example, but that is not a fine large Spencer, nor is it fixed. Kathleen McGowan and Anglian Blue have yet to be tried by the general growers. None of them appears in the N. S. P. S. classification list. It will be interesting to get the combination, which we believe is possible between the true blue in color and the true Spencer in form, and this is a field open to raisers. This season a variety named Mrs. George Charles has been sent out. It gives promise of being a Spencer of Navy Blue color. The first flowers seem easily scorched, but, still, it is promising. What is wanted is a real good Spencer of Lord Nelson color.

Dark Maroon is represented in the classification of the N. S. P. S. by two varieties, both of the old type—Black Knight and Hannah Dale. This indicates that no dark maroon, waved variety has come before the society in its trials that has been fixed enough to obtain the society's approval. Quite a number of darks have been sent out, but growers still wait for one they can depend upon to come true.

Of picotee-edged flowers, Elsie Herbert, white with pink edge, and Mrs. C. W. Breadmore, cream buff with rose edge, are both excellent in their way, and both have big, waved flowers. There is scope in this class for numerous new combinations. Striped, fancy, and bicolor flowers appeal to fewer cultivators, but among these sec-

tions Aurora Spencer, waved cream with rose stripes, and Mrs. Andrew Ireland, waved cream and rose bicolor, are distinct and very beautiful. There is room for fine waved types of good substance in the class represented by Helen Pierce, Prince Olaf, Sybil Eckford, and a few others.

We need hardly remind those who are beginning for the first time to raise new varieties that it is an operation that requires much patience and a considerable extent of ground. All seedlings must be grown on for several years before the possibilities of a cross are exhausted. The most important lesson to enforce is they must all be grown on from single plants, the produce of two plants never being mixed, however similar they may appear. With such work in prospect, raisers will be well advised to think out clearly what they desire to obtain, and, in order to give the necessary attention, it will be best to make but comparatively few and carefully-considered crosses.—Gardeners' Chronicle.

CINCINNATI, O.—Mrs. Christine Wolf, wife of Fred H. Wolf, died at her home on Falke street, Corryville, on November 3, aged 70 years. She was born in Wurtemberg and she and her husband would have soon celebrated their golden wedding anniversary had she lived.

California "Wonders."

When the ordinary layman reads in his favorite newspaper of some weird and wonderful productions of the florist it is strange how readily he absorbs all that the reporter serves up to him. The said reporter, intent on a scare-head and a good story, gets hold of a more or less inexperienced member of the trade and twists out of all proportion the particulars given and as these, in the first place, should be taken with the proverbial grain of salt and are often peculiarly lacking in detail beyond the immense proportions of the flowers, plants or fruits referred to, the story by the time it reaches the breakfast table reads like a repetition of a bad dream induced by indigestion. The press of California has been particularly prolific of this kind of "wonders" of late and one is tempted to ask why in the name of common sense florists who ought to know better allow themselves to be misquoted and their plants described in such lurid language as to raise an incredulous smile or a feeling of disgust from those who know of what they read.

It is, however, strange that California horticulturists do not impress upon their visitors some of the things that really are remarkable and interesting rather than send them away with only a story of, say big geran-

CLEAR COOL WEATHER

The weather is clear and cool, which is conducive to good business; nevertheless there has been some complaint regarding the volume of business during the past week. The horse show in New York has drawn away many of the wealthy class. The aviation meet at Point Breeze has also had a detrimental effect on the business, but all the dealers are pounding along and doing the best they can. There are yet plenty of roses and chrysanthemums but the latter are on the wane. It appears that lilac, daffodils, yellow daisies and sweet peas will soon be plentiful. This is particularly true in reference to sweet peas. Many carnations have failed and peas will be planted in their place. Single violets have been scarce and will continue to be so until after Thanksgiving.

NOTES.

A noteworthy feature of South Eleventh street is the retail store of George Craig. He keeps the best flowers to be obtained in the market and is always busy.

The exhibition of pot chrysanthemums held last week at the Fairmount Park greenhouses was very popular and much appreciated by the public.

At the store of Pennock Bros., during the past week, leading features were their hampers of cut flowers, very artistically arranged.

Wm. J. Baker, the wholesaler of North Penn Square, is again in his store after an extended vacation during the summer months.

Notably fine stock of Richmond roses is now being handled by Eugene Bernheimer, the wholesaler, of 11 South Sixteenth street.

Harry Jones, a skillful designer, formerly with Thos. Young, Jr., New York, has taken a position with J. J. Habermehl's Sons.

The Philadelphia Cut Flower Co. is handling very fine stock of chrysanthemums, lily of the valley, Bride and My Maryland roses.

A feature of Frank Polites' main store at 1418 Chestnut street is his

artistic style of making up bouquets on short notice.

Rupert Kienle, 39 South Seventeenth street, is showing very fine features in small ferns for table dishes, which sell fast.

Robert Kift has recently been doing very fine funeral work, noteworthy being his palls or coffin covers.

Pittsburg.

STOCK SCARCE.

The official weather man states that there has been an average of two minutes' sunshine each day in this city for the past two weeks. It is hardly necessary for us to relate the results, sufficient it is to say that prospects for getting enough Thanksgiving stock are about the worst ever. Carnations have advanced to such prices that many will not touch them except when compelled to do so. Violets almost dropped out of sight altogether, with lily of the valley a close second. The supply of chrysanthemums, especially the smaller grades, has shortened up. Lilies move out freely, and Paper Whites clean up in short order.

NOTES.

G. & J. W. Ludwig had the decoration of the Jefferson Lodge F. & A. M. November 9. As this date was also the anniversary of Julius Ludwig, they held some special events in his honor.

Henry Klunders, recently manager of Randolph & McClements' Penn avenue store, left for New York. Edw. Harvey is now in charge.

The McRae-Jenkinson Co. expect to cut a quantity of chrysanthemums until Christmas.

John Walker, Youngstown, and Jos. Thomas, Greensburg, were recent callers.

So far November has shown a fair bulk of business, with plenty of stock to handle it. Of course the chrysanthemum is still the heavy item, but it is thus a double blessing—its very presence in such quantity and quality tempts the buyer, and gives the florists plenty of stock to sell and its adaptability covers most all the various phases and needs of the trade. The season still is dry—much too dry for the good of the farmer—but it has given the florist a splendid chance to develop his chrysanthemums to perfection. Also the absence of dull, cloudy, rainy weather has been of much value in putting the carnations and other stock in the greenhouses on a splendid basis for winter production. The week of November 14-20 has seen the heaviest of the chrysanthemum cut, although there will still be ample supplies till the first of December. Violets and sweet peas just coming in, roses off crop so that quite a bit of the stock used is procured from outside sources, but this is true to a less extent with carnations. The usual crop of November weddings at about the usual figure, so far as the florist is concerned, may be recorded. Thanksgiving prospects are about normal, which means

a good busy week which helps clean up the last surplus of chrysanthemums, and while the retail florist does not dare to raise prices much, if any, he finds that the wholesale grower has stiffened them up for him and so it goes. Between the grower and final consumer the retailer, as "middleman," gets a little squeeze as his pay for helping the surplus to move—"Vox Populi, etc."

NOTES.

W. H. Culp & Co. had the decorations for the banquet at the fall reunion of Wichita Consistory of 32d degree Masons. This consistory is the largest in the southern jurisdiction and the banquet attendance was about 900. This banquet was followed the next evening by the "Shriners" banquet, with about 750 present. The decorations for this were also furnished by Culp & Co. Quantities of chrysanthemums were used on the tables in each case, besides palms and other decorative plants for the general decoration of the banquet hall. Chas. P. Mueller furnished the decorations for the rest of the building and the large quantities of roses used in the conferring of the Rose Croix degree.

Chas. Mueller handled an elaborate church wedding the middle of the week. When interviewed by the writer Mr. Mueller's usual good humor was showing a slight wear, which he explained by stating that his foreman, George Spear, had "quit his job the Saturday night previous, without notice," and Mr. Mueller's first intimation was an inquiry from the greenhouses Monday regarding the situation. Mr. Mueller further stated that he was unable to get a satisfactory reason for his foreman's action. It does look a little one-sided for the man who furnishes the capital and takes the business risks to have employees act with so small regard to their moral business obligations.

Dugan & Cain, who operated the Fairview Greenhouses, and who purchased the buildings, stock, etc., with the plan of relocating near the cemeteries and later gave up the idea, have lately entered into a partnership with Geo. Bixby on South Water street, and are using the material there in enlarging the Bixby plant. Mr. Bixby is interested in the produce commission trade, and lettuce will form an important part of their production in addition to the usual retail florist's stock.

F. Kuechenmeister is devoting a part of his glass to a "catch crop" of lettuce, with good prospects.

CHARLESTON, W. VA.—J. W. Alexander is now very busy doing some landscape work around his new residence which was built this fall. It is three stories high with dance floor on the third floor. He expects to give some dancing parties this winter. Mr. Alexander looks after the greenhouses while his son takes care of the store. Carnations, roses and pot plants are in fine shape. Good business is looked for this fall and winter.

AMERICAN FLORIST CO., 324 Dearborn St., Chicago**New York.****BETTER PRICES.**

With the exception of chrysanthemus, stock has been coming in a little lighter than for some time previous, whether some holding back for Thanksgiving is being practiced or not we are not sure, though it is thought in some quarters that such is the fact. Among the roses there has been received occasionally a superior grade of American Beauties that have touched high prices. Similar conditions have prevailed with Richmonds, Killarneys and Bridesmaids, a few of which, owing to their general excellence of quality, have realized better figures than was possible with the ordinary run of stock. The shorter grades of roses have been in fairly good demand and prices, we believe, will average a little better than they did one week ago. Carnations are not as plentiful and good flowers have been bringing normal prices for the season. Cattleyas are still in a minority, some selling as high as 75c each. No change is apparent in the gardenia supplies; they are coming in daily and prices are stationary. Lilies are not cleaning out well just now. *Lilium Auratum* is coming in in limited quantities but does not sell well. Lily of the valley has been selling fairly well. Sweet peas are becoming more plentiful, while lilac is a regular feature as also is stevia and bouvardia in limited quantities. Owing, perhaps, to the great football game between Yale and Harvard, which occurred Saturday, violets received quite a boost in prices. This, of course, lasted for one day only, but "every little bit helps."

NOTES.

The A. T. Boddington Co., 342 West Fourteenth street, have their 1911 catalogue almost ready. It will be of 144 pages and from a perusal of some of the proof sheets it is quite evident that many novelties are to be offered next season. The strike of the expressmen played havoc with the filling of orders but now everything is running smoothly again.

Henry Conley, an employee of Hoffmiller, retail florist, fell from a ladder while decorating St. Bartholomew's Church on November 15 and sustained rather severe bruises, though fortunately no bones were broken.

Moore, Hentz & Nash have made arrangements to have one hundred cases of mistletoe shipped them from St. Malo, one of the Jersey Isles; this high-grade stock should prove quite an acquisition to their market.

The Greater New York Florists' Association (Geo. W. Crawbuck, manager), Livingston street, Brooklyn, are having a call for certain varieties of roses that seems quite hard to keep up with.

The seed and bulb trade is not so very active just now. Larger sizes of *Lilium giganteum* bulbs are getting cleaned out fairly well. There has been an increased call for Spanish iris noted.

Joseph Levy has succeeded to the wholesale firm of John Seligman Co., 56 West Twenty-sixth street. Mr. Levy has long been a member of the firm but now becomes the sole owner.

Chris. Bonnet, of the firm of Bonnet & Blake, Livingston street, Brooklyn, is away on his last fishing trip of the season. He is after cod in the deep blue sea.

J. J. Perkins, one of the old-time wholesale florists, will move on December 1 from 115 West Thirtieth street to 117 West Twenty-eighth street.

John I. Raynor, now retired but formerly the well-known wholesale florist, paid a visit to the "district" recently.

W. H. Kuebler, wholesale florist, Wiloughby street, Brooklyn, is handling a very heavy supply of chrysanthemums.

The Kervan Co., 113 West Twenty-eighth street, received a shipment of holly this week.

J. D. Cockroft, carnation grower, Northport, L. I., was in town this week.

Friday evening, November 18, the following scores were made by the New York Florists' Bowling Club:

J. B. Nugent.....	94	96	98	116
J. A. Shaw.....	163	146	143	167
R. Berry.....	148	129	137	198
P. J. Smith.....	143	145	147	119

A match between the New Yorkers and the Astoria team is contemplated for December 1, to be played on the alleys of the latter mentioned team.

Baltimore.**BUSINESS ACTIVE.**

With the exception of a few days of extreme high winds the weather is delightful, the very acme of autumnal crispness and beauty; the air redolent with the soft fragrance of the ripened foliage, the sun bright and inspiring and, there being so far few of the characteristic and gloomy fogs which make November so austere and uncomfortable. The social season has begun and a great variety of entertainments, private or semi-public, have been happening before the great events of the periodical Germans and cotillions which are such important features in polite society. There have been some beautiful weddings, one on so important a scale that a private chapel was constructed to accommodate the guests. All this meant business for the florists and the past week was one of no inconsiderable activity. Everyone seemed to have a share and it is hoped there will be no let-up in the demands. Flowers were fairly abundant. Of chrysanthemums there were, some days, too many; violets the same, roses about equalled requirements, and carnations were hardly sufficient to supply current needs. Lily of the valley and *Lilium Harrisii* are moderately supplied. The plant trade is about up to its average, and the market men begin to find the mornings a little frosty for the exposure outside of their more tender stock.

NOTES.

The meeting at the Florists' Exchange, to which were invited the growers of the area which it covers, was not productive, apparently, of palpable results. Some interesting talk was indulged in, a variety of experiences given, but little headway was gained in the main issue. The question really is whether the shippers to the Exchange ought not to obligate themselves to send their entire output, instead of selling it all at certain times, or part of it all the time, direct to the retailers. The manager of the Exchange complains, and with apparent justice, that unless he can be sure of the regular receipt each day of the product of each grower he cannot enter into contracts to supply

flowers to his regular, or would-be regular customers, to say nothing of expanding his market. Many growers, on the other hand, do not like to forego the advantage of making such sales as they can to the people who come direct to their greenhouses. What they sell in this way is certain, whereas in cases of gluts a portion may be lost of that sent to the Exchange; and, then, too, the commission is saved! Whether, in the long run, the advantages of regular and full shipments to one commission house would not be better for all, both buyers and sellers, is the question at issue. John J. Perry, the manager of the Exchange, made a very fair and frank statement of the position from his standpoint, and invited criticisms of the conduct of the business, but there were, practically, none. Mr. Perry has broadened the scope and widened the market of the Exchange, but he finds his efforts cramped by the indisposition of the growers to strengthen his hands by consignments to the house of regular products on which he can rely, so as to meet the needs of buyers. The Exchange is not in a situation to refuse, as some commission houses in other cities do, to take partial consignments from growers, their rule being "all or none." But the Exchange, being a joint-stock and mutual concern, the establishment of which was largely designed for the advantage of the growers, they themselves as owners fix the policy which it follows. Just how the problem may be settled is as yet problematical. In the meantime the business being done, even with the drawback named, is constantly expanding.

A good deal of building has been done during the summer and fall and as a rule everything is pretty well secured and nearing completion. The enterprising company of Richard Vincent Jr. & Sons, at White Marsh, is adding two more large houses to its already very extensive plant, which it will dedicate to their ever-expanding stock of geraniums; James Hamilton, at Mount Washington, has added one more to his numerous rose houses; Harry Ekas, of the Frederick road, has enlarged his borders and capacity, all of which indicates that confidence prevails as to the future of the gardeners' business in this latitude.

Stevenson Bros., of Govans, had ill luck with their Manetti stock this year, and about only half of their grafts took, but the Killarneys which succeeded are wonders of health and growth.

Association of Official Seed Analysts.

At the third annual meeting of the Association of Official Seed Analysts, held at the Shoreham hotel, Washington, D. C., November 14-15, 1910, a number of papers from the different state laboratories, also from the seed laboratory of the Department of Agriculture, were read. These papers contained much valuable and interesting information on the value of hard seeds in alfalfa and clover, the germination of the umbelliferae and forage plant seeds and the essentials of agricultural seed analysts. In view of this fact a resolution was adopted to present to the secretary of agriculture the importance of having these papers published in the form of a bulletin as a publication of the department. It was also recommended that a circular be issued at the earliest possible date on the desirability of uniform methods in the making of purity tests and that this also be published by the department. This was considered very necessary so that all laboratories could use the same methods and avoid the wide differences as to purity when the same sample is tested at different laboratories. Much also depends on the taking of the sample which should likewise be done in a uniform manner to insure the most accurate results. The methods of germination are so varied and so many different conditions are to be contended with that it was considered best to have tests made and report of these tests read at the next meeting. A resolution was adopted in favor of the appointment of three referees to investigate and report on the following, the main object being to secure uniformity:

- (1) The taking of the sample.
- (2) The methods of germination.
- (3) The determination of purity.

Another important matter taken up was the appointment of a committee to investigate what could be done in the matter of restricting the importation of low grade seeds from Europe, which is done to quite a considerable extent.

SAN JOSE, CALIF.

Experts Can Not Agree On Seed Tests.

Herewith please find a comparative statement of five separate tests made by five different testing stations, of a sample representing a uniform and carefully made lot of Canadian blue grass. If you wish to do so, you may publish this statement. Our object in sending you this statement is to show the impossibility of making uniform tests, and we should like to have it distinctly understood that it has not been made up with intent to criticize, or to reflect in any way on the seed analyst, or seed testing station, and we take it for granted that these tests have been made as carefully as it is possible to make them.

*The word Present indicates that the seed against which it is written was found, but that there was no quantity stated.

The general discussion on methods and apparatus for seed testing was not a very animated one, all present apparently agreeing as to the general methods and apparatus in use, except as to germination, where there seemed to be a diversity of opinion. This was not considered important as the methods of germination tests are open to

question. The discussion on seed legislation was eliminated at this meeting.

Prof. Christie, of Indiana, gave a very interesting talk on seed conditions in that state, which stands at the head of the list in acreage of clover seed and also in the number of farms producing clover seed. A law was framed and introduced to govern the control of small seeds in the state. When brought to an issue, however,

it was found that the people were so ignorant particularly as to the different weed seeds that the law was withdrawn. The seedsmen did not object seriously to the passage of such a law.

The agricultural college at Lafayette inaugurated a plan whereby the farmers are trained so as to be able to recognize the most common weed seeds. They are given a week's course in the college on this subject under direct supervision of the Experiment Station staff. The school teachers are also given a similar course, covering two days, along the same lines and thus the children receive the advantage of this training.

The discussion then turned on the cotton seed diseases and the smut of grains was touched upon.

The time and place of next meeting has not been arranged.

HARRISBURG, PA.—The Holmes Seed Co. sustained heavy loss by fire November 21.

VISITED MINNEAPOLIS: Lester L. Morse, San Francisco, Calif., and A. Emerick, of Vilmorin-Andrieux & Co., Paris, France.

CHICAGO.—Prices on the board of trade November 23 for grass seed were noted as follows: Timothy, \$8.25 to \$9.50 per 100 pounds. White clover, from \$22 to \$28.

VISITED CHICAGO: J. B. Agnew, of the Pacific Seed Growers' Co., Agnew, Calif., returning from the east and H. A. Johns, of the Sioux City Seed & Nursery Co., Sioux City, Ia.

If you knew what we know about **Horseshoe Brand** Japan Bulbs, we would not do this advertising, for you would buy them without it.

If you knew about the quality of seed-bulbs we plant; how they are planted; about the skilful cultivating and fertilizing, and the careful harvesting and assorting, you would wonder why we take so much pains at such expense.

But when you analyze it you will see. These bulbs cost more than most brands, of course, but not more than they are worth. They average so many more flowers per thousand than common bulbs, that they are, after all, the most economical to buy.

The principal reason is because we plant our seed-bulbs deep down in the soil. By this method of planting the bulb usually takes a year longer to mature and more fertilizer, but the quality is so much superior to the common "flat-head" that it more than makes up for the difference in the cost of growing.

Up to the present time we know of no Lily Bulbs equal to our Superior Assortment of **Horseshoe Brand** Giganteum.

Prices upon application.

H. F. Hall, Grand Rapids, Mich., Vice-President;
S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Ruetenik, Cleveland, O., Treasurer.
Annual meeting at Boston, Mass., 1911.

TAMPICO, MEX., Nov. 4.—It is estimated that more than 300 carloads of tomatoes will be shipped from the Tampico region to the United States during the last six weeks of this year. The crop will begin to move about November 15, and will continue to be marketed until the early part of the coming year. In the localities where American colonies are located the acreage in tomatoes this year is large. This is particularly true of San Dieguito, San Luis Potosi.

Prices of Indoor Fruits and Vegetables.

Chicago, November 21.—Mushrooms, 25 cents to 35 cents per pound; cucumbers, \$1 to \$2 per dozen; tomatoes, \$1.10 to \$1.65 per basket of 10 pounds; radishes, 25 cents to 40 cents per dozen bunches.

New York, November 19.—Mushrooms, 50 cents per pound; cucumbers, 15 cents each; lettuce, \$1.25 per dozen heads; tomatoes, 20 cents per pound; radishes, 50 cents per dozen bunches; asparagus, \$7 per dozen bunches; grapes, Gros Colman, \$1 per pound.

Little-Known Salads.

Many who travel abroad, said W. F. Giles, in a lecture before the National Amateur Gardeners' Association in London, on Tuesday, October 4, enjoy the great variety of salads, and enquire if they cannot grow them in their gardens at home. In this matter we were much behind the Continent, where the intensive system of culture enabled more salads to be grown, especially in winter. There were gardeners abroad entirely engaged in forcing tender salad plants in winter, and the high prices they obtained had directed a great deal of attention to French gardening in this country. He did not think that intensive culture was to be relied on to produce a certain profit in England, except when top prices were obtainable, but by the aid of cloches, frames, and hotbeds there was a good deal to be done in private gardens as an interesting pursuit and a means of obtaining fresh salads all the year round. The gentle warmth of the hotbed, combined with much watering, produced the quality of tenderness. Several plants used in Continental salads were very wholesome and pleasant, but were little known in England; also many ordinary vegetables, such as broccoli, cabbage, and potatoes were dressed with oil and served as salads. In fact, the Continental idea of a salad was different from ours and it had been said that there was nothing green and tender that the frugal people of France and Italy could not convert into a salad.

Mr. Giles did not advocate the use of all the plants favored on the Continent for this purpose, but he described several of them with the aid of lantern pictures, and picked out a few that could be grown in England as well as elsewhere, making a welcome addition to the salad bowl and easily cultivated at all seasons. Notable among these was chicory, which was very useful and exceedingly easy to grow. A

special variety was produced in Brussels, which was the great centre for growing this plant. The familiar dandelion, too, was much used as a salad in France, and was generally gathered in the fields until its importance on the market made its cultivation worth while. It was now greatly improved, and through the process of blanching it lost so much of its bitterness that in a salad one scarcely knew that one was eating dandelion. The Florence fennel, which was highly prized at Naples, resembled celery, but was sweeter and very tender, with a slight flavor of aniseed. This plant was used in the manufacture of some kind of liquors. The mache or corn salad was to be had from October all through the winter, and was wholesome and delicious. Requiring little attention it was very suitable for cultivation in this country.

American cress was also to be recommended. It was grown on land and, though like watercress, was more pungent. The turnip-rooted celery, largely grown in France and Germany, could be eaten raw or variously cooked. Chives, which belonged to the same family as onions, but were milder, and mountain spinach, which was to be had in white and red varieties, merited attention, and the Chinese winter radish, white, black, and red, was a very useful introduction. Many plants were available to diversify the British salad, and in order to obtain full advantage from them it was necessary to mix them with a good deal of discrimination, so that the flavor would harmonize and none unduly predominate. John Evelyn had said that the various tastes in a salad should fall into their places like notes of music, so that there would be nothing harsh or grating.—*Journal of Horticulture.*

Conifers at the Arnold Arboretum.—II

Amongst the firs, the White Fir, *Abies concolor*, far surpasses all of the other firs in the Arboretum in beauty and health. There are a number of individuals of it that are just superb! I don't know of any conifer that can surpass it in beauty unless it be a finely developed hemlock spruce.

A Japanese fir, *Abies brachyphylla*, from the mountains of Japan, is doing remarkably well and Dr. Sargent is much pleased with its promising behavior. It forms a handsome broad base, and the thickly branched dark green outline is very attractive.

Veitch's Fir, *Abies Veitchii*, whilst doing very well, is not an object of any particular beauty. It forms a thin branching habit, and the internodes are very conspicuous. It is, perhaps, better adapted for collections than for planting on private estates, where beautiful plants are only considered.

The Saghalin Fir, *Abies Sachalinensis*, from the Island of Saghalin, north-west of Japan, and other parts of East Asia, ought to be hardy, coming from so far north. It is only of botanical interest, and whilst it is doing very well in the Arnold Arboretum, it forms a thin branching habit that would not recommend itself to planters. I think that perhaps there is a better specimen of it in the pinetum at Highland Park, Rochester, N. Y., and it is one of the same batch of seedlings presented to the Board of Park Commissioners about 10 to 12 years since, the seeds of which I think were procured from East Asia 15 to 18 years since by Dr. Sargent.

JOHN DUNBAR.

National Nut Growers' Association.

The ninth annual convention of the National Nut Growers' Association was held at the Jefferson County Court House, Monticello, Fla., Nov. 1-3. Hon. D. A. Finlayson welcomed the members in an eloquent address which was responded to by F. T. Ransey, of Austin, Tex. Papers were read by Judge U. V. Whipple, of Cordele, Ga., on "The Growing of Pecans." Prof. M. B. Waite, of the Department of Agriculture, on "Diseases Affecting the Pecan." Prof. H. K. Miller read the paper prepared by Prof. H. A. Gossard on "Nut Growing in Ohio," and Prof. W. N. Hutt read on "Legislation Affecting Horticulture." The state vice-presidents reported on nut growing in the several states and a short talk was delivered by J. P. Brown, of Carney, Ala. The nurseries of the Standard Pecan Co., Jefferson Nursery Co., Simpson Nursery Co., and Summit Nurseries were visited on the second day. The following officers were elected: H. K. Miller, Monticello, Fla., president; J. B. Curtis, Orange Heights, Fla., 1st vice-president; H. C. White, Monticello, Fla., 2nd vice-president; J. F. Poulan, Georgia, secretary; M. B. McNeely, Richmond, Va., treasurer. Invitations for the convention were received from Beaumont,

GOOD BUSINESS.

The chrysanthemum still reigns supreme and with its showy display in all stores does a great deal towards stimulating the interest of the flower-buying public towards the love of flowers. Trade at present is very good and in spite of increased production of chrysanthemums there are not enough grown locally to fill the demand. There seems to be a great scarcity of well grown pot plants, especially the single varieties which adapt themselves to decorations so admirably and deserve to be grown more largely. Roses arrive in good quality, white and pink Killarney, Mme. Chatenay

and Rhea Reid are the favorites. Carnations are selling very well and there is lots of room for them along with the chrysanthemums.

The chrysanthemum exhibition at the club rooms November 13 proved quite interesting. The list of exhibitors was not large but the quality quite up to the standard. The keenest interest centered around the big cut blooms of which Hall & Robinson were the principal exhibitors and carried off the most of the first prizes. In the plant section J. Luck was most successful. In the classes for roses and carnations the St. Bruno Floral Co. were the chief winners and an exhibit of apples grown on trees imported from

England by T. Pewtress was greatly admired. Hall & Robinson showed a vase of their new carnation Outremont, which promises to be heard of later. It is of a color resembling Dorothy Gordon. James Kean made a great hit with a vase of Rhea Reid roses, which he claims to be a splendid keeper. Other successful exhibitors were Chas. Byford, Geo. Miles, J. Petty and E. Hibbs.

Alec. Wilkie, foreman for Hall & Robinson and assistant secretary and treasurer of the Montreal Gardeners' and Florists' Club, has gone to Boston to accept a head gardener's position near that city.

European Horticulture.

Hemerocallis Flava.—The member of this family we most commonly see growing in gardens is the copper-colored Day Lily (H. fulva), doubtless because it is such a hardy and vigorous grower, and it must be admitted that where there is plenty of space, or in some wild garden, it may produce a good effect with its tall heads of blossom arising out of a mass of bright green foliage. H. flava is much less vigorous, though similar in character, and the flower stalks seldom exceed two feet in height. The great recommendation of the flower is its delicious scent, which has earned it the name of the Yellow Tuberose. It is hardy enough, but thrives best in light soils, succeeding even in hot dry places. Small plants are sometimes difficult to establish owing to the depredations of slugs, which attack them before they rise above the surface of the ground in the early spring. It is easily propagated by division, the early autumn being the best time, with a view to next year's flowering. All that is necessary to do is to take up a clump and pull the fleshy roots asunder, either with the hands or by means of a couple of four-tined forks. It is best left undisturbed for several years. H. Thunbergi is very similar to the above, and is sometimes regarded as a form of H. fulva. There is also a double-flowered form. The main objection against the day lily is the fugitive character of the flowers, but they are so freely produced that we scarcely notice this defect.

BURLINGTON, N. J.—Leon S. Anderson has erected a greenhouse 10x27 feet in which he will raise flowers for the Easter and Memorial Day trade.

Now Is the Time to Force Azaleas for Christmas. What varieties will you take? Which ones will force well? Take my advice. There is the *Deutsche Perle* one of the best well known double whites; we have plants of these at 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00. Next, *Simon Mardner*, double, bright pink. 50c. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00. *Vervaneana* is so well known that there is no need to talk about it; big, variegated rosy flowers. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00. *Apollo*, single, red varieties, much admired. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00. Dozen and hundred at the same price. How about *Mme. Patrick*? This is one of the earliest pink varieties, very scarce this year in Belgium and high in price; a few of this variety you must have. Price: \$1.00. \$1.25. \$1.50 to \$2.00.

For Easter Forcing we have only the well known standard American market varieties, such as *Mme. Van der Cruyssen*, pink, very scarce this year in Belgium. 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Niobe*, double white. 50c. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Deutsche Perle*, 50c. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Helena Thielman*, light pink. \$1.00. \$1.25. \$1.50 to \$2.00; *President Oswald de Kerkove*, \$1.00 to \$1.50; *Schryveriana* 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Empress of India*, double variegated. 60c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00; *Professor Wolters*, 75c. \$1.00. \$1.25 to \$1.50; *Vervaneana*, 60c. 75c. \$1.00. \$1.25 to \$1.50; *Apollo*, 60c. 75c. \$1.00 to \$1.25; *Simon Mardner*, 50c. 60c. 75c. \$1.00 to \$1.50.

Remember, small sizes of Azaleas are scarce this year in Belgium; therefore I had to buy mostly large sizes.

Remember, it is the wide awake man that is not afraid to invest a dollar that makes the money.

Rubber Plants, 6 in. pots, 35c, 40c and 50c; 5-in., 25c.

Asparagus Plumosus, 2½-in. 3c; 3-in., 5c.

Asparagus Sprengeri, 2½-in., 3c; 4-in., 10c.

Primula Chinensis, 4-in. pots, \$10.00 per 100; 5½-in., \$2.50 per doz.

Hydrangea Otaksa, 6-7 in. pots, pot-grown (only pot-grown will force successfully for Easter); price, 25c. 30c. 50c to 75c.

Christmas Peppers, 5½-in., 15c. 20c. 25c.

Cineraria Grandiflora Hybrida, Aschmann's well known strain, 2-in. pots, \$3.00 per 100; 4-in., 10c. **Dracena Branti**, 25 to 30 in. high, 6 in. pots, 40c to 50c.

Lantana Borbonica (Chinese Fan Palms), 30 to 35 in. high, 6 to 7 in. pots, 50c. 75c to \$1.00 each.

Adiantum Hyb., 2½-in. pots, 5c; 3-in., 8c; 4-in., 12c; 6-in. pan, 30c.

Azalea Indica.

Begonia Gloire de Lorraine

This is another specialty of ours. We have a secret in growing them to perfection, only known to us giving them a rich, deep pink color. They stand shipping well, traveling 2,000 to 3,000 miles without injuring or killing them in transit, if properly handled. We have a big housefull in 6 to 7 in. sizes, in bud and partly in bloom ready for immediate sale or for the holidays. Everybody knows that last Christmas we had the best *Begonia Gloire de Lorraine* on the market. They were crackjacks indeed! We have the deep pink and the light pink (Lonsdale) varieties. 6 in. pots, 50c. 75c to \$1.00; 7 in., \$1.25 to \$1.50; 3 in. (if transplanted soon will make good 4-in. for Christmas), 15c each. \$15.00 per 100. If you have room you should order now, because they are always scarce at Christmas.

Begonia Erfordii, latest improvement; this variety is always in full bloom during winter Christmas and Easter; 4-in. pots, in bloom and bud, 20c. **Begonia Rex**, 4 in., 20c.

Cyclamen Grandiflora, best strain, 4-in. pots, large enough for 5-in., 25c; 5½-in., 35c; 3-in., large enough for 4-in., 15c.

Primula Obconica, finest strain, 4-in., in bloom, 15c, in bud, 10c; 5½-in., 25c; 6-in., very large and extra fine, 35c.

Cocos Weddelliana, 3-in. pots, 15c, 18c and 20c.

Wood Brothers, Fishkill, New York.

Nashville.

Thanksgiving week always brings with it the famous foot-fall game between Vanderbilt University and Sewanee. The florists are always much interested in having on hand for the respective universities the necessary colors, for Vanderbilt the gold, and purple for Sewanee. The former is easily enough handled for the gorgeous chrysanthemum is then in its greatest beauty and the "rooters" for Vanderbilt have no difficulty in procuring all the yellow flowers they need, but not so the purple. The modest violet goes by the thousand but can never attain to the magnificence of the other; however, it brings just as much joy to the florist's heart, for violets we must have at any price. To have a full supply of these two flowers for Thanksgiving day is the concern of all the growers in and around the city at this time. The supply of the finest of chrysanthemums promises to be abundant. Golden Wedding, Col. D. Appleton, W. H. Chadwick and other varieties will be on sale that day. Violets will be more or less scarce. Some will be shipped in but the wholesale price is such that it will have a tendency to limit the supply shipped, and the trade will depend largely upon the homegrown article. Orders are already being booked for the great game. Just now some of the handsomest chrysanthemums ever seen, either here or elsewhere, are in the market. For Thanksgiving there will be an abundance of all other stock, roses, carnations and lilies.

NOTES.

One of the handsomest weddings of the season had a decidedly Frenchy tone in the combination of pink and yellow. The bridal bouquet was, of course, white, lily of the valley and orchids with chatelaine. The bride's mother carried a bouquet of small pompon yellow chrysanthemums and lilies of the valley, with chatelaine. The matron of honor had pink roses and lily of the valley. The bridesmaids all carried muffs made of chiffon by the milliner and trimmed with the yellow pompon chrysanthemums, maiden-hair and asparagus dropping with the chatelaine. The church was beautifully decorated with palms and the potted yellow plants, the ribbon pews marked by huge bunches of specimen flowers in the same color, which color scheme was carried out even in the decoration of the residence. Even the bridal table was decorated in yellow. It was a large circular table with the centerpiece three feet six inches in diameter. The outer fringe was of maiden-hair fern with a band of yellow pompons in which sat a large basket filled with the handsomest of flowers, the Golden Wedding chrysanthemums.

Charles Tritchler and W. D. Buchanan have issued a neat little volume on "How to Grow Flowers" that is full of practical information for the amateur or professional grower. Mr. Tritchler is a practical grower and has been connected with floriculture and horticulture all his life and able to write from practical experience.

The Joy Floral Company has some Col. D. Appleton chrysanthemums that are from six to eight inches in diameter. They also have some specimen Black Hawk, the rich dark red that is much sought after.

The window of Geny Bros. in their new store on Fifth avenue is a regular chrysanthemum show, with many of the handsomest varieties, which makes a fine advertisement of their new location. M. C. D.

BATAVIA, N. Y.—Thomas A. Webb of Corfu has taken a position at Gustav Noack's greenhouses on Bank street.

IT IS NOT...

what you pay for the advertisement but what the advertisement pays you. It pays to advertise in the American Florist.

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using—

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO.

Department "N"

Detroit, Mich.

Highways and Byways.

Charleston, W. Va.—S. A. Gregg, of the Charleston Cut Flower & Plant Co., has returned from a visit to his home town in Columbus and is now busy making improvements in the store. They have a fountain in the center of the store and ferns banked around it, which makes a very attractive ornament. They are now showing a large display of bulbs for fall planting and advertise heavily in the local papers so as to remind their customers what they should do now to their flower beds. H. F. Winter, who has charge of the greenhouses, is now busy potting bulbs and lilies as fast as they come in. Prospects for a good season look promising.

Parkersburg, W. Va., J. W. Dudley, of J. W. Dudley & Son, thinks well of the Alma Ward carnation. The lot he has planted is looking well. Funeral work has been brisk the last week, with a few wedding decorations in the bargain which kept the force right busy. In the greenhouses they are busy looking over the hydrangeas for Easter sales. Mr. Dudley grows a house of these and supplies some of the stores in Pittsburgh, Washington and Philadelphia every year. J. W. Dudley & Son will operate a store in Huntington, opening November 1.

Greensburg, Pa.—The new rose houses built by Jos. N. Thomas last summer are giving very good satisfaction, having them planted to Killarney and Richmond. Carnations are looking very well and they are cutting many blooms. The place in general is looking well. A. M.

The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.
 $\frac{3}{4}$ of the heating surface is in the tubes.

Ask the man that knows the one using different style boilers—names are yours for the asking.

After using our boiler one season, you will say like all others: Nothing but "Superior" for me.

This boiler has given better satisfaction than any other boiler on the market

MADE IN NINE (9) SIZES FOR HOT WATER.

Use Sunlight Sash side by side with ordinary Sash this Winter

See how much bigger and sturdier the plants under Sunlight Double Glass Sash will be. See how little care they require—how they save time and labor because you never have to cover them.

The double layer of glass does it Between the two layers of glass is a $\frac{3}{4}$ inch transparent blanket of dry, still air—a perfect non-conductor, keeping in the heat, keeping out the cold. Since the sash are never covered the plants get all the light from sun-up to sun-down.

Agents Wanted: A splendid opportunity. Write for details.

Send for these two books 1. Our Free Catalog—Contains the details of this new invention for hot-beds and cold-frames our freight prepaid and guaranteed delivery proposition.

2. Send 4c in stamps for a valuable booklet on hot-bed and cold-frame gardening by Prof. W. F. Massey. There is no higher authority in the country. This book will interest the most expert gardeners.

Utica, N. Y.

At the meeting of the Florists' Club held November 10 there was a magnificent display of roses, chrysanthemums and carnations, which was thoroughly enjoyed by the members present. Brant Bros. had a fine exhibit of Killarney, My Maryland and Bride roses and some splendid specimens of chrysanthemums and carnations; L. F. Goodman of Clark Mills displayed carnations and ferns; C. F. Sitzer, chrysanthemums; R. Kilbourn of Clinton, chrysanthemums and smilax; W. K. Dobler, carnations, and J. J. Williams, supplies and designs. An interesting display of chrysanthemums was made by A. N. Pierson of Cromwell, Conn., showing some remarkably large and well grown specimens.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.
The pump is of brass throughout, simple and powerful.
The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,
and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. \$1.00.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. \$3.50.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. \$1.25.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. \$6.00.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; post-paid, \$1.21.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. \$1.50.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. \$6.00.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. \$2.00.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. \$1.50.

American Florist Co. 324 Dearborn St. CHICAGO.

SUGGESTIONS FOR THE HOLIDAY TRADE.

Christmas Plants.

If the cyclamen, are backward and are not going to be in flower for the holidays, they can be moved into warmer quarters and be brought forward so as to make salable plants. While this plant likes and grows far better in a cool temperature, yet the grower must have them for the holidays, and they will stand a little forcing. The smaller plants, or those that are more or less one sided, can be potted two to four in a pan, the better side out, and make salable plants. This can also be done with primulas, and made up pans of primula obconica are very attractive. Ardesias are always more or less in demand at the holidays and well grown plants with nicely colored berries are very attractive and sell well. They are quite easily grown but are slow and unless carefully watched are great nests for scale and mealy bug. They should be kept clean and require a warm light house to have them in fine condition at this time of the year. Christmas peppers should be given a good sunny location that the fruit may be of high color. Otaheite oranges, another beautiful Christmas plant, with its golden fruit, must be given a warm sunny position in order to get the bright yellow fruit highly colored by the holiday season. This plant, when well grown and with a goodly number of well ripened oranges upon it, sells readily, even if expensive, but is very unsatisfactory when the fruit is green at this season. Aucuba Japonica and the holly are very showy Christmas plants when well berried. Care must be taken in the handling of these plants or they will drop their berries. This is generally caused by giving them too great a top heat when the roots are inactive, a little bottom heat at first with a cool top will cause root action and after the roots have obtained a new hold in the soil they can be moved to a warmer location. Dracena fragrans, with its high colored leaves, is another beautiful plant and in the small sizes is a great addition to the baskets or hamp-

ers of plants for the holiday trade.

The covering of the pot and making the plant attractive is a great problem to the florist. Crepe paper is used by many but is far from satisfactory, for the first time that the plant is watered, the paper is ruined. Waterproof crepe paper is better, and will answer the purpose, where the trade does not warrant something more expensive. Baskets, which can be purchased to fit all the different sizes of pots, are the best and add but little to the price of the plant. The majority of plants sold at Christmas are for presents and there are but few customers who will not pay the additional cost of a neat covering for the pot. The pot covers made of waterproof crepe paper are much used by many of the stores. Baskets and hampers of a variety of plants have been much in vogue in the larger cities the last few years. These can be made up with the addition of decorative plants and ferns and some very artistic and expensive collections are sold at this time of the year. Have the palms and ferns in good condition for there is sure to be call for both.

Christmas Delivery.

The safe packing and delivery of the thousands of plants that are sold and forwarded at Christmas will require a great deal of thought and hard work to be successfully carried out. Be sure to have on hand a good supply of sheet cotton, and a quantity of newspapers. The cost of the covering is very small when compared to the price of the plant. If the weather is cold, eight to ten thicknesses of paper is none too much to wrap around a plant, and if the plant is to be shipped to any distance, double the quantity should be used. Any plant whose flowers are fragile or apt to bruise, should be first wrapped in a sheet of cotton. The plant should be done up as neatly and compactly as possible and strongly enough tied that the wind cannot get in and blow the paper off. The wrapping of a blooming plant is really quite an art. An azalea should be first tied in so

that the head will be about the size of the pot, a soft coarse twine or a piece of tape should be used for this purpose, so that the branches will not be broken, as they are so apt to be with a hard twine. A begonia should be first wrapped in cotton and cones of tissue paper should be tied over each head of the poinsettias, so that the flowers will not be bruised. Place the pot on two or three thicknesses of paper and tip the bottom of the pot so that the plant will roll on the top rim of the pot and wrap the plant in this manner. Then cover with the required thickness of paper and a neatly done up plant is the result. Tall plants will have to be wrapped standing erect, but papers enough should be around the pot to prevent the roots from getting chilled. An outside paper that is neat should cover the newspapers for a great many people have serious objections to a package done up in newspapers and rightly so, for it certainly is not up to date to forward nice stock with this covering. Single plants that are to be shipped by express are best packed by having a board at top and bottom the size of the plant and laths or light boards nailed up the sides, the plant properly wrapped and set in and then nailed up. Where there are many of these to be forwarded the boards should be sawed out and prepared in advance that they may be already when the rush comes. The man or boy who delivers the plants should be cautioned against setting the plant down on the frozen ground or on the snow, for if the roots of the plant get chilled it will not last long after it reaches its destination, and a disappointed customer is the sure result.

Azaleas.

The azaleas for Christmas blooming should now be beginning to show color, and after Thanksgiving day there should be plenty of room to space them out, and give each plant the necessary room. If the plants are backward, and there is fear that they may not be in bloom for the holidays, steam the house night and morning by spraying the heating pipes and filling the house full of steam which will immediately arise from the pipes, but be careful of the ventilation after this procedure. Keep all the premature growths pinched off as soon as they appear, but this must be done very carefully, for if they are pulled off, the flowering buds may be broken off at the same time. Give the plants plenty of water, the azalea grows in a moist, peaty soil, and after the plant gets into bloom will require frequent and copious watering. Many complaints come to the florists from the purchasers of azaleas, that the flowers wilt and fade as soon as they reach the houses, and this is generally caused by their becoming dry in the extremely warm residences. Some dealers have a neat card printed, "This plant requires frequent and copious watering," or other words to that effect, which they fasten upon azaleas, lilacs, rhododendrons and such plants.

SYRACUSE, N. Y.—Articles of incorporation were filed November 22 for the W. E. Day Co., which is formed for the purpose of engaging in the flower business. The company is capitalized at \$15,000. The directors are William E. Day, Mary E. Day and Fred W. Bannister.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Bargain Sales.

It is with interest that I read in your issue of November 19, the following couplet, "New York, Trade Disappointing," and also "The bargain sales by the department store floral trade, has been a great help in relieving the wholesale district."

I am not writing to ascertain what effect the foregoing has on the retail florist, exclusive, as I am a member of this branch and do not seek acrimonious argument in the trade. Nor do I question that there is a relief to the wholesaler, as noted. What I do not know about the wholesale end would fill a good sized volume. But what I wish to learn is this: Wherein does a grower benefit in the sale of a large crop of flowers, which are ultimately retailed at a lower figure, than a legitimate distributor can purchase them? Or in other words, where is his profit on goods marketed at a cost, under production?

Surely the grower is a loser in cash.

Surely the retailers are losers in business.

And the result is that the wholesaler is merely "relieved."

Now, we cannot believe in suicidal tactics for business, simply because it does not pay. For illustration, the three branches of the florist business may be likened to an equilateral triangle, each angle of like dimensions tending to the balance of the whole. In the centre we may place a point representing the consumer.

1 Retailer.

2 Wholesaler.

3 Consumer.

4 Grower.

To use a simple geometrical figure, what I wish to demonstrate is this: If the wholesaler moves from his given point in the diagram, in order to be nearer the consumer, he disturbs the balance of things, and the figure topples over; he is taking from the retailer and more important yet is returning too little to the grower.

When the flower buying of a week day commences, we find the wholesale man in his proper place, taking a certain price from retailers and returning a certain price to his growers. This has established what we call a market price. Before the day's business is over, our wholesaler finds a surplus of stock on his hands, because his asking price of the morning did not induce heavy buying, and consequently a clearing out. Without any consideration for what his earlier buyers have paid, he seeks to undermine their mutual business transactions and sacrifices the glut, to relieve his water pots. The rank and file of the business have been to market, paid the price and gone home; they are the support of

both grower and wholesaler in doing this. Now, the genus fakir, appears on the scene and gathers in the goods.

I defy any one to prove that there is any gain in the long run, resulting from this kind of business. The fish and vegetable markets may justly sacrifice prices in the event of a glut, for these commodities may be used thrice daily instead of foods which will keep. But cut flowers cannot be handled to the benefit of everybody at a ruinous figure, because they are not a necessity to the average purchaser, and therefore should be classed as all articles de luxe, not necessarily expensive, but never thrown broadcast to the multitude; for if this is done, nothing will so depreciate the value of this most beautiful gift of nature, nor return so little for the pains.

An approximate estimate on the cost of production of each variety of flower should be known by growers; the same as a manufacturer knows the cost of every part of a finished product. The wholesalers returns should be commensurate to cover growers' cost, together with the growers' profit. The wholesaler should handle the product at an exact commission, or other precise profit for himself, and sell to the retailer at approximately the same price per 100 or 1,000 allowing slight reduction for the larger quantity or a total shipment. The retailer will now be governed by the competition in his class, plus his artistic ability in arrangement, which of course is worth a little extra, over selling loose flowers by a dozen.

Now, I am prepared for the inevitable question, "How about an overproduction which cannot be restrained or governed by the arts of the grower?"

Again we must remember, it is the average we shall fall back on. In mid-winter, low production and high prices are not profitable to any of us or satisfactory to customers. Or in the season of full crop and low prices, there is not satisfactory profit to any of us or appreciation by customers, for that which is acquired too cheap soon loses its worth. Therefore to answer the question, when an overcrop has passed from the grower and through the wholesaler at a price fixed on the basis of production, it has reached the retailer, who will be governed entirely by the retail market price (competitive). This condition will govern with equality the street dealer and the store man and act as its own safety valve, guaranteeing the sale of the entire product as far as any trade conditions are regulated. You will find the average retailer just as willing to sell in a large quantity at a lower profit as a small quantity at a larger profit, provided he will not be under bought by some scalper. And he will shoulder the extra labor until the market again rights itself from the over production. But he must have the surety of one price on the goods he buys.

No business can stand competition at one end and discrimination at the other; and in this fact may perhaps be found the reason for the existence of trusts in other great industries, which are not without certain virtues, especially to those within them.

CARL STUMM.

TWIN FALLS, IDAHO.—Mrs. Josephine B. Deake, wife of J. W. C. Deake, died November 19, aged 71 years.

DESIGN FOR ELKS' MEMORIAL DAY.

By A. C. Rott, Joliet, Ill.

Thanksgiving Business in New York.

The Thanksgiving season did not bring out much that was new or startling either in modes of arrangement, novelties in flowers, or receptacles for the holding of flowers and plants; it is at Christmas and Easter times when the retail artist usually puts forth his new creations which dazzle the eye and make the florists' shops the most interesting places in town. The window displays throughout the town were marvels of beauty however, and a passing mention of a few of them may not be out of place.

David Clarke's Sons, Seventy-fifth street and Broadway, had as a central feature of one of their windows a representation of a horn of plenty being emptied, the aim of the artist had evidently been to show a harvesting of all the seasonable flowers available, for among the crops that were being poured out of the horn, as it were, were chrysanthemums of all types, from the mammoth fancy blooms down to the polyantha type no bigger than vest buttons, in bronze and yellow colors, so suggestive of autumn; the bronzy saffron colored rose, Sunrise; leafless stems of native ilex, studded over completely with their glistening red berries; sheafs of pussy willow twigs dotted with their creamy white buds and the whole freely interspersed with ripe and yellow oak leaves—a very pretty combination indeed, and one that suggested at once to the observer the theme the artist had in mind.

A. Warendoff, Broadway, near Twenty-eighth street, is specializing in basket arrangements of cut flowers and plants and had two in French gilt baskets that were most gracefully executed. Small cyclamen plants with deep rose colored flowers and clusters of the new yellow rose Melody were the principle features, the cut flowers being placed in water. These baskets are excellent for steamer trade and will last, fresh and nice, during the entire journey across the Atlantic.

Alex. McConnell, "The Arcade," Fifth avenue, has always a magnificent array of palms and ferns in specimen sizes, together with the very best obtainable in cut flowers and flowering plants. Begonia Gloire de Lorraine, associated with white and pink lilies and chrysanthemums, made a charming combination in one of the windows, while in the interior of the store, tastefully arranged sprays of cattleyas, with a background of choice store plants along the marble counters,

BEGONIA GLOIRE DE LORRAINE.

Grown by Samuel Murray, Kansas City, Mo.—See Page 927.

made a very charming picture indeed.

Klausner, Seventy-third street and Columbus avenue, had as a window display a dinner table, covers laid for six, pink ribbon bows in the cloth between the chairs, pink bouvardia and pink chrysanthemums being the flowers used.

Malandre Bros., Seventy-second street and Broadway, had a very attractive display of made-up baskets of flowering plants, azaleas and cyclamens being used freely.

Thos. Young, Jr., Forty-second street and Fifth avenue, made a feature of gilded baskets and pot-covers filled with Begonia Gloire de Lorraine; the effect was most pleasing, many orchids were also seen among the cut flowers here.

At the Wadley & Smythe store, opposite the new public library, a mound of adiantum farleyense topped with camellia blossoms were the centre of attraction.

It will be gathered from the foregoing that flowering plants were used to quite some extent, and baskets in gilt-finish seem to be the style. Ribbon also was used quite freely wherever it would help the effect. There was some holly in town, but it was not

pushed much to the front, which perhaps is just as well, for any time before Christmas seems quite out of all season for Holly.

Thanksgiving in Chicago.

Unlike the two great days for the florists, Christmas and Easter, Thanksgiving does not call for any new or novel features, the only effect of the day upon the retailers being the increase in business which a day given over to much feasting and as many family parties demands, which necessitates the purchase and handling of a large amount of extra stock. The calls are for home and table decorations and as there are very few presents made upon this day the preparation of special features is not demanded. The show windows of all the stores were a glorious sight and the stores themselves were filled to overflowing with beautiful flowers of all kinds. The wholesalers did an immense business and were practically cleaned out the day before and were hustling to fill belated orders. Chrysanthemums were of course in demand and there were quantities of them. Major Bonaffon was the favorite and could be

EXTERIOR VIEW OF GREENHOUSES AT THE A. F. AMLING CO., MAYWOOD, ILL.—See Page 927.

POINSETTIA PULCHERRIMA.

Grown by Samuel Murray, Kansas City, Mo.—See Page 927.

obtained in all sizes and grades, and W. H. Chadwick and Golden Chadwick were the standbys in large blooms and some very fine Golden Weddings and Nagoyas were also seen. Long stemmed American Beauty roses were a feature at all the stores and fine blooms of Richmond, Killarney and White Killarney. Carnations were a little short of the demand and consequently the purchasing figures were advanced and the price of violets rose to such a figure (almost to Christmas prices) that they were nearly prohibitive, many of the retailers refusing to buy and handled but a small quantity. Very handsome plants were a feature at all the stores, arranged in pretty baskets or trimmed with covers and ribbons, and found many purchasers.

A very satisfactory business is reported at all the stores and some say the best Thanksgiving they ever had, notwithstanding that the morning was stormy and caused the loss of some transient trade. Few of the retail stores made special window displays but some were noted.

John Mangel had a very beautifully decorated dinner table in one of his windows that was very suggestive to buyers, the flowers being bronze pompon chrysanthemums. Chrysanthemums in all the best varieties and a refrigerator full of elegant roses in the morning, which was depleted in the early afternoon. Violets were a great feature and large bunches of this popular flower were lavishly displayed.

C. A. Samuelson had a beautiful harvest window, draped with yellow, with large vases of magnificent blooms of yellow chrysanthemums and large sheaves of wheat and in the center a representation of the bird of the day, the turkey, stood calmly surveying the scene. It was a very attractive picture and beautifully executed and drew the attention of all the passers-by.

W. J. Smyth has made an addition to his pretty store on Thirty-first street and now has twice the space which was formerly used. In addition to the beautiful chrysanthemums and roses which are always found here at this season, there were some exceptionally well-bloomed plants of cyclamen, begonias and Christmas peppers, in pretty baskets that were finding favor with his customers.

At Muir's were also splendid grown plants and in addition to the well-grown begonia Gloire de Lorraine were exceptionally fine cyclamen and azaleas Simon Mardner. This store was well supplied with handsome chrysanthemums and beautiful roses. A glance through the houses found the Christmas stock in fine condition and a great display of poinsettias and other holiday plants is promised.

The popular price boxes at Lange's were an attraction and the customers were purchasing very prettily arranged boxes of roses and chrysanthemums. The Baby chrysanthemums, the little yellow button, was an attractive feature in these boxes. In addition to the elegant roses some very beautiful cattleyas and other orchids were noted.

Fleischmann's store was particularly handsome. While no particular Thanksgiving feature was attempted yet the arrangement of the chrysanthemums and other flowers was very attractive. Very artistic corsages and bunches were being arranged for the debutantes and dinner table decorations. The combinations of violets and lily of the valley and cypripediums and lily of the valley were particularly noticeable.

VIEW OF CHRYSANTHEMUMS AT A. F. AMLING CO.'S, MAYWOOD, ILL.—See Page 927.

Chrysanthemum F. E. Nash.

Chrysanthemum E. M. Byrnes.

Chrysanthemum Alice M. Flagler.

At Bohannon's store an unusually fine display of chrysanthemums and roses was noticed and a window of beautifully grown Begonia Glorie de Lorraine and cyclamen tied with ribbons was especially attractive.

Ernest Weinhoeber Co. was very busy with debutante receptions and dinner parties in addition to the usual Thanksgiving trade. Orchids are having a good call at this establishment and a very handsome assortment of blooming and decorative plants arranged in gilt and other baskets was a great feature in the salesroom. Thanksgiving morning was extremely busy, all hands being on the jump filling orders and arranging the floral work.

Strail & Hahn were very busy with the many orders for the splendid roses and chrysanthemums which they carry and a feature here was the beautifully arranged corsages of roses which were being put up for the dining tables and for personal adornment.

At Friedman's was to be found a fine display of all the seasonable flowers, the best that the market affords. Orchids occupy a prominent place and violets and lily of the valley were used in quantity. A window of beautiful begonias and azaleas was an attraction to the shoppers on Michigan avenue.

Poinsettias.

The poinsettias are now approaching their salable stage, and the bracts are taking on their brilliant color. They will be greatly benefited now with frequent waterings of liquid manure. The plants should be tied up to a neat stake, so that they will be nice and shapely. Great care should now be taken to maintain an even temperature, for if the house is allowed to get cool for one or two nights, a loss of the foliage is certain. The plants that are grown for cut blooms will need to be staked to have long straight stems, a stake to each branch is the better way, and if the soil was not very rich, should be given liquid manure regularly; a little soot in the

Chrysanthemum W. Woodman.

water will add to the brilliancy of the color. Some growers have more or less trouble with the blooms wilting after they are cut, and different methods have been advised to remedy this; some growers place the base of the stem as soon as cut on a red hot coal, thereby sealing the end of the stem. Others plunge the stems into hot water and claim that this will prevent the wilting. The method with which we have had the best results is to wrap the entire stem, bloom and all, in moistened newspaper, the same as is done with cut adiantum ferns, and place them in deep pots of water away from draughts, and in not too cool a place. Six or eight blooms can be wrapped up together in this manner and if allowed to stand in water for 12 hours they will not wilt when unwrapped. The small poinsettias should now be made into pans, and a few small ferns planted around the edge are a great addition and help the sale. In making the pans a taller plant in the center with

small nephrolepis around it and then smaller ferns on the outer edge of the pot are very pretty combinations that sell easily and then, even if the poinsettias do drop their leaves, the pan will still have a neat appearance.

Begonia Gloire de Lorraine.

This popular Christmas plant should now be nearly in bloom, and the plants be given plenty of room and staked and tied out as rapidly as possible. The tying and staking is a tedious job, but should be done carefully, and will amply repay in the advanced price which can be obtained for the plant. A strong wire, that will hold the branches up, makes the neatest appearance, and green silkline is by far the best cord to use for this purpose. If the plants are well advanced and coming into bloom, they can be moved into a cooler temperature, say a house that will have a temperature of 50° at night. The flowers will be of better color and heavier texture, if grown in this temperature for a week or ten days before being sold. Care should be taken in watering the plants now not to wet the flowers, and not to spot the foliage, and any damaged leaves should be immediately removed. In shipping this plant it should be very carefully wrapped, for the flowers are fragile and bruise easily. A sheet of cotton batting around the blooms will be a great help and insure the arrival of the plant in good condition. Light fumigations with nicotine papers should be constantly followed up for aphids are very partial to this plant and will soon ruin it if allowed to get a hold, and will cover the buds and blooming shoots.

TILLSONBURG, ONT.—W. L. Lindsay has made several improvements to his range of glass the past summer. A 75-foot addition has been built to one of the violet houses, an additional boiler installed, a 90-foot chimney erected, and a new potting shed and cellar completed. The plant now consists of ten houses, covering an area of 35,000 square feet.

CHRYSANTHEMUM MRS. DAVID SYME.

Chrysanthemum Novelties.

The following varieties of chrysanthemums have been exhibited at the shows this fall and have received favorable comment wherever shown. The descriptions are furnished by C. H. Totty, of Madison, N. J., the introducer.

Mrs. David Syme, the finest white in existence, either exhibition or commercial. A tall statement to make, but one that the shows of the past few weeks have proved and that the future will also endorse, when the variety is generally distributed. Purest white. Largest size, perfect in stem, foliage and keeping qualities. It is difficult to find a finer variety in its color than Mrs. David Syme.

E. M. Byrnes is a very striking crimson scarlet. This is not particularly large, but the coloring is simply superb.

F. E. Nash has been certificated by the Chrysanthemum Society of America and next year will most likely be very prominent as an exhibition variety. It is a light pink Japanese and when finished in shade gives a flower much the same color as William Duckham. If grown in the sunlight it bleaches to the color of Frank Payne. It will be well worth growing by everyone.

Alice M. Flagler is an American seedling, pure white in color, with a very attractive style and petalage. Stem and foliage are superb and while it might not travel in the same class as Mrs. Syme, it is a beautiful variety.

Mrs. G. C. Kelly, old rose with a silvery reverse. It is the largest of the varieties of this year and next year it will undoubtedly be the finest vase of flowers in the show as Mrs. David Syme was this year. Mrs. Kelly will maintain the Wells-Pockett prestige.

W. Woodmason is one of the last year's novelties. It is slow in producing stock and there will be a short supply for several years to come in consequence. At Morristown it was scored as the largest flower in the show. It created a sensation and many inquiries were made regarding its parentage.

Missouri Botanical Garden Flower Show.

Another successful display of chrysanthemums has been made at the Shaw Garden of St. Louis, giving pleasure to 19,400 persons. As in earlier years, the plants were exhibited under a large circular tent, covering the sunken garden which is used for tulips in the spring and for choice bedding plants through the summer. About 500 named varieties were represented by nearly 2,500 plants, grouped effectively for color and mass results, and the chrysanthemum grower of the garden, Max Schiller, received more than the usual number of compliments on his success in raising large specimen plants and excellent single heads. If the latter did not equal the prize-winners of the large commercial exhibits, the lack was more than made good by the comparative knowledge of chrysanthemums afforded by the display side by side of so large a number of named ferns well and characteristically developed.

The Growers of Maywood, Ill.

Out in Maywood, a suburb of Chicago, are a number of growers, clustered together, who produce a high grade of floral stock for the city flower market. The principal plant in this district, that is the largest, is that of the Albert F. Amling Co. The range consists of some thirty houses with a total area of 250,000 square feet. The large range of fourteen houses 25x300 feet each, is built upon the ridge and furrow plan, with iron gutters, and are very high and light and conducive of extra fine culture. American Beauty roses and sweet peas are the specialties of this concern. Ten of these large houses are planted to American Beauties and the stock was in elegant condition, extra long stems covered with beautiful luxuriant foliage and bearing extra large buds of splendid color. The particular thing which we noticed was that the houses do not appear to be croppy in the least, but growths in all stages were noticed, with promise of a continuous cutting throughout the winter with an excellent set for the holiday season. Four of the houses of this range are devoted to chrysanthemums and large quantities of an extra good grade of commercial blooms are grown and being shipped to the Chicago market. The following varieties were observed as being in noteworthy condition: Major Bonnaillon Crocus, Golden Wedding, Robert Halliday, Timothy Eaton and its yellow sport and White Clementine Touset. A number of houses in the older range are planted to sweet peas.

some of which are just beginning to bloom, and they are in splendid condition, a large quantity of plants of this favorite flower are just coming through the ground in small pots to fill the benches now occupied with the chrysanthemums and an immense cut will be the product of these houses.

being the chrysanthemums, sweet peas, freesias, asparagus and lilies. Henry Wehrmann, a grower who devotes his 20,000 feet of glass to chrysanthemums and sweet peas, had his stock in splendid condition. In chrysanthemums, the following varieties were noticeably fine: White Clementine Touse, Major

and chrysanthemums which were looking very nice, and a good winter crop of the former is promised. Walter Burhop, another grower, devotes his space to chrysanthemums and sweet peas, which were looking very fine.

THE EXHIBITIONS.

New York Horticultural Society.

Fall exhibition of The Horticultural Society of New York, held in the American Museum of Natural History, 77th street and Central Park, west. The strike of the express drivers caused considerable trouble in delivering exhibits and, we believe, was responsible for keeping many good things at home. However, there was a splendid exhibition in view when the doors were opened to the public on the evening of November 9. Chairman of the Council, F. R. Pierson, Secretary Geo. V. Nash and Manager J. A. Manda were indefatigable in their efforts to assist exhibitors in every possible way, the final staging of the various exhibits presented a harmonious picture that was pleasing to all who saw it, and reflected great credit upon those who had it in charge.

The center of the main hall was occupied with three immense specimen chrysanthemum plants, a yellow and two red ones. These were from the Untermeyer Estate, Greystone, N. Y., in groups around the side walls were Crotons from A. J. Manda, plumed colosias from Julius Roehrs Co., Rutherford, N. J.; thirteen varieties of Nephrolepis, from F. R. Pierson, Tarrytown, N. Y.; evergreens, bay trees and specimen palms from Bobbink & Atkins, Rutherford, N. J.; Nephrolepis Glatrasii from G. Glatras, West Hoboken, N. J. The corridor fencing the entrance was donated to orchids; here Lager & Hurrell, Summit, N. J., staged about fifty varieties in bloom. A most interesting feature of this exhibit was a collection of yellow varieties of Cyrtopodium insignis; J. A. Manda, West Orange, N. J., showed a very neat and attractive collection also. The corridor to the right of the entrance contained the displays of roses, carnations, violets and sweet peas with groups of Ficus Pandurata, and variegated evergreens from Bobbink & Atkins in the foreground.

The chrysanthemum cut flowers occupied the opposite corridor and many of the side aisles, this feature of the show being, of course, the most extensive one. Among those in the trade who made elaborate displays on this side were Chas. H. Gottz, Madison, N. J., Scott Bros., Elmstord, N. Y., and R. Vincent, Jr., & Sons Co., White Marsh, Md. The judges were: T. R. Angus, C. H. Totty, Wm. Reid, W. Stobo, T. L. Powell and Alex. Mackenzie. Their verdicts as given out by the secretary, G. V. Nash, follow:

Chrysanthemums.

Specimen bush plant, yellow.—Samuel Untermeyer, Yonkers, first.

Specimen bush plant, white.—E. H. Weatherbee, Mamaroneck (Francis Milne, gardener), first.

Specimen bush plant, pink.—Adolph Lewisohn, Ardsley (John Canning, gardener), first.

WENDLAND & KEIMEL'S PRIZE VASE OF KILLARNEY ROSES.

At the Chicago Show.

Smilax and asparagus are grown in quantity and are now looking very thrifty and a house of Adiantum Farleyense was sending forth some magnificent fronds.

The water supply of this range has been entirely remodeled this season, and demands more than passing notice. An artesian well 225 feet deep is the source, and the water is pumped from this by a gasoline engine, into an immense concrete reservoir built this year, 130 feet long, 30 feet wide and 14 feet deep. From this, two triplex Lucas pumps with power from an electric motor pumps the water, mixed with compressed air, one-third air to two-thirds water, into an iron tank 28 feet long and eight feet in diameter, holding 10,000 gallons. The pumps are so adjusted that when the pressure reaches 80 pounds, they automatically stop, and when the pressure recedes to 60 pounds, they start again. The compressed air furnishing the necessary pressure for syringing and watering. This water system was installed by the Kewanee Water Supply Co., at a total cost of \$5,000.

A. F. Amling superintends the work at the greenhouses, with the assistance of his son, Otto H., and the condition of everything is a testimonial of their ability. The output is marketed in Chicago at the wholesale store of E. C. Amling Co., 32-36 Randolph street.

Others growers of this district who were visited were W. H. Amling, who has a very nice range of 24,000 square feet of glass, having added this year a house 37x350. A general crop is grown in these houses, which was looking very fine, particularly noticeable

Bonnaffon, white Bonnaffon, Timothy Eaton, Crocus, Miss Virginia Poehlmann and Mdle. Jeanne Nonin. Ernest C. Amling has a small range, making a specialty of American Beauty roses, which were very promising. Hugo Luedtke grows chrysanthemums and sweet peas. His plant covers about 10,000 square feet, and the stock is in prime condition. William Wichtendahl has two houses of carnations

CHRYSANTHEMUM MRS. G. P. KELLY.

Specimen bush plant, any other color.—Samuel Untermyer, first.
 Largest and best specimen bush, any color.—Samuel Untermyer, first.
 Specimen standard, pink.—Chas. Hathaway, East Orange, N. J. (Max Schneider, gardener), first.
 Specimen standard, any other color.—F. V. Burton, Newburgh (Wm. Cordes, gardener), first.
 Specimen anemone.—F. V. Burton, first.

Best new variety not in commerce.—Cottage Gardens Co., first.
 Finest vase of 100 blooms.—Traendly & Schenck, sweepstakes, with Mrs. C. W. Ward.
 Twenty-five white.—John J. Riker, Port Chester (Thos. W. Stobo, gardener), first; Emerson MacMillin, Ramsey, N. J. (Francis X. Golly, gardener), second.
 Twenty-five Winsor shade.—Frederick Sturges, first.
 Twenty-five scarlet.—Frederick Potter, first.

J. A. BUDLONG'S PRIZE VASE OF AMERICAN BEAUTY ROSES.
 At the Chicago Show.

Finest and best plant exhibited.—Adolph Lewisohn, sweepstakes, with Annie Laurie.
 Twenty-five blooms, any color.—Miss Blanche Potter, Ossining (Geo. Wittlinger, gardener), first.
 Twelve blooms Mrs. Jerome Jones (special prize offered by Mr. Jerome Jones).—M. F. Plant, Groton, Ct. (Thos. W. Head, superintendent), first.
 Best vase of 50 blooms, arranged for effect.—Traendly & Schenck, Rowayton, Ct., first.
 Twenty-five varieties, distinct.—Mrs. F. A. Constable, Mamaroneck (Jas. Stuart, gardener), first; M. F. Plant, second.
 Display of hardy pompons, 25 varieties.—Chas. Mallory, Port Chester (Wm. J. Sealey, gardener), first; E. H. Weatherbee, second.
 Collection of singles and anemones, or either, 25 varieties.—Mrs. F. A. Constable, first; J. T. Pratt, Glen Cove (J. W. Everitts, gardener), second.
 Twelve blooms, white.—Miss Georgine Iselin, New Rochelle (Ewen MacKenzie, gardener), first; Miss M. T. Cockcroft, Saugatauck, Ct. (Adam Paterson, gardener), second.
 Twelve blooms, yellow.—Miss M. T. Cockcroft, first; Miss B. Potter, second.
 Twelve blooms, any other color.—E. H. Weatherbee, first.
 Best vase of 25 blooms, arranged for effect.—H. M. Tilford, Tuxedo Park (Jos. Tansey, gardener), first.
 Twelve varieties, distinct.—Miss Georgine Iselin, New Rochelle, first; Adolph Lewisohn, second.
 Display of hardy pompons, 12 varieties.—Chas. Mallory, first; Frederick Sturges, Fairfield, Ct. (Thos. Bell, gardener), second.
 Collection of singles and anemones, or either, 12 varieties.—J. T. Pratt, first; Osborn Estate, Garrison (Wm. Inglis, gardener), second.
Roses and Carnations.
 One hundred American Beauty roses.—F. R. Pierson Co., Tarrytown, first.
 One hundred White Killarney.—F. R. Pierson Co., Tarrytown, first.
 Twelve American Beauty.—Samuel Untermyer, first.
 Twelve My Maryland.—H. M. Tilford, first.
 One hundred white carnations.—Traendly & Schenck, first; Chas. Weber, second.
 One hundred Enchantress shade.—Traendly & Schenck, first; Chas. Weber, second.
 One hundred scarlet.—Traendly & Schenck, first.
 One hundred Lawson shade.—Traendly & Schenck, first.
 Best and largest collection, not less than 25 of a kind.—Cottage Gardens Co., Queens, first; Traendly & Schenck, second.

F. R. Newbold, Poughkeepsie (F. W. Saenger, gardener), second.
 Twenty-five Enchantress shade.—John J. Riker, first; F. R. Newbold, second.
 Twenty-five crimson shade.—Frederick Sturges, first.
 Twenty-five Lawson shade.—Frederick Sturges, first; H. M. Tilford, second.
 Twenty-five white ground, variegated.—F. R. Newbold, first.
Foliage and Decorative Plants.
 Stove and greenhouse plants, 100 sq. ft.—Samuel Untermyer, first.
 Collection of conifers, not less than 25 va-

rieties.—Bobbink & Atkins, Rutherford, N. J., first.
 Largest and best exhibit of bay trees.—Bobbink & Atkins, first.
 Best display of *Ficus pandurata*.—Bobbink & Atkins, first.
 Best specimen staghorn-fern.—Mrs. Harold Irving Pratt, Brooklyn (A. J. Manda, gardener), first.

Collection three nepenthes.—Mrs. Harold Irving Pratt, first.
 Collection marantas.—Mrs. Harold Irving Pratt, first.

Specimen plant begonia Gloire de Lorraine.—Adolph Lewisohn, first; S. M. & A. Colgate, Orange, N. J. (Wm. Reid, gardener), second.
 Finest and largest specimen *livistonna Chinensis*.—Mrs. Harold Irving Pratt, first.
 Finest and largest specimen of phoenix.—Mrs. J. Hood Wright (Chas. A. Wobber, gardener), first; Bobbink & Atkins, second.
 Finest and largest specimen of *Howea Forsteriana*.—Mrs. J. Hood Wright, first.
 Best specimen of *cycas circinalis*.—Mrs. Harold Irving Pratt, first.
 Best specimen of *polypodium aureum*.—Bobbink & Atkins, first.
 Best specimen of *davallia*.—Mrs. Harold Irving Pratt, first; Mrs. J. Hood Wright, second.
 Best specimen of *nephrolepis exaltata Bostoniensis*.—F. R. Pierson Co., first; Mrs. J. Hood Wright, second.
 Best specimen *nephrolepis elegantissima*.—F. R. Pierson Co., first.
 Best display of *nephrolepis exaltata* and its varieties.—F. R. Pierson Co., first.
 Display of crotons, six varieties, one plant of each.—Mrs. Harold Irving Pratt, first; Samuel Untermyer, second.
 Specimen of pine-apple plant in fruit.—Samuel Untermyer, first; Mrs. Harold Irving Pratt, second.
 Specimen lemon-tree in fruit.—F. R. Pierson Co., first.
 Collection of 18 different vegetables.—Miss B. Potter, first.
 Sufficiently meritorious new plant.—F. R. Newbold, for chrysanthemum, certificate.

Orchids.

Collection of orchids, not less than 25 species and varieties.—Lager & Hurrell, Summit, N. J., first.
 Novelty not before exhibited before the society.—Lager & Hurrell, first.
 Three hybrid orchids.—Clement Moore, Hackensack, N. J. (Jas. P. Dye, gardener), first; Lager & Hurrell, second.
 One hybrid orchid.—Lager & Hurrell, first.
 Collection of cut blooms.—Jos. Manda, West Orange, N. J., first; Lager & Hurrell, second.
 Collection of cypripediums, cut blooms.—Lager & Hurrell, first.
 Best orchid plant, in bloom.—Lager & Hurrell, first.
 Best *vanda caerulea* plant, in bloom.—Lager & Hurrell.
 Best cypripedium plant in bloom.—Lager & Hurrell, first.
 Best dendrobium plant, in bloom.—Jos. Manda, first; Lager & Hurrell, second.
 Two plants in bloom, showing highest excellence of cultivation.—F. V. Burton, first; Lager & Hurrell, second.
 Best spray of cattleya.—Jos. Manda, first; Lager & Hurrell, second.

WENDLAND & KEIMEL'S PRIZE VASE OF WHITE KILLARNEY ROSES.
 At the Chicago Show.

Best spray of orchidum.—Wm. Ziegler Estate, Noroton, Ct. (A. Bieschke, gardener), first; Lager & Hurrell, second.

Best spray of vanda.—Lager & Hurrell, first.

Best spray of dendrobium.—Lager & Hurrell, first.

Best spray of any other orchid.—Jos. Manda, first.

Six plants, six varieties, in bloom.—F. V. Burton, first.

Three plants of cattleya labiata, in bloom.—F. V. Burton, first.

Three plants, three varieties, in bloom.—Osborn Estate, first.

Best plant exhibited in either class.—F. V. Burton, sweepstakes, with cattleya labiata.

Special Prizes.

Four vases Sweet Peas.—Geo. T. Schuneman, Baldwin, special mention.

Collection of neprolepis glattasii.—George Glatras, West Hoboken, N. J.

Collection hardy pompon chrysanthemums.—R. Vincent, Jr., & Sons Co., White Marsh, Md., special mention.

Nerine Fothergillii major.—Mrs. F. A. Constable, bronze medal.

Collection of hardy pompon and single chrysanthemums.—C. H. Totty, Madison, N. J., special mention.

Cosmos Klondike.—Samuel Untermyer, certificate of merit.

Collection of crotons.—Mrs. Harold Irving Pratt, silver medal.

Group of Celosia Pride of Castle Gould.—J. Roehrs Co., Rutherford, N. J., special mention.

Group of Euonymus japonicus variegatus.—Boblink & Atkins.

Miscellaneous collection of chrysanthemums.—Scott Bros., Elmsford, special mention.

Two Phoenix Roebelinii.—Wm. Ziegler Estate, silver medal.

Vase of Lilian Doty chrysanthemums.—Wm. Ziegler Estate.

Collection of seedling single chrysanthemums.—W. P. Clyde, New Hamburg (H. J. Osterhout, gardener), certificate.

Medals of Society of American Florists Awarded.

Silver Medal to Lager & Hurrell for Cypripedium insigne Hurrellianum.

Silver Medal to F. R. Pierson Co. for Neprolepis viridissima.

Silver Medal to F. R. Pierson Co. for a new form of the superbissima.

It will be seen from the foregoing that this society is making some progress in the giving of flower shows. Chairman F. R. Pierson, when speaking about the future of the society, says: "The aim is to secure a permanent fund that will be large enough so that the income thereof will be sufficient to cover all cost of exhibitions and prize schedules, to make the exhibitions absolutely free to the public, and by so doing, a very large attendance is assured." Sixty new members have been added to the membership roll while the exhibition was in progress, fourteen of which are life members. Mrs. Russell Sage also became one of the patrons of the society.

Connecticut Horticultural Society.

The annual chrysanthemum show given by the Connecticut Horticultural Society was held November 3-4 and was the largest ever held by this society. Among the large exhibitors are J. F. Huss, gardener to J. J. Goodwin; J. A. Weber; gardener to Walter L. Goodwin; and Niel Nelson, gardener at the Hartford Retreat. The prizes in the amateur classes were awarded to A. Rigbenzi, T. B. Brown and Oscar F. Gritzmacher. The judges were Robert Paton and John H. Murray of New Haven and the awards are as follows:

Best three specimen plants, distinct varieties, in pots not exceeding 14 inches in diameter.—John F. Huss, superintendent for James J. Goodwin of Hartford, first; J. A. Weber, gardener for Walter L. Goodwin of Hartford, second.

Best specimen standard, distinct variety.—John F. Huss, first; J. A. Weber, second.

Best specimen bush plant, to show at least one-inch stem, not exceeding 14-inch pot.—John F. Huss, first.

Best 12 single stem, distinct varieties, not exceeding six-inch pots.—J. A. Weber, first; Niel Nelson, horticulturist of the Hartford Retreat, second.

Best six single stem, six distinct varieties, not exceeding six-inch pots.—J. A. Weber, first.

Best 12 pompons, distinct varieties, not exceeding six-inch pots.—John F. Huss, first.

Best three specimen pompons, not exceeding 12-inch pots.—John F. Huss, first.

Best specimen pompon, not exceeding 12-inch pot.—J. A. Weber, first; John F. Huss, second.

Best 25 cut blooms, distinct varieties.—Niel Nelson, first; John F. Huss, second.

Best 12 cut blooms, distinct varieties.—Charles Thomas Beasley, gardener for Mrs. William C. Lanman of Norwich, first; J. A. Weber, second.

Best six cut blooms, distinct varieties.—Charles Thomas Beasley, first; Alfred Cebelius, gardener for Prof. M. W. Jacobus of Hartford, second.

Best six yellow blooms.—Charles Thomas Beasley, first; Mrs. W. L. Cushing, second (Thos. Stentford, gardener), Simsbury, second.

Best six red blooms.—Charles Thomas Beasley, first; Niel Nelson, second.

Best six white blooms.—Charles Thomas Beasley, first; Walter Angus of Chapinville, second.

Best six pink blooms.—Walter Angus, first; John F. Huss, second.

Best six bronze blooms.—Charles Thomas Beasley, first; Niel Nelson, second.

Best six blooms, any other color.—Charles Thomas Beasley, first; Walter Angus, second.

Best three yellow blooms.—Charles Thomas Beasley, first; Alfred Cebelius, second.

Best three red blooms.—Charles Thomas Beasley, first; Mrs. W. L. Cushing, second.

Best three white blooms.—Charles Thomas Beasley, first; Walter Angus, second.

Best three pink blooms.—Charles Thomas Beasley, first; Niel Nelson, second.

Best three bronze blooms.—Alfred Cebelius, first; Charles Thomas Beasley, second.

Best three blooms, any other color.—Walter Angus, first; Mrs. W. L. Cushing, second.

One best incurved, any color; Mrs. W. L. Cushing, first; Alfred Cebelius, second.

One best reflexed, any color.—Mrs. W. L. Cushing, first; Charles Thomas Beasley, second.

Best floral piece of chrysanthemums.—George G. McClunie, first; Niel Nelson, second.

Best standard, any variety, 12-inch pot.—John F. Huss, first.

Best specimen plant, anemone, not exceeding 12-inch pot.—J. A. Weber, first; John F. Huss, second.

Best specimen plant, single, not exceeding 12-inch pot.—John F. Huss, first; J. A. Weber, second.

Best 12 plants, anemone, 6-inch pots.—John F. Huss, first.

Best collection of sprays, single.—Warren S. Mason of Farmington, first.

Best collection of cut pompons.—Warren S. Mason, first.

Group of chrysanthemums, ferns, and foliage plants.—John F. Huss, first.

Best vase of carnations, not yet in commerce.—Terry & Peck of Bristol, first.

Best bunch of violets.—Whiting's Greenhouse, Carl Peterson, manager, West Hartford, first.

Best two specimen plants of Begonia Gloire de Lorraine, pink.—Mrs. W. L. Cushing, first; John F. Huss, second.

Best two specimen plants of Begonia Gloire de Lorraine, white.—John F. Huss, first; Niel Nelson, second.

Best two specimen of ferns, any variety.—John F. Huss, first.

Best specimen of palm.—John F. Huss, first.

Best vase of cosmos, Lady Lenox.—John F. Huss, first.

Best collection of fruits.—George W. Smith of Melrose, first; Walter Angus, second.

Special.

(By Stump & Walter Co. of New York.)

For best trained chrysanthemum plant, standard or bush form.—John F. Huss, first; J. A. Weber, second.

Best collection of carnations, six varieties.—Terry & Peck, first.

(By Arthur T. Boddington of New York.)

Best 12 varieties vegetables.—Walter Angus, first; J. A. Weber, second.

Best 18 varieties.—Walter Angus, first; John F. Huss, second.

Best 24 varieties.—John F. Huss, first.

Diploma to John F. Huss for collection of orchids.

Diploma to John F. Huss for two new begonias, La Patrie.

Certificate of merit to the Whiting Greenhouse for vase of yellow chrysanthemums.

Certificate of merit to the Whiting Greenhouse for collection of roses.

Certificate of merit to J. A. Weber for grafted chrysanthemum, 13 varieties.

Certificate of merit to Mrs. W. L. Cushing for pink Begonia Gloire de Lorraine.

Worcester County Horticultural Society.

The chrysanthemum show of the Worcester County Horticultural Society was held November 10 in Horticultural Hall, and was the best ever held for both quality and quantity. The arrangement of plants and flowers was artistic and reflected great credit on the exhibitors and the committee in charge. The stage was outlined with decorative grasses, bay trees and two tall vases of single white chrysanthemums. Beneath the stage was a display of roses and carnations by Leonard C. Midgley. H. F. A. Lange showed a table of Begonia Gloire de Lorraine, a table of roses, and an arrangement of palms with tall vases of chrysanthemums with a border of small pots of Jerusalem cherries, Whitman and Boston ferns.

The anemone and single chrysanthemums shown by G. W. Knowlton and H. F. A. Lange occupied two tables.

James E. Draper had an extensive exhibit of shrubs, evergreens, bay trees and other decorative plants. In the decorative class the schedule called for a half circle twelve by eight feet. L. C. Midgley exhibited palms with yellow, white and anemone chrysanthemums, lilies, Enchantress carnations and Mrs. Jardine roses. E. W. Breed showed palms and bay trees, the background filled with boxwood and ferns and chrysanthemums in white and yellow. The display by H. F. A. Lange, which was awarded first prize, was made up of palms, chrysanthemums, lilies and ferns, with a semi-circle of cattleya labiata.

Charles D. Mackie's display was nicely arranged and included chrysanthemums, primula obconica, ferns and palms.

Awards.

Twelve blooms chrysanthemums.—George W. Knowlton, first; Mrs. J. C. Whitin, second.

Six blooms.—G. W. Knowlton, first; Mrs. J. C. Whitin, second.

Best bloom.—Mrs. J. C. Whitin, first; G. W. Knowlton, second.

Vase of 10 blooms, white.—G. W. Knowlton, first; Mrs. J. C. Whitin, second; L. C. Midgley, third.

Ten pink.—G. W. Knowlton, first; Mrs. J. C. Whitin, second; L. C. Midgley, third.

Ten yellow.—Mrs. J. C. Whitin, first; John Ginn, second; G. W. Knowlton, third; L. C. Midgley, fourth.

Six red.—G. W. Knowlton, first; Mrs. J. C. Whitin, second; L. C. Midgley, third.

Twenty-five blooms.—G. W. Knowlton, first; Mrs. J. C. Whitin, second; L. C. Midgley, third.

Display of pompons.—G. W. Knowlton, first; Mrs. Percy G. Forbes, second; Mrs. J. C. Whitin, third.

Display of single varieties.—H. F. A. Lange, first; G. W. Knowlton, second.

Plants and flowers.—E. F. A. Lange, first; Edward W. Breed, second; L. C. Midgley, third.

Gratuities: Fernery, Mrs. H. E. Hildreth; evergreen, J. E. Draper; palms, H. F. A. Lange; roses, H. F. A. Lange; begonia, H. F. A. Lange; carnations, L. C. Midgley; roses, L. C. Midgley.

VIEW OF MILWAUKEE FLOWER SHOW.

SOME OF THOSE IDENTIFIED WITH THE MINNEAPOLIS SHOW.—Minneapolis Tribune.

cyclamen, L. C. Midgley; display plants and flowers, C. D. Mackie; vase of pink chrysanthemums, James Nicols; fern globes, Mrs. Hildreth, Mrs. A. E. Auckley, Miss Grace Johnson, Mrs. H. L. Bancroft.

George MacWilliam was the judge of the show and after finishing his labors went to Boston, where he was joined by Mrs. MacWilliam, and both boarded a train for New Brunswick on a two weeks' vacation. M. W. REID.

Minnesota State Florists' Association.

The show was continued until Monday evening and with a good attendance added quite a little to the exchequer by so doing. Nearly all the exhibitors donated their blooming plants and these with the flowers sold during show week netted \$1,000 or more in the sale made on Tuesday. Additional awards are as follows:

Chrysanthemum Plants.

Best specimen white.—Holm & Olson, first; D. C. Swanson, second; Park Greenhouses, third.

Best specimen yellow.—O. C. Swanson, first; Holm & Olson, second.

Best specimen pink.—Holm & Olson, first; O. C. Swanson, second; Park Greenhouses, third.

Best specimen red.—Holm & Olson, first; O. C. Swanson, second.

Best specimen, any other color.—O. C. Swanson, first.—Park Greenhouses, second; Holm & Olson, third.

Best specimen anemone.—O. C. Swanson, first; Holm & Olson, second; Park Greenhouses, third.

Best specimen pompon.—O. C. Swanson, first; Holm & Olson, second.

Twelve plants, six varieties.—O. C. Swanson, first; Holm & Olson, second; Park Greenhouses, third.

Standard form, five plants, any color.—Holm & Olson, first; Park Greenhouses, second.

Best group for effect, 50 square feet.—Park Greenhouses, first; Will Bros. Co., second; La Crosse Floral Co., third.

Best group, 50 square feet, single varieties, for effect.—Holm & Olson, first; L. S. Donaldson Co., second; Park Greenhouses, third.

Group pompon, 30 square feet, for effect.—O. C. Swanson, first; Park Greenhouses, second; Holm & Olson, third.

Twelve white plants grown to single stem.—Holm & Olson, first; Will Bros. Co., second.

Twelve yellow.—Will Bros. Co., first; Holm & Olson, second.

Twelve pink.—Holm & Olson, first.

Collection of orchids in bloom.—O. C. Swanson, first.

Collection of evergreens in tubs, 20 varieties.—L. L. May & Co., first.

To Julius Roehrs, Rutherford, N. J., group of decorative plants for competition, a certificate of merit.

To H. W. Buckbee, Rockford, honorable mention for best seedling exhibition scale and for best seedling commercial scale.

To Minneapolis Floral Co., medal for best rose not in commerce.

To Minneapolis Floral Co., certificate of merit for vase of chrysanthemums arranged for effect.

To John E. Sten, honorable mention for vase of chrysanthemums.

To Hoskins Floral Co., Bismarck, N. D., certificate of merit for 50 pink and 50 White Enchantress, which arrived too late for judging.

Special recognition was made by the judges of the chrysanthemum hanging baskets used in the decoration of the pergolas and furnished by the Park Greenhouses, Minneapolis.

Frank Berry of Stillwater was awarded second prize on 12 reflexed blooms.

Massachusetts Horticultural Society.

The Committee on Gardens of the Massachusetts Horticultural Society announces its list of awards for estates and gardens visited the present year as follows:

H. H. Hunnewell Triennial Premium for an estate of not less than three acres which shall

be laid out with the most taste, planted most judiciously and kept in the best order for three consecutive years: George E. Barnard, Ipswich.

Special prize for an estate in Massachusetts of not more than three acres nor less than one acre that shows the best arrangement in planting and is kept in the best order: Second Prize, F. W. Dahl, Roxbury, \$25.

For a garden of summer or fall-flowering plants, not commercial: First Prize, George E. Barnard, Ipswich, Silver Medal.

For a garden or collection of hardy roses, not commercial: First Prize, George E. Barnard, Ipswich, Silver Medal.

For a rock garden: First Prize, George E. Barnard, Ipswich, Silver Medal.

For a water garden: First Prize, George E. Barnard, Ipswich, Silver Medal.

For a fruit garden of large or small fruits: First Prize, Walter G. Kendall, Atlantic, Silver Medal; Second, F. W. Dahl, Roxbury, Bronze Medal.

For a vegetable garden, not commercial: First Prize, George E. Barnard, Ipswich, Silver Medal; Second, F. W. Dahl, Roxbury, Silver Medal.

Special awards are made as follows: Otto Strassenburg, Lexington, for superior cultivation of summer and fall-flowering plants, First Class Cultural Certificate and \$10. Mrs. Harriet R. Foot, Marblehead, for superior cultivation of roses, First Class Cultural Certificate and \$10. Charles W. Parker, Marblehead, for tasteful planting of his estate "Redgate," First Class Certificate.

The members of the Garden Committee for the present year are Charles W. Parker, Chairman; Arthur F. Barney, Arthur H. Fewkes, T. D. Hatfield, Julius Heurlin, Wm. Nicholson, W. P. Rich, W. J. Stewart, J. B. Shurtleff, Jr., and Wilfred Wheeler.

The green moss shines with icy glare,
The long grass bends its spear-like form,
And lovely is the silvery scene,
When faint the sunbeams smile.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1910

Subscription, United States and Mexico \$1.00 a year; Canada \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

HOLIDAY advertising matter, cards, folders, circulars and the like should be ordered from the local printer now. We have some nice engravings suitable for this work. Write for proofs and prices.

Personal.

J. D. Carmody, Posey County, is in Florida for the winter.

Find Bug That Kills Soil.

Sheffield, Eng., Sept. 5.—At today's meeting of the British association, Dr. Russell and Dr. Hutchinson, who have long been experimenting in soil fertility, announced the discovery of the micro-organism which destroys the bacteria essential to the fertility of the soil. A subsequent speaker declared that it was the most important agricultural discovery made in fifty years.

THANKSGIVING DAY business is reported unusually good and the outlook for Christmas and New Year trade is very promising.

OUR Christmas number will be issued December 15. Advertisements for this issue should be sent in early to insure good location and display.

Society of American Florists.

REGISTRATION OF CANNA.

Public notice is hereby given that The Conard & Jones Company, of West Grove, Pa., offer for registration the canna described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

RAISER'S DESCRIPTION.

Olympic—green foliage, 3 to 4 feet, large flowers of rich, orient red, the center a lighter shade dappled carmine. Individual flowers and clusters and very large.

H. B. DORNER, Secretary.

November 24, 1910.

American Rose Society.

By special call of Chairman Pierson, of the National Flower Show committee, a meeting of the American Rose Society schedule committee was called, November 25, in Horticultural Hall, Boston, Mass., President Elliott, acting under the resolution passed at the Rochester meeting of the society, which was:

"Resolved, That the American Rose Society accept the \$1,730 offered by the National Flower Show committee; that the American Rose Society guarantee payment of any premiums in excess of this amount, which the committee of the American Rose Society may deem necessary, and that any funds which shall be added to this amount of \$1,730, shall, if not awarded, revert to the National Flower Show committee; and that the president of the American Rose Society shall appoint a committee to arrange schedule for the exhibition in connection with the National Flower Show."

President Elliott appointed Messrs. F. R. Pierson, H. O. May, Eber Holmes, Adolph Farenwald, Benjamin Hammond, E. G. Hill, Alexander Montgomery, Robert Simpson and Wallace R. Pierson as a schedule committee. F. R. Pierson said it was impossible for him to serve on the committee, and this was the sense of all present. Mr. Elliott was urged to remain at the meeting, but he said he was unable to do it as he had to leave within a few minutes. Wallace R. Pierson was suggested by Mr. Elliott, then, to act as chairman. The committee adjourned until 10 o'clock, November 26, at which time Mr. Pierson called the committee to order and stated that Vice-President Farenwald was present, and that as vice-president he should preside over the actions of this committee and the committee was so organized, with Vice-President Farenwald in the chair.

After some discussion, it was moved that the sum of \$1,500 be expended by the American Rose Society in premiums for the coming exhibition of 1911, this being in addition to the sum of \$730 already listed for pot plants and includes the \$1,000 allotted by the National Flower Show committee for cut flowers. This motion was seconded by

Mr. Holmes and carried unanimously. The committee then prepared the schedule, each item of which was taken up separately.

BENJAMIN HAMMOND, Sec'y.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Elmer D. Smith announces the committees to examine new chrysanthemums for the ensuing year which are as follows:

Boston, Mass.—Wm. Nicholson (chairman), James Wheeler, Alex Montgomery. Ship flowers to Boston Flower Market, C. Park street, care of chairman.

New York.—Eugene Dailedouze (chairman), Wm. Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., 55 Twenty-second street, care Eugene Dailedouze.

Philadelphia, Pa.—A. B. Cartledge (chairman), John Westcott, S. S. Pennock. Ship flowers to A. B. Cartledge, 1514 Chestnut street.

Cincinnati, O.—R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott Flower Market, care janitor.

Chicago.—J. B. Deamud (chairman), Geo. Asmus, W. H. Kidwell. Ship flowers to J. B. Deamud, 51 Wabash avenue.

Shipments should be made to arrive by 2 p. m. on examination days to receive attention from the committee. must be prepaid to destination and an entry fee of \$2 should be forwarded to the secretary not later than Tuesday of the week they are to be examined or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees provided the raiser has given them two years' trial to determine their true character. Special attention is called to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 8, 15, 22 and 29 and November 5, 12, 19 and 26.

WORK OF EXAMINING COMMITTEES.

Chicago, November 26.—Chadwick Supreme, pink sport from W. H. Chadwick, scored 87 points, commercial scale, exhibited by A. N. Pierson, Inc., Cromwell, Conn.

Cincinnati, O., November 26.—Chadwick Supreme, description and exhibitor as above, scored 82 points, commercial scale.

New York, November 26.—Chadwick Supreme, description and exhibitor as above, scored 79 points, commercial scale.

Notice! The Expressman's Strike Is Now a Thing of the Past.

Have your mind now on business. Be wide awake and

PREPARE FOR THE HOLIDAYS

It won't pay to let others get ahead of you. Don't look at what is behind, but go right straight forward. Make a break for Godfrey Aschmann's Greenhouses, to the old reliable firm who has always looked after your interests and who protects you.

We Have No Department Store Customers. We Sell Strictly to the Trade Only.

If you have room, now is the time to purchase your supply while the weather is mild and shipment can be made more safely, and while we have a big stock of everything at bargain prices.

A HOUSE FULL OF BEGONIA GLOIRE DE LORRAINE. WHO CAN BEAT THAT?

Begonia Gloire de Lorraine

Begonia Gloire de Lorraine
to Beat the Band.

This is another specialty of ours. We have a secret in growing them to perfection, only known to us giving them a rich, deep pink color. They stand shipping well, traveling 2,000 to 3,000 miles without injuring or killing them in transit, if properly handled. We have a big housefull in 6 to 7 in. sizes, in bud and partly in bloom ready for immediate sale or for the holidays. Every-

body knows that last Christmas we had the best Begonia Gloire de Lorraine on the market. They were crackerjacks indeed! We have the deep pink and the light pink (Lonsdale) varieties. 6 in. pots, 50c, 75c to \$1.00; 7 in., \$1.25 to \$1.50; 3 in. (if transplanted soon will make good 4 in. for Christmas), 15c each, \$15.00 per 100. If you have room you should order now, because they are always scarce at Christmas.

Begonia Erfordii, latest improvement: this variety is always in full bloom during winter Christmas and Easter: 4 in. pots, in bloom and bud, 20c. **Begonia Rex**, 4 in., 20c.

AZALEA INDICA.

Already Forced for Christmas, showing color now, and put away in colder houses ready for shipment. **Deutsche Perle**, pure double white; **Simon Mardner**, large double pink; **Vervaneana**, double pink variegated. Price: 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each. Remember, only the best and healthiest stock should be selected for Christmas as poor, weak Azaleas won't force successfully for Christmas. Don't order many 75c ones, because we won't have them. Larger sizes and also white ones must accompany the order.

For Easter Forcing we have only the well known standard American market varieties, such as **Mme. Van der Cruyssen**, pink, very scarce this year in Belgium, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; **Niobe**, double white, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; **Deutsche Perle**, 50c, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; **Helena Thielman**, light pink, \$1.00, \$1.25, \$1.50 to \$2.00; **President Oswald de Kerkove**, \$1.00 to \$1.50; **Schryveriana**, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; **Empress of India**, double variegated, 60c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00; **Professor Wolters**, 75c, \$1.00, \$1.25 to \$1.50; **Vervaneana**, 60c, 75c, \$1.00, \$1.25 to \$1.50; **Apollo**, 60c, 75c, \$1.00 to \$1.25; **Simon Mardner**, 50c, 60c, 75c, \$1.00 to \$1.50.

Remember, small sizes of Azaleas are scarce this year in Belgium; therefore I had to buy mostly large sizes.

Remember, it is the wide awake man that is not afraid to invest a dollar that makes the money.

LEADER

 Please mail advertisements early.

Mr. Florist:

Why do you grow Lawson for dark pink when we offer you such a grand variety as

WASHINGTON,

a sport from the Enchantress; the same color as Lawson; a beautiful cerise. Lawson is all right in a way, but the stems are too short and the price you get for the blooms is too low. Washington gives you the long, perfect stems from the beginning of the season. it's free, easy to grow and as profitable as Enchantress. There is nothing better for you to grow and you know no variety pays you better than Enchantress; therefore don't throw your good money away in buying new varieties you do not know anything about. Invest in a sure thing Washington one we all know.

Rooted cuttings, early delivery,

Pennsylvania Horticultural Society.

At the annual exhibition of the Pennsylvania Horticultural Society additional premiums were awarded November 9. Robert Craig Co. made fine exhibits of Begonia Glory of Cincinnati and Edwin Lonsdale, which are by many considered superior to Begonia Gloire de Lorraine. Certificates of merit were awarded to Robert Craig Co. for groups of crotons, Robert Scott & Co., for new roses Melody and Double Killarney; Stockton & Howe, Princeton, N. J., for new rose Princeton. Adolf Mueller, Norristown, exhibited an adjustable pot holder, a very clever device which attracted much attention. The awards are as follows:

Orchids and Foliage Plants.

Best collection of orchids.—Alphonse Pericat, second.
Palms, best collection of twelve plants.—Mrs. F. C. Penfield, first.
Palms, specimen plant in pot or tub.—John W. Pepper, first.
Ferns, display of six plants, six varieties.—Geo. W. Childs Drexel, first.
Crotons, display of six plants, six varieties, grown as pyramids.—Edw. A. Schmidt, first.
Ferns, six plants, six varieties, in not over 8-in. pots or pans.—Geo. W. Childs Drexel, first; C. B. Newbold, second.

Know Ye This?

We grow only Chrysanthemums and Asters
We have had 21 years' experience in introducing Novelties.
We grow more hard hybridized seedlings than all others combined.
We submitted 14 seedlings and received 13 First Class Certificates.
We have the strongest collection for 1911 ever offered either by ourselves or others.
We have the best Commercial set flowering from July to January.
We shall offer five Exhibition Novelties which are unequalled, Next November shows will sustain us.
We are not holding you up because we have a cinch on the good things for 1911
We have set a price not to exceed 75c each.
We know the American raised are the best.
We also know many of the Foreign novelties cost nearly three fold.
We assure you this is only the difference between American and Foreign prices and does not refer to quality.
We import annually many varieties not as good as those we throw out.
We leave it to you. Think this matter over.
We have a new white and light pink Aster known as Smith's Peerless.
We are certain they are just as deserving of your consideration as the Chrysanthemum.
We solicit a share of your patronage.
We will gladly send immediately descriptions and prices to those wishing to place early orders.
We shall issue our complete catalogue in January.

ELMER D. SMITH & CO., Adrian, Mich.

FINE STOCK.

While the receipts of all kinds of stock is equal to the demand yet in most lines the market cleans up every day. Thanksgiving took all the stock that there was. The weather has been dark and cold and the short days have had a serious effect upon the cut at the several greenhouses, but many of the growers report that a few days will see a much increased supply. While there are still some of the late varieties of chrysanthemums on the market in good condition and a goodly quantity of pompons, yet the majority of those seen are the left overs after the holiday, and many of the wholesale dealers have ceased quoting them, yet some of the growers say that they will have some fine blooms yet to sell, which they hope will last till Christmas. Roses are of fine quality and excellent long stem American Beauties. Killarneys, Richmonds and other varieties are daily reaching the market but the demand is fully equal to the supply and in the shorter grades, at some times, is in excess of the stock on hand, this is especially so of short stem American Beauties. The carnations have now come to a fine stage, and the blooms that are coming in are of excellent grade and as the call fluctuates so do the prices on the market, but there is no over supply of good stock which is selling at good prices for the season. Violets have been decidedly short, the home grown singles are selling well, and the eastern shipments are not as heavy as they have been. Orchids are being received in greater supply than a few weeks ago, but the prices hold good and there is demand for all the market supplies. Lily of the valley is in good demand and of excellent quality and a few gardenias are on the market. Paper White narcissus, Roman hyacinths, stevia, marguerites and a few

calendulas are also to be found. The supply of greens is good and of excellent quality, the autumn foliage has come to an end and the demand for greens is consequently on the increase.

NOTES.

Mrs. Anna Hrdlicka died very suddenly Thanksgiving morning at 8 o'clock from heart failure at the age of 52 years. The funeral was held November 27 from the home of her son-in-law, J. A. Mendel, on West Eighteenth street. The floral tributes were large and numerous. The sympathy of the trade is extended to Mr. Mendel.

The Raedlein Basket Co., 713 Milwaukee avenue, received from their factories at Ebersdorf, Germany, a shipment of 24 cases of florist's baskets, November 26. This firm is now prepared to fill all orders for the holidays and extends a cordial invitation to the trade to pay them a visit and look over their large and varied display.

Peter Reinberg is cutting a choice grade of Richmond, Killarney and American Beauty roses. The latter are arriving in fine condition with long stems, foliage and color hard to beat. Killarney at this place is mostly of medium grade, Richmond good. Tim Matchen the manager reports business brisk, the shipping trade excellent.

Nic Zweifel of North Milwaukee, Wis., visited the city this week. He reports that his new carnation, Bright Spot, which won first honors for the best 100 dark pink at the American Carnation meeting at Pittsburg, Pa., last January, is in fine condition. This variety will be disseminated this season and the advance orders are very gratifying.

Bassett & Washburn are now cutting 1,000 long-stemmed American Beauty roses a day, the buds are perfect with fine foliage. C. L. Washburn, of this

concern, is particularly well pleased with the condition of these roses and says that they were never better. Business has been very good and November 28, was especially a busy day. The last chrysanthemums were cut the forepart of the week.

The schooner Rouse Simons, Capt. H. Schuenemann, has arrived at the southwest corner of Clark street bridge, laden with Christmas trees, bouquet green and boughs. This is the thirty-second year that the captain has gathered greens in the Lake Superior woods, for which he has found a good sale in this city.

The stock that Hoerber Bros. are receiving from their greenhouses at Des Plaines is of high quality Killarney, White Killarney and Richmond roses being fine. A fancy grade of Victory, Beacon, White Perfection, Enchantress and White Enchantress carnations was seen at the store this week.

In the shipments of orchids received daily by Chas. W. McKellar, we noticed an excellent grade of Cattleya Trianae, Vanda caerulea and Dendrobium Phalenopsis. A heavy crop of the cattleyas is now coming on.

A very pretty window display consisting of cut flowers and ferns with a background of birch bark was arranged by Miss J. Then, of the floral department of the Pasteur Filter Sales and Repair Co., 105 Dearborn street.

Vaughan & Sperry are well supplied with a very complete line of high-grade stock. Their American Beauty roses are particularly attractive, also their home-grown violets. A large shipment of *Cattleya Trianae* is due.

O. P. Bassett has purchased a piece of land at Oak Knoll, the residential portion of Pasadena, Calif., with the intention of erecting a costly residence thereon.

POEHLMANN'S FANCY VALLEY } We make these a specialty.
EXTRA FINE HARRISII LILIES } Can supply them all the year.
 Once tried you will have no other.

Several of the leading florist and confectionery stores of the city have on exhibition a number of Armadillo baskets that are attracting a great deal of attention. They are manufactured by Chas. Apelt of Comfort, Texas, with much ingenious skill from the armour-like shell of that curious animal of Old Mexico, the armadillo.

Harry Nicholson, son of William Nicholson, Framingham, Mass., who has been with the Chicago Carnation Co. for the past two years will act as their traveling representative and introduce their new carnation Washington among the growers.

The next regular meeting of the Florists' Club will be held at the Union Restaurant, 111 Randolph street, Thursday evening, December 1, at 8 p. m. The order of business includes the nomination of officers for 1911.

The Chicago Carnation Co. is cutting a fancy grade of carnations with White Enchantress showing up remarkably well. Manager Pyfer has a large vase of Washington, the firm's new carnation, on exhibition.

A meeting of the Horticultural Society executive committee was held November 28, and sub-committees appointed to see about hall and schedule for the next exhibition, with instructions to report December 15.

Funeral and wedding work is keeping Chas. Moravek exceedingly busy at his store at Sawyer and Ogden avenues. A greenhouse is now being built in the rear of the store and will be used for show purposes.

Poehlmann Bros. Co.'s stock is in splendid condition. their American Beauty roses are fine and lily of the valley of the highest grade. This firm is now receiving some beautiful Cattleya Trianae orchids.

Wietor Bros. are cutting a large quantity of Mrs. Jardine, Killarney, White Killarney and American Beauty roses. The last named are mostly of the long stem grade and an exceptionally good quality.

Kennicott Bros. Co. enjoyed a record-breaking Thanksgiving business, which was larger than that of last Christmas. This firm is now receiving a fancy grade of W. H. Chadwick chrysanthemums.

The stock of J. A. Budlong's is arriving in splendid condition, My Maryland, Mrs. Jardine and American Beauty roses. A heavy crop of roses and carnations is now coming on.

The Killarney and White Killarney roses that Weiland & Risch are receiving at the store this week are extra fine and in such quantity that they are able to fill all orders.

Paul Blome's many friends will be pleased to hear that his health is improving. Arthur is looking after the store on N. Clark street during his brother's illness.

The Misses Lillian Hoff and Marie Christianson of Madison, Wis., are visiting their relatives, Wm. Starrett and wife, at their home on Cottage Grove avenue.

L. M. Leveson, of the Palace Floral Co., 678 North Clark street, is enjoying a very busy season, funeral and wedding work occupying his attention.

J. B. Deamud Co. is receiving an excellent grade of roses and carnations in all the leading varieties. A fine grade of Cattleya Percivaliana was seen at the store this week.

Kyle & Foerster are well supplied with all the leading varieties of roses, and are receiving a large quantity of sweet peas and home grown violets.

Zech & Mann are now receiving an excellent grade of roses with Killarney, White Killarney and Bridesmaid showing up especially good.

At George Reinberg's we noticed a high-grade stock of roses in all leading varieties, their Killarneys are now coming in crop.

The E. C. Amling Co. is now offering a very superior grade of American Beauty roses, violets and lily of the valley.

John Huebner on November 26, arranged the table decorations for the banquet of the Chicago Athletic Club.

H. Van Gelder, of Percy Jones, is constantly receiving a large quantity of double violets, exceptionally good.

Clifford Prunner, of E. H. Hunt's supply departments, is looking forward to a very busy month.

Miss M. C. Gunterberg, of the Flower Growers' Market, broke all former records for sales last week.

John Kruchten is receiving a large quantity of roses and carnations in all the leading varieties.

A. L. Randall Co. is receiving large shipments of roses and carnations of extra good quality.

The Chicago Rose Co. is filling a large number of orders for sweet peas of good quality.

**Does all that is
claimed for it.**

It has proved itself to be one of the cheapest and most effective insecticides known today.

Aphine does not alone destroy the insects, but also contains excellent cleaning qualities, in fact, some experts claim it invigorates plant life.

Milwaukee.

STOCK SCARCE.

Stock in this market was very scarce all week, mostly everything selling at a very good figure. Violets sold readily, bringing exceptionally good figures. Carnations were very fine, with not nearly enough to go around. The market was well supplied with an exceptionally fine grade of lily of the valley, which brought a fine price. Long American Beauties were equal to the demand, mediums being rather scarce but with this exception there were roses enough to supply all orders, Killarney being a little off color. It was surprising the quantity of chrysanthemums that were sold last week. The supply seemed to be endless but they kept on selling as fast as they arrived. Stevia is now coming in, but sweet peas are still a shy article—it is expected they will be more plentiful as soon as bright weather sets in. Sunshine has been very scarce in this vicinity for some time and the shortage of stock is owing to the dark weather.

NOTES.

The entertainment committee announces they have completed the preparations for the dance which will take place December 8 at Miller's Hall, corner Eighth and State streets. All florists, their employees and friends are cordially invited and a large crowd

is expected. Tickets are for sale at both wholesale houses and from the club members.

Holton & Hunkel Co. have been cutting a variety of pompon chrysanthemums which sold readily. They also had quite a crop of Killarney roses for Thanksgiving and a nice crop of American Beauties coming in.

The E. Welke Co. has been kept busy with decorations and also large orders for carnations and roses for the opening of a new jewelry store on the north side.

The Sherrer Co. had an exceptionally busy week, Mr. Sherrer being surprised at the quantity of flowers he handled Thanksgiving day.

C. C. Pollworth Co. reports business good. This firm is cutting a lot of very fancy chrysanthemums which are selling at good prices.

M. A. McKenney & Co. had several large wedding orders in addition to their Thanksgiving business, which kept them hustling.

J. M. Fox was quite busy during Thanksgiving week, having several large receptions.

Visitors.—J. Benstead, Racine, Wis. G. R.

LAWRENCE, KAN.—George Ecke and Mrs. Ecke have opened a cut flower store at 823 Massachusetts street.

St. Louis.

Thanksgiving was a beautiful day as regards the weather. Many of the retailers, seeing the scarcity of stock the week before, ordered outside, fearing they would be short. One retailer evidently got carnations from Chicago, as he was selling them below the market price. There was a great supply of chrysanthemums, but violets were scarce and high. All the wholesale houses cleaned out and could have sold more.

NOTES.

Several hundred carnations were distributed November 26 in office buildings, the occasion being the annual Hospital Sunday Fund.

Fred H. Weber had a fine stock of roses, chrysanthemums and violets and disposed of everything in sight.

Metropolitan Floral Co. had a run on fancy white chrysanthemums tied with blue ribbons for the game.

The Paris Floral Co. had a novelty in a blue and white car for the football game November 24.

W. J. & M. S. Vesey had a fine supply of Richmond, Killarney and White Killarney roses.

C. Young & Sons Co. had a beautiful and artistic show window for Thanksgiving.

A special meeting of the Retail Florists' Association is called November 29. W. F.

WIETOR BROS., L. D. Phone Randolph 2181. 51 Wabash Ave. **Chicago**

Los Angeles, Calif.

Many society functions and the arrival of a number of tourists have made a decided revival in trade, while Thanksgiving orders were plentiful and good. Several of the principal retailers are extremely busy and all are anxiously looking up stock for the coming season. Stock of first grade is not plentiful, the heat of the last few weeks having been responsible for roses going off crops earlier than usual. Growers are not pushing their plants, preferring to take chances on a good cut for Christmas. Richmond still leads for quality, both color and stem being good in the best grades. Chrysanthemums are still fairly plentiful and many of the growers as well as the retailers will be glad when "finis" is written against this crop. The inside flowers are practically over, but there are still many coming in from outside. Outdoor paper white narcissus has made its appearance and is a welcome change. Other bulbous stock is coming in line and will probably be plentiful on account of the suitable weather. Orchids are about even with the demand, but certainly not an over supply, and good cattleyas are excellent property. Dendrobium formosum is seen, also a few phalenopsis, but do not cut a very big figure. Carnations are better, both in stem and color, and large quantities are handled. Violets are fine and meet with a limited demand only.

NOTES.

Out at Montebello, Dietrich & Turner are going ahead with their new plant and the rose stock in the new houses is in excellent shape. Prima Donna, a fine new red rose looks extremely promising and H. W. Turner, who presides over the destinies of the place here, is enthusiastic over it. There are three houses 56x300 feet, two devoted to roses and one to carnations, Killarney, White Killarney, Richmond, President Carnot and American Beauty being the principal roses grown, while most of the carnations are of Mr. Turner's own raising. Several thousand lilies are forced and there are large batches of L. Formosum and L. Giganteum in elegant shape. Under lath there are fine stocks of plants used for the firm's trade for the Harvey dining cars on the Santa Fe and Salt Lake railway systems. Cocos Weddelliana, Dracena fragrans, boxwood, aspidistras and various species of phenix are the principal plants used. Outside there are promising blocks of Cedrus deodara, Cocos plumosa, C.

Our Carnations Are Superior

That Is Why We Win So Many Prizes at Every Exhibition

AWARDED HIGHEST HONORS

At Chicago, Milwaukee, St. Louis and Minneapolis Flower Shows.

Exhibition blooms for these shows were taken from our regular daily cut, which is the best in the Chicago market, all the same superior quality every day. That is why we please our customers. If you are not acquainted with us, send in a trial order. We guarantee satisfaction. We also have strictly High Grade 'Mums, Roses, Sweet Peas, Valley, Violets, Greens, Etc., at Lowest Market Prices.

CHICAGO CARNATION CO.

A. T. PYFER, Manager.
Phone Central 3373.

35-37 Randolph St., CHICAGO

flexuosa and Philodendron pertusum while a deeply colored bougainvillea was very attractive. J. Dietrich made a good pilot around the grounds but darkness prevented a look at the home nursery. Mr. Turner was busy with the setting of a new boiler and concrete work in connection with the new flower room.

Howard Smith's Montebello nursery is very attractive now. There are immense stocks of Kentias in all sizes under lath and all the other popular palms. In the open one of the most attractive beds was devoted to a large variety of gerberas, all colors and shades. The herbaceous phloxes are magnificent for so late in the season, all round varieties of the finest round flowered types of exquisite colors and pure white. Cupressus Montana is in fine condition while all around in full bloom are clematis, dahlias, stocks delphiniums and others. In all there are 35 acres of nursery stock and 25 acres of roses under glass, there are large stocks of bedding plants and decorative stock for Christmas sales. Azaleas are already well established and look promising.

W. Saakes had the decorations at the Jewish ball for the opening of the season at the Concordia Club. Over 100 dozen fine yellow chrysanthemums were used and he also made use of 600

electric glow lights. The tables were arranged to seat 200 guests and were treated with Richmond roses, these having a fine effect against the pure white decorations of the banquet hall. Friend "Billy" certainly gets the business.

Wm. Haerle has quite recovered his health and is in harness again. Roses are a little scarce here and promise well for Christmas. He has a house of about 1,000 azaleas in fine trim and early and late lilies look promising. In the orchids, Cattleya Percivaliana, C. Trianae and Dendrobium formosum are flowering fairly and sell readily.

At Wright's Flower Shop business has been very brisk and considerable alterations had to be made to the store to make room for the Thanksgiving trade.

H. N. Gage reports wholesale business as good and his Thanksgiving orders above the average. He is sending in a fine cut of Narcissus Paper White from outdoors.

H. R. R.

WINSTED, CONN.—John David is erecting a greenhouse at his residence on Roberts avenue, Mooreville. He intends to raise plants for spring planting.

THANKSGIVING TRADE.

Thanksgiving day trade though generally satisfactory and in most cases exceeding in volume that of a year ago, brought many surprises to the dealers. The prevailing scarcity of violets the week or ten days previous caused much concern as to the supply for the holiday, which a year ago brought an unprecedented demand for these flowers, but this year their popularity was not maintained to the extent expected and no fancy prices were heard of and many florists had quantities of the product of Rhinebeck and Poughkeepsie, N. Y., on hand when the demand was entirely satisfied. American Beauties and high-priced roses of all varieties shared the same fate for on this occasion the chrysanthemums were indeed queen and the whole week brought in the very best blooms of the season and the highest wholesale prices for many years were realized to the delight of the growers. Correspondingly the retailers moved them at satisfactory figures. The weather was not favorable to the situation as it rained heavily much of the time Wednesday and all day Thursday and this undoubtedly was responsible for deterring many from patronizing the florists' shops and much of the good stock of pot plants prepared for the occasion was left unsold. Carnations were very scarce but sufficient stock was available for the limited call for them.

FLORISTS' CLUB MEETING.

The Florists' Club meeting on Monday evening, November 21, was fairly well attended, and those who braved the inclement weather to be present were well repaid, as the proceedings were more than ordinary. The chief subject on the program was a paper on "Sweet Peas" by Fred Pautke, of Grosse Pointe Farms, Mich. Mr. Pautke has a well merited reputation as a grower of this popular flower, and his address was able, concise, instructive, interesting, and he stood the fire

ORCHIDS

A SPECIALTY.

I am now receiving daily shipments of **Fancy Cattleyas, Vanda Caerulea, Dendrobium Phalaenopsis, Oncidiums** and other choice **Orchids, Fancy Valley, Roses, Carnations,** and all Seasonable Flowers and Decorative Stock.

Supplies of All Kinds.

CHAS. W. McKELLAR
51 Wabash Avenue.
CHICAGO.

of the frequent questions directed at him for over half an hour, as all the growers present were eager to learn the cultural instructions that only a successful grower can give. About eight years ago he grew in one season a crop of sweet peas that numbered 250,000 blooms, all of which were sold for \$1.25 per hundred. That was his banner year, which he has never since equaled. A hearty vote of thanks was given Mr. Pautke, who promised to give publication through trade papers of the chief points of his address. Ex-President E. A. Scribner gave an interesting review of the trade exhibit given last Friday at the Michigan Cut Flower exchange, and the discussion of this gave rise again to the hopes entertained by many that an attempt will

be made a year hence to hold a public Flower Show.

The death recently of one of the club's oldest members, Henry Fruck, was announced, and a committee composed of J. F. Sullivan, Frank Danzer and E. A. Scribner was appointed to draw resolutions expressive of the club's deep sorrow. Three applications for membership were received and the treasurer gave a report of the club's financial strength. The cigars were passed in the name of A. J. Stahelin, who was married recently. J. F. S.

Davenport, Ia.

Thanksgiving has left a good feeling with the florists. Trade, while not like Easter or Christmas, was generally satisfactory and the entire week showed good stiff business. Several of the largest weddings took place this week, calling for a vast number of flowers, as also several funerals of prominent people. Chrysanthemums were in the lead with a good supply of locally-grown stock of excellent quality, the yellows being the most called for. Roses and carnations cleaned up with a shortage of the latter which seems to be rather slow in getting down to business. There was also a shortage on violets, due mainly to the fact that the pre-nuptial events of the past week called for a very large number of them. Thanksgiving weather was all that could be asked for, the glass hovering around 50° all day, making it fine for the delivery boys.

FLORIST CLUB MEETING

The Tri-City Florists' Club held their November meeting at the home of Superintendent C. O. E. Boehm at Central Park on the evening of November 17 with nearly every member present. The Club met early in the evening, so they could inspect the chrysanthemums in the show houses of the park, where the annual show is now being held. The show is up to its high standard and attracts a great number of people every day. Some 124 varieties are grown here, and this attracts the member's attention as he can see what varieties are suited to his business and those that are not. A large number of single chrysanthemums are shown this year, and seem to take well with the public in general. After spending at least two hours in looking over the fine display the members met in the refectory where the business meeting was held. Christmas greens was the topic for discussion, and greens in general for the florists' use. Several members took in the Chicago show and told the members of their trip. They were all disappointed with the display in general, claiming that there were too few that seemed to take interest in the show as they should. The president appointed a committee

"The Busiest House in Chicago."

Our customers received their orders in full for
Thanksgiving. If you did not fare so well, write

Central 3155.

51 Wabash Ave., CHICAGO

of five, with Harry M. Bills as chairman, to make arrangements for the annual banquet, and to report at the next meeting. After accepting Henry Gaethje's invitation to meet at his home in Rock Island December 8 the members adjourned into the dining room, where an elegant five course hot supper was served, the boys all voting Mrs. Boehm the queen of cooks. After supper the members were entertained with music and vocal solos, cigars and a glass, and a good time in general. The meeting was without doubt the best in the past year, and brought the members to a better social standing among themselves than anything else could have done. Mr. and Mrs. Boehm were given a hearty vote of thanks.

NOTES.

One thing noticed quite often of late (in fact, too often) in the obituaries of prominent people was the phrase, "Friends are requested to send no flowers." This might not be so bad in the case of a poor man, but when the parties concerned are very wealthy it is surely robbing the florist of a chance to make an honest living.

It is not every man that is able to read his own obituary, but Theodore Ewoldt had that experience last week. His obituary was printed in one of the leading dailies, causing a great deal of annoyance. An Ewoldt had died but the name was Hugo, and no relation of the florist.

The members of the club missed the pleasant smile of Wm. Knees at the meeting November 17, Mr. Knees being on the sick list and unable to be about.

Members of the craft will be pleased to learn that Mr. Davis, the cucumber man, is about again, after spending over ten weeks in the hospital.

Uncle John Temple's alarm clock was the cause of his not going to the Chicago show. It failed to awaken him and he missed his train.

Henry Pauli handled one of the largest weddings of the season November 21, which cut an awful swath in his chrysanthemums.

Harry M. Bills and wife, C. O. E. Boehm and Miss Woltman were recent Chicago visitors.

T. E.

HORSEHEADS, N. Y.—Earl Shults has recently completed the erection of a greenhouse in which he has already a quantity of carnations and other plants which he is growing for local trade.

ELMIRA, N. Y.—Work was begun November 19 on the addition to the greenhouse plant of the United States Cut Flower Co., on the north of the city. This addition of 25,000 feet of glass will greatly increase the size of the plant, which now has 159,000 square feet.

TRADE ACTIVE.

The fine weather continues, this being the typical period of warm suns and hazy but inspiring airs designated as Indian summer. All this tends to social activity and pleasures, toward which the florist and decorator must contribute, and trade has been fairly active. The season of the chrysanthemum is nearly past and the late sorts begin to diminish in supply, whilst carnations are lacking in abundance. The curbstone vendors complain that prices are too high to give them much chance. Roses are in about sufficient evidence for the market's requirements and violets are overabundant. The single sorts, which for a good many years were entirely tabooed here, have gained a place in popular favor and now go off very readily. Thanksgiving day has never really been a flower day in this vicinity. Some of the churches use large chrysanthemums for decorations, but this is about the limit of the extra demand. But the festival has come to be here, as it has much longer been in other sections, a day for weddings, and this year it quite kept up to the record.

NOTES.

The meeting of the Maryland State Horticultural Society promises to be a great success, and the display of fruits, vegetables, nuts, etc., is large and varied. A number of other societies of kindred interests will also meet during the week. On Monday night President Richard Vincent, Jr., delivered a lecture on "The Bulb Fields of Holland." A banquet will be held November 30, when a number of distinguished men from the Capitol and the governor and mayor will be present.

In the nurseries hereabouts and on many private places the evergreen euonymus is being attacked and in many instances quietly destroyed by a scale, which spreads with amazing rapidity. It has been observed here for many years, but only lately has it gained the destructive headway it now exhibits.

Stevenson Brothers, one of our foremost rose-growers, who have been occupying leased property at Govans, have purchased a desirable site of ten acres at Aigburth Vale near Towson, on the great thoroughfare where values are rapidly enhancing.

A new enterprise has been started here in the way of violet growing by E. A. Perry, formerly located in Philadelphia, who has secured land and built a number of houses near Dorsey, between this city and Washington.

At the Dale Estate greenhouses the roses and carnations are in fine shape and the first crop of violets from the long range is now being taken. Five new houses are about completed and these are to be devoted to palms and ferns. The supply business has developed remarkably during the year, necessitating the exclusive use of another delivery wagon. The growth of the business here is remarkable, the number of customers increasing daily. The office force has been permanently increased to seven. Chrysanthemums have not done as well as usual this year and there has been some trouble with the winter sweet peas, but otherwise all crops are excellent. H. R. R.

BIG BUSINESS.

The volume of business done this Thanksgiving probably exceeds that of any previous year, in spite of the advance notices of no flowers to do business with. As a matter of fact, it did look as though there would not be much in flowers, but, as is always the case, there were enough flowers coming in to fill the orders, so we really cannot report a scarcity of anything, not even violets, which the Rhinebeck people led us to believe would be exceptionally scarce. There were plenty of chrysanthemums for everyone except on Wednesday afternoon, and Thursday there were no yellow and almost any price was offered for them wherever they could be obtained. Lily of the valley is still under cover and everyone is buying this in the East. A nice lot of stevia is coming in, which moves out satisfactorily.

NOTES.

Randolph & McClements had the decorations for a debutante November 27 which kept the whole force busy three days. A feature was a galax-covered crescent 12 feet long, covered with hothouse fruit.

John Madden has taken charge of the Penn avenue store of Randolph & McClements. John recently took a trip west as far as Los Angeles, Calif.

Mrs. Elicker's greenhouses were damaged to the extent of \$200 by fire, which is supposed to be of incendiary origin.

Some of our old-time friends in roses, including Bon Silene and Perle des Jardins are seen at the McCallum Co.

George Werheim, the Liberty avenue florist, reports a busy week with funeral orders.

Mr. Skipwith, of the Castle Grove Greenhouses, Danville, Pa., was a recent caller.

Walter Paul is now connected with a florist in East St. Louis. J.

LEXINGTON KY.—W. S. Bell has retired from the greenhouse business.

Cincinnati.

BUSINESS FINE.

Large amounts of stock were handled the past week. The first of the week the prospects for Thanksgiving looked slim, as everyone was clamoring for stock. As Thursday drew near the supply of stock increased and Wednesday morning saw so much on hand that it would seem almost an impossibility to move with a day's business. Still it went and by Thanksgiving Day everything worthy was sold. Chrysanthemums were as usual the flower for Thanksgiving. The varieties offered included Dr. Enguehard, Mrs. Jerome Jones, Mdle. Jeanne Nonin, White Bonnaillon and Major Bonnaillon. Roses are increasing in numbers but are none too plentiful, the demand being especially for pink. There is enough white roses and American Beauties to go around. Carnations are very scarce and many more could be used if they could be obtained. The market for lily of the valley is easy. There being plenty and an ordinary demand. Double violets are finding a steady call, but single violets are not blooming to amount to anything and hence are scarce, orchids are a rare article. Some callas, stevia and narcissus made their appearance a few days before Thanksgiving. They will undoubtedly begin to come in regularly in the near future. Sweet peas are also coming in. Lilium Longiflorum finds a good call. The green goods market is good and the supply sufficient for all demands. The weather for the past few days has been dark and cloudy. Now it is turning colder and the outlook for the next fortnight is rather slim unless chrysanthemums should hold out nicely.

FINE BUSINESS.

The wholesale dealers report they had the best Thanksgiving business that they have ever had. They say the business is increasing every year, and that if it keeps on this way it will seem more like Christmas. Chrysanthemums and roses were in great demand, carnations did not sell so well and violets are very scarce and sold higher than usual for the time of the year. The retail trade also reports that they had an equally good trade, and that they cleaned up everything they had in the way of stock. Yellow chrysanthemums were in good demand and were of good quality. Roses also sold well and carnations sold about the same as usual for the season, with violets scarce, and on the whole they are very well pleased with their business. As a result everything that came into the market Saturday morning was taken up early in the day, and the benches in the afternoon presented a deserted appearance.

NOTES.

A new concern, Arnold & Pedro, has started in business this week in the building corner of Boylston and Berkeley streets, formerly the Young Men's Christian Association building, which was burned and has been recently reconstructed. Geo. F. Arnold was formerly a florist at Winchester, and Mr. Pedro was with The Rosary on Clarendon street.

The firm of William E. Doyle, which went into bankruptcy last month, has made a settlement with the creditors and a corporation has been formed by W. E. Doyle, J. C. Cassidy and J. Rehill, who will carry on the two stores.

John G. Forbes, florist of Auburn-dale, who sold out his business last month, has moved into one of his houses on Lexington street.

H. C. W.

Cleveland.

Stock of all kinds is cleaning up daily, and everything is very much short of the demand. With no sunshine for nearly four weeks, which is nearly a record, the growers are only cutting a very small percentage of their usual supply. While a pretty fine cut was on the market for Thanksgiving everything sold out clean, and retailers find it a problem to fill orders since then as everything that looked like a flower was cut for Thanksgiving day. Stevia is arriving in small quantities and Paper Whites are in. Lily of the valley and violets are short.

Everything in Cut Flowers.

PERCY B. RIGBY, Treasurer.

Everything in Supplies.

New York.

Thanksgiving trade was fairly good all around, both wholesale and retail. Chrysanthemums, of course, were the main feature in cut flowers and it would be interesting indeed could we tell just how many of these flowers were handled, but that is one of the impossibilities. Prices for these were quite firm and at somewhat of an advance over what had been the rule for the week preceding. Yellow was the favorite color and seemingly countless thousands of Major Bonnaffons and Golden Chadwick were disposed of. Violets cleaned up remarkably well and at much better prices than were possible one year ago. Carnations cleaned out satisfactorily at good prices. Roses met with quite a good call and prices held up very well with all varieties except American Beauties. Some attempts were made to push the specials up to the half-dollar mark but these were unsuccessful. All other flowers were in good demand. Some dealers are of the opinion that this was the best Thanksgiving for business that there has been for a number of years. Friday, November 25, was miserably rainy and business was unusually dull all day, all of which had a depressing effect on values. Saturday came out clear and fine again, however, and trade resumed with marked activity and it rather looks as if we were in for a spell of steady business, with prices that are agreeable for all. Chrysanthemums are yet fairly plentiful, though not too much so to weaken the market, and there are not so many of the short, inferior grades as was the case one week ago. Roses are doing very well indeed, Killarneys, Richmonds and other teas of the ordinary run of stock selling well. Special American Beauties are not bringing as good prices as usual and the call for these is not as good as it is with other roses, due, perhaps, to so many other long-stemmed flowers being available. Lilies have made a slight advance and a few callas have appeared in the market. Cattleyas are still anything but numerous and we have heard of \$1 each being reached for some that were unusually fine and cypripediums are selling well. Gardenias of various grades of perfection are coming in. The call for lily of the valley has weakened quite perceptibly and prices fluctuate. Sweet peas, not very plentiful as yet, are to be had in various degrees of length of stem and Roman hyacinths are a regular feature. The demand for smilax and asparagus is improving and better prices are the rule. Holly has begun to reach the city and oak leaves are gradually diminishing. Indoor greens will soon come into their own again.

NOTES.

The fourth annual ball of the Greek American Florists' Association will take place on Wednesday, January 18, in the Grand Central Palace. George Polygranos is chairman of the committee of arrangements and the tickets are fifty cents each. The previous dances given by this society have been very pleasant affairs and the one to be held in January will be well attended by the trade in general.

Siebrecht & Siebrecht is the name of a new firm of wholesale dealers who have located at 136 West Twenty-eighth street. The members of the firm are sons of two well-known growers and

dealers, W. H. Siebrecht, Astoria, L. I., and H. A. Siebrecht, New Rochelle. They expect to commence business about December 3.

A recent shipment of orchids to Ossining, N. Y., was three days in reaching its destination. Seeing that this town is about 35 miles from here it would seem that some other method of sending packages containing flowers would be in order; perhaps a parcels post system would relieve the situation considerably.

Chicago and Pittsburg offers of \$1.50 per 100 for violets to Hudson River growers has tended to reduce the supply coming here to quite an extent.

L. W. C. Tutthill, of the Horticultural Advertising Agency, is on a business trip to Chicago, Ill.

A. W. Henshaw, of the firm of Henshaw & Fenrich, was married recently. Particulars of the happy event were not forthcoming, though we believe it took place in Pittsburg, Pa. Congratulations are in order.

Kennedy & Hunter, seedsmen, 156 West Thirty-fourth street, do a retail florist business in conjunction with their seed trade. Since opening their establishment they have met with very gratifying success.

F. H. Traendly, of the firm of Traendly & Schenck, went to Boston, Mass., November 2 to attend a meeting of the National Flower Show committee, of which he is one of the members.

The directors of the Cut Flower Exchange have called a meeting for Saturday, December 3, at their office in Long Island City.

Buffalo.

FAIR BUSINESS.

Thanksgiving was all that could be expected. Flowers were equal to all demands and of good quality. Chrysanthemums never sold for as low a price as this year. Violets were not in oversupply and orchids, lily of the valley and gardenias were good sellers. Roses were good and in fair demand. Several dinners and receptions were a part of the week's work and kept all busy. The present week promises a busy one. Early decorations for department stores are in evidence. S. A. Anderson having 10 large ones this week. Chrysanthemums are about over with and from now on there is liable to be a scarcity of large flowers.

NOTES.

John Kramer has opened a very pretty and attractive store on Main street near Utica, which is in the Upper Main street section and in the vicinity of a fine residence neighborhood, also a rising business locality. The store is about twenty feet wide; with a depth of nearly 100 feet; with all modern improvements, and Mr. Kramer has furnished it in white, such as counters, showcases and the ice box. The other fixtures are in natural oak, with dark green walls, the whole making a very attractive store. Miss Gertrude Sauer, who is well known in the business, is in active charge, and from all indications a bright future is in store for the new proprietor.

The Florists' Bowling Club resumed business last Thursday with Chas. Sandiford, captain; Roland Cloudsley, secretary; Chas. Keitsch, treasurer. The best alleys in Buffalo have been secured and every indication points to

a pleasant winter, with the hope that games with Rochester and Cleveland may be had this season.

S. A. Anderson had the men of his store and greenhouses at his residence for dinner recently to have a yearly visit, and more particularly to name the new begonia which so far has been the talk of all the local growers who have seen it. The name and full description will be officially announced later.

Visitors: Arthur Zirkman, of M. Rice & Co.; Martin Reukauf, of H. Bayersdorfer & Co., and — Lake, all of Philadelphia, Penn.; H. J. Wise, Erie, Pa. BISON.

PROVIDENCE, R. I.—The Rhode Island Field Naturalists' Club visited the greenhouse of the J. A. Budlong Sons & Co. Saturday, November 12, and were shown through the large greenhouse range of this concern, and inspected the manner of propagating, grafting and growing the roses, carnations and other stock.

BURPEE's catalogue for 1911 is on the press.

VISITED CHICAGO: W. Atlee Burpee, Philadelphia, Pa.

GRADUS peas are reported selling in England at \$12 per bushel.

THE present attitude of the Chicago dealers in onion sets is one of hope.

SWEET PEA varieties are now listed to the number of 702 in America and Europe.

GLADIOLUS EUROPA, the new white, is offered by the introducer, Wilhelm Pfitzer, of Stuttgart, at \$2.50 per bulb.

LILY OF THE VALLEY pips are a short crop and higher, the new price an advance of four to five marks per thousand.

GREENPOD beans are again scarce with the principal growing establishments and advances may be looked for in this class of goods.

THE last from the Red Top grass seed district is that it is nearly out of the farmers' hands, more so than for many years at this season.

CHICAGO.—Prices on the board of trade November 30 for grass seed were noted as follows: Timothy, \$8.50 to \$9.50 per 100 pounds. White clover, from \$22 to \$28.

THE call for garden varieties of peas continues unabated. Most of the seed houses answer the questions regarding peas by saying, "We expect to have enough for retail wants."

NEW YORK.—Holly, of the grade for fancy trade, will be scarce and holly brokers have to look farther south than usual for their supply. Even commission grade will hardly be in over supply.

BOUQUET GREEN in bulk at Chicago is very scarce and if offered at all is at \$10 to \$12 per crate of 100 pounds. New York reports the market very bare, while Pittsburg is using the western market at the fancy prices mentioned above.

Experts Can Not Agree On Seed Tests.

We enclose herewith some reports on orchard grass, which are very important; probably more so than the reports on tests of the Canada blue grass, published in THE AMERICAN FLORIST of November 26, page 900.

United States	2,730,000	3,483,200
All other countries.....	38,900	53,400
Total	14,352,500	17,922,500

An Irish Seed Contract.

James Dunn, Tyrconnolly, Donemana, sued Robert Smith, Liscleen, Donemana, to recover £20 damages alleged to have been sustained by the complainant, owing to a breach of warranty given by the defendant in the sale of grass seed.

The plaintiff's evidence was to the effect that in April, 1909, he purchased five bushels of grass seed from the defendant, and one-half of this quantity he took possession of at once and sowed in one of his farms. This yielded a good crop, but the remainder of the seed which he received from the defendant later, and which was sown in his other farm in the adjoining townland, did not grow at all. He estimated his loss at £14 or £15.

Mr. Moody said his case was that the grass seed in respect of which

the complaint was made had not been sown at all.

James Holmes, a witness on behalf of the complainant, spoke of having seen the land harrowed and rolled. He believed the complainant sowed the seed.

The complainant's servant, who was also called to give evidence on behalf of his employer, said the weight of the quantity of grass seed sown in a field containing 2½ acres was twenty pounds, in his opinion, and he had carried it on his back.

His Honor—It was not a very healthy sprinkling. You may go down. You have not helped your employer's case much, I am afraid.

The defendant's evidence was that he received no complaint about the seed until he served the complainant with a writ in connection with another matter. Dunn had been drunk in Donemana fair on one occasion, and it was then he complained about the seed, and threatened to take an action against defendant.

His Honor dismissed the case on the merits. The only evidence before him, he said, was that twenty pounds of seed had been scattered over a large area.—Tyrone Constitution.

In view of the agitation which is being fomented in some quarters to obtain an alteration of the law doing away with the non-warranty clause, and making the seedsman directly responsible for the crop, this case has a peculiar interest. We have several times pointed out that in addition to the vagaries of weather and season, the seedsman might be made liable for a crop failure in cases where, through ignorance—or worse—his seed had either never been sown at all or

Imports.

During the week ending October 29, imports were received at New York as follows:

Henry Nungesser & Co., 315 barrels and 200 bags seed.

Aug. Rolker & Son, 168 cases plants. Peter Henderson & Co., 130 bags seed and four cases bulbs.

Ralph M. Ward & Co., 121 packages plants and trees and 63 cases plants.

H. Frank Darrow, 98 cases plants. McHutchison & Co., 73 cases trees and shrubs and 46 cases plants.

F. B. Vandegrift & Co., 48 cases plants, 26 bags seed and seven cases bulbs.

Vaughan's Seed Store, 11 cases plants and 28 cases trees and shrubs.

J. M. Thorburn & Co., 30 barrels seed.

Julius Roehrs Co., 23 cases plants.

Wm. Elliott & Son, 17 cases bulbs.

MacNiff Horticultural Co., six cases bulbs.

John Scott, four cases plants.

To others: 1,575 packages plants, trees and shrubs and 223 cases trees and shrubs, 1,431 bags, 1,124 barrels and seven cases seed, 824 cases, 33 barrels, 16 packages and five boxes plants, 87 cases bulbs, 86 trees in tubs and one case orchids.

The Black Tulip.

Among those May-flowering tulips grouped under the title of Darwin varieties there are several remarkable for the intensity of the dark coloring, say The Gardeners' Magazine, and one of these has quite frequently been referred to as the Black Tulip. This is the variety correctly named The Sultan, and one that is fine for spring bedding, especially in association with orange, crimson, and yellow varieties, or grown over a groundwork of bright polyanthus. It is sufficiently cheap to be planted freely, and it is a grand tulip, growing from two feet to three feet high, and carrying its shapely blackish-maroon flowers on stout, erect stems. The variety has obtained an award of merit from the Royal Horticultural Society, and was a conspicuous feature in the society's trials of tulips held at Wisley a few years ago. Zulu and Philippe de Caminet are other very dark varieties belonging to this class, but they are rare, more expensive, and the coloring is purple-black.

There are many lily bulbs imported into this country from Japan to sell at low prices—they are usually the "leavings" after selected bulbs have been sorted out. There are growers who want cheap stuff and it is the same in every business, the cheap and the high class element. **Horseshoe Brand** bulbs are not intended for the cheap element because they can't be sold at prices to compete with the "leavings". The Japanese call them the "Rubbishes". Now these so-called "Rubbishes" may not be bad bulbs, but it is sure they are not the best, and we maintain that the best are the most economical to force.

Just ask the man you buy from where he gets his bulbs, the same as you would your coal dealer when you want good coal. We are direct importers of the very highest class of Japanese lily bulbs and if you want good bulbs you can get them here. Any quantities, almost any sizes, and varieties on the market.

Prices Reasonable.

The Virginia Truck Experiment Station.

Abstract of a paper read by Prof. T. V. Johnson at the Greenhouse Vegetable Growers' and Market Gardeners' Association convention at Grand Rapids, Mich.

The Virginia Truck Experiment Station was opened for work in the fall of 1907, but owing to construction of buildings and preparation of land real investigations were not started until the summer of 1908. The soils in tide-water Virginia contain a large percentage of sand with a liberal admixture of loam and clay, sand predominating in the better trucking soils. The soils consisting of clay and loam do not respond so readily to cultural conditions and the preponderance of sand has a tendency to render the soil very porous and to reduce the accumulation of humus or organic matter. The elevation above sea level varies from five to twenty feet. This causes the water table in the soil to remain comparatively near the surface. The crop rotation practiced by many of the farmers has had a tendency to reduce the humic condition of the soil to a dangerously low point and this condition has led to the universal use of a large quantity of commercial fertilizers in addition to such natural fertilizers as stable manures, cover crops, leaf mould, etc.

The Station has inaugurated a series of experiments intended to determine the most satisfactory kinds of commercial fertilizers to use, also, the best sources of the fertilizer materials, and the relation that should exist between the commercial fertilizers and the stable manure or other manure of organic sources that might be used. An extended system of plat test has been inaugurated and results already obtained, but it will require some time to get a satisfactory solution for the problem. The residual, or after effects of these fertilizers, is a problem of no mean proportions. The tide-water soils are practically all more or less acid in reaction, hence a fertilizer in combination with acid forming radical has a tendency to increase the acidity, while those in combination with bases would minimize this tendency. These conditions have in some cases led to physiological troubles which for a want of a better name, have been styled malnutrition diseases. It has been found that the disease appears in its most malignant form on such crops as cabbage, spinach, cucumber, etc., on soils where the humic condition has been reduced to a low percentage, and where commercial fertilizers have been used more extensively than the amount of organic matter in the soil would justify, and in some cases, the acid forming elements in the fertilizers have accumulated to such an extent, that from 3,000 to 4,000 pounds of lime per acre would be required to neutralize the acid in the soil to the depth of one foot. Experiments show, that by using fertilizers free from acid forming radicals, the amount of the disease may be materially decreased. The amount of rainfall has an important bearing upon the problem and has led to the conclusion that irrigation may be important as a means of con-

trolling the trouble and in order to test this problem out fully the Station is installing an irrigation plant.

Possibly 95 per cent of the truck grown in the Norfolk region is produced in the open field without glass and has created a demand for types of plants different from those used in greenhouses or cold frames, and the Station is making some specific trials in developing varieties or strains suitable for local conditions, which is well under way. The growing of strawberries is such an important industry that quite a little time is devoted to the study of varieties. The work on sweet potatoes is intended more for southern conditions, while that done on Irish potatoes is applicable throughout the entire country. The larger proportion of the seed potatoes is obtained at present from the north and have not given entire satisfaction and the Station is now testing seed from different sections of the country with the indications that new seed producing areas will be developed where tubers may be grown in fresh ground free from some of the diseases now prevalent in northern sections. Quite a number of experiments have been conducted in the control of diseases on cucumbers, cantaloupes, spinach and other crops in several ways, chief among them is the use of the spray pump, and some experiments along the line of seed from localities known to be free from disease which promise to be very successful. We have found it advisable to treat certain kinds of seed before planting, but cultural methods and crop rotations are also important factors in the control of these difficulties.

Insects of the aphid family cause more trouble to the truck growers than do any others, and a number of them are being studied to determine

their life history and especially to determine the host plant on which they feed while not on the crops. The problem of handling aphid on cabbage, kale and peas is practically solved, but the spinach aphid is somewhat harder to deal with on account of the habit of the spinach plant. During the last two seasons a large number of commercial spray materials have been tested on different truck crops some of the fungicides as might be expected, have actually injured the plants, while others have increased the yield as much as fifty per cent over that of the check plants.

Conifers in the Arnold Arboretum.—III

The Carolina hemlock spruce, *Tsuga Caroliniana*, looks remarkably well and is fast attaining a considerable size. It is a most beautiful conifer and full of grace and beauty and it is very gratifying to see it doing so well, and so promising, so far north, as it extends in its wild state from Virginia to South Carolina. Patton's hemlock spruce, *Tsuga Pattoniana*, (*Tsuga Hookeriana*) which occurs in British Columbia and Northern California is behaving well in a sheltered situation, but is still in the juvenile state. *Tsuga Mertensiana*, which is distributed from Alaska to California is behaving similarly. The Japanese hemlock spruces, *Tsuga Sieboldi* and *Tsuga diversifolia*, are ornamental gems where they do well, and their behavior in the Arnold Arboretum is satisfactory. As a matter of fact all the hemlock spruces like shelter to be happy. Even our native hemlock spruce, *Tsuga Canadensis*, looks very unhappy if it is planted in bleak exposed situations. The hemlock spruces are all objects of much beauty, and those western hemlock spruces are exceedingly noble in adult age, and if they can be made to succeed under suitable environments in portions of the New England and northeastern states, they will be important arboricultural acquisitions.

Larix Kurilensis (*Larix Dahurica* variety, *Japonica*) is widely distributed from Siberia to northern China and Saghalin and the Kuril Islands north of Japan. It is said to be common in the island of Iturup, one of the Kuril Islands group. It looks healthy in the arboretum, but it is a slow grower, and has a thin branching habit and is perhaps of more botanical interest than horticultural value. *Larix Dahurica* is a much more beautiful and promising larch and is growing vigorously. The olive green foliage is very attractive. This larch is doing very well in the pinetum, Highland Park, Rochester, N. Y. It is distributed from the Amurland to Saghalin. *Larix leptolepis* from Japan is perhaps the most promising larch from the Orient or any part of Asia. It is growing with remarkable vigor in the arboretum, and is highly ornamental. The Japanese larch is said to be particularly promising in Scotland and other parts of the British Islands economically, as the European larch is said to be peculiarly susceptible to fungoid diseases during late years. It is however a smaller growing tree than the European larch. The Siberian larch, *Larix Sibirica*, which by some botanists is considered to be a form of the European larch, but is probably a good species is being established in the arboretum, but the plants are yet small. It forms vast forests in Siberia, and there seems to be no reason why it should not be an important tree in the northeastern United States.

What promises to be an important introduction amongst conifers in the

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

arboretum is a hardy form of the Cedar of Lebanon; *Cedrus Libani*. About eight or ten years since Dr. Sargent arranged with a botanical collector in Smyrna for the collection of the cones of the Cedar of Lebanon at high altitudes in the mountains of Syria. This collector gathered the cones from trees at the highest altitudes where they were known to grow. From these seeds Dr. Sargent has raised a large number of seedlings and they have been planted out in the arboretum for a number of winters. Dr. Sargent pointed out to me a large group of them in a somewhat exposed situation where they had been planted out for several years, and they are certainly growing vigorously, and give every appearance of absolute hardiness. One noticeable feature of these young plants is that they throw up strong leaders from the very start, whereas my experience with the Cedar of Lebanon, as it is supplied from European nurseries, that it will form a bushy growth with a lot of equal leaders fighting for the mastery for a number of years, and it appears to be unable to stand the vigors of our winter. There is then every prospect, to believe at present, that this geographical form of the Cedar of Lebanon, which Dr. Sargent has procured, will be a most important introduction to many parts of the northeastern states.

"Lily Rash."

The subject of the irritation caused by living plants on the skin of human beings is attracting considerable attention at the present time among biologists and botanists. Dr. David Walsh has recently made an interesting communication to the "British Medical Journal" on the subject of the so-called "Lily rash," which attacks the flower pickers of the Scilly Isles, who have to handle immense quantities of daffodils and narcissi during the season of gathering the blooms. These are more or less subject to an irritating eruption on the hands and arms, and sometimes also on the face. Some workers escape the rash altogether, others are attacked once only; some individuals are so susceptible that they cannot touch the flowers. The most severe ill-effects are felt when the skin of the hands is cut or abraded. Some varieties of the genus narcissus are more powerfully irritant than others. The daffodil known as campanelle is the most irritant, followed by narcissus ornatus, N. gloriosa, the Scilly white, and N. Grand Monarque; but all other kinds may produce the same effect. Messrs. Bullocks, who have examined the plant at the author's instance, have not been able to isolate the irritant substance. The expressed juice of the fresh plants, an alkaloid extracted from them, and the essential oil obtained from the essence and pomade of jonquil, gave negative results when applied to the unbroken skin.

The juice and the tincture of fresh flowers, however, caused irritation when applied to a surface abraded with a needle, and the former was specially active in this respect. The actual cause of the action is not yet explained; it has been suggested that the raphides which occur plentifully in plants of the amaryllidaceae may play some part. The symptoms seem to be similar to those observed in many other cases of plant rashes, especially in the

immunity of some individuals and the extreme susceptibility of others.—Journal of Horticulture.

Carnation Dorothy Gordon—Orders Now Booked For More Than Fifty Thousand Rooted Cuttings

When in Philadelphia
Be Sure to Look Us Up

Last year, you remember, we told you about the great beauty and remarkable quality of our new seedling Carnation "Dorothy Gordon," which we were then introducing for the first time, after giving a very thorough trial ourselves. Hundreds of growers in all parts of the country became convinced of its merit, both through our advertising and by seeing the flower on exhibit at the various shows of the season, and we sold practically all the cuttings we could grow, up to April of this year.

That means that hundreds of progressive growers are going to make money this year, for we have proved "Dorothy Gordon" a money-maker—beyond all question the most profitable of the commercial carnations. These men are going to make money from the carnations they grow this year; now how about you?

Are you in line for your share of the profits from this splendid flower?

If not, you're going to miss something good this winter, but there's still a fine chance for you to "get in"—we're growing more rooted cuttings, and can fill your order, if placed at once. We have already booked orders for more than 50,000 this fall, so it is evident that this season's business will be a close second to that of last.

Carnation "Dorothy Gordon" is a seedling of Lawson on Enchantress and is a trifle darker than Pink Enchantress. It is vigorous, notably free from disease, and bears extra-large flowers of good substance, (averaging over three inches in diameter) in great abundance on long, stiff stems. These keep unusually well, and bring much higher prices than other commercial carnations—in fact, we have regularly found that a given quantity of "Dorothy Gordon" would yield just double the returns that could be realized from Enchantress, which we had grown extensively before taking up "Dorothy Gordon."

We quote on rooted cuttings of "Dorothy Gordon" as follows:

\$6.00 per 100; \$50.00 per 1000.

Orders should be placed early and will be filled in rotation. Write for particulars, or better still come and see "Dorothy Gordon" growing in our houses. Visitors welcome any week-day

A Grand New Carnation BRIGHT SPOT

Outclasses everything heretofore grown in the dark pink class.

Won first honors in the 100 class for best dark pink at the A.C.S. Meeting, Pittsburgh, January, 1910, also at the Chicago Flower Show, November, 1909.

It is a pure bright dark pink of even shade, size $3\frac{1}{2}$ inches, an early and continuous bloomer, brings fully 25 per cent more flowers to the plant than Lawson at its best; flowers well shaped on long wiry stems; calyx does not split. It is a good shipper, and the cuttings root easy.

North Milwaukee,
Wisconsin.

Toledo, O.

Retailers and wholesalers have been satisfied with the business lately, selling chrysanthemums of course more than everything else, and looking forward with great expectation for a brisk Thanksgiving rush. The weather of late has been disappointing, no sun whatever, and chrysanthemums have been slow coming out. While the growers feared that they would not be able to hold the chrysanthemums back they have now less flowers than in other years, and there will be plenty to go around after Thanksgiving. W. H. Chadwick has been especially slow. The quality of roses and carnations is getting better every day, though the cut is small as yet. The prices for chrysanthemums have been satisfactory to the grower, and of this year's introductions, Donatello, Edmund Albe and Elise Papworth, which have made a pretty good record, more will be grown next year. Donatello is specially to be recommended, to follow the Golden Glow. It is a good substantial flower of fair size and does easy from any bud.

NOTES.

We paid friend E. Kuhnke a visit lately. He has certainly made a big improvement with his new shed, which has been built to last several generations. This shed is about 39'x125', I forget the exact dimensions, the side-walls being built of cement block with an extra heavy roof, the entire floor being cemented as far as it can be done. A shed large enough to turn around without falling over anything. Sheds have always seemed to me to be a weak point with florists, they never seem large enough to do the work without moving other stuff out of the way.

The last meeting of our club was again a very live one, same being held at Timm & Wirz's place, who served the boys with coffee and cake, which even our German friends present had to appreciate. Prizes were proposed for the second meeting in December for the best arranged 6-inch pot of flowering and foliage plants, one for the best pan of poinsettias, and one for the three best cutflowers of poinsettias. In order to make the club grow the ladies of the fraternity were admitted as members (now just watch for the debates we are going to have in the future).

In potted plants cyclamen and primulas take the lead, Schiller's place having the most, as these are his specialties; 40,000 cyclamen will be the next year's output, and they are now all up nicely and transplanting is in order. The cyclamen are here not sown broadcast or in drills and not planted as soon as they appear, but they are carefully sown one inch apart and have the advantage of becoming fairly strong before being transplanted the first time, and permits also all seeds that are going to grow to come up without being disturbed as cyclamen germinate very irregularly, some appearing within three weeks and some after six or seven weeks from sowing. About 1,000 primula obconica are grown in 4-inch pots for the purpose of testing the strains and many there are which have larger flowers than the best Chinese primulas, and when we look back to the obconica of 1888, what a wonderful improvement, and the end is not yet.

SCH.

FREEPORT, ILL.—John Bauscher, Jr., has made many improvements and greatly added to the size of his greenhouse the past year and now has something over 100,000 square feet of glass in which his plants are growing. He also bears the distinction of being the "champeen jiner" of the section of the state, belonging to 34 or 35 orders.

Seasonable Stock

Always mention The American Florist when you order stock. : : :

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist,

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

Postpaid. Sample free.

L. J. WATER, 203 Main St., Springfield, Mass.

Nashville.

The Thanksgiving trade surpassed the expectations of even the most sanguine and everything went, if not for the great ball game, then for table decorations. The town was never fuller of visitors to see the great Vanderbilt-Sewanee football game, and the first thought of the visitors was to possess the colors of the respective teams. There was a rush for the finest of the large yellow chrysanthemums and those who favored Sewanee carried large white chrysanthemums with purple ribbon streamers. Dudley field, where the game was played, looked like an immense flower show. The florists were altogether happy, for everybody sold out clean all the available stock. In lieu of the purple chrysanthemum many brought the purplish pink, the Maud Dean and Dr. Enguehard. Violets were very scarce.

NOTES.

McIntyre Bros. claim that they have the finest lot of Gloire de Lorraine begonias that will be put on the market during the holidays, also poinsettias.

Geny Bros. have an unsurpassed lot of cyclamen for the holidays.

M. C. D.

The "Meyer Green Silkaline"

is the only Green Thread that should be used by florists and growers. It is guaranteed full weight and full measure.

Also Violet Thread for tying up Violets. Price of both, \$1.25 per lb.

For sale by all first-class supply houses. If your dealer does not carry it in stock, write us direct, giving us his name.

Wm. Thomson & Sons, Ltd., Tweed Vineyards,
Clovenfords, Scotland.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.
The pump is of brass throughout, simple and powerful.
The mixing device keeps the contents of the tank well stirred up from
start to finish.

When the machine is filled to within six inches of the top, a few strokes
of the pump will compress enough air in the tank to produce a continuous
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,
and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

SUGGESTIONS FOR THE HOLIDAY TRADE.

Holly.

In speaking or writing of Christmas greens, the first that comes to the mind is holly, for of all the different greens used by florists, this seems to associate itself and belong to Christmas alone. From all appearances, it looks now as if good holly would not be overplentiful this season, and that the price would be high; but even so, the best of holly, well-berried, is what the customer wants. Holly, without berries and shiny glistening leaves, is worthless, and does not at all carry out the holiday idea. When the cases of holly arrive, they should be placed in a cool dark place, where the leaves and berries will not dry up or lose their lustre. In the making of holly wreaths, avoid the cheap arrangements with the separate leaves sewed on a cardboard, and leave that trade to the corner grocery or butcher shop, but make up pretty wreaths of selected sprays and have this work done by somebody who knows how to finish them, and not leave it to inexperienced help. They can be made up a few days in advance, before the great rush begins and kept in a cool moist place and be all ready when the trade calls for them. While much holly is sold in wreath form, which gives an opportunity to use the shorter sprays, yet the larger quantity is sold in bunches, which the purchasers arrange themselves, or hang in the doorways, windows or on the walls and nice sprays should be selected and tied for this purpose. Different sized bunches, at different prices, can be fastened together and a few samples of these should be arranged around the office or store where they are sure to catch the eye of the customer. If from any cause the holly becomes dry and wilted it can be sprinkled with water and the nice short sprays placed in a tub or tank of water until it takes on a fresh appearance. A short spray of well-berried holly tied on the outside of cut flower boxes is very neat and greatly appreciated by the best trade.

Boxwood.

The most useful green for the florist at this season, or in fact at all seasons, is the boxwood sprays, for it can be used in so many different ways and is of such lasting quality. This green if it becomes badly wilted and dry, if plunged into water and allowed to remain a short time will freshen up and be as good as ever. Wreaths of boxwood, either made double or single are very handsome and attractive. They should be made loosely and not too compact, yet full enough to have a fine appearance and the addition of a few winter berries will greatly enhance their beauty. Boxwood balls are a great feature in some places. They are hung in the windows suspended by a bright red ribbon with a handsome bow. They are very easily made and will readily sell at a nice figure. They are made by tying a small bunch of moss tightly together, about two inches in diameter, and inserting a wire, to which the ribbon may be fastened. Have a sharp pointed stick that is held erect and firm, and place the ball of moss on this. Cut the boxwood into short lengths, three to four inches, with a sharp point at the cut, and insert into the ball of moss, beginning at the top. When the ball is half made, take it off the stick and turn it over, placing it again on the stick so that the unfinished part will be uppermost, and fill the other half as before. It can then be hung by the aid of the wire. A few winter berries, or if you haven't these, a few bunches of red immortelles will add the necessary Christmas color, and make them very attractive. These balls, if well made, will readily sell at a dollar or more each, and the expense is small, and they are rapidly put together. Nice sprays of boxwood are used by many, to mix with their vases of carnations, and where the carnations are weak-stemmed, are a great assistance in holding them up straight, and besides it is a considerably cheaper green than asparagus, and will to a certain extent take the place of this

greenhouse product. Another use for boxwood is to place short sprays in the pots of plants which have lost their leaves, or which are not plentifully enough supplied with foliage, to make the plant look well-furnished.

Mistletoe.

While, perhaps Mistletoe can hardly be considered a green, yet in writing of Christmas greens it should not be omitted for it is the sentiment and tradition that makes this parasitical plant so popular especially among the younger people at this season of the year. While, perhaps, there is no longer demand for the large sprays that formerly sold at such remunerative values, yet there is always a demand for pretty medium-sized bunches that are well-berried that the shy damsel likes to hang in the doorway or the alcove. It is one of the Christmas articles that the florist handles that have to be looked after very sharp, or it will be a loss rather than a gain. A great quantity is damaged in the shipping and if not handled carefully more loss will be sustained after being received and a good price will have to be received for what is salable. The short sprays that get broken off, if the berries have not dropped, can be used by placing them in the cut flower boxes, gratis, where they are sure to be appreciated.

Laurel.

The sprays of laurel, *Kalmia latifolia*, are extensively used for Christmas decorations, made up in wreaths or in festooning. The short sprays are very easily tied into wreath forms and in some sections of the country the majority of Christmas wreaths are made from this material. When made into festooning or roping, as it is sometimes called, it makes the richest material for large decorations, but is a trifle too heavy for small rooms. It is the mass effect which it produces that makes it so especially attractive. It will keep for a long time and continues to be decorative until the leaves dry enough to turn brown. The bunches of laurel in long sprays are very effective in large vases of flowers that are not well supplied with foliage. A few branches in a vase of *Lilium Longiflorum* are a great addition. This green is also used by many florists as a background for floral work. As the material to cover baskets and large designs it is invaluable for it fills up rapidly and makes a rich handsome groundwork for the flowers.

Bouquet Green.

This popular Christmas green, known as ground pine in some localities, is always used in great quantities, but it looks now as if it would be very scarce this year. It is considered by the best buyers as a cheap green, but at the prices now quoted this season, can hardly be considered as such. It is used extensively as a material for making festooning and in the filling of bouquets and cheaper work. When made into wreaths a few pine cones or bunches of winterberries or red immortelles arranged with the green are necessary to make them attractive. Balls, made of this green, in the same manner as described in the writing of boxwood, are made a feature by some dealers, but they are not as rich looking as the latter and at the present price of bouquet green will cost almost as much as the boxwood. An addition of color is necessary in the balls of this green to take away the cheap look.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Plant Baskets.

SEE SUPPLEMENT WITH THIS ISSUE.

The approach of the Christmas holiday will cause the florists' mind to turn towards the Christmas plant baskets which are always in good demand at this season. The wealth of material at his disposal at this time allows the dealer a great latitude in the arranging of these beautiful gifts. The tendency of both the retailer and the buyer is for a too close arrangement, and the plants are squeezed together until all individuality is lost, and the beauty of the single specimen spoiled by the massing of too many different kinds, but the buyers all seem to desire as many plants in the basket as can be possibly placed in them, and their tastes must be satisfied. The basket which we illustrate is very light and handsome. The *Erica Melanthera* in the centre making a light airy appearance, the poinsettias with their crimson bracts and glossy foliage and the Jerusalem cherries with their bright red fruit giving the necessary Christmas color and the Roman hyacinths lightening up the sides, making a very rich and beautiful appearance. The selection of ribbons which are added should be chosen with the greatest of care. Where there is a large quantity of green with some red flow-

ers or berries the red ribbons can be used with telling effect, but with smaller flowers like the *ericas* and *hyacinths* the white gauzy ribbons make the finest finish, and the tying of these auxiliaries will give the florist ample opportunity to display his artistic ability and lots of practise is necessary to become proficient. A goodly quantity of well-grown ferns, small *nephrolepis*, both Boston and crested types, and the *pteris* and other small ferns are necessary for the finishing of these arrangements.

With the New York Retailers.

Jno. V. Phillips, 272 Fulton street, Brooklyn, has been quite busy recently, owing to rather active society functions that have been taking place in Brooklyn's aristocratic quarter, "The Heights." An elaborate decoration was made a few days ago for the marriage of Miss Dutcher. Orange blossoms, yellow and white chrysanthemums and palms and ferns were used lavishly in the decorative scheme; the bridal bouquet was of lily of the valley and orange blossoms; the maid of honor carried yellow chrysanthemums.

Weir's, corner Fulton and Pierpont streets, Brooklyn, are making attractive window displays of chrysanthemums and ferns these days, many of the newer varieties of the flowers mentioned being in view.

Dard's, corner Forty-fourth street and Madison avenue, have a special feature in the new Violet Marie Elize, a pretty, fragrant flower, much lighter in color than Marie Louise, very scarce as yet and not to be had in quantity, hence, very popular. A very liberal display of evergreens is maintained in the forefront of this store, which tends to emphasize and bring out to the greatest possible advantage the charming display of cut flowers in view in the show windows.

The A. T. Bunyard store, corner Forty-eighth street and Madison avenue, is a well appointed establishment in every particular. The show windows this week were replete with choice things in the cut flower line, among which were *zygopetalunis*, *gardenias* and *marguerites*, all tastefully displayed. Mr. Bunyard has met with a very gratifying measure of success ever since the first day of the opening of his establishment. The coming season promises to be a very busy one from present indications.

Spalding, formerly with Hodgson's, located at 509 Madison avenue, is look-

VIEW OF HOFFMAN'S STORE, BOSTON, MASS.

ing forward to quite a busy season, several nice little dinner orders being booked for the near future. A printed price list of cut flowers and green material is one of the methods employed to keep their customers apprised of flower values, and is found to be quite a factor in bringing in orders—via the "telephone."

J. W. Hauser, Fifty-sixth street and Madison avenue, has been located 24 years in the same block. Mr. Hauser had a wagon load of flowers to deliver on the S. S. Germania, which left the Brooklyn pier, bound for the Azores, on November 17, which fact clearly indicates the volume of business being done. Returning but recently from a rather extended trip through the Northwest, Mr. Hauser is enthused with the quality of the roses seen growing at Portland, Ore. Particularly does he refer to the splendid excellence of the varieties Caroline Testout and La France, as seen there.

Myer, Fifty-eighth street and Madison avenue, has among the attractive flowers in his window a very interesting yellow rose, labeled Golden Beauty, which is receiving a good deal of attention. Business at this house has been very brisk during the last few weeks. At a luncheon decoration provided for Wm. Brokaw, at his residence, "Nirvana," Great Neck, N. Y., in honor of a race meet on his private grounds, the principal feature was an immense mound of white and lavender chrysanthemums (Timothy Eaton and Dr. Enguehard), the racing colors of the host, surmounted with a statue of a horse in silver, the latter being the trophy offered for the winner of the steeplechase. Myer also had the decorations for the Alfred Vanderbilt dinner on November 10, about which the daily press made so much ado. On one table 500 special American Beauty roses were used. The bronze chrysanthemums, (A. Carnegie) were used in masses in the hall, with palms for a background and as a screen for the orchestra. Vases of Timothy Eaton and Col. D. Appleton chrysanthemums arranged with oak foliage were distributed very freely throughout the house. Altogether it was a very big order and was carried out successfully in every particular.

W. J. Smyth, Chicago.

The additional room which W. J. Smyth has acquired by leasing the store on Thirty-first street, adjoining the one he has occupied, and taking out the partition, makes one of the most commodious and pretty stores in Chicago. The posts, that was found necessary to retain, have been incased with mirrors and the use of mirrors on the sides of the store gives a very light and beautiful effect. The furnishings are all in white enamel, and the refrigerator, full of beautiful flowers, is a point of attraction to the customer. The arrangement of this refrigerator is of the best; it is double-glazed, that is, with an inner and outer glass, to prevent the sweating of the glass, as well as the securing of thorough refrigeration and the inner glass is set in a hinged frame to allow the cleaning of both the large panes of glass. The floral beauties and the decorative plants, are all of the highest grade and on our visit, a very fine display of cattleya and cypripedium orchids were noticeable. An exceptionally fine assortment of supplies

is always on hand especially noticeable were the many beautiful baskets of all shapes and sizes so necessary to the up-to-date retailer. The back part of the new store has been partitioned off, which gives an ample storeroom for the large stock of supplies and this can also be used as an additional workroom during rush season. Mr. Smyth is to be congratulated upon the possession of such a beautiful store, in one of the best localities in the city, where the artistic arrangements for which he has acquired such an enviable reputa-

THE CARNATION.

Cultural Details.

Winter conditions now prevail in the carnation houses and every little detail concerning the care of the plants must be followed up closely to obtain the best results. The temperature in the houses is one of the most important to be looked after and any sudden rise or fall should be carefully avoided, one of the safeguards to perfect caly-

tion, are demanded, and upon the prosperous business which he has succeeded in building up.

Fumigating With Tobacco Stems.

ED. AMERICAN FLORIST:

What would be the proper amount of tobacco stems to use in fumigating a greenhouse containing 8,000 cubic feet of space? Would it be better to use two fumigators rather than one in a house 100 feet long?

R. W. E. V.

In fumigating with tobacco stems it is far better to fumigate lightly and often rather than heavily. A half bushel of tobacco stems will be enough to fumigate the house in question. The stems should be moistened to prevent them from blazing up, for if this happens the plants will be damaged. If the first fumigation does not kill the insects repeat the operation the next night. It is not necessary to have two fumigators but the pot should be moved from one end of the house to the other so that the smoke may be equally distributed throughout the house. There are some plants that will not stand very much fumigating with tobacco smoke, such as adiantum cuneatum, spireas and heliotrope and it is better to use the nicotine papers in houses where these plants are grown.

W.

FARGO, N. D.—The Shotwell Floral Co. are making a fine display with their beautiful chrysanthemums. They now have seven houses, five of which are devoted to carnations which are in splendid condition.

ces and good keeping qualities of the flowers being an even temperature at all times. If the plants have had a generous treatment they should now be in vigorous health, promising good results for the holidays, one of the surest signs of careful treatment being a good crop of flowers for the Christmas holidays without the necessity of extra forcing, which, though it may bring out a few more blooms for that time will surely react on the plant later in the season. Keep the temperature in your carnation houses 50-52 degrees at night and 56 degrees on dull days and on bright days 60-70 degrees without steam heat and with ventilation enough to allow for a free current of pure air, but with the absence of any cold draughts.

Watering is another important part of the work. The old idea of watering every day as a general daily routine is a serious mistake and to keep the soil in a soaked condition is even a greater one. The plants should be watered when the soil at the roots requires it and then thoroughly, but a good drying out should take place between each watering to maintain an active growing condition of the roots. The matter of syringing the plants after this time of the year is a matter that is advocated by some and condemned by others, but we find that the plants are greatly benefited by a thorough syringing occasionally on bright days (particularly after a spell of heavy firing), but it should be done early enough in the day for the plants to dry out again before night;

it puts new vigor into the plants and helps to keep down the red spider. The question of extra stimulation of the plants by feeding with commercial or other fertilizers hardly needs to be touched upon at this time, it being too early to attempt much along these lines. At this early date the nourishment now in the soil should be sufficient to carry the plants over to the first of the year or until the first batch of cuttings have been taken off, when a little extra encouragement will be needed.

Disbudding should be followed up closely, but do not carry it to the extreme by rubbing out the side buds and shoots before they are hardly formed, but watch the action of the remaining buds closely; there may be a lot in that advocated by some that disbudding too closely is a cause of badly bursted calyces, too much strength having been thrown into the main bud. There is not any better time than now to fumigate a time or two with the nicotine preparation that you have found most effective to check the thrips or aphids even though there are not any visible signs of any, for once the plants are thoroughly cleaned of these pests they will remain so for a long time. Cutting and shipping the flowers is a work that is many times done very carelessly; why, it is hard to tell, for far from being a task that should be done in a haphazard way, it should be attended to with the greatest care. Cut the blooms early in the day whenever possible and put into water in a cool place directly after cutting. If the method of marketing the flowers is by bunching see to it that every flower in the bunch is of an even grade, both as to color and quality, also the same should rule when they are shipped loose in boxes of 50, 75 or 100, as many of the better grade of flowers are done in the large cities. Every flower should be as the ticket indicates. Another item that should receive close attention and that is to keep the growing shoots of the plants into the rings before they have a chance to become crooked or diseased.

C. W. JOHNSON.

Carnations in the South.

The plants are now throwing up flowering shoots and a little feed is in order. Well pulverized cow manure, to which has been added some bone flour, is a good starter. The roots are spreading over the surface and the beds can no longer be worked over, hence the pulverized cow manure makes a good foundation for any fertilizer to be worked in later by hand. The mulch may be put on about half an inch thick. The cool nights are having a beneficial effect and the plants are growing rapidly. Plenty of water is needed to supply their wants and as much ventilation as the weather will permit. Fire heat may occasionally be needed, but the less it is used yet the better. When used have as much air on the houses as will keep the temperature down to 50° or a little over.

Red spider is very apt to put in an appearance now, but by going over the houses twice a week with a fine spray nozzle little trouble need be anticipated. The spraying should be done from each side of the bench, so that all the

plants may get the full effect. In general at this time no effort must be made at forcing, but let the plants come along at their own gait for a few more weeks. Keep the aphids down by regular fumigation and the houses sweet and clean and results will come in good time.

WM. LEAR.

Sweet Peas.

Paper read by Fred Pautke, Grosse Pointe Farms, Michigan, before the Detroit Florists' Club, November 21, 1910.

A few days ago I was requested to prepare a paper on sweet peas. The time has been short and I have been very busy, so don't expect anything but a short notice order. And I will give you in the following my experience in growing sweet peas for the last twenty years.
